Usenet Newsgroup Archive: rec.radio.cb

2012

These Usenet messages were preserved as a plain-text archive. This PDF was generated by Digital Library of Amateur Radio & Communications from the source text file in 2026.

Date span: 2012-01-01 through 2012-12-28

Source text: rec.radio.cb.txt

Source item: https://archive.org/details/usenet-rec

Messages included in this PDF: 439

Messages are presented chronologically by archived date.

Binary or encoded payloads are not printed as blocks of encoded text; a placeholder appears where such material was detected. The original source text is unchanged.

I don't use an antenna tuner on my 102" steel whip on my mobile. I use it on 10 & 11 meters. It's resonant at 28.460 and the SWR on CB is 1.7:1. It still talks fine on 11 meters. You should NOT need a tuner to cover 450 KHz of bandwidth unless your antenna has a lot of Q (coil) in it.

What are your installation details dictating the use of a tuner?

You are so screwed up, when it comes to US Radio Law, you wouldn't know
the REAL FACTS, if they bit you in the Arse....

First Off: What Cops, are saying WHAT, about which Frequencies?
Be VERY specific....
Second Off: It would be VERY hard to a local prosecutor to try
such a case, even in a local Court, KNOWING that
it would likely be overturned in the first Federal
Court where the case landed.
Third Off: Local Cops, and even State Cops, do not have jurisdiction
in the enforcement of FEDERAL Laws, and should they try,
the local Federal Marshal would slap them down in a
nanosecond. That is HIS Job.
Fourth Off: Cops can, and do, say a lot of stuff, about which they have
NO CLUE, just like YOU do. Just because some local IDIOT
LEO says something, does NOT make it True, or in fact
Legally, the LAW. I have testified in MANY Courts of Law
on just these kinds of issues, and mostly the local LEO
has it WRONG, and the IDIOT Prosecutor, gets his hands
slapped by the local Judge, once the correct FEDERAL
Statutes, are introduced into Evidence, if it ever
actually gets that far, in the first place.....
I mean REALLY... Duh....

Just Say'en..... YMMV.....

first off, radioguy is a frickin ignorant asswipe,
second off, local cops enforce federal law every day of the year.
e.g., a convicted felon is found with a gun. that's a federal law.

when sworn in they take oaths to "uphold the laws of the United States and the US Constitution....".

US marshalls rarely deal with cops who enforce the law.

Read the constitution. You will find that sheriffs are the law.
It's only when you have assholes like Eric Holder running the country do you hear them whining about local cops enforcing federal law.

The law prohibiting the constructive possession of a fire arm for
convicted felons is the law in many, if not all, states.

Kent, the boy is a fruit cake.
What he's talking about here is the two frequencies are actually shared
with both ham and police. But some police departments feel because they use
it, you can't.

Local and State Cops Do NOT enforce Federal Law... They enforce State Law... What you cite is cases where BOTH State and Federal Statutes prohibit a convicted Felon from possessing a Firearm, and the local or State cops are enforcing the State Statutes, NOT the Federal One.

>
> US marshals rarely deal with cops who enforce the law.

apparently you have never dealt with a US Marshal... I have, many times, as a Resident Field Agent for the FCC, reTIRED... and know exactly of what I speak..... When on land, the US Marshal provides any muscle needed for ALL Federal Agencies that do not have Police Powers, inherent in their founding Statutes. On the water, it is the USCG, that provides the enforcement function, for any Federal agency, that doesn't have Police Powers. Nobody messes with a Federal Marshal. Their Police Powers are valid anywhere inside US Territory, Period... including Military Bases. The USCG has those same Police Powers on ANY navigable body of water, for US flagged Vessels, as well as foreign vessels inside US Territorial waters, PERIOD... No one messes with a USCG Boarding Party, either...

Just Say'en.....

and they are WRONG, and any enforcement action by some local or State
Cop, would be thrown out by the first Court of Jurisdiction, when the
Relevant Statutes, and FCC Regulations, are presented to the Judge. If
not there, then the first Appeals Court. Usually these things never make
it to a Court, as the Prosecutor doesn't want to be overturned, or
laughed out of Court, for not knowing the relevant Statutes, in the
first place.

Just Say'en.....

421.2500 mhz & 426.2500 mz.

I know.

>What he's talking about here is the two frequencies are actually shared
>with both ham and police. But some police departments feel because they use
>it, you can't.

Aren't those frequencies reserved for law enforcement use only?

From the US Amateur 70cm bandplan at the ARRL website:

70 Centimeters (420-450 MHz):
420.00-426.00 ATV repeater or simplex with 421.25 MHz video carrier control
links and experimental

426.00-432.00 ATV simplex with 427.250-MHz video carrier frequency

http://www.arrl.org/band-plan-1

Nothing there says it's even a shared service.

Suffering from memory problems as well, persent? You said:

"nothing that's why i send it to alt.test"
--persent

You in fact "send" it to alt.slack,alt.usenet.kooks,
rec.radio.amateur.policy,comp.os.os2.advocacy, persent.

Still suffering from reading comprehension problems, persent? I did
not produce your unsubstantiated and erroneous claim. Rather, you
did,
and question remains, what does your unsubstantiated and erroneous
claim have to do with alt.slack,rec.nude,rec.radio.amateur.policy,
comp.os.os2.advocacy,rec.radio.cb, persent?

ANyone remember the SBE Console II?

It was considered a great rig....but I dont think they ever made a 40 chanel model.

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

I do not review the forums, just send me an email. Please do not use emails from servers "LIVE" , all they are take as spam emails in my inbox.

- Mechanics, Mechanical Engineering & Aerospace Engineering:

Solution Manual Classical Mechanics (Douglas Gregory)
Solution Manual Classical Mechanics : From Newton to Einstein : A Modern Introduction (2nd Ed., Martin McCall)
Solution Manual Advanced Dynamics (Donald T. Greenwood)
Solution Manual Principles of Dynamics (2nd Ed., Donald T. Greenwood)
Solution Manual Advanced Engineering Dynamics (2nd Ed., Jerry Ginsberg)
Solution Manual Classical Dynamics (Jorge V. José)
Solution Manual Impact Mechanics (W.J. Stronge)
Solution Manual Human Body Dynamics (Aydin Tozeren)
Solution Manual Statistical Mechanics (2nd Ed., R.K. Pathria)
Solution Manual Statistical Mechanics (3rd Ed., R.K. Pathria & Paul D. Beale)
Solution Manual Engineering Mechanics of Solids (2nd Ed., Egor P. Popov)
Solution Manual Introduction to Continuum Mechanics (4th Ed., W. Michael Lai, David Rubin & Erhard Krempl)
Solution Manual Analytical Mechanics (7th Ed., Grant R. Fowles, George Cassiday)
Solution Manual Introduction to Mechanical Engineering (Rizza)
Solution Manual Engineering Fundamentals and Problem Solving (4th Ed.,

Eide, Jenison, Mashaw & Northup)
Solution Manual Engineering Fundamentals and Problem Solving (5th Ed., Eide, Jenison, Northup & Mickelson)
Solution Manual Engineering Fundamentals and Problem Solving (6th Ed., Eide, Jenison, Northup & Mickelson)
Solution Manual Mechanical Engineering Principles (Bird & Ross)
Solution Manual Dynamics of Mechanical Systems (C.T.F. Ross)
Solution Manual Mechanics of Solids (C.T.F. Ross)
Solution Manual Introduction to Engineering Analysis (1st Ed., Hagen)
Solution Manual Introduction to Engineering Analysis (2nd Ed., Hagen)
Solution Manual Introduction to Engineering Analysis (3rd Ed., Hagen)
Solution Manual Engineering Design (Rudolph J. Eggert)
Solution Manual Creative Design of Products and Systems (Saeed Niku)
Solution Manual Fundamentals of Engineering Design (2nd Ed., Barry Hyman)
Solution Manual Engineering Design (4th Ed., George Dieter & Linda Schmidt)
Solution Manual Engineering Design and Graphics with Autodesk Inventor 2009 (James Bethune)
Solution Manual Engineering Design : A Project-Based Introduction (2nd Ed., Clive Dym & Patrick Little)
Solution Manual Engineering Design : A Project-Based Introduction (3rd Ed., Clive Dym & Patrick Little)
Solution Manual Tools and Tactics of Design (Dominick, Demel, Lawbaugh, Freuler, Kinzel & Fromm)
Solution Manual Biofluid Mechanics - An Introduction to Fluid Mechanics, Macrocirculation, and Microcirculation (David Rubenstein, Wei Yin & Mary Frame)
Solution Manual Advanced Fluid Mechanics (William Graebel)
Solution manual Modern Fluid Dynamics (Clement Kleinstreuer)
Solution manual Essential Computational Fluid Dynamics (Oleg Zikanov)
Solution Manual Computational Fluid Dynamics : A Practical Approach (Jiyuan Tu, Guan Heng Yeoh & Chaoqun Liu)
Solution Manual Mechanics of Fluids (8th Ed., Massey)
Solution Manual Fluid Mechanics (5th Ed., Frank White)
Solution Manual Fluid Mechanics (6th Ed., Frank White)
Solution Manual Fluid Mechanics (7th Ed., Frank White)
Solution Manual Viscous Fluid Flow (3rd Ed., Frank White)
Solution Manual Statistical Thermodynamics (Normand Laurendeau)
Solution Manual Introductory Statistical Thermodynamics (Nils Dalarsson , Mariana Dalarsson & Leonardo Golubovic)
Solution Manual Thermodynamics and Heat Power (6th Ed., Kurt C. Rolle)
Solution Manual Modern Engineering Thermodynamics (Robert Balmer)
Solution Manual Introduction to the Thermodynamics of Materials (4th Ed. David Gaskell)
Solution Manual Introduction to Thermodynamics and Heat Transfer (2nd Ed., Yunus Cengel)
Solution Manual Fundamentals of Thermal-Fluid Sciences (1st Ed., Yunus Cengel)
Solution Manual Fundamentals of Thermal-Fluid Sciences (2nd Ed., Yunus

Cengel)
Solution Manual Fundamentals of Thermal-Fluid Sciences (3rd Ed., Yunus Cengel & Robert Turner)
Solution Manual Fundamentals of Thermal-Fluid Sciences (4th Ed., Yunus Cengel , Robert Turner & John Cimbala)
Solution Manual Thermodynamics : An Engineering Approach (5th Ed., Yunus Cengel)
Solution Manual Thermodynamics : An Engineering Approach (6th Ed., Yunus Cengel & Michael Boles)
Solution Manual Thermodynamics : An Engineering Approach (7th Ed., Yunus Cengel & Michael Boles)
Solution Manual Essentials of Fluid Mechanics : Fundamentals and Applications (1st Ed., Yunus Cengel, John Cimbala)
Solution Manual Fluid Mechanics (1st Ed., Yunus Cengel & John Cimbala)
Solution Manual Fluid Mechanics (2nd Ed., Yunus Cengel & John Cimbala)
Solution Manual Heat Tranfer (2nd Ed., Yunus Cengel)
Solution Manual Heat and Mass Transfer : A Practical Approach (3rd Ed., Yunus Cengel)
Solution Manual Heat and Mass Transfer : Fundamentals and Applications (4th Ed., Yunus Cengel & Afshin Ghajar)
Solution Manual Introduction to Fluid Mechanics (6th Ed., Robert Fox, Alan McDonald & Philip Pritchard)
Solution Manual Introduction to Fluid Mechanics (7th Ed., Robert Fox, Philip Pritchard & Alan McDonald)
Solution Manual Fox and McDonald's Introduction to Fluid Mechanics (8th Ed., Philip Pritchard)
Solution Manual Fluid Mechanics (5th Ed., Douglas)
Solution Manual Fluid Mechanics (3rd Ed., Kundu & Cohen)
Solution Manual Fluid Mechanics (4th Ed., Kundu & Cohen)
Solution Manual Fluid Mechanics (5th Ed., Kundu , Cohen & Dowling)
Solution Manual Elementary Fluid Mechanics (7th Ed., Street, Watters & Vennard)
Solution Manual Fluid Mechanics with Engineering Applications (10th Ed., Finnemore & Franzini)
Solution Manual Fundamentals of Fluid Mechanics (4th Ed., Bruce Munson, Donald Young, Theodore Okiishi)
Solution Manual Fundamentals of Fluid Mechanics (5th Ed., Bruce Munson, Donald Young, Theodore Okiishi)
Solution Manual Fundamentals of Fluid Mechanics (6th Ed., Bruce Munson, Donald Young, Theodore Okiishi, Wade Huebsch)
Solution Manual Fundamentals of Fluid Mechanics - SI Units (6th Ed., Bruce Munson, Donald Young, Theodore Okiishi, Wade Huebsch)
Solution Manual A Brief Introduction to Fluid Mechanics (3rd Ed., Donald Young, Bruce Munson, Theodore Okiishi)
Solution Manual A Brief Introduction to Fluid Mechanics (4th Ed., Donald Young, Bruce Munson, Theodore Okiishi, Wade Huebsch)
Solution Manual A Brief Introduction to Fluid Mechanics (5th Ed., Donald Young, Bruce Munson, Theodore Okiishi, Wade Huebsch)

Solution Manual Engineering Fluid Mechanics (7th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (8th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (9th Ed., Clayton Crowe, Donald Elger, John Roberson, Barbara Williams)
Solution Manual Engineering Fluid Mechanics - SI Version (9th Ed., Clayton Crowe, Donald Elger, John Roberson, Barbara Williams)
Solution Manual Fluid Mechanics (Potter & Foss)
Solution Manual Mechanics of Fluids (3rd Ed., Potter)
Solution Manual Fluid Power with Applications (7th Ed., Esposito)
Solution Manual Mechanics of Fluids (4th Ed., Shames)
Solution Manual Applied Fluid Mechanics (6th Ed., Mott)
Solution Manual Applied Fluid Mechanics - SI Units (6th Ed., Mott)
Solution Manual Hydraulic Control Systems (Noah Manring)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (5th Ed., S.L. Dixon)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (6th Ed., S.L. Dixon & Cesare Hall)
Solution Manual The Design of High-Efficiency Turbomachinery and Gas Turbines (2nd Ed., David Gordon Wilson & Theododios Korakianitis)
Solution Manual Fundamentals of Turbomachinery (William Peng)
Solution Manual Principles of Turbomachinery in Air-Breathing Engines (Baskharone)
Solution Manual Theory of Aerospace Propulsion (Pasquale Sforza)
Solution Manual Fundamentals of Jet Propulsion with Applications (Ronald D. Flack)
Solution Manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution Manual Thermodynamics : An Integrated Learning System (Schmidt, Ezekoye, Howell & Baker)
Solution Manual Design of Fluid Thermal Systems (2nd Ed., William Janna)
Solution Manual Design and Simulation of Thermal Systems (N.V. Suryanarayana & Oner Arici)
Solution Manual Introduction to Thermal and Fluids Engineering (Kaminski & Jensen)
Solution Manual Heating, Ventilating and Air Conditioning Analysis and Design (6th Ed., McQuiston)
Solution Manual Electricity, Electronics, and Control Systems for HVAC (4th Ed., Thomas Kissell)
Solution Manual Heat and Mass Transfer (Anthony Mills)
Solution Manual Heat Transfer (2nd Ed., A.F. Mills)
Solution Manual Basic Heat and Mass Transfer (2nd Ed., A.F. Mills)
Solution Manual Convective Heat and Mass Transfer (4th Ed., Kays & Crawford)
Solution Manual Advanced Engineering Thermodynamics (3rd Ed., Bejan)
Solution Manual Convection Heat Transfer (3rd Ed., Bejan)
Solution Manual Design with Constructal Theory (Adrian Bejan & Sylvie Lorente)

Solution Manual Shape and Structure, from Engineering to Nature (Adrian Bejan)
Solution Manual Thermodynamics : Concepts and Applications (Stephen Turns)
Solution Manual Experimental Methods for Engineers (8th Ed., Jack P. Holman)
Solution Manual Heat Transfer (10th Ed., Jack Holman)
Solution Manual Principles of Heat Transfer (Kaviany)
Solution Manual Heat Convection (Latif M. Jiji)
Solution Manual Fundamentals of Momentum, Heat and Mass Transfer (5th Ed., Welty)
Solution Manual Analytical Methods for Heat Transfer and Fluid Flow Problems (Bernhard Weigand)
Solution Manual An Introduction to Fluid Dynamics : Principles of Analysis and Design (Stanley Middleman)
Solution Manual An Introduction to Mass and Heat Transfer : Principles of Analysis and Design (Stanley Middleman)
Solution Manual Fundamentals of Thermodynamics (5th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)
Solution Manual Fundamentals of Thermodynamics (6th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)
Solution Manual Fundamentals of Thermodynamics (7th Ed., Claus Borgnakke & Richard Sonntag)
Solution Manual Introduction to Engineering Thermodynamics (1st Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Introduction to Engineering Thermodynamics (2nd Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Fundamentals of Engineering Thermodynamics (5th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics - SI Units (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics (7th Ed., Michael Moran, Howard Shapiro, Daisie Boettner, Margaret Bailey)
Solution Manual Fundamentals of Heat and Mass Transfer (5th Ed., Incropera, DeWitt, Bergman, Lavine)
Solution Manual Fundamentals of Heat and Mass Transfer (6th Ed., Incropera, DeWitt, Bergman, Lavine)
Solution Manual Fundamentals of Heat and Mass Transfer (7th Ed., Incropera, DeWitt, Bergman, Lavine)
Solution Manual Introduction to Heat Transfer (4th Ed., Incropera, DeWitt)
Solution Manual Introduction to Heat Transfer (5th Ed., Incropera, DeWitt, Bergman, Lavine)
Solution Manual Introduction to Heat Transfer (6th Ed., Incropera, DeWitt, Bergman, Lavine)
Solution Manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution Manual Radiation Detection and Measurement (4th Ed., Glenn

Knoll)
Solution Manual Radiative Heat Transfer (2nd Ed., Michael Modest)
Solution Manual Principles of Combustion (2nd Ed., Kenneth Kuan-yun Kuo)
Solution Manual An Introduction to Combustion : Concepts and Applications (3rd Ed., Stephen R. Turns)
Solution Manual Combustion (2nd Ed., Irvin Glassman)
Solution Manual Combustion (3rd Ed., Irvin Glassman)
Solution Manual Combustion (4th Ed., Irvin Glassman)
Solution Manual Incompressible Flow (3rd Ed., Panton)
Solution Manual Modern Compressible Flow : With Historical Perspective (3rd Ed., John Anderson)
Solution Manual Non-Newtonian Flow : Fundamentals and Engineering Applications (R.P. Chhabra & J F Richardson)
Solution Manual Computational Techniques for Fluid Dynamics (Srinivas, K., Fletcher, C.A.J.)
Solution Manual Introduction to Computational Fluid Dynamics (A.W. Date)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Introduction to Robotics : Mechanics and Control (3rd Ed., John J. Craig)
Solution Manual Introduction to Robotics: Analysis, Control, Applications (2nd Ed., Saeed B. Niku)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Robotic Mechanical Systems : Theory, Methods, and Algorithms (3rd Ed., Jorge Angeles)
Solution Manual Kinematic Chains and Machine Components Design (Dan B. Marghitu)
Solution Manual Kinematics, Dynamics, and Design of Machinery (2nd Ed., Waldron & Kinzel)
Solution Manual Kinematics and Dynamics of Machinery (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Kinematics and Dynamics of Machinery - SI Units (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Machines and Mechanisms : Applied Kinematic Analysis (3rd Ed., David H. Myszka)
Solution Manual Machines and Mechanisms : Applied Kinematic Analysis (4th Ed., David H. Myszka)
Solution Manual Mechanism Design : Analysis and Synthesis (4th Ed., Erdman, Sandor & Kota)
Solution Manual Mechanical Design : A Components Approach (2nd Ed., Peter Childs)

Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (1st Ed., Collins)

Solution Manual Intermediate Mechanics of Materials (1st Ed., Barber)
Solution Manual Elasticity (2nd Ed., J.R. Barber)
Solution Manual Elasticity : Theory, Applications, and Numerics (1st Ed., Martin Sadd)
Solution Manual Elasticity : Theory, Applications, and Numerics (2nd Ed., Martin Sadd)
Solution Manual Elasticity in Engineering Mechanics (2nd Ed., Boresi)
Solution Manual Elasticity in Engineering Mechanics (3rd Ed., Boresi, Chong, Lee)
Solution Manual Advanced Mechanics of Materials and Applied Elasticity (5th Ed., Ansel C. Ugural & Saul K. Fenster)
Solution Manual Advanced Mechanics of Materials (6th Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (2nd Ed., Cook & Young)
Solution Manual Metal Fatigue in Engineering (2nd Ed., Stephens, Fatemi & Fuchs)
Solution Manual Applied Mechanics for Engineering Technology (8th Ed., Keith M. Walker)
Solution Manual Applied Statics and Strength of Materials (5th Ed. Limbrunner & Spiegel)
Solution Manual Statics and Strength of Materials (Robert Mott)
Solution Manual Applied Strength of Materials (4th Ed., Mott)
Solution Manual Applied Strength of Materials (5th Ed., Mott)
Solution Manual Intermediate Dynamics for Engineers (Marcelo R.M & Crespo da Silva)
Solution Manual Engineering Mechanics : Statics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Dynamics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Statics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Engineering Mechanics : Dynamics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Elastic And Inelastic Stress Analysis (Irving Shames)
Solution Manual Strength of Materials - A New Unified Theory for the 21st Century (Surya Patnaik & Dale Hopkins)
Solution Manual Statics and Strengths of Materials (6th Ed., Morrow & Kokernak)
Solution Manual Statics and Strengths of Materials (7th Ed., Morrow & Kokernak)
Solution Manual Engineering Mechanics : Statics (11th Ed., Hibbeler)

Solution Manual Engineering Mechanics : Statics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Statics - SI Units (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (12th Ed., Hibbeler)
Solution Manual Mechanics of Materials (4th Ed., Hibbeler)
Solution Manual Mechanics of Materials (6th Ed., Hibbeler)
Solution Manual Mechanics of Materials (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials - SI Units (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials (8th Ed., Hibbeler)
Solution Manual Mechanics of Materials - SI Units (8th Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (Beer, Johnston, DeWolf & Mazurek)
Solution Manual Statics and Mechanics of Materials (Bedford, Liechti & Fowler)
Solution Manual Statics and Mechanics of Materials (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials - SI Units (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (3rd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials - SI Units (3rd Ed., Hibbeler, Fan Sau Cheong)
Solution Manual Energy Principles and Variational Methods in Applied Mechanics (2nd Ed., Reddy)
Solution Manual The Physics of Vibrations and Waves (6th Ed., Pain)
Solution Manual Engineering Vibrations (3rd Ed., Inman)
Solution Manual Theory of Vibrations with Applications (5th Ed., William T. Thomson, Marie Dillon Dahleh)
Solution Manual Mechanical Vibrations - SI Units (4th Ed., Singiresu S. Rao)
Solution Manual Mechanical Vibrations (5th Ed., Singiresu S. Rao)
Solution Manual Theory of Vibration : An Introduction (2nd Ed., A.A. Shabana)
Solution Manual Vibration of Discrete and Continuous Systems (2nd Ed., Ahmed Shabana)
Solution Manual Introduction to Finite Element Vibration Analysis (Maurice Petyt)
Solution Manual Vibrations and Stability : Advanced Theory, Analysis, and Tools (2nd Ed., Jon J. Thomsen)
Solution Manual Dynamics and Vibration : An Introduction (Magd Abdel Wahab)
Solution Manual Mechanical Vibration (William J. Palm, III)
Solution Manual Random Vibrations : Analysis of Structural and Mechanical Systems (Loren Lutes & Shahram Sarkani)
Solution Manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution Manual Fundamentals of Structural Integrity : Damage Tolerant Design and Nondestructive Evaluation (Alten F. Grandt)
Solution Manual A First Course in the Finite Element Method (4th Ed.,

Daryl L. Logan)
Solution Manual Introduction to Finite Elements in Engineering (3rd Ed.,Tirupathi R. Chandrupatla, Ashok D. Belegundu)
Solution Manual Introduction to Finite Elements in Engineering (4th Ed.,Tirupathi R. Chandrupatla, Ashok D. Belegundu)
Solution Manual Finite Element Analysis Theory and Application with ANSYS (3rd Ed., Moaveni)
Solution Manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution Manual Fundamentals of Finite Element Analysis (1st Ed., David V. Hutton)
Solution Manual The Finite Element Method in Engineering (4th Ed., Rao)
Solution Manual The Finite Element Method in Engineering (5th Ed., Rao)
Solution Manual The Finite Element Method and Applications in Engineering Using ANSYS (Madenci & Guven)
Solution Manual Introduction to Finite Element Analysis and Design (Nam-Ho Kim, Bhavani V. Sankar)
Solution Manual Introduction to the Finite Element Method : Theory, Programming and Applications (Erik G. Thompson)
Solution Manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution Manual Fundamental Finite Element Analysis and Applications : with Mathematica and Matlab Computations (Asghar Bhatti)
Solution Manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution Manual Modeling and Analysis of Dynamic Systems (3rd Ed., Close)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual System Dynamics (1st Ed., William J Palm III)
Solution Manual System Dynamics (2nd Ed., William J Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual System Dynamics : Modeling and Simulation of Mechatronic Systems (4th Ed., Karnopp, Margolis & Rosenberg)
Solution Manual Concepts and Applications of Finite Element Analysis (4th Ed., Cook, Malkus, Plesha & Witt)
Solution Manual Finite Element Modeling for Stress Analysis (Robert Cook)
Solution Manual Principles of Fracture Mechanics (R. J. Sanford)
Solution Manual Fracture Mechanics (Chin-Teh Sun & Zhihe Jin)
Solution Manual Fracture Mechanics : Fundamentals and Applications (2nd Ed., T.L. Anderson)
Solution Manual Mechanical Behavior of Materials (3rd Ed., Dowling)
Solution Manual Mechanical Behavior of Materials (W.F. Hosford)

Solution Manual Mechanical Behavior of Materials (Keith Bowman)
Solution Manual Theory and Design for Mechanical Measurements (4th Ed., Figliola & Beasley)
Solution Manual Theory and Design for Mechanical Measurements (5th Ed., Figliola & Beasley)
Solution Manual Theory and Design for Mechanical Measurements - International Student Version (5th Ed., Figliola & Beasley)
Solution Manual Mechanical Measurements (6th Ed., Beckwith, Marangoni & Lienhard)
Solution Manual Measurement and Instrumentation : Theory and Application (Alan Morris & Reza Langari)
Solution Manual Measurement and Data Analysis for Engineering and Science (Patrick Dunn)
Solution Manual Design and Analysis of Lean Production Systems (Askin & Goldberg)
Solution Manual Computer-Aided Manufacturing (3rd Ed., Tien-Chien Chang, Richard A. Wysk, Hsu-Pin Wang)
Solution Manual Work Systems : The Methods, Measurement & Management of Work (Mikell P. Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (2nd Ed., Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (3rd Ed., Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (3rd Ed., Mikell Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (4th Ed., Mikell Groover)
Solution Manual Introduction to Manufacturing Processes (Mikell Groover)
Solution Manual Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual DeGarmo's Materials and Processes in Manufacturing (10th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual DeGarmo's Materials and Processes in Manufacturing (11th Ed., J. T. Black, Ronald A. Kohser)
Solution Manual Principles of Metal Manufacturing Processes (Beddoes & Bibby)
Solution Manual Design for Manufacturing : A Structured Approach (Corrado Poli)
Solution Manual Fundamentals of Manufacturing (2nd Ed., Philip D. Rufe)
Solution Manual Engineering Materials Science (Milton Ohring)
Solution Manual Engineering Materials : Properties and Selection (8th Ed., Budinski)
Solution Manual Engineering Materials : Properties and Selection (9th Ed., Budinski)
Solution Manual Materials Science for Engineering Students (Traugott Fischer)
Solution Manual Essentials of Modern Materials Science and Engineering (James Newell)

Solution Manual Science and Design of Engineering Materials (2nd Ed., Schaffer, Saxena, et al)
Solution Manual Structure and Properties of Engineering Materiales (5th Ed., Daniel Henkel & Alan Pense)
Solution Manual Materials Selection in Mechanical Design (3rd Ed., Michael Ashby)
Solution Manual Materials Selection in Mechanical Design (4th Ed., Michael Ashby)
Solution Manual Materials : Engineering, Science, Processing and Design (1st Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Materials : Engineering, Science, Processing and Design (2nd Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (3rd Ed., Michael Ashby & David Jones)
Solution manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (4th Ed., Michael Ashby & David Jones)
Solution Manual Engineering Materials Vol. 2 : An Introduction to Microstructures, Processing and Design (3rd Ed., Michael Ashby & David Jones)
Solution Manual Materials Science and Engineering : An Introduction (6th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (7th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (8th Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (2nd Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (3rd Ed., William Callister)
Solution Manual Foundations of Materials Science and Engineering (3rd Ed, Smith)
Solution Manual Foundations of Materials Science and Engineering (4th Ed, Smith & Hashemi)
Solution Manual Foundations of Materials Science and Engineering (5th Ed, Smith & Hashemi)
Solution Manual Introduction to Materials Science for Engineers (6th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers (7th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers - International Edition (7th Ed., Shackelford)
Solution Manual Manufacturing Facilities Design and Material Handling (3rd Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th Ed., Stephens & Meyers)
Solution Manual Manufacturing Processes for Engineering Materials (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing Processes for Engineering Materials - SI

Units (5th Ed. Kalpakjian, Smith & Chih-Wah Kok)
Solution Manual Manufacturing, Engineering & Technology (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology (6th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology - SI Units (6th Ed. Kalpakjian & Smith)
Solution Manual Principles of Corrosion Engineering and Corrosion Control (Zaki Ahmad)
Solution Manual Steels : Microstructure and Properties (3rd Ed. Bhadeshia & Honeycombe)
Solution Manual Analysis and Performance of Fiber Composites (3rd Ed., Bhagwan Agarwal, Lawrence Broutman & K. Chandrashekhara)
Solution Manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution Manual Applied Manufacturing Process Planning : With Emphasis on Metal Forming and Machining (Nelson, Schneider)
Solution Manual Mastering CAD/CAM (1st Ed., Ibrahim Zeid)
Solution Manual Principles of CAD/CAM/CAE (Kunwoo Lee)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Introduction to Computer Numerical Control (4th Ed., Valentino & Goldenberg)
Solution Manual Linear State-Space Control Systems (Robert L. Williams, II & Douglas A. Lawrence)
Solution Manual Gas Turbine Theory (6th Ed., H.I.H. Saravanamuttoo, G.F.C. Rogers, H. Cohen & Paul Straznicky)
Solution Manual Rocket Propulsion Elements (7th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Rocket Propulsion Elements (8th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution Manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution Manual Atmospheric and Space Flight Dynamics : Modeling and Simulation with MATLAB and Simulink (Ashish Tewari)
Solution Manual Flight Dynamics Principles (2nd Ed., by Cook)
Solution Manual Mechanics of Flight (1st Ed., Warren F. Phillips)
Solution Manual Mechanics of Flight (2nd Ed., Warren F. Phillips)
Solution Manual Modern Flight Dynamics (David K. Schmidt)
Solution Manual Fundamentals of Airplane Flight Mechanics (David G. Hull)
Solution Manual Dynamics of Flight : Stability and Control (3rd Ed., Bernard Etkin & Lloyd Duff Reid)
Solution Manual Aircraft Rescue and Firefighting (5th Ed., IFSTA)
Solution Manual Aircraft Dynamics : From Modeling to Simulation (Marcello Napolitano)
Solution Manual Aircraft Propulsion (Saeed Farokhi)
Solution Manual Aircraft Performance (Maido Saarlas)

Solution Manual Design of Aircraft (Thomas C. Corke)
Solution Manual Flight Performance of Fixed and Rotary Wing Aircraft (Antonio Filippone)
Solution Manual Fundamentals Of Aircraft Structural Analysis (Howard Curtis)
Solution Manual Aircraft Control and Simulation (2nd Ed., Brian Stevens & Frank Lewis)
Solution Manual Aircraft Structures for Engineering Students (3rd Ed., T.H.G. Megson)
Solution Manual Aircraft Structures for Engineering Students (4th Ed., T.H.G. Megson)
Solution Manual Introduction to Aircraft Structural Analysis (T.H.G. Megson)
Solution Manual Mechanics of Aircraft Structures (2nd Ed, C. T. Sun)
Solution Manual Principles of Helicopter Aerodynamics (1st Ed., Leishman)
Solution Manual Fundamentals of Aerodynamics (2nd Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (3th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (4th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (5th Ed., Anderson)
Solution Manual Aerodynamics for Engineers (5th Ed., John Bertin & Russell Cummings)
Solution Manual Introduction to Flight (5th Ed., Anderson)
Solution Manual Introduction to Flight (6th Ed., Anderson)
Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual Introduction to Mechatronic Design (J. Edward Carryer, Matthew Ohline & Thomas Kenny)
Solution Manual Introduction to Mechatronics and Measurement Systems (2nd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (3rd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (4th Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution Manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)
Solution Manual Gas Dynamics (3rd Ed., John & Keith)
Solution Manual Fundamentals of Gas Dynamics (2nd Ed, Robert D. Zucker)
Solution Manual Theory of Ground Vehicles (3rd Ed., J. Y. Wong)
Solution Manual Theory of Ground Vehicles (4th Ed., J. Y. Wong)
Solution Manual Vehicle Dynamics : Theory and Application (Reza Jazar)
Solution Manual Engineering Fundamentals of the Internal Combustion Engine (2nd Ed., Willard W. Pulkrabek)
Solution Manual Internal Combustion Engines : Applied Thermosciences (2nd Ed., Ferguson & Kirkpatrick)
Solution Manual Advanced Engine Performance Diagnosis (4th Ed., James

Halderman)
Solution Manual Automotive Engines (8th Ed., Crouse)
Solution Manual Automotive Heating & Air Conditioning (5th Ed., Tom Birch)
Solution Manual Diagnosis and Troubleshooting of Automotive Electrical, Electronic, and Computer Systems (5th Ed., James Halderman)
Solution Manual Automotive Brake Systems Package (4th Ed., Rehkopf)
Solution Manual Automotive Brake Systems (4th Ed., Halderman)
Solution Manual Automotive Engine Performance (2nd Ed., Halderman)
Solution Manual Automotive Engines : Theory and Servicing (6th Ed., James Halderman)
Solution Manual Automotive Fuel and Emissions Control Systems (2nd Ed., James Halderman & James Linder)
Solution Manual Automotive Science and Mathematics (Allan Bonnick)
Solution Manual Automotive Mathematics (Jason Rouvel)
Solution Manual Automotive Service Management (Andrew Rezin)
Solution Manual Automotive Technology : Principles, Diagnosis, and Service (3rd Ed., Halderman)
Solution Manual Automotive Steering, Suspension, and Alignment (4th Ed., Halderman)
Solution Manual Automatic Transmissions & Transaxles (4th Ed., Tom Birch & Chuck Rockwood)
Solution Manual Hybrid and Alternative Fuel Vehicles (Halderman & Martin)
Solution Manual Manual Drivetrains and Axles (5th Ed., Birch & Rockwood)
Solution Manual Blueprint Reading for the Machine Trades (6th Ed., Schultz & Smith)
Solution Manual Modern Welding Technology (6th Ed., Cary & Helzer)
Solution Manual Tissue Engineering (Bernhard O. Palsson & Sangeeta N. Bhatia)
Solution Manual Tissue Engineering (Clemens van Blitterswijk, et al.)
Solution Manual Tissue Mechanics (Cowin, Doty)
Solution Manual Technology and Society (3rd Ed., Hjorth, Eichler, Khan & Morello)
Solution Manual BTEC First Engineering Curriculum Support Pack (Mike Tooley)
Solution Manual BTEC First Engineering (Mike Tooley)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (1st Ed., Philip Kosky, George Wise, Robert Balmer & William Keat)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution Manual Engineering Science (5th Ed., W. Bolton)
Solution Manual Principles of Energy Conversion (2nd Ed., Archie W. Culp)
Solution Manual Fundamentals of Renewable Energy Processes (1st Ed., Aldo da Rosa)

Solution Manual Fundamentals of Renewable Energy Processes (2nd Ed., Aldo da Rosa)
Solution Manual Alternative Energy Systems (B. K. Hodge)
Solution Manual Solar Energy Engineering : Processes and Systems (Soteris Kalogirou)
Solution Manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution Manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution Manual Energy Technology and Directions for the Future (Fanchi)
Solution Manual Power Generation Technologies (Paul Breeze)
Solution Manual Foundations of Engineering (2nd Ed, Holtzapple & Dan Reece)
Solution Manual Industrial Mechanics and Maintenance (3rd Ed., Larry Chastain)
Solution Manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution Manual Mechanical and Electrical Equipment for Buildings (11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Engineering Drawing And Design (7th Ed., Jensen, Helsel & Short)
Solution Manual Pipe Drafting and Design (3rd Ed., Roy A. Parisher)
Solution Manual Autodesk Inventor (James M. Leake)
Solution Manual Engineering Design Graphics : Sketching, Modeling, and Visualization (1st Ed., James Leake & Jacob Borgerson)
Solution Manual Orthopaedic Biomechanics : Mechanics and Design in Musculoskeletal Systems (Donald Bartel, Dwight Davy & Tony Keaveny)
Solution Manual Science for Engineering (3rd Ed., John Bird)

68. 4110 Solution manuals and Test Banks to Electrical, Electronics and Computer Engineering Books - part1

Newsgroup: rec.radio.cb
Date: 2012-01-31 08:03:12 UTC
From: Rod Wesler <rodwes15@gmail.com>
Message-ID: <beb38403-d2e8-41f0-97ac-9625e84acf3a@m11g2000yqe.googlegroups.com>
Source record: 251273

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

I do not review the forums, just send me an email. Please do not use emails from servers "LIVE" , all they are take as spam emails in my inbox.

- Electrical, Electronics & Computer Engineering :

Solution Manual Design for Electrical and Computer Engineers (J. Eric Salt & Robert Rothery)
Solution Manual Electrical Engineering : Principles and Applications (3rd Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (4th Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (5th Ed., Hambley)
Solution Manual Electronics (2nd Ed., Hambley)
Solution Manual Foundations of Electric Circuits (J.R. Cogdell)
Solution Manual Physics of Semiconductor Devices (Jean-Pierre Colinge, Cynthia A. Colinge)
Solution Manual Electronics and Communications for Scientists and Engineers (Martin Plonus)
Solution Manual Cryptography & Network Security (Behrouz A Forouzan)
Solution Manual Data Communications and Networking (3rd Ed., Behrouz A. Forouzan)
Solution Manual Data Communications and Networking (4th Ed., Behrouz A. Forouzan)
Solution Manual TCP/IP Protocol Suite (2nd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (3rd Ed., Behrouz Forouzan)

Solution Manual TCP/IP Protocol Suite (4th Ed., Behrouz Forouzan)
Solution Manual Local Area Networks (Behrouz A Forouzan)
Solution Manual Analog Integrated Circuits for Communication : Principles, Simulation and Design (2nd Ed., Donald Pederson & Kartikeya Mayaram)
Solution Manual Satellite Communications (2nd Ed, Pratt, Bostian, Allnutt)
Solution Manual Business Data Communications (Behrouz A Forouzan)
Solution Manual Logic and Computer Design Fundamentals (4th Ed., Mano & Kime)
Solution Manual Linear Robust Control (Michael Green, David J. N. Limebeer)
Solution Manual Adaptive Control (2nd Ed., Karl Johan Astrom, Bjorn Wittenmark)
Solution Manual Digital Control Engineering : Analysis and Design (M. Sami Fadali & Antonio Visioli)
Solution Manual Computer-Controlled Systems : Theory and Design (3rd Ed., Karl Johan Astrom & Bjorn Wittenmark)
Solution Manual Electric Circuits (7th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (8th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (9th Ed., Nilsson & Riedel)
Solution Manual Introductory Circuits for Electrical and Computer Engineering (James Nilsson, Susan Riedel)
Solution Manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution Manual Optical Fiber Communications (4th Ed., Gerd Keiser)
Solution Manual Fiber Optic Communications (5th Ed., Joseph C. Palais)
Solution Manual Electromagnetics (Branislav M. Notaros)
Solution Manual Electromagnetics for Engineers (Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (6th Ed., Ulaby, Michielssen & Ravaioli)
Solution Manual Applied Electromagnetics : Early Transmission Lines Approach (Stuart Wentworth)
Solution Manual Fundamentals of Electromagnetics with Engineering Applications (Stuart Wentworth)
Solution Manual Electromagnetics for Engineers : With Applications to Digital Systems and Electromagnetic Interference (Clayton Paul)
Solution Manual MEMS & Microsystems : Design and Manufacture (1st Ed., Tai-Ran Hsu)
Solution Manual MEMS & Microsystems : Design, Manufacture, and Nanoscale Engineering (2nd Ed., Tai-Ran Hsu)
Solution Manual Probability and Statistics for Engineering and the Sciences (7th Ed., Jay L. DeVore)
Solution Manual Probability and Stochastic Processes : A Friendly Introduction for Electrical and Computer Engineers (2nd Ed., Roy Yates & David Goodman)
Solution Manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr, Steven LeBlanc)

Solution Manual Fuel Cell Engines (Matthew M. Mench)
Solution Manual Fuel Cell Fundamentals (1st Ed., Ryan O'Hayre, et. al)
Solution Manual Fuel Cell Fundamentals (2nd Ed., Ryan O'Hayre, Whitney Colella, Suk-Won Cha, Fritz Prinz)
Solution Manual Control Systems Engineering (4th Ed., Norman Nise)
Solution Manual Control Systems Engineering (5th Ed., Norman Nise)
Solution Manual Control Systems Engineering (6th Ed., Norman Nise)
Solution Manual Automatic Control Systems (8th Ed., Benjamin C. Kuo, Farid Golnaraghi)
Solution Manual Automatic Control Systems (9th Ed., Farid Golnaraghi, Benjamin C. Kuo)
Solution Manual Basic Electricity for Industry : Circuits and Machines - Canadian Edition (Doug Edgar)
Solution Manual Basic Engineering Circuit Analysis (8th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (9th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (10th Ed., Irwin & Nelms)
Solution Manual A Brief Introduction to Circuit Analysis (J. David Irwin)
Solution Manual Semiconductor Devices : Basic Principles (Jasprit Singh)
Solution Manual Semiconductor Device Fundamentals (Robert F. Pierret)
Solution Manual Advanced Semiconductor Fundamentals (2nd Ed., Robert F. Pierret)
Solution Manual Device Electronics for Integrated Circuits (3rd Ed., Richard S. Muller, Theodore I. Kamins)
Solution Manual Fundamentals of Semiconductor Devices (Anderson)
Solution Manual Scientific Computing (2nd Ed., Michael T. Heath)
Solution Manual System Identification : An Introduction (Karel J. Keesman)
Solution Manual Scientific Computing with Case Studies (Dianne P. O'Leary)
Solution Manual Pattern Recognition and Machine Learning (Christopher M. Bishop)
Solution Manual Modern Semiconductor Devices for Integrated Circuits (Chenming C. Hu)
Solution Manual Analysis and Design of Analog Integrated Circuits (4th Ed., Paul Gray, et al.)
Solution Manual Analysis and Design of Analog Integrated Circuits (5th Ed., Paul Gray)
Solution Manual Analysis and Design of Digital Integrated Circuits (3rd Ed., Hodges)
Solution Manual Introduction to Electric Circuits (6th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (7th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (8th Ed., Dorf & Svoboda)

Solution Manual Modulation, Detection and Coding (Tommy Öberg)
Solution Manual Principles of Communications: Systems, Modulation, and Noise (5th Ed., R.E. Ziemer & W.H. Tranter)
Solution Manual Principles of Communications (6th Ed., R.E. Ziemer & W.H. Tranter)
Solution Manual The Analysis and Design of Linear Circuits (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits : Laplace Early (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits (5th Ed, Thomas)
Solution Manual The Analysis and Design of Linear Circuits (6th Ed, Thomas, Rosa & Toussaint)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual Modern Control Systems (11th Ed., Dorf & Bishop)
Solution Manual Modern Control Systems (12th Ed., Dorf & Bishop)
Solution Manual System Dynamics (4th Ed., Katsuhiko Ogata)
Solution Manual System Dynamics (1st Ed., William Palm III)
Solution Manual System Dynamics (2nd Ed., William Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Optimal Control (2nd Ed., Frank Lewis & Vassilis Syrmos)
Solution Manual Optimal Control Theory : An Introduction (Donald E. Kirk)
Solution Manual Power Electronics (1st Ed., Daniel W. Hart)
Solution Manual Power Electronic Circuits (Issa Batarseh)
Solution Manual Power Electronics : Circuits, Devices and Applications (3rd Ed., Muhammad H. Rashid)
Solution Manual Power Electronics : Converters, Applications, and Design (3rd Ed., Ned Mohan, Tore Undeland & William Robbins)
Solution Manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution Manual Signals and Systems using MATLAB (Luis Chaparro)
Solution Manual Analog Signals and Systems (Erhan Kudeki & David C. Munson, Jr.)
Solution Manual Continuous and Discrete Time Signals and Systems (Mrinal Mandal, Amir Asif)
Solution Manual Digital Signal and Image Processing (Tamal Bose)
Solution Manual Digital Image Processing (2nd Ed., Rafael Gonzalez, Richard Woods)
Solution Manual DSP First : A Multimedia Approach (James H. McClellan, Ronald W. Schafer, Mark A. Yoder)
Solution Manual Discrete-Time Signal Processing (2nd Ed., Alan Oppenheim, Ronald Schafer, John Buck)
Solution Manual Discrete-Time Signal Processing (3rd Ed., Alan Oppenheim & Ronald Schafer)
Solution Manual Signal Processing First (James H. McClellan, Ronald W.

Schafer, Mark A. Yoder)
Solution Manual Statistical Digital Signal Processing and Modeling (Monson Hayes)
Solution Manual Digital Signal Processing (Thomas J. Cavicchi)
Solution Manual Digital Signal Processing System Design : LabVIEW-Based Hybrid Programming (2nd Ed., Kehtarnavaz)
Solution Manual Digital Signal Processing (2nd Ed., Mitra)
Solution Manual Digital Signal Processing (3rd Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., John G. Proakis, Dimitris K Manolakis)
Solution Manual Digital Signal Processing (Charles Schuler & Mahesh Chugani)
Solution Manual Digital Signal Processing : Fundamentals and Applications (Li Tan)
Solution Manual Digital Signal Processing : An Experimental Approach (Shlomo Engelberg)
Solution Manual Digital Signal Processing : System Analysis and Design (Paulo S. R. Diniz)
Solution Manual Digital Signal Processing : A Modern Introduction (Ashok Ambardar)
Solution Manual Engineering Optimization : Theory and Practice (4th Ed., Singiresu S. Rao)
Solution Manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution Manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution Manual Introduction to Applied Optimization (2nd Ed., Urmila Diwekar)
Solution Manual Logic Synthesis and Verification Algorithms (Gary Hachtel & Fabio Somenzi)
Solution Manual Adaptive Filtering : Algorithms and Practical Implementation (3rd Ed., Paulo S. R. Diniz)
Solution Manual Introduction to Scientific Computation and Programming (Daniel T. kaplan)
Solution Manual Principles of Signal Detection and Parameter Estimation (Bernard C. Levy)
Solution Manual Electric Machines Analysis and Design Applying MatLab (Cathey)
Solution Manual Fundamentals of Electrical Engineering (Giorgio Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (4th Ed, Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (5th Ed, Rizzoni)
Solution Manual Fundamentals of Electric Circuits (2nd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (3rd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (4th Ed., Alexander

& Sadiku)
Solution Manual MSP430 Microcontroller Basics (John Davies)
Solution Manual Programming Massively Parallel Processors : A Hands-on Approach (David Kirk & Wen-mei Hwu)
Solution Manual Embedded Systems and Software Validation (Abhik Roychoudhury)
Solution Manual Embedded Systems Design with Platform FPGAs : Principles and Practices (Ronald Sass, Andrew Schmidt)
Solution Manual Embedded DSP Processor Design : Application Specific Instruction Set Processors (Dake Liu)
Solution Manual Embedded Microcontrollers and Processor Design (Charles Greg Osborn)
Solution Manual Embedded System Design : A Unified Hardware/Software Introduction (Vahid & Givargis)
Solution Manual Embedded Microcomputer Systems : Real Time Interfacing (2nd Ed., Jonathan W. Valvano)
Solution Manual Introduction to Programming with C++ (2nd Ed., Y. Daniel Liang)
Solution Manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution Manual Matlab : A Practical Introduction to Programming and Problem Solving (2nd Ed., Stormy Attaway)
Solution Manual Principles of Computer System Design : An Introduction (Jerome Saltzer & M. Frans Kaashoek)
Solution Manual The Illustrated Network : How TCP/IP Works in a Modern Network (Walter Goralski)
Solution Manual Electronic Design Automation : Synthesis, Verification, and Test (Laung-Terng Wang, Yao-Wen Chang & Kwang-Ting Cheng)
Solution Manual Digital Design (Frank Vahid)
Solution Manual Digital Design with RTL Design, Verilog and VHDL (2nd Ed., Frank Vahid)
Solution Manual Digital Logic Design Principles (Balabanian & Carlson)
Solution Manual Fundamentals of Logic Design (5th Ed., Charles H. Roth)
Solution Manual Real-Time Systems and Software (Alan Shaw)
Solution Manual Introduction to VLSI Circuits and Systems (John P. Uyemura)
Solution Manual Chip Design for Submicron VLSI : CMOS Layout & Simulation (John Uyemura)
Solution Manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution Manual Objects, Abstraction, Data Structures and Design : Using C++ (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Objects, Abstraction, Data Structures and Design Using Java Version 5.0 (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Computer Architecture and Organization : An Integrated Approach (Murdocca & Heuring)
Solution Manual Wiley Pathways Networking Basics (1st Ed., Ciccarelli, Faulkner, FitzGerald, Dennis & Miller)

Solution Manual Software Engineering : Principles and Practice (3rd Ed., Hans van Vliet)
Solution Manual Software Design : From Programming to Architecture (Eric Braude)
Solution Manual Software Engineering : An Object-Oriented Perspective (Eric Braude)
Solution Manual Software Engineering : Modern Approaches (2nd Ed., Eric Braude & Michael Bernstein)
Solution Manual Neural and Adaptive Systems : Fundamentals through Simulations (José Principe, Neil Euliano & W. Curt Lefebvre)
Solution Manual Fundamentals of Electronic Circuit Design (David J. Comer & Donald T. Comer)
Solution Manual Microelectronic Circuit Design (2nd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (3rd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (4th Ed., Jaeger & Blalock)
Solution Manual Introduction to Microelectronic Fabrication : Volume 5 of Modular Series on Solid State Devices (2nd Ed., Richard Jaeger)
Solution Manual Microelectronic Circuits (5th Ed., Adel S. Sedra, K. C. Smith)
Solution Manual VHDL for Engineers (Kenneth Short)
Solution Manual Fundamentals of Digital Logic with VHDL Design (1st Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (2nd Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (3rd Ed., Brown & Vranesic)
Solution Manual CMOS Analog Circuit Design (2nd Ed., Phillip E. Allen, Douglas R. Holberg)
Solution Manual Design of Analog CMOS Integrated Circuits (Behzad Razavi)
Solution Manual Design of Integrated Circuits for Optical Communications (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics, Preliminary Edition (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics (1st Ed., Behzad Razavi)
Solution Manual RF Microelectronics (2nd Ed., Behzad Razavi)
Solution Manual Design with Operational Amplifiers and Analog Integrated Circuits (3rd Ed., Sergio Franco)
Solution Manual Your UNIX : The Ultimate Guide (1st Ed., Sumitabha Das)
Solution Manual Your UNIX : The Ultimate Guide (2nd Ed., Sumitabha Das)
Solution Manual Microwave Engineering (Annapurna Das)
Solution Manual Microwave Engineering (3rd Ed., David M. Pozar)
Solution Manual Microwave and RF Design of Wireless Systems (David M. Pozar)

Solution Manual Introduction to Wireless Systems (P. M. Shankar)
Solution Manual Microwave Transistor Amplifiers : Analysis and Design (2nd Ed., Guillermo Gonzalez)
Solution Manual Control Systems (Madan Gopal)
Solution Manual A First Lab in Circuits and Electronics (Yannis Tsividis)
Solution Manual Power System Analysis : Analysis and Design (John Grainger)
Solution Manual Power Systems Analysis (2nd Ed., Hadi Saadat)
Solution Manual Power Systems Analysis and Design (4th Ed., J.Duncan Glover and Mulukutla S. Sarma)
Solution Manual An Introduction to Digital and Analog Communications (2nd Ed., Simon Haykin & Michael Moher)
Solution Manual Communication Systems (4th Ed., Simon Haykin)
Solution Manual Communication Systems (5th Ed., Simon Haykin)
Solution Manual Communication Systems (4th Ed., A. Bruce Carlson, Paul B. Crilly, Janet Rutledge)
Solution Manual Communication Systems (5th Ed., A. Bruce Carlson, Paul B. Crilly)
Solution Manual Signals and Systems (2nd Ed., Simon Haykin & Barry Van Veen)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (1st Ed., Patt and Patel)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (2nd Ed., Patt and Patel)
Solution Manual Elements of the Theory of Computation (2nd Ed., Lewis & Papadimitriou)
Solution Manual Introduction to Languages and the Theory of Computation (3rd Ed., John Martin)
Solution Manual Introduction to Languages and the Theory of Computation (4th Ed., John Martin)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Silicon VLSI Technology : Fundamentals, Practice, and Modeling (Plummer, Deal & Griffin)
Solution Manual Dynamic Electromagnetics (Paul Diament)
Solution Manual Engineering Electromagnetics (2nd Ed., Nathan Ida)
Solution Manual Engineering Electromagnetics (Kenneth Demarest)
Solution Manual Engineering Electromagnetics (Umran S. Inan & Aziz Inan)
Solution Manual Field and Wave Electromagnetics (1st Ed., David Cheng)
Solution Manual Fundamentals of Engineering Electromagnetics (David Cheng)
Solution Manual Information Modeling and Relational Databases (2nd Ed., Terry Halpin & Tony Morgan)
Solution Manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual The Intel Microprocessors (8th Ed., Barry B. Brey)

Solution Manual Wireless Networking (Kumar, Manjunath & Kuri)
Solution Manual Wireless Communications : Principles and Practice (2nd Ed., Theodore S. Rappaport)
Solution Manual Digital Electronics and Design with VHDL (Volnei A. Pedroni)
Solution Manual System-on-Chip Test Architectures : Nanometer Design for Testability (Wang, Stroud & Touba)
Solution Manual Digital Design (Verilog) : An Embedded Systems Approach Using Verilog (Peter Ashenden)
Solution Manual Digital Design (VHDL) : An Embedded Systems Approach Using VHDL (Peter Ashenden)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (3rd Ed., Patterson & Hennessy)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (4th Ed., Patterson & Hennessy)
Solution Manual Fundamentals of Computer Organization and Design (Sivarama P. Dandamudi)
Solution Manual Wireless Communications & Networking (Vijay Garg)
Solution Manual Network Flows : Theory, Algorithms, and Applications (Ravindra K. Ahuja, Thomas L. Magnanti, James B. Orlin)
Solution Manual Network Analysis, Architecture, and Design (3rd Ed., James McCabe)
Solution Manual Computer Networks : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Computer Networks ISE : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Digital Design and Computer Architecture (David Harris & Sarah Harris)
Solution Manual Fault-Tolerant Systems (Israel Koren & C. Krishna)
Solution Manual Computer Architecture : Pipelined and Parallel Processor Design (Michael J. Flynn)
Solution Manual Computer Architecture : A Quantitative Approach (4th Ed., Hennessy & Patterson)
Solution Manual High-Performance Embedded Computing : Architectures, Applications, and Methodologies (Wayne Wolf)
Solution Manual Pattern Recognition (3rd Ed., Theodoridis & Koutroumbas)
Solution Manual Pattern Recognition (4th Ed., Theodoridis & Koutroumbas)
Solution Manual Data Mining : Concepts and Techniques (2nd Ed., Han & Kamber)
Solution Manual Commonsense Reasoning (Erik Mueller)
Solution Manual Introduction to Data Compression (3rd Ed., Khalid Sayood)
Solution Manual Programming Language Pragmatics (2nd Ed., Michael Scott)
Solution Manual Programming Language Pragmatics (3rd Ed., Michael Scott)
Solution Manual Computer Graphics for Java Programmers (2nd Ed., Leen Ammeraal & Kang Zhang)

Solution Manual Database Modeling and Design : Logical Design (4th Ed., Teorey, Lightstone & Nadeau)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (1st Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (2nd Ed., Wayne Wolf)
Solution Manual Virtual Machines : Versatile Platforms for Systems and Processes (Jim Smith & Ravi Nair)
Solution Manual Comprehensive Functional Verification : The Complete Industry Cycle (Wile, Goss & Roesner)
Solution Manual User Interface Design and Evaluation (Stone, Jarrett, Woodroffe & Minocha)
Solution Manual Network Algorithmics : An Interdisciplinary Approach to Designing Fast Networked Devices (George Varghese)
Solution Manual Data Modeling Essentials (3rd Ed., Simsion & Witt)
Solution Manual A Student Guide to Object-Oriented Development (Carol Britton & Jill Doake)
Solution Manual Routing, Flow, and Capacity Design in Communication and Computer Networks (Pioro & Medhi)
Solution Manual Knowledge Representation and Reasoning (Brachman & Levesque)
Solution Manual Communication Networking : An Analytical Approach (Anurag Kumar, D. Manjunath & Joy Kuri)
Solution Manual Principles and Practices of Interconnection Networks (Dally & Towles)
Solution Manual Game Physics (David Eberly)
Solution Manual Engineering a Compiler (Keith Cooper & Linda Torczon)
Solution Manual Constraint Processing (Rina Dechter)
Solution Manual Design Methods for Reactive Systems : Yourdon, Statemate, and the UML (R. J. Wieringa)
Solution Manual Temporal Data & the Relational Model (C.J. Date, Darwen & Lorentzos)
Solution Manual Java Made Simple (2nd Ed., P. K. McBride)
Solution Manual The Firmware Handbook (Jack Ganssle)
Solution Manual Optical Networks : A Practical Perspective (2nd Ed., Ramaswami & Sivarajan)
Solution Manual Optical Networks : A Practical Perspective (3rd Ed., Ramaswami, Sivarajan & Sasaki)
Solution Manual Usability Engineering : Scenario-Based Development of Human-Computer Interaction (Rosson & Carroll)
Solution Manual The Designer's Guide to VHDL (2nd Ed., Peter Ashenden)
Solution Manual Transactional Information Systems : Theory, Algorithms, and the Practice of Concurrency Control and Recovery (Weikum & Vossen)
Solution Manual Parallel Computer Architecture : A Hardware/Software Approach (Culler, Singh & Gupta)
Solution Manual Advanced Compiler Design and Implementation (Steven Muchnick)
Solution Manual Parallel Programming with MPI (Peter Pacheco)
Solution Manual An Introduction to Parallel Programming (Peter

Pacheco)
Solution Manual Distributed Algorithms (Nancy Lynch)
Solution Manual Electrical and Electronic : Principles and Technology (3rd Ed., John Bird)
Solution Manual Electrical and Electronic : Principles and Technology (4th Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (3rd Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (4th Ed., John Bird)
Solution Manual Electronic Circuits : Fundamentals & Applications (3rd Ed., Mike Tooley)
Solution Manual A Practical Guide to SysML : The Systems Modeling Language (Friedenthal, Moore & Steiner)
Solution Manual Multidimensional Signal, Image, and Video Processing and Coding (John Woods)
Solution Manual Multidimensional Signal, Image, and Video Processing and Coding (2nd Ed., John Woods)
Solution Manual Bioelectrical Signal Processing in Cardiac and Neurological Applications (Leif Sörnmo & Pablo Laguna)
Solution Manual Foundations of Analog and Digital Electronic Circuits (Anant Agarwal & Jeffrey Lang)
Solution Manual Introduction to Linear Circuit Analysis and Modelling : From DC to RF (Luis Moura & Izzat Darwazeh)
Solution Manual Embedded Systems Architecture : A Comprehensive Guide for Engineers and Programmers (Tammy Noergaard)
Solution Manual Bioimpedance and Bioelectricity Basics (2nd Ed., Grimnes & Martinsen)
Solution Manual Simulation with Arena (5th Ed., Kelton, Sadowski & Swets)
Solution Manual Simulation Modeling and Analysis with ARENA (Tayfur Altiok & Benjamin Melamed)
Solution Manual The Visual Story : Creating the Visual Structure of Film, TV and Digital Media (2nd Ed., Bruce Block)
Solution Manual The Shut Up and Shoot Documentary Guide : A Down & Dirty DV Production (Anthony Artis)
Solution Manual Portable Video : ENG & EFP (5th Ed., Medoff & Fink)
Solution Manual Voice and Vision : A Creative Approach to Narrative Film and DV Production (Mick Hurbis-Cherrier)
Solution Manual Writing for Multimedia and the Web : A Practical Guide to Content Development for Interactive Media (3rd Ed., Timothy Garrand)
Solution Manual Developing and Maintaining a Design-Tech Portfolio : A Guide for Theatre, Film & TV (Rafael Jaen)
Solution Manual Producing for TV and Video : A Real-World Approach (Cathrine Kellison)
Solution Manual Producing for TV and New Media : A Real-World Approach for Producers (2nd Ed., Cathrine Kellison)
Solution Manual Placing Shadows : Lighting Techniques for Video Production (3rd Ed., Gloman & Tom LeTourneau)

Solution Manual Film Directing Fundamentals : See Your Film Before Shooting (3rd Ed., Nicholas Proferes)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (3rd Ed., Musburger & Kindem)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (4th Ed., Kindem & Musburger)
Solution Manual Directing the Documentary (5th Ed., Michael Rabiger)
Solution Manual Video Production Handbook (4th Ed., Gerald Millerson & Jim Owens)
Solution Manual Making Media : Foundations of Sound and Image Production (Jan Roberts-Breslin)
Solution Manual Prepare to Board! Creating Story and Characters for Animation Features and Shorts (Nancy Beiman)
Solution Manual Light and Lens : Photography in the Digital Age (Robert Hirsch)
Solution Manual The Radio Station : Broadcast, Satellite & Internet (7th Ed., Michael Keith)
Solution Manual Developing Story Ideas (2nd Ed., Michael Rabiger)
Solution Manual Radio Production Worktext : Studio and Equipment (5th Ed., Reese, Gross & Gross)
Solution Manual Broadcast News Writing, Reporting, and Producing (4th Ed., Ted White)
Solution Manual Problem Solving and Programming Concepts (7th Ed., Sprankle)
Solution Manual Problem Solving and Programming Concepts (8th Ed., Sprankle & Hubbard)
Solution Manual A Balanced Introduction to Computer Science (2nd Ed., David Reed)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Starting Out with Programming Logic and Design (Tony Gaddis)
Solution Manual Starting Out with Programming Logic and Design (2nd Ed., Tony Gaddis)
Solution Manual Tools For Structured and Object-Oriented Design (7th Ed., Bohl & Rynn)
Solution Manual Programming with Alice and Java (Lewis & DePasquale)
Solution Manual e-Business and e-Commerce How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual XML How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, Ted Lin, Praveen Sadhu)
Solution Manual Python How to Program (Harvey M. Deitel, Paul J. Deitel, Jonathan P. Liperi Ben Wiedermann)
Solution Manual Perl How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, D. C. McPhie)
Solution Manual C How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual C How to Program (5th Ed., Harvey & Paul Deitel)
Solution Manual C++ How to Program (6th Ed., Harvey & Paul Deitel)
Solution Manual Visual Basic.NET How to Program (2nd Ed., Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)

Solution Manual Visual C++ 2008 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Internet & World Wide Web : How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual Web Technologies : A Computer Science Perspective (Jeffrey C. Jackson)
Solution Manual Mastering the Internet, XHTML and JavaScript (2nd Ed., Ibrahim Zeid)
Solution Manual Weaving a Website : Programming in HTML, Java Script, Perl and Java (Susan Anderson-Freed)
Solution Manual Simply C++ : An Application-Driven Tutorial Approach (Harvey & Paul Deitel)
Solution Manual Visual C# 2005 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Visual C# 2008 How to Program (3rd Ed., Harvey & Paul Deitel)
Solution Manual Visual C# 2010 How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual Simply C# : An Application-Driven Tutorial Approach (Harvey & Paul Deitel, Hoey & Yaeger)
Solution Manual Java : An Introduction to Problem Solving and Programming (4th Ed., Walter Savitch)
Solution Manual Java : An Introduction to Problem Solving and Programming (5th Ed., Savitch & Carrano)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Java How to Program (7th Ed., Harvey & Paul Deitel)
Solution Manual Java How to Program : Early Objects Version (8th Ed., Paul Deitel)
Solution Manual Java How to Program : Late Objects Version (8th Ed., Paul Deitel)
Solution Manual Java For Students (5th Ed., Bell & Parr)
Solution Manual Java, Java, Java, Object-Oriented Problem Solving (3rd Ed., Morelli & Walde)
Solution Manual Java : An Eventful Approach (Bruce, Danyluk & Murtagh)
Solution Manual Introduction to Java Programming with JBuilder (3rd Ed., Y. Daniel Liang)
Solution Manual Starting Out with Visual Basic 2008 (4th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Visual Basic 2010 (5th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Python (Tony Gaddis)
Solution Manual Object-Oriented Programming in Python (Goldwasser & Letscher)
Solution Manual Introduction to MathCAD 11 (Ronald W. Larsen)
Solution Manual Introduction to MathCAD 13 (2nd Ed., Ronald W. Larsen)
Solution Manual MatLAB Programming (David Kuncicky)
Solution Manual Introduction to Maple 8 (David Schwartz)
Solution Manual Introduction to FORTRAN 90 (2nd Ed., Larry R. Nyhoff & Sanford Leestma)

Solution Manual Fortran 95/2003 Scientists and Engineers (3rd Ed., Stephen J. Chapman)
Solution Manual Introduction to Java (Stephen J. Chapman)
Solution Manual Java Software Solutions for AP Computer Science A (2nd Ed., Lewis, Loftus & Cocking)
Solution Manual Business Data Networks and Telecommunications (6th Ed., Raymond R. Panko)
Solution Manual Business Data Networks and Telecommunications (7th Ed., Raymond R. Panko)
Solution Manual Business Data Communications (Allen Dooley)
Solution Manual Object-Oriented Programming in C++ (4th Ed., Robert Lafore)
Solution Manual C++ : Classes and Data Structures (Jeffrey Childs)
Solution Manual Data Structures Outside-In with Java (Sesh Venugopal)
Solution Manual Data Structures and Abstractions with Java (2nd Ed., Frank M. Carrano)
Solution Manual Data Structures and Algorithms in Java (Peter Drake)
Solution Manual Practical Introduction to Data Structures and Algorithm Analysis : C++ Edition (2nd Ed., Clifford A. Shaffer)
Solution Manual Computer Vision : A Modern Approach (David Forsyth & Jean Ponce)
Solution Manual Computer Graphics Using Java 2D and 3D (Hong Zhang & Y. Daniel Liang)
Solution Manual Computer Graphics Using OpenGL (3rd Ed., Francis Hill Jr. & Stephen Kelley)
Solution Manual Computer Graphics with OpenGL (3rd Ed., Donald Hearn & M. Pauline Baker)
Solution Manual User-Centered Web Site Development : A Human-Computer Interaction Approach (McCracken & Wolfe)
Solution Manual Fundamentals of Game Design (Ernest Adams & Andrew Rollings)
Solution Manual Introduction to The Game Industry (Moore & Sward)
Solution Manual Fundamentals of Math and Physics for Game Programmers (Wendy Stahler)
Solution Manual Usability Engineering : Process, Products & Examples (Laura Leventhal & Julie Barnes)
Solution Manual Web Usability : A User-Centered Design Approach (Jonathan Lazar)
Solution Manual Structured Computer Organization (5th Ed., Andrew S. Tanenbaum)
Solution Manual Assembly Language for Intel-Based Computers (5th Ed., Kip Irvine)
Solution Manual Assembly Language for x86 Processors (6th Ed., Kip R. Irvine)
Solution Manual Fundamentals of Multimedia (Ze-Nian Li & Mark Drew)
Solution Manual Digital Media Primer (Yue-Ling Wong)
Solution Manual Essentials for Design Macromedia Director MX 2004 Comprehensive (Tara Gray)
Solution Manual Modern Systems Analysis and Design (4th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)

Solution Manual Modern Systems Analysis and Design (5th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Systems Analysis and Design (6th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Database Management (8th Ed., Hoffer, Prescott & Topi)
Solution Manual Modern Database Management (9th Ed., Hoffer, Prescott & Topi)
Solution Manual Modern Database Management (10th Ed., Hoffer, Ramesh & Topi)
Solution Manual Database Systems Using Oracle (2nd Ed., Nilesh Shah)
Solution Manual An Advanced Course in Database Systems : Beyond Relational Databases (Dietrich & Urban)
Solution Manual Data and Text Mining : A Business Applications Approach (Thomas Miller)
Solution Manual Network Management : Concepts and Practice, A Hands-On Approach (J. Richard Burke)
Solution Manual Computer and Communication Networks (Nader F. Mir)
Solution Manual High Performance TCP/IP Networking (Mahbub Hassan & Raj Jain)
Solution Manual Computer Security : Principles and Practice (William Stallings & Lawrie Brown)
Solution Manual Computer Forensics : Principles and Practices (Volonino, Anzaldua & Godwin)
Solution Manual Disaster Recovery : Principles and Practices (April Wells, Charlyne Walker & Timothy Walker)
Solution Manual Firewalls and VPNs : Principles and Practices (Richard Tibbs & Edward Oakes)
Solution Manual Network Defense and Countermeasures : Principles and Practices (Chuck Easttom)
Solution Manual Corporate Computer and Network Security (1st Ed., Raymond Panko)
Solution Manual Corporate Computer and Network Security (2nd Ed., Raymond Panko)
Solution Manual IP Telephony Using CallManager Express Lab Portfolio (Cheryl Schmidt & Ernie Friend)
Solution Manual High-Speed Networks and Internets : Performance and Quality of Service (2nd Ed., William Stallings)
Solution Manual Object-Oriented Modeling and Design with UML (2nd Ed., Michael Blaha & James Rumbaugh)
Solution Manual Operating Systems : Internals and Design Principles (5th Ed., William Stallings)
Solution Manual Operating Systems : Internals and Design Principles (6th Ed., William Stallings)
Solution Manual Distributed Systems : Principles and Paradigms (2nd Ed., Tanenbaum & Van Steen)
Solution Manual Modern Operating Systems (3rd Ed., Andrew Tanenbaum)
Solution Manual Computer Networks (4th Ed., Andrew S. Tanenbaum)
Solution Manual Computer Networks (5th Ed., Andrew S. Tanenbaum, David J. Wetherall)

Solution Manual Operating Systems Design and Implementation (3rd Ed., Andrew Tanenbaum & Albert Woodhull)
Solution Manual UNIX Unbounded : A Beginning Approach (5th Ed., Amir Afzal)
Solution Manual Introduction to Operating Systems and Networks (Ruth Watson)
Solution Manual Operating Systems (3rd Ed., Harvey Deitel, Paul Deitel & David Choffnes)
Solution Manual Operating Systems Principles (Lubomir Bic & Alan Shaw)
Solution Manual A Practical Guide to Linux : Commands, Editors, and Shell Programming (Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (2nd Ed., Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (3rd Ed., Mark Sobell)
Solution Manual A Practical Guide to Fedora and Red Hat Enterprise Linux: College Edition (Mark Sobell)
Solution Manual A Practical Guide to Ubuntu Linux (Mark Sobell)
Solution Manual Automata, Computability and Complexity : Theory and Applications (Elaine Rich)
Solution Manual Modern Digital Electronics (R.P. Jain)
Solution Manual Linear Systems and Signals (B.P. Lathi)
Solution Manual Modern Digital and Analog Communications Systems (3rd Ed., B. P. Lathi)
Solution Manual Introduction to Digital Systems (Milo D. Ercegovac, Lang & Moreno)
Solution Manual Embedded Systems : Architechture, Programming and Design (Raj Kamal)
Solution Manual Modern Power System Analysis (D. P. Kothari & I. J. Nagrath)
Solution Manual Basic Electrical Engineering (2nd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Electric Machines (3rd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Circuits and Networks (A. Sudhakar & S. Palli Shyammohan)
Solution Manual Electrical and Electronic Technology (9th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electrical and Electronic Technology (10th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electric Motors and Drives : Fundamentals, Types and Applications (3rd Ed., Austin Hughes)
Solution Manual Modern Processor Design : Fundamentals of Superscalar Processors (John P. Shen)
Solution Manual Computer Networks : Principles, Technologies and Protocols for Network Design (N. Olifer & V. Olifer)
Solution Manual Computer Networking : Internet Protocols in Action (Jeanna Matthews)
Solution Manual Computer Organization (5th Ed., Hamacher et al.)
Solution Manual CMOS Digital Integrated Circuits : Analysis and Design

(3rd Ed., Sung-Mo Kang & Yusuf Leblebici)
Solution Manual Introduction to Logic Design (1st Ed., Alan B
Marcovitz)
Solution Manual Introduction to Logic Design (2nd Ed., Alan B
Marcovitz)
Solution Manual Introduction to Logic Design (3rd Ed., Alan B
Marcovitz)
Solution Manual Introduction to Logic and Computer Design (Alan B
Marcovitz)
Solution Manual Digital Principles and Design (Donald D. Givone)
Solution Manual Programmable Logic Controllers (3rd Ed., Frank
Petruzella)
Solution Manual Programmable Logic Controllers (4th Ed., Frank
Petruzella)

69. 4110 Solution manuals and Test Banks to Electrical, Electronics and Computer Engineering Books - part2

Newsgroup: rec.radio.cb
Date: 2012-01-31 08:03:58 UTC
From: Rod Wesler <rodwes15@gmail.com>
Message-ID: <96d41525-8064-41a6-9f4b-1df59b362ed1@f11g2000yql.googlegroups.com>
Source record: 251272

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

I do not review the forums, just send me an email. Please do not use emails from servers "LIVE" , all they are take as spam emails in my inbox.

- Electrical, Electronics & Computer Engineering :

Solution Manual Antenna Theory and Design (2nd Ed., Stutzman & Thiele)
Solution Manual Antennas for All Applications (3rd Ed., John Kraus & Ronald Marhefka)
Solution Manual Principles of Neurocomputing for Science and Engineering (Fredric M. Ham & Ivica Kostanic)
Solution Manual Introduction to Algorithms (2nd Ed., Cormen, et al.)
Solution Manual Algorithms (Dasgupta, et al.)
Solution Manual Applied Operating Systems Concepts (Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (8th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating Systems Concepts with Java (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (8th Ed., Silberschatz, Galvin & Gagne)

Solution Manual C++ Program Design (3rd Ed., Cohoon & Davidson)
Solution Manual Java : Program Design 5.0 (Cohoon & Davidson)
Solution Manual Programming in C++ : Lessons and Applications (Timothy B. D'Orazio)
Solution Manual Applied C : An Introduction and More (Alice Fischer)
Solution Manual Programming Languages : Principles and Paradigms (1st Ed., Allen Tucker & Robert Noonan)
Solution Manual Programming Languages : Principles and Paradigms (2nd Ed., Allen Tucker & Robert Noonan)
Solution Manual Introduction to Parallel Computing (2nd Ed., Grama, Karypis, Kumar & Gupta)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael J Quinn)
Solution Manual Data Communications and Network Security (Houston H. Carr & Charles Snyder)
Solution Manual Data Communications and Networks (David Miller)
Solution Manual Management Information Systems (3rd Ed., Post & Anderson)
Solution Manual Management Information Systems (4th Ed., Post & Anderson)
Solution Manual Database Management Systems (3rd Ed. Post)
Solution Manual Management Information Systems (9th Ed., James A. O'Brien, George Marakas)
Solution Manual Introduction to Systems Analysis and Design (Whitten & Bentley)
Solution Manual Systems Analysis & Design : An Active Approach (2nd Ed., Marakas)
Solution Manual An Introduction to Object-Oriented Programming with Java (4th Ed., C. Thomas Wu - Otani)
Solution Manual An Introduction to Object-Oriented Programming with Java (5th Ed., C. Thomas Wu - Otani)
Solution Manual A Comprehensive Introduction to Object-Oriented Programming With Java (C. Thomas Wu)
Solution Manual Data Structures and the Java Collections Framework (1st Ed., William Collins)
Solution Manual Data Structures and the Java Collections Framework (2nd Ed., William Collins)
Solution Manual Data Structures and the Standard Template Library (William Collins)
Solution Manual Database System Concepts (4th Ed., Silberschatz)
Solution Manual Database System Concepts (5th Ed., Silberschatz)
Solution Manual Database System Concepts (6th Ed., Silberschatz, Korth & Sudarshan)
Solution Manual Database Management Systems (3rd Ed., Ramakrishnan & Gehrke)
Solution Manual Fundamentals of Network Security (Eric Maiwald)
Solution Manual Computing Concepts (1st Ed., Haag, et al.)
Solution Manual Computing Concepts (2nd Ed., Haag et al.)
Solution Manual Microsoft Office 2003 (Haag et al.)
Solution Manual Advanced Programming Using Visual Basic .NET (2nd Ed.,

Julia Case Bradley & Anita Millspaugh)
Solution Manual Advanced Programming Using Visual Basic 2005 (3rd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming with Java (Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in C#.Net (1st Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual C# 2005 (2nd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Learning Programming Using Visual Basic.Net (Bill Burrows & Joe Lanford)
Solution Manual Programming in Visual Basic.NET : Visual Basic.NET 2005 (6th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual Basic .Net : 2003 Update Edition (5th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Survey of Operating Systems (2nd Ed., Jane Holcombe & Charles Holcombe)
Solution Manual Principles of Voice and Data Communications (Regis J. Bates & Marcus Bates)
Solution Manual Mike Meyers' Network+ Guide To Managing and Troubleshooting Networks (Michael Meyers)
Solution Manual Introduction to Windows Server 2003 (Eric Ecklund)
Solution Manual Programming The Web : An Introduction (Barrie Sosinsky & Valda Hilley)
Solution Manual Programming The Web Using XML (Ellen Pearlman & Eileen Mullin)
Solution Manual Internet Marketing : Building Advantage in a Networked Economy (2nd Ed., Rafi Mohammed et al.)
Solution Manual Internet Technologies at Work (Fred T. Hofstetter)
Solution Manual Internet Literacy (4th Ed., Fred T. Hofstetter)
Solution Manual Software Engineering : A Practitioner's Approach (5th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (6th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (7th Ed., Roger Pressman)
Solution Manual Web Engineering : A Practioner's Approach (1st Ed., Roger S. Pressman & David Lowe)
Solution Manual Object-Oriented Software Engineering (Stephen Schach)
Solution Manual Object-Oriented and Classical Software Engineering (5th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (6th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (7th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (8th Ed., Steve Schach)
Solution Manual Introduction to Object-Oriented Analysis and Design (Steve Schach)
Solution Manual Communication Networks (2nd Ed., Alberto Leon-Garcia &

Indra Widjaja)
Solution Manual Fundamentals of Digital Logic with Verilog Design (1st Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Fundamentals of Digital Logic with Verilog Design (2nd Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Continuous and Discrete Control Systems (John Dorsey)
Solution Manual Engineering Circuit Analysis (6th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Circuit Analysis (7th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Electromagnetics (7th Ed., William Hayt & John Buck)
Solution Manual Engineering Electromagnetics (8th Ed., William Hayt & John Buck)
Solution Manual Principles of Electronic Materials and Devices (2nd Ed., Safa O. Kasap)
Solution Manual Principles of Electronic Materials and Devices (3rd Ed., Safa O. Kasap)
Solution Manual Programming in Haskell (Graham Hutton)
Solution Manual Probability and Random Processes With Applications to Signal Processing and Communications (Miller & Childers)
Solution Manual Logic in Computer Science : Modelling and Reasoning about Systems (2nd Ed., Michael Huth & Mark Ryan)
Solution Manual Introduction to Distributed Algorithms (2nd., Gerard Tel)
Solution Manual Information Theory, Inference and Learning Algorithms (David J. C. MacKay)
Solution Manual Digital Systems Engineering (William Dally & John Poulton)
Solution Manual Concepts in Programming Languages (by John Mitchell)
Solution Manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kealton)
Solution Manual Simulation Modeling and Analysis with Expertfit Software (4th Ed., Averill Law)
Solution Manual System Modeling and Analysis : Foundations of System Performance Evaluation (Hisashi Kobayashi & Brian Mark)
Solution Manual Wireless Communications (Andrea Goldsmith)
Solution Manual Testing of Digital Systems (N. K. Jha & S. Gupta)
Solution Manual Space-Time Coding (Hamid Jafarkhani)
Solution Manual Space-Time Block Coding for Wireless Communications (Erik Larsson & Petre Stoica)
Solution Manual Smart Electronic Materials : Fundamentals and Applications (Jasprit Singh)
Solution Manual Radio-Frequency Electronics : Circuits and Applications (Jon Hagen)
Solution Manual Photonic Devices (Jia-ming Liu)
Solution Manual Networking Wireless Sensors (Bhaskar Krishnamachari)
Solution Manual Mobile Wireless Communications (Mischa Schwartz)
Solution Manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution Manual Fundamentals of Wireless Communication (David Tse &

Pramod Viswanath)
Solution Manual Fundamentals of Modern VLSI Devices (Yuan Taur & Tak H. Ning)
Solution Manual Electronic and Optoelectronic Properties of Semiconductor Structures (Jasprit Singh)
Solution Manual An Introduction to Statistical Signal Processing (Robert M. Gray)
Solution Manual An Introduction to Radio Frequency Engineering (Christopher Coleman)
Solution Manual Algebraic Codes for Data Transmission (Richard Blahut)
Solution Manual Fundamentals of Solid State Electronics (C.T. Sah)
Solution Manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh Razeghi)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Semiconductor Fabrication (Gary S. May, Simon M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (2nd Ed, Simon M. Sze)
Solution Manual Physics of Semiconductor Devices (3rd Ed., Simon M. Sze, Kwok K. Ng)
Solution Manual Electric Machinery (6th Ed., Fitzgerald)
Solution Manual Electric Machinery Fundamentals (4th Ed., Chapman)
Solution Manual Electric Machinery Fundamentals (5th Ed., Chapman)
Solution Manual Electric Machinery and Power System Fundamentals (Chapman)
Solution Manual Local Area Networks (2nd Ed., Keiser)
Solution Manual Signals and Systems : Analysis of Signals Through Linear Systems (1st Ed., M.J. Roberts)
Solution Manual Fundamentals of Signals and Systems (M.J. Roberts)
Solution Manual Introduction to Signals and Systems (Lindner)
Solution Manual Semiconductor Physics and Devices : Basic Principles (3rd Ed., Donald Neamen)
Solution Manual Semiconductor Physics and Devices : Basic Principles (4th Ed., Donald Neamen)
Solution Manual An Introduction to Semiconductor Devices (Donald Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (3rd Ed., Donald Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (4th Ed., Donald Neamen)
Solution Manual Electronic Circuit Analysis and Design (2nd Ed.,

Donald Neamen)
Solution Manual Design for Electrical and Computer Engineers (1st Ed., Ralph Ford & Chris Coulston)
Solution Manual Fundamentals of Modeling and Analyzing Engineering Systems (Cha, Rosenberg, Dym)
Solution Manual Linear Systems (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual A Linear Systems Primer (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual Principles of Linear Systems (Philip E. Sarachik)
Solution Manual Linear Systems Control : Deterministic and Stochastic Methods (Elbert Hendricks, Ole Jannerup & Paul Haase Sørensen)
Solution Manual Power Systems Harmonics : Fundamentals, Analysis and Filter Design (George J. Wakileh)
Solution Manual Principles of Adaptive Filters and Self-learning Systems (Anthony Zaknich)
Solution Manual Algebraic Methods for Nonlinear Control Systems (2nd Ed., Conte, Moog & Perdon)
Solution Manual Discrete-Time Control Systems (2nd Ed., K. Ogata)
Solution Manual Modern Control Engineering - Problems B (3rd Ed., K. Ogata)
Solution Manual Modern Control Engineering (4th Ed., K. Ogata)
Solution Manual Modern Control Engineering (5th Ed., K. Ogata)
Solution Manual Modern Control Engineering - International Version (5th Ed., K. Ogata)
Solution Manual LabVIEW 8 Student Edition (Bishop)
Solution Manual LabVIEW 2009 Student Edition (Bishop)
Solution Manual Learning with LabVIEW 2009 (Bishop)
Solution Manual Introduction to Feedback Control (Li Qiu & Kemin Zhou)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual Feedback Control Systems (4th Ed., Charles L. Phillips, Royce D. Harbor)
Solution Manual Feedback Control Systems (5th Ed., Charles L. Phillips, John Parr)
Solution Manual Feedback Control of Dynamic Systems (4th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (5th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems - International Version (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Predictive Control with Constraints (Jan Maciejowski)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Engineering Problem Solving with C (3rd Ed., Etter)
Solution Manual Engineering Problem Solving with C++ (2nd Ed., Etter)
Solution Manual Process Control Instrumentation Technology (8th Ed., Johnson)

Solution Manual Electrical Power and Controls (2nd Ed., Skvarenina & DeWitt)
Solution Manual Electronics and Computer Math (8th Ed., Deem & Zannini)
Solution Manual Circuits, Signals, and Systems for Bioengineers : A MATLAB-Based Introduction (John Semmlow)
Solution Manual Signals and Systems for Bioengineers : A MATLAB-Based Introduction (2nd Ed., John Semmlow)
Solution Manual VLSI Test Principles and Architectures : Design for Testability (Laung-Terng Wang, Cheng-Wen Wu & Xiaoqing Wen)
Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual Introduction to Mechatronic Design (J. Edward Carryer, Matthew Ohline & Thomas Kenny)
Solution Manual Introduction to Mechatronics and Measurement Systems (2nd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (3rd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (4th Ed., David Alciatore & Michael Histand)
Solution Manual Machine Vision : Theory, Algorithms, Practicalities (3rd Ed., E. R. Davies)
Solution Manual Essential Java for Scientists and Engineers (Brian D. Hahn & Katherine M. Malan)
Solution Manual Guide to Microsoft Excel 2002 for Scientists and Engineers (3rd Ed., Bernard V. Liengme)
Solution Manual 10-Key Touch Key : Developing Speed and Accuracy (Burton)
Solution Manual Introduction to C++ Programming, Brief Version (Y. Daniel Liang)
Solution Manual Introduction to C++ Programming, Comprehensive (Y. Daniel Liang)
Solution Manual C++ for Business Programmers (2nd Ed., John C. Molluzzo)
Solution Manual Introduction to Java Programming - Brief Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (6th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming : Fundamentals First

(6th Ed., Y. Daniel Liang)
Solution Manual Objects First With Java : A Practical Introduction Using BlueJ (3rd Ed., Barnes & Kolling)
Solution Manual Simply Java Programming : An Application-Driven™ Tutorial Approach (Deitel)
Solution Manual ADTs, Data Structures, and Problem Solving with C++ (2nd Ed., Larry R. Nyhoff)
Solution Manual Java : An Introduction to Computing (Joel Adams, Larry R. Nyhoff & Jeffrey Nyhoff)
Solution Manual Advanced Java™ 2 Platform How to Program (Deitel & Santry)
Solution Manual SQL for SQL Server (Bijoy Bordoloi & Douglas B. Bock)
Solution Manual SQL Clearly Explained (3rd Ed., Jan Harrington)
Solution Manual An Introduction to Programming Using Visual Basic 2005 (6th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2008 (7th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2010 (8th Ed., Schneider)
Solution Manual Simply Visual Basic .NET (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Simply Visual Basic 2005 (2nd Ed., Harvey & Paul Deitel)
Solution Manual Simply Visual Basic 2008 (3rd Ed., Harvey & Paul Deitel)
Solution Manual Visual Basic 2005 How to Program (3rd Ed., Deitel)
Solution Manual Visual Basic 2008 How to Program (4th Ed., Deitel)
Solution Manual Visual Basic 2010 How to Program (5th Ed., Deitel)
Solution Manual An Introduction to Programming with Visual Basic 6.0 (4th Ed., Schneider)
Solution Manual Visual Basic.Net Programming (2nd Ed., Jeffrey Tsay)
Solution Manual Simply Visual Basic .NET (Harvey & Paul Deitel & Nieto)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual PC Systems, Installation and Maintenance (2nd Ed., R.P. Beales)
Solution Manual Introduction to Linear Programming (Leonid N. Vaserstein)
Solution Manual Electric Circuits Fundamentals (8th Ed., Thomas Floyd)
Solution Manual Introductory Circuit Analysis (11th Ed., Robert L. Boylestad)
Solution Manual Introductory Circuit Analysis (12th Ed., Robert L. Boylestad)
Solution Manual Principles of Electric Circuits : Conventional Current Version (8th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Conventional Current Version (9th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (8th Ed., Thomas L. Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow

Version (9th Ed., Thomas L. Floyd)
Solution Manual Contemporary Electric Circuits : Insights and Analysis (2nd ed., Strangeway, Petersen, Gassert & Lokken)
Solution Manual Introductory Electronic Devices and Circuits : Electron Flow Version (7th Ed., Paynter)
Solution Manual Introductory Electronic Devices and Circuits : Conventional Flow Version (7th Ed., Paynter)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (2nd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (3rd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (2nd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (3rd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Introductory DC/AC Circuits (6th Ed., Nigel P. Cook)
Solution Manual Introductory DC/AC Electronics (6th Ed., Nigel P. Cook)
Solution Manual Electronic Devices : Conventional Current Version (7th Ed., Floyd)
Solution Manual Electronic Devices : Conventional Current Version (8th Ed., Floyd)
Solution Manual Electronic Devices : Electron Flow Version (7th, Floyd)
Solution Manual Electronic Devices : Electron Flow Version (8th, Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (7th Ed., Thomas L. Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (8th Ed., Floyd & Buchla)
Solution Manual Electronic Devices and Circuit Theory (9th Ed., Boylestad, Nashelsky)
Solution Manual Electronic Devices and Circuit Theory (10th Ed., Boylestad, Nashelsky)
Solution Manual The Science of Electronics : DC/AC (David M. Buchla, Thomas L. Floyd)
Solution Manual The Science of Electronics : Digital (Floyd & Buchla)
Solution Manual The Science of Electronics: Analog Devices (Floyd & Buchla)
Solution Manual Digital Electronics : A Practical Approach (7th Ed., Kleitz)
Solution Manual Digital Electronics : A Practical Approach (8th Ed., Kleitz)
Solution Manual Digital Systems : Principles and Applications (10th Ed., Tocci, Widmer & Moss)
Solution Manual Digital Systems : Principles and Applications (11th Ed., Tocci, Widmer & Moss)
Solution Manual Digital Electronics with VHDL - Quartus II Version (Kleitz)
Solution Manual Digital Fundamentals (9th Ed., Floyd)

Solution Manual Digital Fundamentals (10th Ed., Floyd)
Solution Manual Digital Fundamentals with PLD Programming (Thomas L. Floyd)
Solution Manual The 8051 Microcontroller (4th Ed., MacKenzie & Chung-Wei Phan)
Solution Manual The 8051 Microcontroller and Embedded Systems (2nd Ed., Muhammad Ali Mazidi, Janice Mazidi & Rolin McKinlay)
Solution Manual INTEL Microprocessors 8086/8088, 80186/80188, 80286, 80386, 80486, Pentium, Prentium ProProcessor, Pentium II, III, 4, (7th Ed., Barry B. Brey)
Solution Manual Microcontroller Technology : The 68HC11 (5th Ed., Peter Spasov)
Solution Manual PIC Microcontroller (Muhammad Ali Mazidi, Rolin McKinlay & Danny Causey)
Solution Manual HCS12 Microcontrollers and Embedded Systems : Using Assembly and C with CodeWarrior (Muhammad Ali Mazidi, Danny Causey & Janice Mazidi)
Solution Manual The x86 PC : Assembly Language, Design, and Interfacing (5th Ed., Muhammad Ali Mazidi, Janice Mazidi & Danny Causey)
Solution Manual The AVR Microcontroller and Embedded Systems : Using Assembly and C (Muhammad Ali Mazidi, Sarmad Naimi & and Sepehr Naimi)
Solution Manual Industrial Electronics (James A. Rehg, Glenn J. Sartori)
Solution Manual Programmable Controllers Using the Allen-Bradley SlC-500 Family (2nd Ed., Dave Geller)
Solution Manual Programmable Logic Controllers (James A. Rehg, Glenn J. Sartori)
Solution Manual Fundamentals of Programmable Logic Controllers, Sensors, and Communications (3rd Ed., Jon Stenerson)
Solution Manual An Introduction to Programming with Visual Basic 6.0, Update Edition (4th Ed., Schneider)
Solution Manual C++ Programming Today (1st Ed., Barbara Johnston)
Solution Manual C++ Programming Today (2nd Ed., Barbara Johnston)
Solution Manual Introduction to Data Communications and Networking (Wayne Tomasi)
Solution Manual Introduction to Telecommunications (2nd Ed., Martha Rosengrant)
Solution Manual Network Security Essentials : Applications and Standards (3rd Ed., William Stallings)
Solution Manual Network Security Essentials : Applications and Standards (4th Ed., William Stallings)
Solution Manual Information Security: Principles and Practices (Mark Merkow, James Breithaupt)
Solution Manual Principles and Practice of Information Security (Linda Volonino, Stephen R. Robinson)
Solution Manual Principles of Electronic Communication Systems (3rd Ed., Louis E. Frenzel)
Solution Manual Modern Electronic Communication (8th Ed., Jeff Beasley, Gary M. Miller)

Solution Manual Modern Electronic Communication (9th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Electronic Communications for Technicians (2nd ed., Tom Wheeler)
Solution Manual Concepts In Systems and Signals (2nd Ed., John D. Sherrick)
Solution Manual Understanding Fiber Optics (5th Ed., Jeff Hecht)
Solution Manual Understanding UNIX/LINUX Programming : A Guide to Theory and Practice (Bruce Molay)
Solution Manual Applying PIC18 Microcontrollers : Architecture, Programming, and Interfacing using C and Assembly (Barry Brey)
Solution Manual Electrical Power and Controls (2nd Ed., Timothy L. Skvarenina, William E. DeWitt)
Solution Manual Process Control Instrumentation Technology (8th Ed., Curtis Johnson)
Solution Manual Electrical Machines, Drives and Power Systems (6th Ed., Theodore Wildi)
Solution Manual Introduction to Vacuum Technology (David M. Hata)
Solution Manual Electronic Project Design and Fabrication (6th Ed., Ronald A. Reis)
Solution Manual Technology and Society (3rd Ed., Linda Hjorth, Barbara A. Eichler, Ahmed S. Khan, John Morello)
Solution Manual Solid State Electronic Devices (6th Ed., Ben Streetman, Sanjay Banerjee)
Solution Manual Approaching Quantum Computing (Dan C. Marinescu & Gabriela M. Marinescu)
Solution Manual Foundations of MEMS (Chang Liu)
Solution Manual Foundations of MEMS (2nd Ed., Chang Liu)
Solution Manual Basic Electromagnetics with Applications (Nannapaneni Narayana Rao)
Solution Manual Elements of Engineering Electromagnetics (6th Ed., Nannapaneni Narayana Rao)
Solution Manual Fundamentals of Electromagnetics for Electrical and Computer Engineering (Nannapaneni Narayana Rao)
Solution Manual Digital Design (4th Ed., M. Morris Mano & Michael D. Ciletti)
Solution Manual Digital Design : Principles and Practices Package (4th Ed., John F. Wakerly)
Solution Manual VHDL: A Starter's Guide (2nd Ed., Sudhakar Yalamanchili)
Solution Manual Computer Organization and Architecture : Designing for Performance (7th Ed., William Stallings)
Solution Manual Computer Organization and Architecture : Designing for Performance (8th Ed., William Stallings)
Solution Manual Parallel Programming : Techniques and Applications Using Networked Workstations and Parallel Computers (2nd Ed., Barry Wilkinson & Michael Allen)
Solution Manual Fundamentals of Parallel Processing (Harry F. Jordan & Gita Alaghband)
Solution Manual Digital and Analog Communication Systems (7th Ed.,

Leon W. Couch)
Solution Manual Digital Communications (4th Ed., John Proakis)
Solution Manual Digital Communications (5th Ed., John Proakis)
Solution Manual Principles of Digital Communication and Coding (Andrew J. Viterbi, Jim K. Omura)
Solution Manual Modern Wireless Communications (Simon Haykin, Michael Moher)
Solution Manual Communication Systems Engineering (2nd Ed., John G. Proakis & Masoud Salehi)
Solution Manual ISDN and Broadband ISDN with Frame Relay and ATM (4th Ed., William Stallings)
Solution Manual Data and Computer Communications (8th Ed., William Stallings)
Solution Manual Cryptography and Network Security (4th Ed., William Stallings)
Solution Manual Cryptography and Network Security : Principles and Practice (5th Ed., William Stallings)
Solution Manual Computer Networking with Internet Protocols (William Stallings)
Solution Manual Local and Metropolitan Area Networks (6th Ed., William Stallings)
Solution Manual Probabilistic Systems and Random Signals (Abraham Haddad)
Solution Manual Error Control Coding (2nd Ed., Shu Lin & Daniel J. Costello)
Solution Manual Wireless Communications & Networks (2nd ed., William Stallings)
Solution Manual Wireless Communications and Networking (Jon W. Mark, Weihua Zhuang)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual Digital Control System Analysis and Design (3rd Ed., Charles L. Phillips, H. Troy Nagle)
Solution Manual Signals, Systems, and Transforms (3rd Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms - International Version (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Fundamentals of Signals and Systems Using the Web and Matlab (3rd Ed., Edward Kamen & Bonnie Heck)
Solution Manual Adaptive Filter Theory (4th Ed., Simon Haykin)
Solution Manual Neural Networks and Learning Machines (3rd Ed., Simon Haykin)
Solution Manual Spectral Analysis of Signals (Petre Stoica & Randolph L. Moses)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (2nd Ed., Snyder)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (3rd Ed., Snyder)

Solution Manual Fluency with Information Technology, Brief Edition (Lawrence Snyder)
Solution Manual Excel 2003 Volume II: Advanced Concepts in Excel (5th Ed., Karen Jolly)
Solution Manual Focus on Excel 2003 (Julie Hayward Spooner)
Solution Manual Comprehensive Excel 2002 for Office XP (4th Ed., Karen Jolly)
Solution Manual Ethics for the Information Age (2nd Ed., Michael Quinn)
Solution Manual Ethics for the Information Age (3rd Ed., Michael Quinn)
Solution Manual Computer Science : An Overview (8th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (9th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (10th Ed., J. Glenn Brookshear)
Solution Manual Excel 2003 Volume 1 : Core Concepts in Excel (5th Ed., Karen J. Jolly)
Solution Manual Concise Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Concise Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Extended Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Extended Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Logic and Design of Computer Programs (Jim Messinger)
Solution Manual Absolute C++ (2nd Ed., Walter Savitch)
Solution Manual Absolute C++ (3rd Ed., Walter Savitch)
Solution Manual Absolute C++ (4th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ : The Object of Programming (5th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (6th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (7th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (8th Ed., Walter Savitch)
Solution Manual Problem Solving, Abstraction, and Design using C++ (4th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Problem Solving, Abstraction & Design Using C++ (5th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Starting Out with C++ : From Control Structures through Objects (5th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects (6th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects (7th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects - Brief Version (6th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects - Brief Version (7th Ed., Tony Gaddis)

Solution Manual Starting out with C++ Brief Version Updated (4th Ed., Gaddis & Krupnow)
Solution Manual Starting out with C++ Brief Version (5th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Brief Version Update, Visual C++ .NET (4th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Early Objects (5th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (6th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (7th Ed., Gaddis, Walters & Muganda)
Solution Manual C++ By Dissection (Ira Pohl)
Solution Manual Essential C++ for Engineers and Scientists (2nd Ed., Jeri Hanly)
Solution Manual C++ Coach : Essentials for Introductory Programming (Jeff Salvage)
Solution Manual C++ Primer (4th Ed., Stanley Lippman, Josée Lajoie & Barbara Moo)
Solution Manual Engineering Computation with MATLAB (1st Ed., David Smith)
Solution Manual Engineering Computation with MATLAB (2nd Ed., David Smith)
Solution Manual Absolute Java (1st Ed., Walter Savitch)
Solution Manual Absolute Java (2nd Ed., Walter Savitch)
Solution Manual Absolute Java (3rd Ed., Walter Savitch)
Solution Manual Absolute Java (4th Ed., Walter Savitch)
Solution Manual The Art and Science of Java (Eric Roberts)
Solution Manual Building Java Programs : A Back to Basics Approach (Stuart Reges & Martin Stepp)
Solution Manual Introduction to Programming in Java : An Interdisciplinary Approach (Robert Sedgewick & Kevin Wayne)
Solution Manual Java Foundations: Introduction to Program Design and Data Structures (John Lewis, Peter DePasquale & Joe Chase)
Solution Manual Starting Out with Java : Early Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (4th Ed., Gaddis)
Solution Manual Java Software Solutions (Java 5.0 version) : Foundations of Program Design (4th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (5th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (6th Ed., Lewis & Loftus)
Solution Manual Starting Out with Java : From Control Structures through Data Structures (Gaddis & Muganda)
Solution Manual Object of Java, The: Introduction to Programming Using Software Engineering Principles (2nd Ed, David Riley)

Solution Manual Object-Oriented Programming in Java : A Graphical Approach, Preliminary Edition (Kathryn E. Sanders & Andy van Dam)
Solution Manual Starting Out with Java 5 : Control Structures to Objects (Tony Gaddis)
Solution Manual Starting Out with Java 5 : Early Objects (Tony Gaddis)
Solution Manual Introduction to Programming Using Java : An Object-Oriented Approach (2nd Ed., David Arnow, Scott Dexter & Gerald Weiss)
Solution Manual Computing with Java (2nd Ed., Art Gittleman)
Solution Manual Problem Solving with Java, Update (2nd Ed., Elliot B. Koffman & Ursula Wolz)
Solution Manual Starting Out with Alice : A Visual Introduction to Programming (Tony Gaddis)
Solution Manual Problem Solving and Program Design in C (4th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (5th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (6th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Starting Out with Visual Basic 2005 (3rd Ed., Tony Gaddis & Kip Irvine)
Solution Manual Starting Out with Visual Basic 6 (Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Starting Out with Visual Basic.Net (2nd Ed., Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Computer Programming Fundamentals with Applications in Visual Basic® 6.0 (Mitchell Kerman & Ronald Brown)
Solution Manual Advanced VB.NET Alternate with VB.Net CD's (3rd Ed., Kip Irvine & Tony Gaddis)
Solution Manual Advanced Visual Basic 2005 (4th Ed., Kip Irvine & Tony Gaddis)
Solution Manual C# Software Solutions : Foundations of Program Design (John Lewis)
Solution Manual Problem Solving, Abstraction and Design Using C++, Visual C++.NET Edition (Frank Friedman & Elliot Koffman)
Solution Manual Ada 95 : Problem Solving and Program Design (3rd Ed., Michael Feldman & Elliot Koffman)
Solution Manual Programming and Problem Solving with Delphi (Mitchell Kerman)
Solution Manual C Program Design for Engineers (2nd Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Data Abstraction & Problem Solving with C++ (5th ed., Frank Carrano)
Solution Manual Data Structures and Algorithm Analysis in C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in C++ (3rd Ed., Mark Allen Weiss)
Solution Manual Data Abstraction and Problem Solving with C++ : Walls and Mirrors (4th Ed., Frank Carrano)
Solution Manual Data Structures and Problem Solving Using C++ (2nd Ed., Mark Allen Weiss)

Solution Manual Data Structures and Algorithm Analysis in Java (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures in Java : From Abstract Data Types to the Java Collections Framework (Simon Gray)
Solution Manual Data Abstraction and Problem Solving with Java (2nd Ed., Frank Carrano & Janet Prichard)
Solution Manual Data Structures and Other Objects Using Java (3rd Ed., Michael Main)
Solution Manual Data Structures and Problem Solving Using Java (3rd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Problem Solving Using Java (4th Ed., Mark Allen Weiss)
Solution Manual Java Software Structures : Designing and Using Data Structures (2nd Ed., John Lewis, Joseph Chase)
Solution Manual The Object of Data Abstraction and Structures (using Java) (David Riley)
Solution Manual Classic Data Structures in Java (Timothy Budd)
Solution Manual Data Structures in Java (Thomas A. Standish)
Solution Manual Data Structures, Algorithms and Software Principles in C (Thomas A. Standish)
Solution Manual Introduction to the Design and Analysis of Algorithms (1st Ed., Anany Levitin)
Solution Manual Introduction to the Design and Analysis of Algorithms (2nd Ed., Anany Levitin)
Solution Manual Algorithm Design (Jon Kleinberg & Éva Tardos)
Solution Manual Data Structures and Algorithm Analysis in C (2nd Ed., Mark Allen Weiss)
Solution Manual Computer Algorithms : Introduction to Design and Analysis (3rd Ed., Sara Baase & Allen Van Gelder)
Solution Manual Artificial Intelligence : Structures and Strategies for Complex Problem Solving (6th Ed., George Luger)
Solution Manual Artificial Intelligence : A Modern Approach (2nd Ed., Stuart Russell & Peter Norvig)
Solution Manual The Complete A+ Guide to PC Repair (3rd Ed., Cheryl Schmidt)
Solution Manual The Complete A+ Guide to PC Repair (4th Ed., Cheryl Schmidt)
Solution Manual Complete Computer Repair Textbook (4th Ed., Cheryl Schmidt)
Solution Manual Computer Systems Organization and Architecture (John D. Carpinelli)
Solution Manual CMOS VLSI Design : A Circuits and Systems Perspective (3rd Ed., Neil Weste & David Harris)
Solution Manual CMOS VLSI Design : A Circuits and Systems Perspective (4th Ed., Neil Weste & David Harris)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (4th Ed., Edward Angel)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (5th Ed., Edward Angel)
Solution Manual File Structures : An Object-Oriented Approach with C++

(3rd Ed., Michael J. Folk, Bill Zoellick & Greg Riccardi)
Solution Manual Oracle 10g Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Databases, Types and the Relational Model (3rd Ed., C. J. Date & Hugh Darwen)
Solution Manual Fundamentals of Database Systems (5th Ed., Ramez Elmasri & Shamkant Navathe)
Solution Manual Database Systems : An Application-Oriented Approach, Introductory Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual Database Systems : An Application Oriented Approach, Complete Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (4th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (5th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual Database Systems : The Complete Book (2nd Ed., Hector Garcia-Molina, Jeffrey D. Ullman, Jennifer Widom)
Solution Manual A First Course in Database Systems (3rd Ed., Jeffrey D. Ullman, Jennifer Widom)
Solution Manual Fundamentals of Database Systems/Oracle 9i Programming (4th Ed., Ramez Elmasri, Shamkant B. Navathe & Rajshekhar Sunderraman)
Solution Manual An Introduction to Database Systems (8th Ed., C.J. Date)
Solution Manual Oracle 9i Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Elements of Information Theory (1st Ed., Thomas M. Cover & Joy A. Thomas)
Solution Manual Principles of Database Systems with Internet and Java Applications (Greg Riccardi)
Solution Manual Introduction to Data Mining (Pang-Ning Tan, Michael Steinbach & Vipin Kumar)
Solution Manual Data Mining: A Tutorial Based Primer (Richard Roiger & Michael Geatz)
Solution Manual Learning SQL : A Step-by-Step Guide Using Access (Sikha Bagui, Richard Earp)
Solution Manual Learning SQL : A Step-By-Step Guide Using Oracle (Richard Earp, Sikha Bagui)
Solution Manual Access 2007 Guidebook (6th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Access 2003 Guidebook for Office XP (5th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Implementing Databases in Oracle 9i (John Day & Craig Van Slyke)
Solution Manual Web 101: Making the Net Work for You (2nd Ed., Wendy Lehnert)
Solution Manual Web 101 (3rd Ed., Wendy G. Lehnert & Richard L. Kopec)

Solution Manual Web Developer Foundations : Using XHTML (2nd Ed., Terry Felke-Morris)
Solution Manual Web Development & Design Foundations With XHTML (3rd Ed., Terry Felke-Morris)
Solution Manual Web Development and Design Foundations with XHTML (4th Ed., Terry Felke-Morris)
Solution Manual Internet Effectively : A Beginner's Guide to the World Wide Web (Tyrone Adams & Sharon Scollard)
Solution Manual Light on the Web : Essentials to Making the 'Net Work for You (Wendy G. Lehnert)
Solution Manual Programming the World Wide Web (3rd Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (4th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (5th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (6th Ed., Robert W. Sebesta)
Solution Manual XML: Language Mechanics and Applications (Dwight Peltzer)
Solution Manual Practical Perl with CGI Applications (Elizabeth Chang)
Solution Manual Developing Web Applications with Active Server Pages (Thom Luce)
Solution Manual Structure and Interpretation of Signals and Systems (Edward A. Lee & Pravin Varaiya)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (2nd Ed., Thomas Sudkamp)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (3rd Ed., Thomas Sudkamp)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Software Quality Assurance : From Theory to Implementation (Daniel Galin)
Solution Manual Object Oriented Software Development Using Java (2nd Ed., Xiaoping Jia)
Solution Manual Introduction to the Team Software Process (Watts S. Humphrey)
Solution Manual Software Project Management : A Real-World Guide to Success (Joel Henry)
Solution Manual Software Engineering (7th Ed., Ian Sommerville)
Solution Manual Software Engineering (8th Ed., Ian Sommerville)
Solution Manual Software Engineering (9th Ed., Ian Sommerville)
Solution Manual Software Engineering (3rd Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Software Engineering : Theory and Practice (4th Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Object-Oriented Programming featuring Graphical Applications in Java (Michael Laszlo)
Solution Manual Project-Based Software Engineering : An Object-Oriented Approach (Evelyn Stiller & Cathie LeBlanc)

Solution Manual Engineering of Software, The: A Technical Guide for the Individual (Dick Hamlet & Joe Maybee)
Solution Manual Concepts of Programming Languages (7th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (8th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (9th Ed., Robert W. Sebesta)
Solution Manual Advanced Java : Internet Applications (2nd Ed., Art Gittleman)
Solution Manual Objects to Components with Java 2 Platform (Art Gittleman)
Solution Manual C for Java Programmers (Tomasz Muldner)
Solution Manual Pointers on C (Kenneth Reek)
Solution Manual C++ Programming with Design Patterns Revealed (Tomasz Muldner)
Solution Manual The C++ Programming Language (3rd Ed., Bjarne Stroustrup)
Solution Manual Operating Systems : A Systematic View (6th Ed., William S. Davis & T.M. Rajkumar)
Solution Manual Unix: The Textbook (2nd Ed., Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Operating Systems (3rd Ed., Gary Nutt)
Solution Manual LINUX & UNIX Programming Tools : A Primer for Software Developers (Syed Mansoor Sarwar & Khaled H. Al-Saqabi)
Solution Manual Addison-Wesley's Interactive Linux Tutorial and Reference (Edutrends, Inc.)
Solution Manual Linux : The Textbook (Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Kernel Projects for Linux (Gary Nutt)
Solution Manual OSP : An Environment for Operating System Projects (Michael Kifer & Scott A. Smolka)
Solution Manual Distributed Computing : Principles and Applications (M.L. Liu)
Solution Manual Distributed Operating Systems and Algorithm Analysis (Randy Chow & Theodore Johnson)
Solution Manual Mastering Networks : An Internet Lab Manual (Jorg Liebeherr & Magda El Zarki)
Solution Manual Computer Networking Complete Package (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach Featuring the Internet (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (4th Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (5th Ed., James Kurose & Keith Ross)
Solution Manual Producing Great Sound for Film and Video (3rd Ed., Jay Rose)
Solution Manual Network Management : Principles and Practice (Mani Subramanian)

Solution Manual Computer Security : Art and Science (Matt Bishop)
Solution Manual Introduction to Computer Security (Matt Bishop)
Solution Manual Creating Powerful Brands (4th Ed., Leslie de Chernatony, Malcolm McDonald, Elaine Wallace)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael Quinn)
Solution Manual Modern Recording Techniques (6th Ed., Miles Huber & Runstein)
Solution Manual Creating Powerful Radio : Getting, Keeping and Growing Audiences News, Talk, Information & Personality Broadcast, HD, Satellite & Internet (Valerie Geller)
Solution Manual Electronic Media Law and Regulation (5th Ed., Kenneth Creech)
Solution Manual Electronic Media Management, Revised (5th Ed., Pringle & Starr)
Solution Manual Convergent Journalism an Introduction: Writing and Producing Across Media (Quinn & Filak)
Solution Manual Flash Journalism : How to Create Multimedia News Packages (Mindy McAdams)

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

I do not review the forums, just send me an email. Please do not use emails from servers "LIVE" , all they are take as spam emails in my inbox.

- Math, Statistics & Probability :

Solution manual Advanced Engineering Mathematics (8th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (9th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (10th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (2nd Ed, Michael Greenberg)
Solution manual Advanced Engineering Mathematics (6th Ed., Peter O'Neil)
Solution manual Statistics and Finance : An Introduction (David Ruppert)
Solution manual Statistics and Data Analysis for Financial Engineering (David Ruppert)
Solution Manual Mathematical Statistics for Economics and Business (Ron C. Mittelhammer)
Solution manual Advanced Modern Engineering Mathematics (3rd Ed., Glyn James)
Solution manual Modern Engineering Mathematics (4th Ed., Glyn James)
Solution manual Differential Equations and Dynamical Systems (3rd Ed., Lawrence Perko)

Solution manual Introductory Differential Equations with Boundary Value Problems (3rd Ed., Martha Abell & James Braselton)
Solution manual A Modern Introduction to Differential Equations (2nd Ed., Henry J. Ricardo)
Solution manual Elementary Differential Equations (7th Ed., Boyce)
Solution manual Elementary Differential Equations (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations (9th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (7th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (9th Ed., Boyce & Diprima)
Solution manual Differential Equations : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Differential Equations with Boundary Value Problems : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual An Introduction to Mathematical Cryptography (J. Hoffstein, J. Pipher, J.H. Silverman)
Solution manual Advanced Calculus : A Transition to Analysis (Thomas Dence & Joseph Dence)
Solution manual Calculus : Early Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Introduction to the Finite Element Method : Theory, Programming and Applications (Erik G. Thompson)
Solution manual A Physicist's Guide to Mathematica (2nd Ed., Patrick Tam)
Solution manual Mathematics for Engineers : A Modern Interactive Approach (3rd., Anthony Croft & Robert Davison)

Solution manual Measurement and Data Analysis for Engineering and Science (Patrick F Dunn)
Solution manual Elementary Linear Algebra (4th Ed., Stephen Andrilli & David Hecker)
Solution manual Elementary Linear Algebra Edition Abridged (9th Ed., Anton & Rorres)
Solution manual Elementary Linear Algebra (9th Ed., Anton)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Anton & Rorres)
Solution manual Boundary Value Problems and Partial Differential Equations (6th Ed., David Powers)
Solution manual Introductory Statistics : Using Technology (5th Ed., Prem S. Mann)
Solution manual Introductory Statistics (6th Ed., Prem S. Mann)
Solution manual Introductory Statistics (7th Ed., Prem S. Mann)
Solution manual Basic Real Analysis (Houshang H. Sohrab)
Solution manual Modern Algebra : An Introduction (6th Ed., John Durbin)
Solution manual The Art and Craft of Problem Solving (2nd Ed., Paul Zeitz)
Solution manual Numerical Linear Algebra (Grégoire Allaire, Sidi Mahmoud Kaber, K. Trabelsi)
Solution manual Introductory Statistics for the Behavioral Sciences (6th Ed., Welkowitz, Cohen & Ewen)
Solution manual Statistics : Principles and Methods (5th Ed., Richard Johnson)
Solution manual Statistics : Principles and Methods (6th Ed., Richard Johnson)
Solution manual Statistical Bioinformatics : with R (Sunil K. Mathur)
Solution manual Parameter Estimation and Inverse Problems (Richard Aster, Brian Borchers & Clifford Thurber)
Solution manual Codes : An Introduction to Information Communication and Cryptography (Norman L. Biggs)
Solution manual Geometry and Its Applications (2nd Ed., Walter A. Meyer)
Solution manual Elementary Differential Geometry (2nd Ed., A.N. Pressley)
Solution manual Fractal Geometry : Mathematical Foundations and Applications (2nd Ed., Kenneth Falconer)
Solution manual Analytical and Computational Methods of Advanced Engineering Mathematics (Grant B. Gustafson & Calvin H. Wilcox)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (4th Ed., Daniel Solow)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (5th Ed., Daniel Solow)
Solution manual A Probability Path (Sidney Resnick)
Solution manual Probability, Reliability, and Statistical Methods in Engineering Design (Achintya Haldar, Sankaran Mahadevan)
Solution manual An Engineers Guide to MATLAB (3rd Ed., Magrab, Azarm, Balachandran, Duncan, Herold & Walsh)

Solution manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution manual Modeling Random Processes for Engineers and Managers (James Solberg)
Solution manual Probability and Random Processes with Applications to Signal Processing (3rd Ed., Henry Stark & John W. Woods)
Solution manual Probability, Statistics, and Random Processes for Engineers (4th Ed., Henry Stark & John W. Woods)
Solution manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Applied Statistics for Engineers and Physical Scientists (3rd Ed., Johannes Ledolter & Robert Hogg)
Solution manual Applied Statistics and Probability for Engineers (3rd Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (4th Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (5th Ed., Montgomery & Runger)
Solution manual Engineering Statistics (3rd Ed., Montgomery, Runger & Hubele)
Solution manual Engineering Statistics (4th Ed., Montgomery, Runger & Hubele)
Solution manual Engineering Statistics (5th Ed., Montgomery, Runger & Hubele)
Solution manual Introduction to Statistical Quality Control (5th Ed., Montgomery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Montgomery)
Solution manual Calculus : One Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (8th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Squaring the Circle : Geometry in Art and Architecture (Paul Calter)
Solution manual Technical Mathematics (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus, Canadian Edition (Paul Calter & Michael Calter)
Solution manual Techniques of Problem Solving (Luis Fernández, Haedeh Gooransarab)
Solution manual Probability and Statistics in Engineering (4th Ed., Hines, Montgomery, Goldsman & Borror)
Solution manual A First Course in Design and Analysis of Experiments

(Gary W. Oehlert)
Solution manual Design and Analysis of Experiments (6th Ed., Douglas Montgomery)
Solution manual Design and Analysis of Experiments (7th Ed., Douglas Montgomery)
Solution Manual Experimental Methods for Engineers (8th Ed., Jack P. Holman)
Solution manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)
Solution manual Introduction to the Design & Analysis of Experiments (Canavos & Koutrouvelis)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed., Wadsworth, Stephens, Godfrey)
Solution manual Essential Statistics for Economics, Business and Management (Teresa Bradley)
Solution manual Statistics and Econometrics : Methods and Applications (Ashenfelter, Levine & Zimmerman)
Solution manual Applied Combinatorics (5th Ed., Alan Tucker)
Solution manual Vector Calculus (Miroslav Lovric)
Solution manual Applied Multivariate Techniques (Subhash Sharma)
Solution manual Mathematical Modeling (3rd Ed., Mark Meerschaert)
Solution manual Discrete Mathematics : Mathematical Reasoning and Proof with Puzzles, Patterns, and Games (Douglas Ensley, J. Winston Crawley)
Solution manual Probability, Random Variables and Random Signal Principles (4th Ed., Peyton Z., Jr. Peebles)
Solution manual Introduction to C++, Excel MATLAB & Basic Engineering Numerical Methods V1.1 (Harvey Stenger & Charles Smith)
Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (1st Ed., Amos Gilat & Vish Subramaniam)
Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (2nd Ed., Amos Gilat & Vish Subramaniam)
Solution manual MATLAB : An Introduction with Applications (2nd Ed., Amos Gilat)
Solution manual MATLAB : An Introduction with Applications (3rd Ed., Amos Gilat)
Solution manual MATLAB : An Introduction with Applications (4th Ed., Amos Gilat)
Solution manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution manual Matlab : A Practical Introduction to Programming and Problem Solving (2nd Ed., Stormy Attaway)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett & Horrell)
Solution manual Understanding Analysis (Stephen Abbott)
Solution manual Time Series Analysis With Applications in R (2nd Ed.,

Jonathan D. Cryer & Kung-Sik Chan)
Solution manual Time Series Analysis and Its Applications : With R Examples (2nd Ed., Robert Shumway & David Stoffer)
Solution manual Doing Statistics for Business with Excel : Data, Inference, and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Engineering with Excel (3rd Ed., Ronald W. Larsen)
Solution manual Spreadsheet Tools for Engineers Using Excel 2007 (Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (2nd Ed. Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (3rd Ed. Byron Gottfried)
Solution manual Introduction to Matlab 7 (Etter, Kuncicky & Moore)
Solution manual Introduction to Matlab 6 for Engineers (1st Ed., William Palm III)
Solution manual Introduction to Matlab 7 for Engineers (2nd Ed., William Palm III)
Solution manual Introduction to Matlab for Engineers (3rd Ed., William Palm III)
Solution manual A Concise Introduction to MATLAB (William J Palm III)
Solution manual Numerical Methods for Engineers (Bilal M. Ayyub, Richard H. McCuen)
Solution manual Numerical Methods for Engineers (4th Ed. Steven Chapra, Raymond Canale)
Solution manual Numerical Methods for Engineers (5th Ed. Steven Chapra, Raymond Canale)
Solution manual Numerical Methods for Engineers (6th Ed. Steven Chapra, Raymond Canale)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (1st Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (2nd Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (3rd Ed., Steven Chapra)
Solution manual MATLAB for Engineers (1st Ed., Holly Moore)
Solution manual MATLAB for Engineers (2nd Ed., Holly Moore)
Solution manual Statistics for Engineers and Scientists (1st Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (2nd Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (3rd Ed., William Navidi)
Solution manual Principles of Statistics for Engineers and Scientists (William Navidi)
Solution manual Probability (Jim Pitman)
Solution manual Basic Probability Theory (Robert B. Ash)
Solution manual An Introduction to Stochastic Modeling (3rd Ed., Samuel Karlin & Howard M. Taylor)
Solution manual An Introduction to Stochastic Modeling (4th Ed., Mark Pinsky & Samuel Karlin)

Solution manual Stochastic Calculus for Finance (Steven E. Shreve)
Solution manual Markov Processes for Stochastic Modeling (Oliver Ibe)
Solution manual Mathematical Statistics with Applications (K.M. Ramachandran & Chris Tsokos)
Solution manual Probability : A Graduate Course (Allan Gut)
Solution manual Linear Algebra Done Right (2nd Ed., Sheldon Axler)
Solution manual Precalculus : A Prelude to Calculus (Sheldon Axler)
Solution manual Statistics for Business (Derek Waller)
Solution manual An Introduction to the Mathematics of Financial Derivatives (2nd Ed., Salih Neftci)
Solution manual Elementary Number Theory with Applications (2nd Ed., Thomas Koshy)
Solution manual Introduction to Probability Models (9th Ed., Sheldon Ross)
Solution manual Introduction to Probability Models (10th Ed., Sheldon Ross)
Solution manual Introductory Statistics (2nd Ed., Sheldon Ross)
Solution manual Introductory Statistics (3rd Ed., Sheldon Ross)
Solution manual Introduction to Probability and Statistics for Engineers and Scientists (4th Ed., Sheldon Ross)
Solution manual Basic Mathematics through Applications (4th Ed. by Akst, Bragg)
Solution manual Developmental Mathematics (6th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics (7th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (1st Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (2nd Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Essential Mathematics (2nd Ed., Margaret Lial & Stanley Salzman)
Solution manual Essential Mathematics (3rd Ed., Margaret Lial & Stanley Salzman)
Solution manual Prealgebra & Introductory Algebra (2nd Ed. by Elayn El Martin-Gay)
Solution manual Prealgebra (5th Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Prealgebra (5th Ed., Elayn El Martin-Gay)
Solution manual Prealgebra : An Integrated Approach (Lial & Hestwood)
Solution manual Integrated Arithmetic and Basic Algebra (4th Ed., Jordan & Palow)
Solution manual Introductory Algebra through Applications (1st Ed., Akst & Bragg)
Solution manual Introductory Algebra through Applications (2nd Ed., Akst & Bragg)
Solution manual Beginning Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen R. Angel)
Solution manual Intermediate Algebra with Applications & Visualization (3rd Ed., Rockswold & Krieger)

Solution manual Intermediate Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (3rd Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Algebra for College Students (4th Ed., Mark Dugopolski)
Solution manual Algebra for College Students (5th Ed., Mark Dugopolski)
Solution manual Algebra For College Students (6th Ed., Robert F Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (6th Ed., Lial, Hornsby & McGinnis)
Solution manual Statistics, Data Analysis, and Decision Modeling (3rd Ed., James Evans)
Solution manual Statistics, Data Analysis, and Decision Modeling (4th Ed., James Evans)
Solution manual College Geometry : A Discovery Approach (2nd Ed., David Kay)
Solution manual College Geometry : Using The Geometer's Sketchpad - Preliminary Edition (Barbara Reynolds & William Fenton)
Solution manual College Geometry : A Problem Solving Approach with Applications (2nd Ed., Musser, Trimpe & Maurer)
Solution manual A Survey of Mathematics with Applications (8th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition (8th Ed., Angel, Abbott & Runde)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas: Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Thinking : Problem-Solving and Proofs (2nd Ed., John P. D'Angelo & Douglas B. West)
Solution manual Thinking Mathematically (4th Ed., Robert F. Blitzer)
Solution manual Introduction to Mathematical Thinking: Algebra and Number Systems (Will J. Gilbert & Scott A. Vanstone)
Solution manual Mathematical Reasoning : Writing and Proof (1st Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning : Writing and Proof (2nd Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning for Elementary Teachers (4th Ed., Calvin T. Long & Duane W. DeTemple)
Solution manual Mathematical Reasoning for Elementary Teachers (5th Ed., Long, DeTemple & Millman)
Solution manual Mathematics for Elementary School Teachers (4th Ed., O'Daffer, Charles, Cooney, Dossey & Schielack)
Solution manual Mathematics for Elementary Teachers (2nd Ed., Sybilla Beckmann)

Solution manual Finite Mathematics and Calculus with Applications (7th Ed., Lial, Greenwell & Ritchey)
Solution manual Finite Mathematics and Calculus with Applications (8th Ed., Lial, Greenwell & Ritchey)
Solution manual Additional Calculus Topics (11th Ed., Barnett, Ziegler & Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & Wood)
Solution manual Finite Mathematics for Business, Economics, Life Sciences and Social Sciences (11th Ed., Barnett, Ziegler, Byleen)
Solution manual Finite Mathematics (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus and Its Applications (9th Ed., Bittinger & Ellenbogen)
Solution manual Calculus for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Calculus with Applications (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus with Applications : Brief Version (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Concepts of Calculus with Applications (Martha Goshaw)
Solution manual University Calculus : Elements with Early Transcendentals (Hass, Weir & Thomas, Jr.)
Solution manual Thomas' Calculus, Early Transcendentals: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual Thomas' Calculus: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual University Calculus : Alternate Edition (Hass, Weir & Thomas, Jr.)
Solution manual Differential Equations Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Differential Equations and Boundary Value Problems : Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations with Boundary Value Problems (6th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations (6th Ed., Edwards & Penney)
Solution manual Fundamentals of Differential Equations (7th Ed., Nagle, Saff & Snider)
Solution manual Fundamentals of Differential Equations with Boundary Value Problems (5th Ed., Nagle, Saff & Snider)
Solution manual Differential Equations and Linear Algebra (3rd Ed., Goode & Annin)
Solution manual Discrete Mathematical Structures (6th Ed., Kolman, Busby & Ross)
Solution manual College Algebra Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)

Solution manual College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra : Graphs and Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (3rd Ed., Judith A. Beecher, Judith A. Penna & Marvin L. Bittinger)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual College Algebra (9th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry for College Readiness (Margaret L. Lial & John Hornsby)
Solution manual Algebra and Trigonometry Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Algebra and Trigonometry : Graphs & Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Trigonometry : A Unit Circle Approach (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus (4th Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus : Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Precalculus : Functions and Graphs (3rd Ed. Mark Dugopolski)
Solution manual Precalculus : Graphs & Models and Graphing (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Discrete and Combinatorial Mathematics (5th ed., Ralph P. Grimaldi)
Solution manual Discrete Mathematics (Sherwood Washburn, Thomas Marlowe & Charles T. Ryan)
Solution manual Discrete Mathematics (5th ed., John Dossey, Albert Otto, Lawrence Spence & Charles Vanden Eynden)
Solution manual Mathematics for New Technologies (Don Hutchison & Mark Yannotta)
Solution manual Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures: With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual The Finite Element Method in Engineering (4th Ed., by Rao)
Solution manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution manual Fundamentals of Finite Element Analysis (1st Ed., David V. Hutton)
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kelton)
Solution manual Simulation Modeling and Analysis (4th Ed., Averill Law)
Solution manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution manual Algebra : Form and Function (William McCallum, Eric Connally & Deborah Hughes-Hallett)

Solution manual Algebra : Form and Function, Preliminary Edition (William McCallum, Eric Connally & Deborah Hughes-Hallett)
Solution manual Applied Calculus (2nd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (3rd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (4th Ed., Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (3rd Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (4th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (5th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Single Variable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (5th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (5th Ed., Deborah Hughes-Hallett)
Solution manual Functions Modeling Change : A Preparation for Calculus - Texas Edition (2nd Ed., Eric Connally, Deborah Hughes-Hallett & Andrew M. Gleason)
Solution manual Functions Modeling Change : A Preparation for Calculus (2nd Ed., Eric Connally, Deborah Hughes-Hallett, et al.)
Solution manual Functions Modeling Change : A Preparation for Calculus (3rd Ed., Eric Connally)
Solution manual Differential Equations (A. King, J. Billingham, S. Otto)
Solution manual Regression Methods in Biostatistics : Linear, Logistic, Survival, and Repeated Measures Models (Eric Vittinghoff, David Glidden, Stephen Shiboski, Charles McCulloch)
Solution manual A Modern Introduction to Probability and Statistics : Understanding Why and How (F.M. Dekking, C. Kraaikamp, H.P. Lopuhaä, L.E. Meester)
Solution manual Statistical Methods for the Analysis of Repeated Measurements (Charles S. Davis)
Solution manual Bayesian Core : A Practical Approach to Computational Bayesian Statistics (Jean-Michel Marin, Christian Robert)
Solution manual The Bayesian Choice : From Decision-Theoretic Foundations to Computational Implementation (2nd Ed., Christian Robert)
Solution manual Essentials of Stochastic Processes (Rick Durrett)
Solution manual Methods of Multivariate Statistics (Muni Srivastava)

Solution manual Regression Analysis : Theory, Methods, and Applications (Ashish Sen & Muni Srivastava)
Solution manual Applied Probability and Statistics (Mario Lefebvre)
Solution manual Basic Probability Theory with Applications (Mario Lefebvre)
Solution manual Foundations of Hyperbolic Manifolds (2nd Ed., John Ratcliffe)
Solution manual Fourier and Laplace Transforms (R. J. Beerends , H. G. ter Morsche)
Solution manual Infinite-Dimensional Dynamical Systems (James C. Robinson)
Solution manual Mathematical Methods for Physics and Engineering, (3rd Ed., Riley, Hobson & Bence)
Solution manual Numerical Methods in Engineering with MATLAB (Jaan Kiusalaas)
Solution manual Numerical Methods in Engineering with Python (Jaan Kiusalaas)
Solution manual An Introduction to Numerical Analysis (Endre Suli and David Mayers)
Solution manual Fundamentals of Engineering Numerical Analysis (Parviz Moin)
Solution manual Statistical Design (George Casella)
Solution manual Statistical Inference (2nd Ed., George Casella, Roger L. Berger)
Solution manual Monte Carlo Statistical Methods (2nd Ed., Christian P. Robert, George Casella)
Solution manual Introducing Monte Carlo Methods with R (Christian Robert & George Casella)
Solution manual Introduction to Mathematical Structures and Proofs (Larry J. Gerstein)
Solution manual Analyzing Categorical Data (Jeffrey S. Simonoff)
Solution manual Fundamentals of Complex Analysis with Applications to Engineering, Science, and Mathematics (3rd Ed., E. Saff & Arthur Snider)
Solution manual Probability & Statistics for Engineers & Scientists (8th Ed., Walpole, Myers, Ye)
Solution manual Probability & Statistics for Engineers & Scientists (9th Ed., Walpole, Myers, Ye)
Solution manual Statistics for Engineering and the Sciences (5th Ed., Mendenhall & Sincich)

- Math, Statistics & Probability :

Solution manual A Second Course in Statistics : Regression Analysis (6th Ed., Mendenhall & Sincich)
Solution manual A Second Course in Statistics : Regression Analysis (7th Ed., Mendenhall & Sincich)
Solution manual Miller & Freund's Probability and Statistics for Engineers (7th Ed., Johnson, Miller, Freund)
Solution manual Miller & Freund's Probability and Statistics for Engineers (8th Ed., Johnson, Miller, Freund)
Solution manual Numerical Methods Using Matlab (4th Ed., Mathews & Fink)
Solution manual Applied Numerical Analysis Using MATLAB (2nd Ed., Laurene v. Fausett)
Solution manual Applied Numerical Analysis (7th Ed., Curtis F. Gerald, Patrick O. Wheatley)
Solution manual Friendly Introduction to Numerical Analysis (Bradie)
Solution manual Elementary Linear Algebra (2nd Ed., Spence, Insel & Friedberg)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Kolman & Hill)
Solution manual Introductory Linear Algebra : An Applied First Course (8th Ed., Kolman & Hill)

Solution manual Linear Algebra with Applications (6th Ed., S. Leon)
Solution manual Linear Algebra with Applications (7th Ed., S. Leon)
Solution manual Linear Algebra for Engineers and Scientists Using Matlab (Hardy)
Solution manual Linear Algebra with Applications (3rd Ed., Bretscher)
Solution manual Linear Algebra with Applications (4th Ed., Bretscher)
Solution manual Modern Matrix Algebra (Hill & Kolman)
Solution manual Matrix Methods : Applied Linear Algebra (3rd Ed., Richard Bronson & Gabriel B. Costa)
Solution manual A Transition to Abstract Mathematics : Learning Mathematical Thinking and Writing (2nd Ed., Randall Maddox)
Solution manual Partial Differential Equations and Boundary Value Problems with Fourier Series (2nd ed., Asmar)
Solution manual Applied Partial Differential Equations (4th Ed., Haberman)
Solution manual Technical Calculus (5th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics with Calculus (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Introductory Mathematics (4th Ed., Cook)
Solution manual Mathematics for the Technical Trades (Cook)
Solution manual College Mathematics (7th Ed., Cleaves & Hobbs)
Solution manual Fundamentals of Statistics (2nd Ed., Michael III Sullivan)
Solution manual Fundamentals of Statistics (3rd Ed., Michael III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (2nd Ed., Michael III Sullivan)
Solution manual Modern Elementary Statistics (12th Ed., John E. Freund, Benjamin M. Perles)
Solution manual Statistics : The Art and Science of Learning From Data (Agresti & Franklin)
Solution manual Statistics : The Art and Science of Learning From Data (2nd Ed., Agresti & Franklin)
Solution manual Elementary Statistics : Picturing the World (3rd Ed., Larson & Farber)
Solution manual Elementary Statistics : Picturing the World (4th Ed., Larson & Farber)
Solution manual Elementary Statistics : Picturing the World (5th Ed., Larson & Farber)
Solution manual A First Course in Statistics (9th Ed., McClave & Sincich)
Solution manual A First Course in Statistics (10th Ed., McClave & Sincich)
Solution manual Statistics (10th Ed., McClave & Terry Sincich)
Solution manual Statistics (11th Ed., McClave & Terry Sincich & William Mendenhall)
Solution manual Interactive Statistics (3rd Ed., Martha Aliaga &

Brenda Gunderson)
Solution manual Statistics for the Life Sciences (3rd Ed., Samuels & Witmer)
Solution manual Statistics for the Life Sciences (4th Ed., Samuels, Witmer & Schaffner)
Solution manual Applied Statistics and the SAS Programming Language (5th Ed., Cody & Smith)
Solution manual Biostatistics for the Health Sciences (R. Clifford Blair & Richard Taylor)
Solution manual Biostatistics : How It Works (Steve Selvin)
Solution manual Business Statistics : First Course (4th Ed., Levine, Krehbiel & Berenson)
Solution manual Business Statistics : First Course (5th Ed., Levine, Krehbiel & Berenson)
Solution manual Course in Business Statistics (4th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision Making Approach (6th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (7th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (8th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Statistics for Business & Economics (10th Ed., McClave, Benson & Sincich)
Solution manual Statistics for Managers Using Excel (5th Ed., Levine)
Solution manual Statistics for Managers Using Microsoft Excel (4th Ed., Levine, Stephan, Krehbiel & Berenson)
Solution manual Statistics for Business and Economics (5th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (6th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (7th Ed., Newbold, Carlson & Thorne)
Solution manual Basic Business Statistics : Concepts and Applications (10th Ed., Berenson, Krehbiel & Levine)
Solution manual Basic Business Statistics (11th Ed., Berenson, Levine & Krehbiel)
Solution manual John E. Freund's Mathematical Statistics with Applications (7th Ed., Miller)
Solution manual Probability and Statistical Inference (7th Ed., Hogg & Tanis)
Solution manual Probability and Statistical Inference (8th Ed., Hogg & Tanis)
Solution manual Introduction to Mathematical Statistics (6th Ed., Hogg, Craig & McKean)
Solution manual Introduction to Mathematical Statistics and Its Applications (4th Ed., Larsen & Marx)
Solution manual Introduction to Mathematical Statistics and Its Applications (5th Ed., Larsen & Marx)
Solution manual A Brief Course in Mathematical Statistics (Hogg &

Tanis)
Solution manual Fundamentals of Probability, with Stochastic Processes (3rd Ed., Saeed Ghahramani)
Solution manual A First Course in Probability (7th Ed., Sheldon Ross)
Solution manual A First Course in Probability (8th Ed., Sheldon Ross)
Solution manual Applied Multivariate Statistical Analysis (6th Ed., Johnson & Wichern)
Solution manual Multivariate Data Analysis (6th Ed., Hair, Black, Babin, Anderson & Tatham)
Solution manual Multivariate Data Analysis (7th Ed., Hair, Black, Babin, Anderson)
Solution manual Essential MATLAB for Engineers and Scientists (3rd Ed., Brian Hahn & Dan Valentine)
Solution manual Essential MATLAB for Engineers and Scientists (4th Ed., Brian Hahn & Dan Valentine)
Solution manual Introduction to Applied Statistical Signal Analysis : Guide to Biomedical and Electrical Engineering Applications (3rd Ed. Richard Shiavi)
Solution manual Construction Mathematics (Surinder Virdi & Roy Baker)
Solution manual Numerical Methods in Biomedical Engineering (Stanley Dunn, Alkis Constantinides & Prabhas Moghe)
Solution manual Probability and Statistics with Integrated Software Routines (Ronald Deep)
Solution manual Finite Element Analysis with Error Estimators : An Introduction to the FEM and Adaptive Error Analysis for Engineering Students (J. Akin)
Solution manual Basic Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (5th Ed., John Bird)
Solution manual Higher Engineering Mathematics (5th Ed., John Bird)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Mathematics for Electrical Engineering and Computing (Mary Attenborough)
Solution manual Probability and Random Processes : With Applications to Signal Processing and Communications (Miller & Childers)
Solution manual Introductory Statistics for Engineering Experimentation (Peter Nelson, Karen Copeland & Marie Coffin)
Solution manual Understanding Engineering Mathematics (Bill Cox)
Solution manual Statistics And Probability For Engineering Applications With Microsoft Excel (Decoursey)
Solution manual Business Math Using Calculators : With 10-Key Computer Assisted Instruction (Burton)
Solution manual Mathematics for Economics and Business (5th Ed., Ian Jacques)
Solution manual Business Math, Brief (7th Ed., Cleaves & Hobbs)
Solution manual Math for Merchandising: A Step-by-Step Approach (3rd Ed., Moore)
Solution manual Mathematics for Business (7th Ed., Salzman , Miller & Clendenen)
Solution manual Mathematics for Business (8th Ed., Salzman , Miller &

Clendenen)
Solution manual Basic College Mathematics with Early Integers (K. Elayn Martin-Gay)
Solution manual Developmental Mathematics (K. Elayn Martin-Gay)
Solution manual An Introduction to Analysis (3rd Ed., William Wade)
Solution manual An Introduction to Analysis (4th Ed., William Wade)
Solution manual A Friendly Introduction to Analysis (2nd Ed., Witold A.J. Kosmala)
Solution manual Advanced Calculus (Gerald Folland)
Solution manual Analysis : With an Introduction to Proof (4th Ed., Steven R. Lay)
Solution manual Essentials of Basic College Mathematics (John Jr Tobey, Jr., Jeffrey Slater)
Solution manual Basic College Mathematics (5th Ed., John Tobey & Jeffrey Slater)
Solution manual Prealgebra (3rd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen Angel)
Solution manual Elementary Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)
Solution manual Elementary Algebra for College Students (7th Ed., Allen R. Angel)
Solution manual Experiencing Introductory and Intermediate Algebra Through Functions and Graphs (3rd Ed., JoAnne Thomasson & Robert Pesut)
Solution manual Introductory Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Beginning Algebra (6th Ed., John Jr Tobey & Jeffrey Slater)
Solution manual Beginning Algebra : Early Graphing (Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Beginning and Intermediate Algebra (2nd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Introductory Algebra (4th Ed., Robert Blitzer)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (7th Ed., Allen Angel)
Solution manual Intermediate Algebra (Michael Sullivan III & Katherine Struve)
Solution manual Intermediate Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Essentials of Intermediate Algebra for College Students (Robert Blitzer)
Solution manual Intermediate Algebra (4th Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (5th Ed., Robert Blitzer)
Solution manual Algebra A Combined Approach (3rd Ed., K. Elayn Martin-Gay)
Solution manual Elementary & Intermediate Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)

Solution manual Essentials of Introductory and Intermediate Algebra for College Students (Robert F. Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (5th Ed., Robert F Blitzer)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (4th Ed., Robert Blitzer)
Solution manual College Algebra Essentials (2nd Ed., Robert F. Blitzer)
Solution manual College Algebra : An Early Functions Approach (Robert F. Blitzer)
Solution manual College Algebra : Concepts Through Functions (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra : Concepts Through Functions (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Essentials of College Algebra : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Algebra and Trigonometry (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry (3rd Ed., Robert F. Blitzer)
Solution manual Algebra and Trigonometry: An Early Functions Approach (Robert Blitzer)
Solution manual Algebra & Trigonometry (7th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry Enhanced With Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Trigonometry (7th Ed., Michael Sullivan)
Solution manual Trigonometry (8th Ed., Michael Sullivan)
Solution manual Trigonometry Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Robert Blitzer)
Solution manual Precalculus (4th Ed., Robert Blitzer)
Solution manual Precalculus (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus : A Right Triangle Approach (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus Essentials (2nd Ed., Robert Blitzer)
Solution manual Precalculus Essentials (3rd Ed., Robert Blitzer)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (2nd Ed., Michael Sullivan III &

Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (5th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Essentials : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Excursions in Modern Mathematics (5th Ed., Peter Tannenbaum)
Solution manual Excursions In Modern Mathematics with Mini-Excursions (6th Ed., Peter Tannenbaum)
Solution manual Quantitive Reasoning & the Environment (Greg Langkamp & Joseph Hull)
Solution manual Fundamentals of Mathematics (10th Ed., William M Setek & Michael A Gallo)
Solution manual Learning Math in Elementary and Middle School & IMAP Package (4th Ed., Cathcart, Pothier, Vance & Bezuk)
Solution manual Understanding the Math You Teach: Content and Methods for Prekindergarten Through Grade 4 (Anita C. Burris)
Solution manual Algebra Connections (Ira J. Papick & UMO University of Missouri)
Solution manual Calculus Connections (Asma Harcharras, Dorina Mitrea)
Solution manual Data Analysis and Probability Connections: Mathematics for Middle School Teachers (Debra A. Perkowski & Michael Perkowski)
Solution manual Geometry Connections (John K. Beem)
Solution manual Elementary Math Modeling Updated (2nd Ed., Mary Ellen Davis & C. Henry Edwards)
Solution manual Additional Calculus Topics (11th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Finite Math and Its Application (9th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Finite Mathematics and Its Application (10th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and social Sciences (11th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Additional Calculus Topics (9th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Brief Calculus and Its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Brief Calculus and Its Applications (12th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (10th Ed., Larry Goldstein, David Schneider, David Lay)

Solution manual Calculus and its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (12th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Calculus, Early Transcendentals (6th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus, Early Transcendentals (7th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus (9th Ed., Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus Early Transcendentals (Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Calculus (6th Ed., Henry Edwards & David E. Penney)
Solution manual Single Variable Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Vector Calculus (3rd Ed., Susan Colley)
Solution manual Applied Linear Algebra (Peter Olver & Cheri Shakiban)
Solution manual Differential Equations and Linear Algebra (2nd Ed., Jerry Farlow, James E. Hall, Jean Marie McDill & Beverly West)
Solution manual Differential Equations and Linear Algebra (2nd Ed., C. Henry Edwards & David Penney)
Solution manual Differential Equations and Linear Algebra (3rd Ed., C. Henry Edwards & David Penney)
Solution manual Differential Equations (2nd Ed., John Polking, Al Boggess & David Arnold)
Solution manual Differential Equations with Boundary Value Problems (2nd ed., John Polking, Al Boggess & David Arnold)
Solution manual Discrete Mathematics with Graph Theory (3rd Ed., Edgar Goodaire & Michael Parmenter)
Solution manual Essential Discrete Mathematics (Todd Feil & Joan Krone)
Solution manual Statistical Methods for the Social Sciences (4th Ed., Agresti & Finlay)
Solution manual A Brief Course in Mathematical Statistics (Tanis & Hogg)
Solution manual Business Mathematics, 10th Ed. (Miller, Salzman & Clendenen)
Solution manual Elementary Statistics (6th Ed., Weiss)
Solution manual Elementary Statistics (7th Ed., Weiss)
Solution manual Elementary Statistics (8th Ed., Weiss)
Solution manual Elementary Statistics Using the Graphing Calculator: For the TI-83/84 Plus (Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus

Calculator (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Update (9th Ed., Mario Triola)
Solution manual Elementary Statistics (10th Ed., Mario Triola)
Solution manual Elementary Statistics (11th Ed., Mario Triola)
Solution manual Elementary Statistics - Technology Update (11th Ed., Mario Triola)
Solution manual Essentials of Statistics (2nd Ed., Mario Triola)
Solution manual Essentials of Statistics (3rd Ed., Mario Triola)
Solution manual Essentials of Statistics (4th Ed., Mario Triola)
Solution manual Introductory Statistics (7th Ed., Neil Weiss)
Solution manual Introductory Statistics (8th Ed., Neil Weiss)
Solution manual Introductory Statistics (9th Ed., Neil Weiss)
Solution manual Intro Stats (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Intro Stats (3rd Ed., De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Elementary Statistics Using Excel (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (4th Ed., Mario Triola)
Solution manual Stats : Modeling the World (2nd Ed., Bock, Velleman & De Veaux)
Solution manual Stats : Modeling the World (3rd Ed., Bock, Velleman & De Veaux)
Solution manual Statistical Reasoning for Everyday Life (2nd Ed., Bennett, Briggs & Triola)
Solution manual Statistical Reasoning for Everyday Life (3rd Ed., Bennett, Briggs & Triola)
Solution manual Business Statistics (Triola & Franklin)
Solution manual Business Statistics (1st Ed., Sharpe, De Veaux & Velleman)
Solution manual Business Statistics (2nd Ed., Sharpe, De Veaux & Velleman)
Solution manual Business Statistics : A First Course (Sharpe, De Veaux & Velleman)
Solution manual Biostatistics for the Biological and Health Sciences with Statdisk (Marc Triola & Mario Triola)
Solution manual Biostatistics : A Guide to Design, Analysis and Discovery (2nd Ed., Ronald Forthofer, Eun Lee, Mike Hernandez)
Solution manual A Course in Probability (Neil A. Weiss)
Solution manual Probability and Statistics (3rd Ed., DeGroot & Schervish)
Solution manual Probability and Statistics (4th Ed., DeGroot & Schervish)
Solution manual Statistics for Science and Engineering (John Kinney)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (1st Ed., Chartrand, Polimeni & Zhang)

Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (2nd Ed., Chartrand, Polimeni & Zhang)
Solution manual Elementary Number Theory (5th Ed., Kenneth H. Rosen)
Solution manual History of Mathematics : Brief Version (Victor J. Katz)
Solution manual Geometry : An Investigative Approach (2nd Ed., Phares G. O'Daffer & Stanley Clemens)
Solution manual A First Course in Abstract Algebra (7th Ed., John Fraleigh)
Solution manual Complex Variables with Applications (3rd Ed., David Wunsch)
Solution manual Numerical Analysis with CD-ROM (Timothy Sauer)
Solution manual Numerical Analysis and Scientific Computation (Jeffery Leader)
Solution manual Linear Algebra and Differential Equations (Gary Peterson & James Sochacki)
Solution manual Elementary Differential Equations (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Elementary Differential Equations with Boundary Value Problems (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Fundamentals of Differential Equations (6th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Fundamentals of Differential Equations and Boundary Value Problems (4th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Linear Algebra and Its Applications with CD-ROM, Update (3rd Ed., David C. Lay)
Solution manual Introduction to Linear Algebra (5th ed., Lee W. Johnson, R. Dean Riess & Jimmy T. Arnold)
Solution manual Calculus for the Life Sciences (Marvin L. Bittinger, Neal Brand & John Quintanilla)
Solution manual Calculus with Applications for the Life Sciences (Raymond N. Greenwell, Nathan P. Ritchey & Margaret L. Lial)
Solution manual Calculus : An Integrated Approach to Functions and Their Rates of Change, Preliminary Edition (Robin J. Gottlieb)
Solution manual Calculus (9th Ed., George B. Thomas, Jr. & Ross L. Finney)
Solution manual Thomas' Calculus, Alternate Edition (9th Ed., George B. Thomas, Jr. & Ross L. Finney)
Solution manual Calculus : A Complete Course (2nd Ed., Ross L. Finney, Franklin D. Demana, Bert K. Waits & Daniel Kennedy)
Solution manual Calculus (Elgin H. Johnston & Jerry Mathews)
Solution manual Thomas' Calculus, Updated (10th Ed., George B. Thomas, Jr., Ross L. Finney, Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Thomas' Calculus Early Transcendentals (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual University Calculus (Joel D. Hass, Maurice D. Weir &

George B. Thomas, Jr.)
Solution manual University Calculus : Alternate Edition (Joel D. Hass, Maurice D. Weir & George B. Thomas, Jr.)
Solution manual Thomas' Calculus, Media Upgrade (11th Ed., George B. Thomas, Jr., Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus, Early Transcendentals, Media Upgrade (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Calculus with Applications (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Calculus with Applications, Brief Version (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Finite Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematical Ideas (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (3rd Ed., Bennett & Briggs)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (4th Ed., Bennett & Briggs)
Solution manual A Problem Solving Approach to Mathematics (9th Ed., Billstein, Libeskind & Lott)
Solution manual A Survey of Mathematics with Applications (7th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition (7th Ed., Angel, Abbott & Runde)
Solution manual Mathematics All Around (3rd Ed., Tom Pirnot)
Solution manual Mathematics for Elementary School Teachers (3rd Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary School Teachers (4th Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary Teachers with Activities (Sybilla Beckmann)
Solution manual Mathematics for Elementary Teachers plus Activities

Manual (2nd Ed., Sybilla Beckmann)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (8th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (9th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (10th Ed., Billstein, Libeskind & Lott)
Solution manual Essentials of Using and Understanding Mathematics : A Quantitative Reasoning Approach (Jeffrey Bennett & William Briggs)
Solution manual Technical Calculus with Analytic Geometry (4th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus Metric Version (8th Ed., Allyn Washington)
Solution manual Introduction to Technical Mathematics (5th Ed., Washington, Triola & Reda)
Solution manual A Graphical Approach to Precalculus (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits (3rd Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Precalculus : Functions and Graphs (5th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphical, Numerical, Algebraic (7th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual Package (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Functioning in the Real World : A Precalculus Experience (2nd Ed., Gordon, F. Gordon, Tucker & Siegel)
Solution manual Precalculus with Modeling and Visualization (3rd Ed., Gary K. Rockswold)
Solution manual Precalculus with Modeling and Visualization (4th Ed., Gary K. Rockswold)
Solution manual Precalculus (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Mark Dugopolski)
Solution manual Precalculus (4th Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (2nd Ed., Mark

Dugopolski)
Solution manual Precalculus : Functions and Graphs (3rd Ed., Mark Dugopolski)
Solution manual Fundamentals of Precalculus (Mark Dugopolski)
Solution manual Trigonometry (1st Ed., Mark Dugopolski)
Solution manual Trigonometry (2nd Ed., Mark Dugopolski)
Solution manual Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual Trigonometry (8th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry (9th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry : A Circular Function Approach (Marie Aratari)
Solution manual A Graphical Approach to Algebra and Trigonometry (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Algebra and Trigonometry (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Algebra and Trigonometry : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Algebra and Trigonometry (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Algebra and Trigonometry (3rd Ed., Beecher, Penna & Bittinger)
Solution manual College Algebra and Trigonometry (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry (4th Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry : A Unit Circle Approach (5th Ed., Mark Dugopolski)
Solution manual Algebra and Trigonometry with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Algebra and Trigonometry with Modeling and Visualization (4th Ed., Gary Rockswold)
Solution manual College Algebra and Trigonometry (3rd Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra and Trigonometry (4th Ed., Lial, Hornsby & Schneider)
Solution manual A Graphical Approach to College Algebra (4th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual A Graphical Approach to College Algebra (5th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual College Algebra : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra (J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)

Solution manual College Algebra with Modeling and Visualization (4th Ed., Gary Rockswold)
Solution manual Essentials of College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Essentials of College Algebra (Lial, Hornsby & Schneider)
Solution manual Essentials of College Algebra, Alternate Edition (Lial, Hornsby & Schneider)
Solution manual Essentials of College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra (3rd Ed., Mark Dugopolski)
Solution manual College Algebra (4th Ed., Mark Dugopolski)
Solution manual College Algebra (5th Ed., Mark Dugopolski)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (1st Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (2nd Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra (2nd Ed., Judith Beecher, Judith Penna & Marvin Bittinger)
Solution manual College Algebra (9th Ed., Margaret Lial, John Hornsby & David Schneider)
Solution manual Essentials of Geometry for College Students (2nd Ed., Margaret Lial, Barbara Brown, Arnold Steffenson & L. Murphy Johnson)
Solution manual Algebra for College Students (5th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (4th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Elementary and Intermediate Algebra (1st Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Elementary and Intermediate Algebra (3rd Ed., Tom Carson, Bill Jordan)
Solution manual Introductory and Intermediate Algebra : A Combined Approach (2nd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra through Applications (2nd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Elementary and Intermediate Algebra (1st Ed., George

Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., George Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra (3rd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra : Concepts and Applications (4th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Beginning and Intermediate Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Foundations of Mathematics (Marvin Bittinger & Judith Penna)
Solution manual Intermediate Algebra (9th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra (10th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra : Graphs & Models (3rd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra (9th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra with Applications and Visualization (2nd Ed., Gary Rockswold & Terry Krieger)
Solution manual Intermediate Algebra (Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra (3rd Ed., Tom Carson, Bill Jordan)
Solution manual Intermediate Algebra: Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Beginning Algebra (10th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Prealgebra and Introductory Algebra (Marvin Bittinger & David Ellenbogen)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Introductory Algebra (9th Ed., Marvin Bittinger)
Solution manual Introductory Algebra (10th Ed., Marvin Bittinger)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Margaret Lial, John Hornsby, Terry McGinnis & Diana Hestwood)
Solution manual Prealgebra and Introductory Algebra (3rd Ed., Margaret Lial, Diana Hestwood, John Hornsby & Terry McGinnis)
Solution manual Elementary Algebra with Early Systems of Equations (Tom Carson & Ellyn Gillespie)

Solution manual Elementary Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Elementary Algebra (3rd Ed., Tom Carson, Bill Jordan)
Solution manual Elementary Algebra : Concepts and Applications (6th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra : Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Introductory Algebra (Richelle Blair)
Solution manual Introductory Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory Algebra (9th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Integrated Arithmetic and Basic Algebra (3rd Ed., Bill Jordan & William Palow)
Solution manual Introductory Algebra through Applications (Geoffrey Akst & Sadie Bragg)
Solution manual Prealgebra (3rd Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Prealgebra (5th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Prealgebra (2nd Ed., Tom Carson)
Solution manual Basic Mathematics (9th Ed., Marvin Bittinger)
Solution manual Basic Mathematics (10th Ed., Marvin Bittinger)
Solution manual Basic Mathematics Preliminary Edition (Robert Prior)
Solution manual Basic Mathematics with Early Integers (Marvin Bittinger & Judith Penna)
Solution manual Basic College Mathematics (7th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic College Mathematics (8th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Fundamental Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Wave Motion (J. Billingham & A. C. King)
Solution manual Solving ODEs with MATLAB (L. F. Shampine, I. Gladwell & S. Thompson)
Solution manual Numerical Solution of Partial Differential Equations: An Introduction (2nd Ed., K. W. Morton & D. F. Mayers)
Solution manual Measure Theory and Filtering : Introduction and Applications (Lakhdar Aggoun & Robert J. Elliott)
Solution manual Mathematical Models in Biology : An Introduction (Elizabeth S. Allman & John A. Rhodes)
Solution manual Insurance Risk and Ruin (David C. M. Dickson)
Solution manual Data Analysis and Graphics Using R : An Example-based Approach (2nd Ed., John Maindonald & John Braun)

Solution manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution manual Convex Optimization (Stephen Boyd & Lieven Vandenberghe)
Solution manual Concrete Abstract Algebra : From Numbers to Gröbner Bases (Niels Lauritzen)
Solution manual A Concrete Approach to Abstract Algebra : From the Integers to the Insolvability of the Quintic (Jeffrey Bergen)
Solution manual Calculus : Concepts and Methods (Ken Binmore & Joan Davies)
Solution manual An Introduction to Partial Differential Equations (Yehuda Pinchover & Jacob Rubinstein)
Solution manual An Introduction to Ordinary Differential Equations (James C. Robinson)
Solution manual An Introduction to Mathematical Physiology and Biology (2nd Ed., J. Mazumdar)
Solution manual An Introduction to Financial Option Valuation : Mathematics, Stochastics and Computation (Desmond Higham)
Solution manual An Interactive Introduction to Mathematical Analysis (Jonathan Lewin)
Solution manual An Introduction to Mathematical Finance: Options and Other Topics (1st Ed., Sheldon M. Ross)

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

I do not review the forums, just send me an email. Please do not use emails from servers "LIVE" , all they are take as spam emails in my inbox.

- Physics & Astronomy :

Solution manual Introduction to Solid State Physics (8th Ed., Charles Kittel)
Solution manual Quantum Physics (3rd Ed., Stephen Gasiorowicz)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Physics of Solar Energy (C. Julian Chen)
Solution manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution manual Physics of Condensed Matter (Prasanta Kumar Misra)
Solution Manual Human Body Dynamics (Aydin Tozeren)
Solution manual Solid-State Physics : Introduction to the Theory (2nd Ed., James Patterson, Bernard Bailey)
Solution manual Introduction to Nuclear Engineering (3rd Ed., John R. Lamarsh & Anthony J. Baratta)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Fundamentals of Electromagnetics with Engineering Applications (Stuart M. Wentworth)
Solution manual Physics (7th Ed. by Paul E. Tippens)
Solution manual Physics (6th Ed., Cutnell & Johnson)
Solution manual Physics (7th Ed., Cutnell & Johnson)
Solution manual Physics (8th Ed., Cutnell & Johnson)

Solution manual Essentials of Physics (Cutnell & Johnson)
Solution manual Understanding Physics (1st Ed., Cummings, Laws, Redish & Cooney)
Solution manual Introductory Physics : Building Understanding (Jerold Touger)
Solution manual Physics Matters : An Introduction to Conceptual Physics (James Trefil & Robert Hazen)
Solution manual How Things Work : The Physics of Everyday Life (3rd Ed., Louis Bloomfield)
Solution manual An Introduction to Modern Astrophysics (2nd Ed., Bradley W. Carroll & Dale A. Ostlie)
Solution manual Foundations of Astrophysics (Barbara Ryden & Bradley Peterson)
Solution manual Physics (5th Ed., Halliday, Resnick, Krane)
Solution manual Fundamentals of Physics (6th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (7th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (8th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (9th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (3rd Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (4th Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (5th Ed., Thomas Griffith)
Solution manual Physics of Everyday Phenomena : A Conceptual Introduction to Physics (6th Ed., W. Thomas Griffith & Juliet W. Brosing)
Solution manual Integrated Science (2nd Ed., Tillery et al.)
Solution manual Integrated Science (3rd Ed., Tillery et al.)
Solution manual Integrated Science (4th Ed., Tillery et al.)
Solution manual Physical Science (5th Ed., Tillery)
Solution manual Physical Science (6th Ed., Tillery)
Solution manual Physical Science (7th Ed., Tillery)
Solution manual Physical Science (8th Ed., Tillery)
Solution manual The Physical Universe (11th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual The Physical Universe (12th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual Physics of the Life Sciences (Jay Newman)
Solution manual Introduction to Biomedical Engineering (2nd Ed., John Enderle, Susan Blanchard, Joseph Bronzino)
Solution manual Introduction to Biomedical Engineering (3rd Ed., John Enderle, Joseph Bronzino)
Solution manual Physics in Biology and Medicine (3rd Ed., Paul Davidovits)
Solution manual Optics (1st Ed., Ajoy Ghatak)

Solution manual Optics (4th Ed., Eugene Hecht)
Solution manual Nonlinear Optics (3rd Ed., Robert Boyd)
Solution manual Introduction to Optics (3rd Ed., Frank L Pedrotti, Leno M Pedrotti & Leno S Pedrotti)
Solution manual Principles of Physical Optics (Charles Bennett)
Solution manual Optics : Principles and Applications (Kailash Sharma)
Solution manual Continuum Electromechanics (James R. Melcher)
Solution manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution manual Matter and Interactions I : Modern Mechanics (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 1 : Modern Mechanics (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions II : Electric and Magnetic Interactions (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 2 : Electric and Magnetic Interactions (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution manual Introduction to Statistical Physics (Kerson Huang)
Solution manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution manual An Introduction to Thermodynamics and Statistical Mechanics (2nd Ed, Keith Stowe)
Solution manual Equilibrium and Non-Equilibrium Statistical Thermodynamics (Michel Le Bellac, Fabrice Mortessagne & G. George Batrouni)
Solution manual Elements of Statistical Mechanics: With an Introduction to Quantum Field Theory and Numerical Simulation (Ivo Sachs & Siddhartha Sen)
Solution manual Quantum Transport (2nd Ed., Supriyo Datta)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Statistical Mechanics (2nd Ed., R.K. Pathria)
Solution manual Statistical Mechanics (3rd Ed., R.K. Pathria , Paul D. Beale)
Solution manual Quantum Mechanics (Gennaro Auletta, Mauro Fortunato & Giorgio Parisi)
Solution manual Fundamentals of Quantum Mechanics (C.L. Tang)
Solution manual Astronomy : A Physical Perspective (2nd Ed., Marc L. Kutner)
Solution manual Classical Mechanics (Douglas Gregory)
Solution manual Electromagnetic Field Theory Fundamentals (2nd Ed., Singh Guru & Hiziroglu)
Solution manual Special Relativity : From Einstein to Strings (P.M. Schwarz & J.H. Schwarz)
Solution manual Gravity : An Introduction to Einstein's General Relativity (James Hartle)
Solution manual A Short Course in General Relativity (3rd Ed., James Foster & J. David Nightingale)
Solution manual Statistical Thermodynamics (Normand Laurendeau)
Solution Manual Introductory Statistical Thermodynamics (Nils

Dalarsson , Mariana Dalarsson & Leonardo Golubovic)
Solution manual Statistical Thermodynamics and Microscale Thermophysics (Van P. Carey)
Solution manual Thermal Physics (Ralph Baierlein)
Solution manual Topics in Atomic Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Foundations of Quantum Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Essential University Physics (2nd Ed., Richard Wolfson)
Solution manual Essential College Physics (Andrew Rex, Richard Wolfson)
Solution manual Applied Physics (8th Ed., Dale Ewen, Ronald Nelson, Neill Schurter & Erik Gundersen)
Solution manual Applied Physics (9th Ed., Dale Ewen, Neill Schurter & Erik Gundersen)
Solution manual Analytical Mechanics (7th Ed., Grant R. Fowles, George Cassiday)
Solution manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution manual Diagnostic Ultrasound Imaging : Inside Out (Thomas Szabo)
Solution manual Astronomy : A Beginner's Guide to the Universe (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual The Cosmic Perspective (5th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Cosmic Perspective Media Update (4th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (4th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual Astronomy Today (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual Astronomy Today (6th Ed., Eric Chaisson & Steve McMillan)
Solution manual Conceptual Physical Science (3rd Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Physical Science (4th Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Integrated Science (Paul G. Hewitt, Suzanne Lyons, John A. Suchocki & Jennifer Yeh)
Solution manual Physics : Concepts & Connections (4th Ed., Art Hobson)
Solution manual Physics : Concepts & Connections (5th Ed., Art Hobson)

Solution manual Conceptual Physics (10th Ed., Paul Hewitt)
Solution manual Conceptual Physics (11th Ed., Paul Hewitt)
Solution manual Conceptual Physics Fundamentals (Paul G. Hewitt)
Solution manual College Physics : A Strategic Approach (2nd Ed., Randall D. Knight, Brian Jones, Stuart Field)
Solution manual College Physics (6th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (7th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (8th Ed., Young & Geller)
Solution manual Modern Physics (2nd Ed., Randy Harris)
Solution manual Modern Physics for Scientists and Engineers (John Morrison)
Solution manual Solid State Physics : Essential Concepts (David Snoke)
Solution manual Physics with Mastering Physics (3rd Ed., James Walker)
Solution manual Physics with Mastering Physics (4th Ed., James Walker)
Solution manual Active Learning Guide (Alan Van Heuvelen & Eugenia Etkina)
Solution manual E&M TIPERs : Electricity & Magnetism Tasks (C. J. Hieggelke, D. P. Maloney, T. L. O'Kuma & Steve Kanim)
Solution manual Physics : Principles with Applications (6th Ed., Douglas C. Giancoli)
Solution manual Physlet® Physics : Interactive Illustrations, Explorations and Problems for Introductory Physics (Wolfgang Christian & Mario Belloni)
Solution manual University Physics with Modern Physics with Mastering Physics (11th Ed., Hugh Young & Roger Freedman)
Solution manual University Physics with Modern Physics with Mastering Physics (12th Ed., Hugh Young & Roger Freedman)
Solution manual Physics for Scientists and Engineers (3rd Ed., Douglas C. Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (3rd Ed., Douglas Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (4th Ed., Douglas Giancoli)
Solution manual Physlet® Quantum Physics : An Interactive Introduction (Mario Belloni, Wolfgang Christian & Anne Cox)
Solution manual Introduction to Electrodynamics (3rd Ed., David J. Griffiths)
Solution manual Introduction to Quantum Mechanics (2nd Ed., David Griffiths)
Solution manual Quantum Mechanics : An Accessible Introduction (Robert Scherrer)
Solution manual Modern Quantum Mechanics (J. J. Sakurai)
Solution manual Modern Quantum Mechanics (2nd Ed., J. J. Sakurai & Jim Napolitano)
Solution manual The Physics of Sound (3rd Ed., Richard Berg & David Stork)
Solution manual Electromagnetism : Principles and Applications (1st Ed., Paul Lorrain, Dale R. Corson)

Solution manual Classical Electromagnetism (Jerrold Franklin)
Solution manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution manual An Introduction to Astrobiology (Iain Gilmour & Mark Sephton)
Solution manual An Introduction to Galaxies and Cosmology (Mark HJones & Robert Lambourne)
Solution manual An Introduction to the Solar System (Neil McBride & Iain Gilmour)
Solution manual Quantum Physics (Michel Le Bellac)
Solution manual Laser Fundamentals (2nd Ed., William T. Silfvast)
Solution manual Laser Electronics (3rd Ed., Joseph T. Verdeyen)
Solution manual Introductory Quantum Optics (Christopher Gerry & Peter Knight)
Solution manual Introduction to Plasma Physics: With Space and Laboratory Applications (D. A. Gurnett & A. Bhattacharjee)
Solution manual A Short Introduction to Quantum Information and Quantum Computation (Michel Le Bellac)
Solution manual A Quantum Approach to Condensed Matter Physics (Philip L. Taylor & Olle Heinonen)
Solution manual A First Course in String Theory (Barton Zwiebach)
Solution manual A First Course in Computational Physics and Object-Oriented Programming with C++ (David Yevick)
Solution manual A Course in Modern Mathematical Physics : Groups, Hilbert Space and Differential Geometry (Peter Szekeres)
Solution manual Ultrasonic Nondestructive Evaluation Systems: Models and Measurements (Lester W. Schmerr & Sung-Jin Song)
Solution manual Explorations : Stars Galaxies and Planets (1st Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (2nd Ed., Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (3rd Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (4th Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (5th Ed. Updated, Thomas Arny)
Solution manual Astronomy : Journey to the Cosmic Frontier (3rd Ed., John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (4th Ed., John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (5th Ed., John D. Fix)
Solution manual Pathways to Astronomy with Starry Night Pro (Steven Schneider & Thomas T Arny)
Solution manual From Molecules to Networks (2nd Ed., John Byrne & James Roberts)

Solution manual Biotechnology (David Clark & Nanette Pazdernik)
Solution manual Light and Video Microscopy (Randy Wayne)

- Civil Engineering and Architecture :

Solution manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution manual Fundamentals of Structural Analysis (1st Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (2nd Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (3rd Ed., Leet, Uang & Gilbert)
Solution manual Fundamentals of Structural Analysis (4th Ed., Leet, Uang & Gilbert)
Solution manual A Structures Primer (Harry F. Kaufman)
Solution manual Steel Design (4th Ed., William T. Segui)
Solution manual Structural and Stress Analysis (2nd Ed., Megson)
Solution manual Structural Steel Design ASD Method (4th Ed., Jack McCormac)
Solution manual Structural Steel Design (4th Ed., Jack McCormac)
Solution manual Structural Steel Design (5th Ed., Jack C. McCormac & Stephen F. Csernak)
Solution manual Structural Steel Design : A Practice Oriented Approach (Abi Aghayere & Jason Vigil)
Solution manual Unified Design of Steel Structures (1st Ed., Louis

Geschwindner)
Solution manual Unified Design of Steel Structures (2nd Ed., Louis Geschwindner)
Solution manual Steel Structures : Behavior and LRFD (1st Ed., Ramulu Vinnakota)
Solution manual The Engineering of Foundations (1st Ed., Rodrigo Salgado)
Solution manual Introduction to Infrastructure : An Introduction to Civil and Environmental Engineering (Michael R. Penn, Philip J. Parker)
Solution manual Civil and Environmental Systems Engineering (2nd Ed., Charles S. Revelle, Earl Whitlatch, Jeff Wright)
Solution manual Mechanics of Materials : A Modern Integration of Mechanics and Materials in Structural Design (Christopher Jenkins & Sanjeev Khanna)
Solution manual Analysis and Design of Shallow and Deep Foundations (Lymon Reese, William Isenhower & Shin-Tower Wang)
Solution manual Elementary Structures for Architects and Builders (5th Ed., Ronald Shaeffer)
Solution manual Statics and Strength of Materials for Architecture and Building Construction (3rd Ed., Onouye & Kane)
Solution manual Statics and Strength of Materials for Architecture and Building Construction (4th Ed., Onouye & Kane)
Solution manual Finite Element Techniques in Structural Mechanics (C. T. F. Ross)
Solution manual Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual Adjustment Computations : Spatial Data Analysis (4th Ed., Charles Ghilani & Paul Wolf)
Solution manual Adjustment Computations : Spatial Data Analysis (5th Ed., Charles Ghilani)
Solution manual Surveying (5th Ed., Jack McCormac)
Solution manual Surveying with Construction Applications (6th Ed., Barry Kavanagh)
Solution manual Surveying with Construction Applications (7th Ed., Barry Kavanagh)
Solution manual Surveying : Principles and Applications (8th Ed., Barry Kavanagh)
Solution manual Surveying Fundamentals and Practices (5th Ed., Jerry Nathanson, Michael Lanzafama & Philip Kissam)
Solution manual Surveying Fundamentals and Practices (6th Ed., Jerry Nathanson, Michael Lanzafama & Philip Kissam)
Solution manual Structural Analysis (5th Ed., Hibbeler)
Solution manual Structural Analysis (7th Ed., Hibbeler)
Solution manual Structural Analysis - SI Units (7th Ed., Hibbeler)
Solution manual Structural Analysis (8th Ed., Hibbeler)
Solution manual Dynamics of Structures (3rd Ed., Chopra)
Solution manual Dynamics of Structures (4th Ed., Chopra)

Solution manual Designing with Geosynthetics (5th Ed., Robert M. Koerner)
Solution manual Geotechnical Earthquake Engineering (Steven L. Kramer)
Solution manual Principles of Geotechnical Engineering (6th Ed., Braja M. Das)
Solution manual An Introduction to Geotechnical Engineering (2nd Ed., Robert D. Holtz, William D. Kovacs, Thomas C. Sheahan)
Solution manual Foundation Design : Principles and Practices (2nd Ed., Donald P. Coduto)
Solution manual Geotechnical Engineering: Principles and Practices (2nd Ed., Donald P. Coduto, Man-chu Ronald Yeung & William A. Kitch)
Solution manual Geotechnical Engineering: Principles and Practices - International Version (2nd Ed., Donald P. Coduto, Man-chu Ronald Yeung & William A. Kitch)
Solution manual Fundamentals of Structural Stability (George Simitses & Dewey Hodges)
Solution manual Fundamentals of Structural Mechanics (2nd Ed., keith D. Hjelmstad)
Solution Manual Structural Dynamics : Theory and Applications (Tedesco, McDougal & Ross)
Solution manual Fundamentals of Structural Dynamics (2nd Ed., Roy Craig & Andrew Kurdila)
Solution manual Concrete (2nd Ed., Sidney Mindess, J. Francis Young, David Darwin)
Solution manual Design of Concrete Structures (13th Ed., Nilson, Darwin & Dolan)
Solution manual Design of Concrete Structures (14th Ed., Nilson, Darwin & Dolan)
Solution manual Structures (6th Ed., Daniel Lewis Schodek & Martin Bechthold)
Solution manual Concrete Structures (Mehdi Setareh & Robert Darvas)
Solution manual Reinforced Concrete Design : A Practical Approach (Brzev & Pao)
Solution manual Reinforced Concrete : A Fundamental Approach (6th Ed., Edward Nawy)
Solution manual Prestressed Concrete : A Fundamental Approach - ACI, AASHTO, IBC 2009 Codes Version (5th Ed. Update, Edward Nawy)
Solution manual Reinforced Concrete Design (6th Ed., Chu-Kia Wang, Charles Salmon)
Solution manual Reinforced Concrete Design (7th Ed., Chu-Kia Wang, Charles Salmon & José Pincheira)
Solution manual Reinforced Concrete Design (6th Ed., George Limbrunner & Abi Aghayere)
Solution manual Reinforced Concrete Design (7th Ed., George Limbrunner & Abi Aghayere)
Solution manual Reinforced Concrete : Mechanics and Design (4th Ed., James MacGregor & James Wight)
Solution manual Reinforced Concrete : Mechanics and Design (5th Ed., James Wight & James MacGregor)
Solution manual Reinforced Concrete : Mechanics and Design -

International Version (5th Ed., James Wight & James MacGregor)
Solution manual Reinforced Concrete : Mechanics and Design (6th Ed., James Wight & James MacGregor)
Solution manual Structural Concrete : Theory and Design (3rd Ed., M. Nadim Hassoun & Akthem Al-Manaseer)
Solution manual Structural Concrete : Theory and Design (4th Ed., M. Nadim Hassoun & Akthem Al-Manaseer)
Solution manual Design of Reinforced Concrete (6th Ed., Jack McCormac & James Nelson)
Solution manual Design of Reinforced Concrete (7th Ed., ACI 318-05 Code Edition, by Jack McCormac)
Solution manual Design of Reinforced Concrete (8th Ed., Jack McCormac & Russell Brown)
Solution manual Structural Analysis : Using Classical and Matrix Methods (3rd Ed., James Nelson, Jr., Jack McCormac)
Solution manual Structural Analysis : Using Classical and Matrix Methods (4th Ed., Jack McCormac)
Solution manual Pavement Design and Materials (A. T. Papagiannakis, E. A. Masad)
Solution manual Pavement Analysis and Design (2nd Ed., Yang H. Huang)
Solution manual Traffic Engineering (4th Ed., Roger P. Roess, Elena S. Prassas, William R. McShane)
Solution manual Principles of Highway Engineering and Traffic Analysis (3rd Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Principles of Highway Engineering and Traffic Analysis (4th Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Highway Engineering (7th Ed., Paul Wright & Karen Dixon)
Solution manual Soil Mechanics : Concepts and Applications (2nd Ed., William Powrie)
Solution manual Unsaturated Soil Mechanics (Ning Lu & William Likos)
Solution manual Soil Mechanics and Foundations (2nd Ed., Muni Budhu)
Solution manual Soil Mechanics and Foundations (3rd Ed., Muni Budhu)
Solution manual Soils and Foundations - SI Units (6th Ed., Liu & Evett)
Solution manual Soils and Foundations (7th Ed., Liu & Evett)
Solution manual Fundamentals of Soil Mechanics for Sedimentary and Residual Soils (Laurence Wesley)
Solution manual Essentials of Soil Mechanics and Foundations : Basic Geotechnics (7th Ed., David McCarthy)
Solution manual Foundations and Earth Retaining Structures (Muniram Budhu)
Solution manual Design Analysis in Rock Mechanics (William G. Pariseau)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Hydraulic Control Systems (Noah Manring)
Solution manual Open Channel Hydraulics (A. Osman Akan)
Solution manual Open Channel Hydraulics (1st Ed., Terry Sturm)

Solution manual Open Channel Hydraulics (2nd Ed., Terry Sturm)
Solution manual Open-Channel Flow (2nd Ed., M. Hanif Chaudhry)
Solution manual Frozen Ground Engineering (2nd Ed., Orlando Andersland & Branko Ladanyi)
Solution manual Hydraulics in Civil and Environmental Engineering (4th Ed. Andrew Chadwick)
Solution manual Fundamentals of Hydraulic Engineering Systems (4th Ed., Robert Houghtalen, A. Osman Akan, Ned H. C. Hwang)
Solution manual Transportation Engineering : An Introduction (3rd Ed., C. Jotin Khisty, B. Kent Lall)
Solution manual Introduction to Transportation Engineering (2nd Ed., Banks)
Solution manual Urban Transportation Planning (2nd Ed., Meyer & Miller)
Solution manual Transportation Engineering and Planning (3rd Ed., Papacostas & Prevedouros)
Solution manual Transportation Engineering and Planning - SI Edition (3rd Ed., Papacostas & Prevedouros)
Solution manual Structural Wood Design : A Practice-Oriented Approach (Abi Aghayere & Jason Vigil)
Solution manual Simplified Design of Wood Structures (6th Ed., James Ambrose & Patrick Tripeny)
Solution manual Simplified Design of Steel Structures (8th Ed., James Ambrose & Patrick Tripeny)
Solution manual Materials and Components of Interior Architecture (7th Ed., J. Rosemary Riggs)
Solution manual Olin's Construction : Principles, Materials, and Methods (8th Ed., H. Leslie Simmons)
Solution manual Basic Construction Materials (8th Ed., Theodore Marotta, John C. Coffey, Cynthia LaFleur-Brown & Christine LaPlante)
Solution manual Fundamentals of Residential Construction (2nd Ed., Edward Allen & Rob Thallon)
Solution manual Fundamentals of Building Construction : Materials and Methods (4th Ed., Edward Allen & Joseph Iano)
Solution manual Fundamentals of Building Construction : Materials and Methods (5th Ed., Edward Allen & Joseph Iano)
Solution manual Composites for Construction : Structural Design with FRP Materials (Lawrence Bank)
Solution manual Building Construction : Principles, Materials, and Systems (Madan Mehta, Diane Armpriest & Walter Scarborough)
Solution manual Construction Contracts (2nd Ed., Jimmie Hinze)
Solution manual Construction Contracts (3rd Ed., Jimmie Hinze)
Solution manual Construction Planning and Scheduling (3rd Ed., Jimmie W. Hinze)
Solution manual Construction Planning and Scheduling (4th Ed., Jimmie W. Hinze)
Solution manual Sustainable Construction and Design (Regina Leffers)
Solution manual Global Engineering and Construction (J. K. Yates)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Materials for Civil and Construction Engineers (3rd

Ed., Michael S. Mamlouk & John P. Zaniewski)
Solution manual Construction Management (3rd Ed., Daniel Halpin)
Solution manual Construction Management (4th Ed., Daniel Halpin & Bolivar Senior)
Solution manual Financial Management and Accounting Fundamentals for Construction (Daniel Halpin & Bolivar Senior)
Solution manual Construction Management Fundamentals (1st Ed., Schexnayder & Mayo)
Solution manual Construction Management Fundamentals (2nd Ed., Knutson, Schexnayder, Fiori & Mayo)
Solution manual Construction Planning, Equipment, and Methods (6th Ed., Peurifoy & Schexnayder)
Solution manual Construction Planning, Equipment, and Methods (7th Ed., Peurifoy, Schexnayder & Shapira)
Solution manual Construction Planning, Equipment, and Methods (8th Ed., Peurifoy, Schexnayder, Shapira & Schmitt)
Solution manual Construction Methods and Management (7th Ed., Stephens Nunnally)
Solution manual Construction Methods and Management (8th Ed., Stephens Nunnally)
Solution manual Construction Project Administration (8th Ed., Edward Fisk, Wayne Reynolds)
Solution manual Construction Project Administration (9th Ed., Edward Fisk, Wayne Reynolds)
Solution manual Construction Project Management (3rd Ed., Gould & Joyce)
Solution manual The Management of Construction : A Project Lifecycle Approach (F. Lawrence Bennett)
Solution manual Construction Accounting and Financial Management (1st Ed., Steven Peterson)
Solution manual Construction Accounting and Financial Management (2nd Ed., Steven Peterson)
Solution manual Principles and Practices of Commercial Construction (8th Ed., Cameron K. Andres & R.C. Smith)
Solution manual Construction Cost Analysis and Estimating (Phillip Ostwald)
Solution manual Cost Analysis and Estimating for Engineering and Management (Phillip Ostwald & Timothy McLaren)
Solution manual Construction Estimating Using Excel (Stephen J. Peterson)
Solution manual Heating and Cooling of Buildings : Design for Efficiency (2nd Ed., Jan Kreider, Peter Curtiss & Ari Rabl)
Solution manual Heating, Cooling, Lighting : Sustainable Design Methods for Architects (3rd Ed., Norbert Lechner)
Solution manual Mechanical and Electrical Systems in Architecture, Engineering and Construction (5th Ed., Frank R. Dagostino & Joseph B. Wujek)
Solution manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution manual Mechanical and Electrical Equipment for Buildings

(11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution manual Mechanical & Electrical Systems in Buildings (4th Ed.,
Richard Janis & William Tao)
Solution manual Introduction to Naval Architecture : Formerly Muckle's

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

I do not review the forums, just send me an email. Please do not use emails from servers "LIVE" , all they are take as spam emails in my inbox.

- Environmental Engineering, Earth and Environmental Sciences :

Solution manual Principles of Environmental Engineering and Science (1st Ed., Mackenzie Davis & Susan Masten)
Solution manual Principles of Environmental Engineering and Science (2nd Ed., Mackenzie Davis & Susan Masten)
Solution manual Introduction to Environmental Engineering (Richard Mines & Laura Lackey)
Solution manual Introduction to Environmental Engineering (4th Ed., MacKenzie Davis & David Cornwell)
Solution manual Introduction to Environmental Engineering and Science (2nd Ed., Gilbert Masters)
Solution manual Introduction to Environmental Engineering and Science (3rd Ed., Gilbert Masters & Wendell Ela)
Solution manual Thermal Environmental Engineering (3rd Ed., Thomas H. Kuehn, James W. Ramsey, James L. Threlkeld)
Solution manual Solar Energy Engineering (Soteris Kalogirou)
Solution manual Environmental Science and Engineering (2nd Ed., J. Glynn Henry, Gary W. Heinke)
Solution manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)

Solution manual Energy Technology and Directions for the Future (Fanchi)
Solution manual Civil and Environmental Systems Engineering (2nd Ed., Charles S. Revelle, Earl Whitlatch, Jeff Wright)
Solution manual Environmental Engineering : Fundamentals, Sustainability, Design (James Mihelcic, Julie Zimmerman)
Solution manual Environmental Engineering Science (Nazaroff & Alvarez - Cohen)
Solution manual Environmental Engineering (4th Ed., Ruth Weiner & Robin Matthews)
Solution manual Environmental Pollution and Control (4th Ed., Peirce, Vesilind & Weiner)
Solution manual Introduction to Engineering and the Environment (1st Ed., Edward Rubin)
Solution manual Basic Environmental Technology : Water Supply, Waste Management & Pollution Control (5th Ed., Jerry Nathanson)
Solution manual Water and Wastewater Technology - SI Units (5th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Technology (6th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Technology (7th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Engineering (Mackenzie L. Davis)
Solution manual Water and Wastewater Engineering : Water Supply and Wastewater Removal (3rd Ed., Nazih K. Shammas & Lawrence K. Wang)
Solution manual Water Supply and Pollution Control (8th Ed., Viessman Jr., Hammer, Perez & Chadik)
Solution manual Water Supply and Pollution Control - International Version (8th Ed., Viessman Jr., Hammer, Perez & Chadik)
Solution manual Water Treatment : Principles and Design (2nd Ed., by MWH)
Solution manual Water Resources Engineering (Ralph A. Wurbs & Wesley P. James)
Solution manual Water Resources Engineering 2005 Edition (Larry W. Mays)
Solution manual Water Resources Engineering (2nd Ed., Larry W. Mays)
Solution manual Water Resources Engineering (2nd Ed., Chin)
Solution manual Water Chemistry (Benjamin)
Solution manual Aquatic Pollution : An Introductory Text (3rd Ed., Edward A. Laws)
Solution manual Plant Pathology (5th Ed., George Agrios)
Solution manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution manual Radiation Detection and Measurement (4th Ed., Glenn Knoll)
Solution manual Principles of Sequence Stratigraphy (Octavian Catuneanu)
Solution manual The Earth's Ionosphere : Plasma Physics & Electrodynamics (2nd Ed., Michael Kelley)
Solution manual Atmosphere, Ocean and Climate Dynamics : An

Introductory Text (Marshall & Plumb)
Solution manual Atmospheric Science : An Introductory Survey (2nd Ed., John Wallace, Peter Hobbs)
Solution manual Environmental Issues : An Introduction to Sustainability (3rd Ed., McConnell & Abel)
Solution manual Environmental Science : Toward A Sustainable Future (10th Ed., Wright & Nebel)
Solution manual Hazard City : Assignments in Applied Geology (3rd Ed., King, Carpenter & Wilson)
Solution manual Introduction to Environmental Geology (4th ERd., Edward Keller)
Solution manual The Science of Grapevines : Anatomy and Physiology (Markus Keller)
Solution manual Geoenvironmental Engineering : Site Remediation, Waste Containment, and Emerging Waste Management Technologies (Hari Sharma & Krishna Reddy)
Solution manual Natural Hazards : Earth's Processes as Hazards, Disasters and Catastrophes (2nd Ed., Keller & Blodgett)
Solution manual Essentials of Oceanography (9th Ed., Trujillo & Thurman)
Solution manual Exercises for Weather and Climate (6th Ed., Greg Carbone)
Solution manual Fundamentals of Ground Water (Franklin Schwartz & Hubao Zhang)
Solution manual Practical Problems in Groundwater Hydrology (Scott Bair & Terry Lahm)
Solution manual Groundwater Hydrology (3rd Ed., David Keith Todd & Larry Mays)
Solution manual Groundwater Science (Charles Fitts)
Solution manual Frozen Ground Engineering (2nd Ed., Orlando Andersland & Branko Ladanyi)
Solution manual Stormwater Management for Land Development : Methods and Calculations for Quantity Control (Thomas A. Seybert)
Solution manual Urban Hydrology, Hydraulics, and Stormwater Quality : Engineering Applications and Computer Modeling (A. Osman Akan & Houghtalen)
Solution manual Hydraulics in Civil and Environmental Engineering (4th Ed. Andrew Chadwick)
Solution manual Hydrologic Analysis and Design (3rd Ed., Richard H. McCuen)
Solution manual Introduction to Hydrology (5th Ed., Warren Viessman, Jr. , Gary L. Lewis)
Solution manual Fundamentals of Hydraulic Engineering Systems (4th Ed., Robert Houghtalen, A. Osman Akan, Ned H. C. Hwang)
Solution manual Agriculture's Ethical Horizon (Robert Zimdahl)
Solution manual Environmental Contaminants : Assessment and Control (Daniel Vallero)
Solution manual A Problem-Solving Approach to Aquatic Chemistry (James Jensen)
Solution manual Hazardous Waste Management (2nd Ed., Michael LaGrega,

Phillip Buckingham & Jeffrey Evans)
Solution manual Environmental Biotechnology : Principles and Applications (1st Ed., Bruce Rittmann & Perry McCarty)
Solution manual Chemistry for Environmental Engineering and Science (5th Ed., Clair Sawyer, Perry McCarty & Gene Parkin)
Solution manual Geology for Engineers and Environmental Scientists (3rd Ed., Alan Kehew)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Hydrology : Water Quantity and Quality Control (2nd Ed., Wanielista, Kersten & Eaglin)
Solution manual Hydrology and Floodplain Analysis (4th Ed., Philip Bedient, Wayne Huber & Baxter Vieux)
Solution manual Hydrology : An Introduction (Brutsaert)
Solution manual Applied Atmospheric Dynamics (Amanda H. Lynch & John J. Cassano)
Solution manual Mid-Latitude Atmospheric Dynamics : A First Course (Jonathan E. Martin)
Solution manual Adjustment Computations : Spatial Data Analysis (4th Ed., Charles Ghilani & Paul Wolf)
Solution manual Adjustment Computations : Spatial Data Analysis (5th Ed., Charles Ghilani)
Solution manual Ecology (4th Ed., Manuel C. Molles)
Solution manual Industrial Ecology and Sustainable Engineering (T. E. Graedel & Braden R. Allenby)
Solution manual Principles of Environmental Science : Inquiry and Applications (4th Ed., Cunningham)
Solution manual Principles of Environmental Science : Inquiry and Applications (5th Ed., Cunningham)
Solution manual Environmental Science : A Global Concern (9th Ed., Cunningham)
Solution manual Environmental Science : A Global Concern (10th Ed., Cunningham)
Solution manual Essential Environmental Science (1st Ed., Edward Keller & Daniel Botkin)
Solution manual Environmental Science : Earth as a Living Planet (6th Ed., Daniel Botkin & Edward Keller)
Solution manual Environmental Science : Earth as a Living Planet (7th Ed., Daniel Botkin & Edward Keller)
Solution manual Environmental Science : Earth as a Living Planet, Canadian Edition (Daniel Botkin & Edward Keller & Isobel Heathcote)
Solution manual Introduction to Marine Biogeochemistry (2nd Ed., Susan Libes)
Solution manual Farm Management (5th Ed., Ronald Kay, William Edwards & Patricia Duffy)
Solution manual Farm Management (6th Ed., Ronald Kay, William Edwards

& Patricia Duffy)
Solution manual Environmental Geology (6th Ed., Carla Montgomery)
Solution manual Environmental Geology (7th Ed., Carla Montgomery)
Solution manual Environmental Geology (8th Ed., Carla Montgomery)
Solution manual Natural Disasters (4th Ed., Patrick Abbott)
Solution manual Natural Disasters (5th Ed., Patrick Abbott)
Solution manual Natural Disasters (6th Ed., Patrick Abbott)
Solution manual Geography Information Systems (2nd Ed., Kang-tsung Chang)
Solution manual Meteorology (2nd Ed., Danielson et al.)
Solution manual Fundamentals of Oceanography (4th Ed., Duxbury, Sverdrup)
Solution manual Fundamentals of Oceanography (5th Ed., Duxbury, Sverdrup)

Was it considered as good a rig as the Console II?

76. Open Message to Doug Adair N8WWM

Newsgroup: rec.radio.cb
Date: 2012-02-01 03:13:51 UTC
From: Chuck K8CPA <chuckk8cpa@gmail.com>
Message-ID: <984a1a60-9faa-4e37-b7d6-19ef85629702@c6g2000vbk.googlegroups.com>
Source record: 251280

I wrote this once to Mr. Adair. It appears that I need to do this
again.

This a public open message to Douglas Adair N8WWM....

Doug, I would advise you if you do not want the wrath of the FBI, the
Ohio State Police and the Toledo police on your hide. I would advise
you to stop coming to my blog and leaving the stupid messages. I have
your IP address and I will share it with whomever I feel the need to.

The law has much changed since the 1990's and cyber-stalking is a
federal crime. Do not think for one damned second that I will not file
a complaint. I do not wish to have ANY sort of communication with you
at all. So, cut the crap, or face a judge.

Further more, I feel the need to inform you that Joseph Hampton N8ECN
is most wanting to get ahold of you. He's still pissed about the shit
that you wrote about him, and then tried to blame me for. He's done
some investigating and he's on your dumb ass.

I would think with your previous criminal record, the one in Ohio and
also the one in Chicago; that you would want to avoid the law. But,
you seem to have this thing about pushing your luck. Well, you keep
screwing around, and your luck is going to run out; and you are going
to end up in the federal prison. If you're stupid enough to believe
that just leaving a fake name and e-mail prevents me from knowing who
you are; you are highly mistaken.

This is your first and last warning and fair notice. Stop coming to my
blog or I will be filing charges.

How ironic that I have to post this again. This time ol' Dougie is now
trying to hack my PayPal account. PayPal is fully aware of what he is
doing. He's now pissed off because I told him that I would find myself
on his door step and take care of business, if he didn't cut the shit.
Now, he is going to go run behind his big daddy Government; because he
is a fucking pussy and cannot fight like a man!

Anyhow, Like I said dougie in the e-mail I sent; you're the one with police record, the one in Ohio and the one in Chicago. If the feds come here, which they won't, they don't give a fuck about what you or I do. because you're not a threat to me or I to you. But, they will be interested, if they do come here; to know that you are placing bogus donations with stolen credit cards into a business PayPal account, all so you can try and steal money out of my bank account.

Either way, I have NOTHING to hide. I have no record, I've never had anything other than a speeding ticket.

So, keep it up Douglas and we'll see who the hell ends up in jail and it ain't gonna be me.

73 to all and good dx!

Under what they THOUGHT was a cloak of anonymity these fools blubbered forth anything they wanted to blubber. Now that their identities have been well established the sissies shut their traps.

You aint done yet, keyqueens. As was long ago said, it aint over until we say it is.

shut up, sissyboy....Go kill a commie in the name of Jesus. Christ
himself would tell you that you are fucked up beyond repair. There is
a bright spot for you, though...George Lincoln Rockwell wants you to
dig him up and kiss his pubic bone.

Source record: 251298
Body handling: Binary attachment payload not displayed: John.vcf

It's really depressing to read the comments by so called expert CB shops who give advice on CB setups without so much as even asking the first question. A person sees a CB on youtube that they like, and ask what antennae they recommend, and gosh darn it, without knowing anything about how they plan on using the CB, the radio shop instantly knows
the brand and type of antennae that would be best for their needs. I mean, who cares if they planned on installing the CB in a car, truck, boat, house, etc. Because according to
some of these so called experts, their whip antennae's will be perfect for the average house, truck, car, boat, rv, 18-wheeler, or anything else you put the CB in. Otherwise, the
shop would have been smart enough to ask this FIRST! But all their interested in is looking like they know what they're talking about so they can say "Hey we have the CB here, and if you buy it from us then gosh darn it, we can tweak it out and tune it, and put any upgrades on it that you want and then send it to you...." Sure, that sounds great, but if they're not competent enough to know that no single antennae will work for every job, how am I to believe they know what they're doing with the CB when they claim to be tweaking it? It's been posted on many sites that the first thing to do is check the output wattage before you let them tweak the radio, then check it with the same meter once you get it back from them, so you can tell if they did what they claim to have done. It's also recommended not using their meter, as they might have modified it to look like it works better.... Also it's recommended to ask them what they plan on doing to the radio. A lot of shops simply download the information others have done and solder a few mods in as the instructions tell them to, without the least bit of understanding what they're doing. Not to mention, some modifications may Sound like your outputting better on your end, but when you test the output on a meter, and listen to the quality on another radio, you'll find out that not all "mods" are worth doing! To the CB shops out there trying to get rich quick off the new CB purchaser, shame on you! You shouldn't even call yourself a CB shop! It should be mandated that all CB shops belong to a CB group, and provide a list of members for customers to check on the knowledge and quality of the CB shop's work. Reputable CB shops have nothing to hide, as their work is the proof of their knowledge. Rip Off Artist would be worried as they don't usually aim for repeat customers!

You aren't very bright - are you?

My dad has the best one liner in the business - " How Stupid Are You?"

Until you understand how communications works, and how your signal radiates - you will never get how it all goes together.

First off the radio.
I take it you are not talking about a LEGAL 3 Watt AM cb radio / or even a LEGAL 12 Watt PEP SSB radio.

Those days are over.
All of the quality has left the building with Elvis when Browning, Courier, Tram etc went out of business.

The only thing left is what they call the " IMPORT " radio's.
You know the ones, Galaxy, Ranger, Connex - that were designed to be used in the 10 / 12 meter portion of the amateur radio band, which are easily modified - AKA " ILLEGAL " for use in the Citizens Band portion of the bands.

The word ILLEGAL seems to make some sort of connotation of it being better.
Like if my radio puts out 5 watts and your radio puts out 50 watts - you are going to be able to talk over my signal.

Or if the factory stock Ranger 2950 puts out 25 watts AM, that if someone tweeks and tunes it and makes it put out 30 watts that it is going to be better then the 25 watt radio.

" HOW STUPID ARE YOU?"

All signals reduce at the square of the distance away!
All effective communications is line of sight!
In order to move the needle one S unit between S -1 and S -9 you need a Db gain in power received.
6 DB gain equals a 400 % increase in power.

5 watt box stock radio vs 25 watt Ranger radio.

5 x 1 = 5
5 x 2 = 10
10 x 2 = 20
20 x 2 = 40

You have a Wilson 5000 antenna on a Suburban - 20 miles away.
I have a Wilson 5000 Antenna on a Suburban - 20 miles away.
A third person has a identical Wilson 5000 on a Suburban. - stationary.

Your signal to the third party is S- 8
My signal to the third party is S - 7

Who is louder?
Can you hear the difference between a 5-7 and a 5-8 signal report?
NO!

Now to move the S meter one more S unit in the range of 1 - 9 - how much more power do we need?

40 x 1 = 40
40 x 2 = 80
80 x 2 = 160
160 x 2 = 320 watts

The difference between a 5 watt radio and a 100 watt radio is about 16 Db or about 2 1/2 S units to the third party radio.

Now - the greatest gains to be had between a 5 watt legal radio and what ever you could install in a mobile application is about 350 watts legal power.
Why?

Because to move the needle another S unit - you would need to increase the power another 6 db and that would cost you a significant amount of money.

320 x 1 = 320
320 x 2 = 640
640 x 2 = 1280
1280 x 2 = 2560 watts of power.

In order to generate enough electric to run the 2500 watt amplifier, you would need a 500 amp alternator and several 1000 cca batteries - mobile.

Now - in order to move the needle beyond 10 / S-9 1 S unit, you need to increase transmit power 100 times.

So if you were 10 / S- 9 with 100 watts and you wanted to move the needle one S unit, you would need 1000 watts of transmit power.

If you wanted to increase your transmit power to 30 / S -9 into the same radio, you would need 10,000 watts of transmit power.

By that time, you would have graduated from alternators and car batteries and moved up to a 15 KW generator and a trailer to haul it on.

Because people are so stupid and uneducated, they do not realize that all transmitting is the same. The only thing that changes is the way you transmit - the frequency, the length of the antenna, the height of the antenna above ground, the soil conductivity of the ground beneath the antenna, what kind of ground plane you use etc...

Amateur radio people and employed electrical engineers can easily take advantage of any stupid person that walks into a CB shop and wants to buy a ILLEGAL CB radio. It is so easy even a cub scout can do it.

You take a simple SWR meter and turn it on to the power and you measure the average power transmitted.
You then " " tweek and tune the radio and put the meter on Peak instead of average RMS power and whistle in the mic. The meter will show a increase of about 50%

Lets say power RMS equals .707 of the peak
A 120 vac electrical outlet actually puts out 170 volts or 340 volts peak to peak.

The RMS is measured in any AC current by using a known resistor and how much power it takes to produce a certain amount of heat.
You don't know this - because no one has taught you this.
All you know is that your wall outlet is rated at 120 VAC - because that is what you have been told and because when you measure it with your VOM it reads 120 VAC.
http://www.ultracad.com/articles/rms.pdf

http://en.wikipedia.org/wiki/Root_mean_square

This is the reason why anyone can talk on the CB radio, and why no license is required to operate, or any knowledge of how it works.

This is also the reason why everyone who legally acquires a amateur radio license has to learn this stuff before they are given a license. The CB mentality does not kick in until after the person has been granted a license and finds that their dipole antenna does not work and they want to " " Talk over every one else.

The amplifier people accommodates them accordingly.

Mr X in Kansas is using 100 watts on 28 mhz and Mr Y in Georgia wants to talk over him, so Mr Y goes out and buys a 1000 watt linear amplifier. Only Mr X in Kansas has a 16 DB gain beam antenna and Mr Y does not.

Who is louder?

Do the math!

>a LEGAL 12 Watt PEP SSB radio.
First off, a Legal CB radio is 4 Watts, not 3, not 5, but 4. And
yes some people do prefer to do things the LEGAL way. Not everyone on
the CB is an asshole. Granted, apparently where you live folks are if
their only concern is talking over people.

You _are_ feeling like a manly bisexual! That's good, Woger. Soon, you may even be ready to post in your own name as an out queer. What do you think of that? Oh, don't tell me, it's your scat fetish again, isn't it?

Snarky

My name isn't "Zydeco," Dave. It's "Rick Sabian's All-Star Canadian
Assworm Zydeco Band". You don't know me well enough to simply refer to
me as "Zydeco," and you're hardly qualified to make classic erroneous
presuppositions about whether or not I've made an erroneous
presupposition. Furthermore, if you insist on adding even more inane
replies to this conversation, kindly do NOT set follow-ups because IT
PISSES ME OFF! TIA...

Rick Sabian's All-Star Canadian Assworm Zydeco Band
<Bungmunch@Squeeze.Box> writes:

2> Newsgroups:
alt.usenet.kooks,rec.radio.amateur.policy,rec.radio.cb,comp.os.os2.advocacy,alt.checkmate

2> My name isn't "Zydeco," Dave.

Who is "Dave", Zydeco? Suffering from attribution problems,
Zydeco?

2> It's "Rick Sabian's All-Star Canadian
2> Assworm Zydeco Band".

What does your "name" have to do with alt.usenet.kooks,
rec.radio.amateur.policy,rec.radio.cb,comp.os.os2.advocacy,
alt.checkmate, Zydeco?

2> You don't know me well enough to simply refer to
2> me as "Zydeco," and you're hardly qualified to make classic
erroneous
2> presuppositions about whether or not I've made an erroneous
2> presupposition.

What does your classic unsubstantiated and erroneous claim
have to do with alt.usenet.kooks,rec.radio.amateur.policy,
rec.radio.cb,comp.os.os2.advocacy,alt.checkmate, Zydeco?

2> Furthermore, if you insist on adding even more inane
2> replies to this conversation, kindly do NOT set follow-ups because
IT
2> PISSES ME OFF! TIA...

What does your displeasure have to do with alt.usenet.kooks,
rec.radio.amateur.policy,rec.radio.cb,comp.os.os2.advocacy,
alt.checkmate, Zydeco?

For someone looking to hire someone - you didn't give the right
information.
A person needs to know the name of the locality, the name of the
employer and the pay rate.

Spï¿½cial Radiocommunication : Le journal du 11 mï¿½tres (Cibi + RadioAmateur)

Bonjour ï¿½ toutes et ï¿½ tous.

Suite ï¿½ l'ï¿½coute d'un QSO sur le 27.690 Mhz en USB (en France Dep.: 33),
je me suis rendu aussitï¿½t sur le site dont ils parler : ï¿½Le journal du
11 mï¿½tresï¿½ => http://www.27mhz-news.info/
Je leur et envoyez un email suivit de mon inscription (directement sur
le site) plus sur la carte de France =>
http://www.mappemonde.net/carte/Les-Cibistes-de-France/france.html .
Je trouve ï¿½a bien que quelqu'un lance un telle site pour faire connaï¿½tre
et faire ï¿½voluï¿½ la Cibi. Peut ï¿½tre un rapprochement des clubs ? C'est on
jamais pour relancer l'activitï¿½. ;-)

A mon tour de vous le faire connaï¿½tre se site par ce biais pour faire
avancer le schmilblick.

73-51 aux OM et 88 aux YL

(14) D R F 33

ps.: Je ne suis pas un spammeur. Juste quelqu'un qui donne un petit coup
de main dans le monde de la Cibi Francophone. :-)

a babelfish translooseration:

Special Radiocommunication: The newspaper of the 11 meters (Cibi + Radio ham) Hello with all and all. Following l'
listen to d' a QSO on the 27.690 MHz in USB (in France EPD.: 33), I went at once on the site about of which they to
speak: ï¿½The newspaper of the 11 metersï¿½ => http://www.27mhz-news.info/ I and send an email to them followed my
inscription (directly on the site) more on the chart of France =>
http://www.mappemonde.net/carte/Les-Cibistes-de-France/france.html. I find that although quelqu' a lance such a site to
make known and to make advanced Cibi. Can be a bringing together of the clubs? C' is one never to start again l'
activity. ; -) In my turn to make known it to you site by this skew to advance the schmilblick. 73-51 to the OM and 88
with the YL (14) D R F 33 PS.: I am not a spammor. Just quelqu' one which gives a small knack in the world of Cibi
Francophone. : -)

The CB radio has died, a slow and merciless death.
All that is left is the mentally ill, the mentally stupid and people who have done something so illegal that they cannot get a amateur radio license, or people who are so stupid they cannot pass a 35 question multiple guess test.

My favorite is listening to the numbers stations down in Mexico.
The women with the rodger beep that says the same things over and over.
The purpose is to give coded messages to the drug dealers.

I wish I had that much time, but then I'd be broke because I wasn't working...

145. Belfort Instrument Company FUCKING DigiWx AWOS

Newsgroup: rec.radio.cb
Date: 2012-03-09 01:04:48 UTC
From: someone@somewhere.com
Message-ID: <RYOHSYEM40977.3783333333@reece.net.au>
Source record: 251249
Cross-posted to: rec.autos.makers.ford.mustang,rec.radio.cb,rec.arts.tv.soaps.abc

Belfort Instrument Company is selling to a known terrorist country as evidenced by mention of the DigiWx AWOS on their corporate homepage sold to:

Pakistan
-Lahore International Airport (LHE/OPLA) RVR System, Lahore Pakistan

And then there is word of this:
During the first two weeks of January 2007, U.S. air strikes targeted four sites in southern Somalia formerly under al Qaida control where terrorists have been training and hiding for months.

"As we speak now, the area is being bombarded by the American air force," a Somali government official told Reuters two weeks ago.

The U.S. attacks targeted an area close to Ras Kamboni, a coastal village near the Kenyan border where many Islamists are believed to be hiding after being ousted by Ethiopia-backed government forces, the official added.

Four places were hit -- Hayo, Garer, Bankajirow and Badmadowe, the source said. "Bankajirow was the last Islamist holdout. Bankajirow and Badmadowe were hit hardest," he added.

The Pentagon confirmed only one air strike that took place in the south of the country, saying that it was part of a wider offensive aimed at an al-Qaeda cell that includes suspects in the 1998 bombings of U.S. embassies in east Africa and a hotel in Kenya.

Meanwhile, ABC News quoted U.S. and French military sources as saying that American U.S. special forces were working with Ethiopian troops on the ground in operations inside Somalia.

Following a thrust by the U.S. military, U.S. special forces discovered a Belfort Instruments Digiwx AWOS weather reporting system on a hill south of Ras Kamboni.

The Belfort Instruments Digiwx AWOS station was not operational as it had suffered a direct military hit from an explosion of unknown origin. But the Digiwx name could be clearly seen imprinted on the 15 foot tower which now lays on it side in pieces.

U.S. troops subsequently uncovered handheld Digiwx weather receivers in two of the camps previoulsy occupied by al-Qaeda terrorists which apparently had been left behind and abandoned.

How the Belfort Instruments Digiwx AWOS system made it to Somalia and into terrorists hands is still unknown. Whether al-Qaeda and Osama bin-Laden organizations are employing Digiwx AWOS units in other parts of the world is currently unknown.

U.S. troops have been advised to be on the lookout for additional Digiwx AWOS units under Al-Qaeda and/or Sunni/Shiite control in Iraq and Afghanistan.

U.S. special forces are reportedly monitoring the two known wireless frequencies that Digiwx AWOS transmits on, notably 464.6 and 464.75 MHz. British military sources report that signals on both frequencies have been detected but only occasionally as the terrorists seem to be running Belfort Instruments Digiwx for only short periods of time.

Belfort Instrument Company (Baltimore, MD, USA), the original manufacturer of Digiwx AWOS, has had no comment.

Why would an American company be "aiding and abetting" known terrorists organizations around the world while doing business in pursuit of the almighty American dollar? Maybe you would want to contact them and find out why:

Much has been written about Belfort Instrument Company's DigiWx AWOS anonymously for good reason because the Belfort DigiWx "fur" has been flying since at least 2005. One can find mention of Belfort's inferior weather station named

DigiWx AWOS as witnessed by:

Ten reasons to NOT buy Belfort DigiWx AWOS (keep reading)
http://www.aviationkb.com/Uwe/Forum.aspx/piloting/5041

I also am of the belief that Belfort Instrument Company has
been actively censoring anyone and any words which dishes
dirt on this inferior DigiWx AWOS weather station.

Now we have word from Belfort Instrument Company of
a "Recommended Service Bulletin" dated April 21, 2011
and numbered 2011-1.

SUBJECT: Unicom Transmission

MODELS AFFECTED: Belfort DigiWx AV100 with
either Technisonic or ICom radios

TIME OF COMPLIANCE: At owners discretion

There have been some discussions by users at congested
airports of not being able to receive the AWOS broadcast
over the Unicom or the weather report stepping on other
Unicom communications. The following suggest may decrease
the problem.

1. On the DigiWx radio, set the squelch well above
the squelch break point this, in turn requires more
power to break the squelch which means traffic has to be
closer to the airport to receive the weather report.

2. The DigiWx standard broadcast mode is using 3 MIC
clicks. At busy airports, there isn t a way for the
DigiWx to determine if someone is clicking the MIC 3
times for the weather or three (3) separate pilots are
clicking the MIC to talk. If this is the case, it might
help to change the number of MIC clicks for weather to
5 MIC clicks. Both of the above recommendations will
help reduce the number of broadcasts from the DigiWx
and they are easy to do and don t cost money.

Belfort Field Service Team
800 937-2353
serv...@belfortinstrument.com

Well, I fly from one of the airports in MT with one
of these DigiWx AWOS pieces of SHIT. And its beyond me
to understand why changing the mic clicks at a congested
airport is going to fix the problem of a DigiWx which
clogs the UNICOM frequency. Just like Belfort said,
DigiWx cannot distinguish who is clicking the mic 3
times. The DigiWx is stupid. When it hears any 3 mic
clicks, it activates and clogs an already congested
UNICOM frequency. We pointed this out to Belfort 3

years ago and THIS WAS AND CONTINUES TO BE THEIR FIX?

If I cut thru the emotion of everything ever written
about the Belfort Instrument Company DigiWx AWOS, I
am now a believer. Belfort doesn't know the first
phucking thing about designing an AWOS to broadcast
over a UNICOM frequency. I have talked with numerous
pilots from other airports who have the SuperAWOS
and the Vaisala AWOS. And they just DON'T have these
clogged frequency problems.

Yep, you read that right:
BUY Belfort Instruments DigiWx-SHIT... Have a PILE OF SHIT guaranteed!

Have you heard about the Meadow Lake Airport AWOS Fiasco?
Quoting, http://meadowlake-airport.com/AWOS.htm reads in short:

"Executive Conclusion: Of the four candidate AWOS manufacturers, only
two meet the threshold and objective system performance levels. These
are systems provided by All Weather Inc (AWI) and Vaisala. The
SuperAWOS by Potomac Aviation does not pass an initial cut due to
maintenance problems encountered with their SuperUnicom installed at
Meadow Lake airport."

"The Belfort DigiWX "AWOS" is not a true FAA fully commission-able
AWOS. Its complete sensor suite is not certified. Installation of this
system at 00V means that we would not have our weather data (METAR)
accessible in the federal database which means that Flight Service and
other sites such as ADDS, XM weather, WSI, etc would not not have
Meadow Lake weather data. The only certified weather info would be
altimeter and visibility. While this does allow Part 91 and 135
instrument approaches, the inability to incorporate its complete METAR
data in the federal system is a deal-breaker."

"The apparent initial cost savings of the initial Belfort DigiWX
acquisition is minimal and not worth the lack of functionality and
usefulness to the national aviation community. Life-cycle cost of the
Belfort system over 15 years is over $27,000 higher than the Vaisala
system."

"It would not allow us to transition to a three letter airport
identifier."

"Bottom line is that the Belfort system represents false economy,
minimal pilot usefulness and is inconsistent with providing the
aviation community services that make this airport attractive to
current and future pilots and businesses."

"Of the remaining systems offered by AWI and Vaisala, Vaisala is the
preferred system."

The complete report highlighting DigiWx shortcomings can be found at:
http://meadowlake-airport.com/AWOSanalysis.doc

Now have a LQQK at this.....

Ron Lee from Meadow Lake Airport wrote in Pike's Peak Flyer:
January 2009

The SuperUnicom was shut down in early August 2008 due to harmful interference on the 122.7 MHz frequency A grant was submitted and approved to get an AWOS III P/T using FAA funds. Our portion of the cost is around $4,000 although incidentals may drive it higher... but far below the $25,000 previously budgeted for an AWOS. One MLAA Board member is attempting to force a system that is not fully certified down our throats using the flawed rationale that it is cheaper that the fully certified systems offered by All Weather Inc and Vaisala. A major down side to the Belfort system is that pilots will not be able to access METAR data through Flight Service, ADDS, on their on-board weather systems, etc. We will very likely be unable to acquire a three letter airport ID and maintenance will cost much more over its lifetime than with either of the fully certified systems. Plus in its current implementation, there is no obvious upgrade path to getting present weather and lightning information available in an AWOS III P/T system. It is crucial to the safety of this airport and our usefulness as a destination airport within the National Airspace System that we get a state of the art AWOS. With the FAA grant, it is amazingly affordable. But it is essential that local pilots become informed on this matter and contact all Board members to express their view. My opinion... based upon extensive research on behalf of MLAA members... is that we need a fully certified AWOS. The minimum configuration is AWOS III, with AWOS III P/T highly desirable (objective). It needs to be the number one priority acquisition with a target installation not later than Spring 2009. It must not be sacrificed to pay interest on the land acquisition.

His full report is located he
http://home.pcisys.net/~ronlee/MeadowLakeAWOSSelectionAnalysis.doc

If you're considering Digiwx AWOS... READ THIS ANALYSIS FIRST!

Following up on the post regarding the UN-APPROVED, UN-CERTIFIED and UN-OFFICIAL weather data spewed by Belfort Digiwx AWOS, one also needs to note that they only sold 2 units during all of 2011.

Bruce R. Robinson's 10 reasons to NOT buy Belfort Digiwx AWOS:

Ten reasons for not buying Belfort Instrument Digiwx AWOS:
1) no FAA Approved or FAA Certified wind speed
2) no FAA Approved or FAA Certified wind direction
3) no FAA Approved or FAA Certified temperature
4) no FAA Approved or FAA Certified dewpoint
5) no FAA Approved or FAA Certified density altitude

6) no FAA Approved or FAA Certified visibility
7) no FAA Approved or FAA Certified precipitation measurement
8) no FAA Approved or FAA Certified precipitation discriminator
9) no FAA Approved or FAA Certified ceiling measurement (ceilometer)
10) no FAA Approved or FAA Certified lightning detection

About Belfort Instrument Company:
Belfort used to be a leading provider of weather instruments to the government, professional meteorology and aviation markets. Key words: "use to be." They never provided any wind sensors to the Wright Brothers despite their fantastic assertion that they did! Historical archives available at the U.S. Air Force National Museum (1100 Spaatz Street, Wright-Patterson AFB, OH 45433) tells a very different story and specifically mentions a "Richards" anemometer which Wilbur Wright held as pictured at: "http://wings.avkids.com/Book/Wright/history1_19012.html". The Belfort aerovane wind system on U.S. Naval aircraft carriers are currently being replaced with ultrasonic wind sensors from QPI (11207 Single Oak Road, Fredericksburg, VA 22407) which just won a $94 million dollar contract for the Moriah Wind System. Belfort wind speed and direction anemometers found on the ASOS platform are now being replaced with ultrasonic sensors from the Vaisala Group. Belfort Instruments Model 6000 visibility sensor will no longer be a part of the U.S. Air Force's OS-21/FSB program come early 2007. And despite a $500,000 U.S. government grant from NASA's Small Aircraft Transportation System (SATS) program in 2004 to build a low-cost ceilometer, Belfort didn't possess the technical smarts nor the engineering know-how to accomplish the task. So now they're importing the Eliasson CBME 80A laser ceilometer from Muir Matheson. As one can readily see, Belfort is no longer setting any standards of measurement in the weather instrumentation world. And now Belfort is propagating lie after lie about their fabled company history while trying to steal thunder from the accomplishments of the Wright Brothers. According to the National Museum of American History (12th Street and Constitution Avenue, N.W., Washington, D.C. 20560), Belfort founder Julian Friez never made it to Baltimore to set up shop until sometime in the 1890s even though Belfort officials fraudulently claim the company was founded in 1876. Thus, there was no 125th anniversary for Belfort to celebrate in 2001 even though they hosted a party to which no one came! Belfort's proclamation that it is the "Oldest Weather Company in the World" is simply yet another Belfort lie as Thomas Romney Robinson invented the first wind anemometer in 1846, six years before Julian Friez was born in 1852. Belfort doesn't even know it's own company history so they just make it up! You should wonder what other crap

(eg. Digiwx AWOS) they also make up! For more information
about Belfort Instrument and DigiWx, visit dogsh*t.com

Ellen H. Robinson LIKES MEEZ BIG BLACK MAMBA
http://groups.google.com/group/alt.airports/msg/08232a7de634561c
December 29, 2010

Ellen H. Robinson will SUCK and FUCK you!

Onze afternoon, i wasz catchin a snooze in my backyard on a sunny
day. much to my surprize, i lifted my hat and found my neighborz
Ellen H. Robinson unzipping my pants. she gestured to me with herz
indexes finger over herz slender lips to be quiet. I say figures
okay, she then unzipped my pants and reached in and tuggzed on my
big black mamba! Imediatelzly, my blacks a mamba becomes engorged
with hot burstz of human excitementz. With a big tugz with both of
herz handz, Ellen H. Robinson pluckz me black mamba to a full
erctionz! she then opened herz mouthz and slipsz it over my full
manhoodz. she gagz and coughz a bit but begins her suckin action
upz and downz! she repeatedlyz goez faster and faster untilz i
feelz my venemouz black mamba release a massive explozion into
herz mouth. At first, she triyz to swallow it allz but my venomouz
fluidz keepz jaculating in herz mouthz. Then, she pullz herz head
awayz with herz handz still clenched on my black mamba. she coughz
and gagz a minute over the concretes but then placez herz lips back
on myz black mamba. Once aginz, she jerks it hard withz both handz.
Again, I'z begin to release a strong venemouz fluid at a fullz flow
into herz small mouth. Myz black mamba squirmz in herz handz as i
release all of my venemous fluid from myz snake into herz mouthz.
i'z kannotz waitz til my neighbor Ellen H. Robinson sneaks back
over to my house for somz afternoonz delight. Next timz, me thinks
i shall let my black mamba go hogwildz in herz anuz. if she suckz
me this good next time, i shall let myz snake ezcape in herz cunt
andz give her zome my brotherly love. Myz black mamba has neverz
felt so good after Ellen H. Robinson wrapped herz lipz around the
big headz on meez mamba!

Belfort Instrument Company does business under several names
including Gamma Scientific, UDT Instruments, Advanced Retro,
Road Vista and KR Acquisitions Corporation.

Does anyone have anything good to say about Belfort's Digiwx AWOS?

Audio available at http://www.arnewsline.org/

Amateur Radio NewslineT Report 1805 - March 16 2012

Amateur Radio Newsline report number 1805 with a release
date of March 16th, 2012 to follow in 5-4-3-2-1.
The following is a QST. More on ham radios role in the wake
of a recent tornado outbreak; FEMA asks the FCC to permit
text to speech EAS transmissions; interference from ocean
buoys discovered on 10 meters and a DXpedition to Mali is
cancelled due to political unrest in that nation. Find out
the details are on Amateur Radio NewslineT report number
1805 coming your way right now.

RESCUE RADIO: ARES HAMS FILL MULTIPLE ROLES DURING KENTUCKY
SEVERE WEATHER OUTBREAK

Amateur Radio operators in Hardin and surrounding Kentucky
counties provided critical communications during and after
the severe weather outbreaks on February 29th, and again on
Saturday March 3rd. Amateur Radio Newsline's Cheryl Lasek,
K9BIK, is here with the details:

--

Members of the Hardin County Kentucky Amateur Radio
Emergency Service were activated initially by the National
Weather Service. This as a resource to relay significant
weather information directly to their office in Louisville.

Hardin County ARES provided weather spotting, logistics,
disaster assessment, and shelter coordination assistance.
Throughout the severe weather, they were busy maintaining
communications with served agencies, with hams in adjacent
counties, other ARES units, and to amateur radio station
WX4NWS which is located at the Louisville National Weather
service office.

Knowing in advance the high probability for dangerous
weather, several of the volunteer radio amateurs took
personal time off from work in order to perform this public
service.

In the aftermath of these deadly storms, Hardin County Amateur Radio operators continued to serve with agencies in affected areas in Southern Indiana and Eastern Kentucky, providing communications, disaster assistance, and support for ongoing search, rescue and recovery operations.

Fred Jones, WA4SWF, is the Region 4 Assistant Section Emergency Coordinator for the ARES in Eastern Kentucky. He e-mailed Newsline that as of March 11th there were Amateur Radio emergency Service nets still in operation on 8 repeaters in Eastern Kentucky. Whether or not these nets have been secured is unknown as we go to air.

For the amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

According to Shelby Ennis, W8WN, who is the Emergency Coordinator of the Hardin County ARES, 20 operators were active during the emergency on February 29th and 27 volunteered on March 3rd. (WA4SWF, KE4EK)

**

RESCUE RADIO: FEMA WANTS FCC TO ALLOW CAP TEXT TO SPEECH NOW

The Federal Emergency Management Agency better known by the acronym FEMA has asked the FCC to reconsider portions of its latest EAS Report and Order. Specifically in the area dealing with message standards.

In its filing, FEMA told the commission that portions of its 5th Report and Order on EAS limit the ability of local emergency management officials to obtain all of the benefits of Common Alerting Protocol messaging standards for EAS. Especially those that deal with text to speech conversion .

The FCC had put off the text-to-speech conversion issue for a separate rule making proceeding. But FEMA claims that one possible consequence of not allowing such conversions now is that Common Alerting Protocol messages supplied without audio content could cause a C-A-P equipped EAS device to interrupt a stations normal programming and only convey an EAS header tone. Or it might only transmit an alert signal and an end-of-message notification.

FEMA says that for radio stations this would mean that no information usable by the public would be conveyed. As such, FEMA is urging the FCC to reconsider and to allow speech-to-text technology to support EAS radio operations now.

(RW, Radio Today, Observer)

**

COMMUNICATIONS LAW: HOUSE ENERGY AND COMMERCE COMMITTEE APPROVES TWO FCC REFORM MEASURES

The House Energy and Commerce Committee voted 31 to 16 on Tuesday March 6th to approve an FCC reform bill that puts shot clocks on FCC decisions, requires disclosure of items before votes, and limits on merger conditions.

The cable, phone and broadcast industries all supported the FCC reform efforts as outlined in HR 3309, while House Democrats said the measure will needlessly tie the FCC's hands and could lead to endless litigation. Democrats have vowed to defeat the measure.

At the same time the House also passed a second, non controversial FCC reform bill. HR 3310 that simply requires the FCC to conduct a biennial survey of the state of competition in the marketplace that will be published online and submitted to Congress. (B&C)

**

ON THE AIR: IRLP TOPIC CHANNELS INAUGURATED

The long-awaited Internet Radio Linking Project or IRLP Topic Channels have now gone live. IRLP- users are now able to log onto reflector channels allocated for interests ranging from DX'ing to music, media, history, the upcoming 2012 election and many others.

For those not aware, the Internet Radio Linking Project was the result of research and development by Dave Cameron, VE7LTD, back in 1998. This as a way of using the Internet to interconnect repeaters world-wide. With the advent of IRLP Topic Channels the concept has developed into a global discussion real-time forum on almost any topic of interest to those signed on.

For up-to-date information on the IRLP Topic Channels please visit www.irlptopics.net. To locate an IRLP node near you go to status.irlp.net on the world-wide-web. (W7RAT, Southgate)

**

INTRUDER WATCH: BUOYS ON 10 METERS

The source of some mysterious weak signals on 29.684 MHz with an 81.9 Baud and 130 Hz shift have been located. According to the February IARU Region One newsletter, the signals came from the Spanish coastal area and were audible across all of Europe but only during band openings and only by directional antennas.

It turns out the source of transmissions by Datawell buoys. These buoys, produced in the Netherlands are used for measuring water temperatures and wave heights. They are designed to transmit with 75 milliwatts on frequencies between 27 and 40 MHz.

Dick Van Empelen, PA2GRU, of Heemstede in the Netherlands has since visited the Datawell Company and has informed them that the buoy transmissions on the amateur service 10 meter band are illegal. The operations chief promised to inform all Datawell offices about the situation. (IARU-R1)

**

BREAKING NEWS: PLANNED MALI DXPEDITION ON HOLD DUE TO POLITICAL UNREST

Some breaking news in the world of DX. This with word that political unrest has led to a planned DX operation to Mali being put on indefinite hold.

Two weeks ago members of the "Italian Dxpedition Team" announced that they were planning to be active as TZ5T from Mali between April 12th to the 27th. However, their Pilot station Art Lorenzo, IK7JWY, has now issued a statement that the situation of civil war in Mali between the government and Tuareg insurgents is worsening. Because of this and other concerns Mali authorities will not issue licenses to radio amateurs who may be targeted because of radio equipment.

For this reason the DXpedition has been postponed until a yet to be determined later date. For updates please check in regularly at www (dot) i2ysb (dot) com on the World-Wide Web. And we will have more DX news later on in this weeks report. (OPDX)

PROPAGATION: YET ANOTHER CME HEADS TOWARD EARTH
Spaceweather reports that the sun has again erupted in a way that will likely affect radio propagation here on Earth for

several days. Especially on the High Frequency bands. We have more in this report:

--

Sunspot AR1429 unleashed another strong flare on March 13th. The category M 7.9 explosion produced a significant Coronal Mass Ejection or CME that solar forecasters predicted would reach Earth at 06:20 UTC, plus or minus 7 hours, on March 15th and whose effects on propagation could last for several days.

As a result, geomagnetic storms are possible when the charged cloud arrives that could produce auroral displays in the Northern-most latitudes. This in turn could lead to aurora propagation at 50 Mhz and above.

Ironically, a bright comet is at the same time diving into the sun. The comet was recently discovered NASA's Solar and Heliospheric Observatory SWAN instrument. As such its been named "Comet SWAN."

The comet's death plunge or "swan dive" as some astronomers are calling it comes just as the sun has unleashed the strong flare. Because of this some of the SOHO images of the comet are confused to some degree by energetic protons striking the camera's imaging sensor.

For the amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

For updates on this and other solar activity we suggest that you check spaceweather.com for the latest information. (Spaceweather, Space.com)

**

ENFORCEMENT: FCC AFFIRMS $25000 FINE FOR UNLICENSED SAN JOSE CA FM BROADCAST OPERATIONS

The FCC has affirmed a $25,000 Notice of Apparent Liability issued to Gabriel A. Garcia of San Jose, California. This for a 2010 series of unlicensed radio transmissions heard on 92.9 MHz, 93.7 and 104.3 MHz all traced to Garcia residences.

Garcia was issued four notices of unlicensed operation from the FCC before being issued the proposed fine in 2011. The base penalty in such cases is $10,000 but the agency has said that Garcia operated on multiple frequencies, on multiple occasions, and called his behavior particularly egregious. This because his transmissions allegedly

interfered with the Aviation Radio Services band.

Garcia never responded to the proposed fine. Having not heard an appeal from him since issuing the NAL last March, the FCC now has finalized the $25,000 fine and given him the customary 30 days to pay. If he fails to do so the case may be referred to the Department of Justice for collection. (FCC)

**

COMMUNICATIONS COORDINATION: FREQUENCY COORDINATION FOR 2012 POLITICAL CONVENTIONS COMMITTEE FORMED

Broadcast engineers have formed a committee to coordinate spectrum use at the Democratic and Republican conventions this summer. According to member Ray Benedict PolComm 2012 was formed in an effort to head off radio and TV personnel who may show up at the conventions and then try to use their wireless mics and two-way radios without first going through the frequency coordination process.

The Republican convention is Aug. 27th to the 30th in Tampa, Florida and the Democratic convention is September 3rd to the 6th in Charlotte, North Carolina. The committee says that it will seek a temporary rules waiver to allow TV Channels 14, 16 and 17 to be used as communication channels in Tampa and TV Channels 14, 16, 17, 18, 19 and 20 in Charlotte.

Broadcast engineering consultant Louis Libin is the PolComm 2012 chairman. Libin has chaired frequency coordination committees for past seven national political conventions. (RW)

**

NEW PRODUCTS: THE TALENT POD FROM HENRY ENGINEERING

A fascinating new piece of merchandise has come along that while not meant for ham radio, deserves a mention.

Henry Engineering, the California-based company owned by Hank Landsberg, WB6MEU, has come out with a broadcast product that could also be of interest to contesters, DX'ers as well as dedicated multi-operator stations such as during Field Day. Called the Talent Pod, the unit is a desktop local host controller for microphones and headphones that the company says solves audio problems often encountered when doing remote broadcasts.

Talent Pod is a mini-console made for use by an announcer. It gives that person full control of his or her mic and headphones. It lets the announcer turn the mic on and off

and create a mix of local and return audio in the headphones. The mic button is illuminated and is visible in outdoor settings. A cough button momentarily mutes mic audio.

There are also two separate inputs for local and return audio, with a volume control for each. The operator can control the volume level and mix of the headphone audio.

To prevent confusion between the local and return audio, Talent Pod also has two pan switches, so the announcer can independently position the local and return audio in the center, left or right channel of the headphones.

As most hams involved in contesting and multi-op DXing will note, all of these functions could easily be adapted to use in an amateur radio multi operator station environment. All it takes is a bit of imagination. More information on the Talent Pod is on line at www.henryeng.com. (RW)

**

HAM RADIO HONORS: ARRL OPENS NOMINATIONS FOR SEVERAL AWARDS

The nomination period is now open for a number of ARRL awards that are designed to recognize educational and technological pursuits in Amateur Radio, as well as an award to honor a young Amateur Radio operator. These include the Herb S. Brier Instructor of the Year Award for educators and the Hiram Percy Maxim Award is for a licensed radio amateur under age 21 to name only two. In all there are a half a dozen awards this year. For more information take your web browser to tinyurl.com/arrl-awards-2012 or contact Steve Ewald, by e-mail to wv1x (at) arrl (dot) org. (ARRL)

**

HAM HAPPENINGS: INTERNATIONAL MUSEUMS WEEKEND REGISTRATION NOW OPEN

The International Museums Weekend special event operations will take place on the weekends of June 16th through the 17th and again on June 23rd and 24th. Radio amateurs are encouraged to participate in this event by setting up stations in their local museums.

The International Museums Weekend organizer Harry Bloomfield, M1BYT in Leeds in the U-K. He asks that all those intending to take part in the event to register their museum operation at www.ukradioamateur.co.uk/imw.

This is not only a fun event but one that permits you to showcase amateur radio to non-hams world wide. (WIA News)

**

HAM HAPPENINGS: CELEBRATING THE MORSE CODE

New York's QSY Society Amateur Radio Club will be hosting a special event station at the Samuel F. B. Morse Estate at Locust Grove in the city of Poughkeepsie. This in celebration of his creation of the Morse Code in 1832. The operation will run from 8:30 a.m. to 1:30 p.m. Eastern Daylight Time on Saturday April 14th using the special event callsign K2QS. Transmissions will be centered on 7.034 on 40 meters and 14.034 MHz on 20. Hams making contact with K2QS will be eligible for a special commutative QSL card. QSL requests go to David Ruth at 48 Hoof Print Road, Millbrook, New York, 12545. ((KB2VJP)

**

NAMES IN THE NEWS: STEVE FLETCHER G4RFC NAMED RSGB OLYMPIC FACILITATOR

Some names in the news. The Radio Society of Great Britain has announced that Steve Fletcher, G4RFC, has been appointed as the U-K national society's Olympic Facilitator. According to a press release, Fletcher will be drawing together all the information on radio amateur special events associated with the upcoming Olympic and Paralympic Games in the UK. S As such he wants to hear about any individual plans so the RSGB website can show who is doing what, when and where. Fletcher can be reached by e-mail to g4rfcinfo (at) yahoo (dot) co (dot)uk. (GB2RS)

**

NAMES IN THE NEWS: G6LVB TO SPEAK AT AMSAT-NA - TAPR HAMVENTION BANQUET

Howard Long, G6LVB will be the featured speaker at the 2012 AMSAT/TAPR Hamvention Banquet on Friday night, May 18th in Dayton, Ohio. Long will be talking about his FUNcube Dongle and the 64 to 1700 MHz Software Defined Receiver. Banquet tickets will not be sold at the AMSAT booth during the Hamvention therefore reservations must be made ahead of time through the AMSAT Store. Its located in cyberspace at tinyurl.com/amsat-na-store. Tickets are priced at $30 each. (ANS)

**

NAMES IN THE NEWS: K9EID UK AUDIO TALK POSTED TO YOUTUBE

And a talk about improving audio on the ham radio bands given by Bob Heil, K9EID, has been posted on-line by M3XYP. Recorded at the United Kingdom 2011 National Hamfest, the video is in five parts and can be found at

www.youtube.com/user/m3xypsar/videos (M3XYP)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

THE CHANGING OF THE GUARD: PACIFIC DXER RON WRIGHT ZL1AMO S.K.

Another of those sad changing of the guard moments. This with word that the ham radio community has lost legendary Pacific DX'er and DXpeditioner Ron Wright, ZL1AMO.

Word went out two weeks ago that Wright had been admitted to the North Shore Hospital in New Zealand because of a collapsed lung but recovered. The last medical update noted that ZL1AMO was in stable condition.

According to reports, Wright was still in the hospital at the time of his death on March 6th. Services for ZL1AMO were to be held at the Morrison Fuenral Home in Henderson, New Zealand on Saturday March 10th. At the time of his passing Ron Wright, ZL1AMO, was age of 75. (OPDX, NZ Herald)

**

HAM RADIO IN SPACE: CALL FOR SPEAKERS AT 2012 AMSAT UK SPACE COLLOQUIUM

A call has gone out for speakers for the AMSAT-UK 2012 International Space Colloquium. This years gathering will take on the weekend of September 15th to the 16th at the Holiday Inn, Guildford, England. Also being sought are papers for subsequent publishing on the AMSAT-UK web site.

Submissions should be sent via e-mail to david dot johnson at blackpepper dot co dot uk or to the postal address for G4DPZ found on QRZ dot com. More information on this event is on-line at www (dot) uk (dot) amsat (dot) org/colloquium/twelve.

This years Colloquium will take place only a few weeks prior to the planned launch of AMSAT-UK's FUNcube-1 ham radio satellite. (AMSAT-UK)

**

HAM RADIO IN SPACE: AMATEUR RADIO SATELLITE COORDINATION FORMS REVISED

Hans van de Groenendaal, ZS6AKV, reports that the Amateur Satellite Frequency Coordination request form has been updated and is available for download from www.iaru.org/satellite. Also on the IARU satellite web page are a number of guideline documents which will assist satellite builders, including a document on the ITU requirements for amateur radio satellites. ZS6AKV is the IARU Satellite Advisor. (ZS6AKV)

**

HAM RADIO IN SPACE: AMSAT-NA RECEIVES OKJ TO RE-DISTRIBUTE KEPS

AMSAT's Ray Hoad, WA5QGD has announced that the organizations request to re-distribute US Air Force Space Command Keplerian elements from SpaceTrack has been approved for the period April 1, 2012 to April 1, 2013. AMSAT's request to distribute the orbital element data was approved on March 1st. (ANS, WA5QGD)

**

WORLDBEAT: RNW MEDIA NETWORK WEBLOG TO END MARCH 22

The Radio Netherlands Media Network Weblog will be closing for good at the end of the winter shortwave broadcast season on Saturday March 24th. This as the result of a new mandate by the the Holland-based broadcaster that effective on January 1, 2013, it will no longer be possible to provide coverage of international media news.

The Weblog is written and edited by Andy Sennitt and contains over 15,000 media news items published since October 2003. Sennitt says that it will remain online as a searchable archive. To prevent spam, it will no longer be possible to add comments, but the nearly 14,000 comments already received will still be available for viewing.

The last Media Network newsletter will be e-mailed to subscribers on March 22nd. (Media Network)

**

WORLDBEAT: GREECE TURNS OFF 11 MEDIUM WAVE TRANSMITTERS

The Administrative Board of the Greek Public Broadcaster has ordered the switch-off of eleven medium wave transmitters. This as a result of new austerity measures due to the financial situation being faced by that European nation.

This leaves only nine medium wave transmitters with their respective Greek Public Radio programs in operation. The action was adopted by the Administrative Board after a meeting on February 17th. (GreekRadio.com)

**

RADIOSPORT: 2012 CQIR CONTEST CELECRATES IRTS 80TH ANNIVERSARY

From the radiosports file, word that the CQIR contest is taking place at not long after this newscast goes to air. That being from mid-day on Saturday March 17th to mid-day on the 18th.

This years contest will be the international showpiece event for the Irish Radio Transmitters Society`s 80th anniversary celebration. Paul O'Kane, EI5DI, advises that his contest logger will be free and unrestricted for the contest. Also that his SD may be downloaded from ei5di.com.

CQIR entrants should be aware that the Russian DX contest overlaps with it. You can easily tell the difference between the two in that Russian stations will send a 2 character district code instead of a serial report as used in the CQIR competition.

Full rules for the CQIR contest are available on-line at www.irts.ie. (IRTS)

**

DX

2E1EUB, will once again be active as from Eastern Scotland as 2M1EUB for 7 days beginning March 24th. He will be located in the Cairngorms National Park operating on 160 and 80 meters and several ham satellites. QSL as directed under 2M1EUB on QRZ.com.

The current XW1A and XWOZJZ operations from Laos have been approved for DXCC credit. Bill Moore, NC1L, who heads up the DXCC Desk at ARRL headquarters made the approval official on Tuesday, March 13th.

EI7CC will be on the air from Lesotho as 7P8PB through April 3rd. Activity will be holiday style and he will operate when circumstances permit. QSL via EI7CC, either direct or via the bureau. Logs will be uploaded to Logbook of the World immediately after his return to Ireland.

A large group from Germany and Poland plan to be active from the Pacific island of Tonga until March 24th. They are using the callsign is A35YZ. QSL via DL7DF.

Down the road a bit comes word that DK9FN will once again return to Temotu Province be active as H40FN between this December 22nd and January 7th of 2013. QSL H40FN via HA8DD. More details will be forthcoming.

Lastly comes news that F4CYZ will be operational from Morocco as CN2YZ through years end. His activity will be from the city of Tangier and especially on the weekends.
The Mediterraneo DX Club is supporting his activities and is also providing a Web site with a log-check. Its in cyberspace at www.mdxc.org/cn2yz.

THAT FINAL ITEM: BILL BEFORE CONGRESS TO LET ASTRONAUTS KEEP SPACE SOUVENIRS

And finally this week, a dispute between NASA and some former astronauts over ownership of space artifacts has led to a bill in Congress that would give the Mercury, Gemini and Apollo astronauts "full ownership rights." This, to items such as checklists and personal logs from their missions. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the rest of the story:

--

Known as H.R. 4158 the proposed legislation grows out of an effort last year by Apollo 13 Commander Jim Lovell to sell the lunar module activation checklist that had been used to convert the moon lander into a space lifeboat on the periled 1970 Apollo 13 mission. The sale brought record-setting $388,375 but it was put on hold after the National Aeronautics and Space Administration demanded proof that the former astronaut owned the item.

Now comes H.R. 4158 that was introduced by Representative Ralph Hall of Texas. Hall is the chairman of the House Science, Space and Technology Committee. He measures cosponsor was Representative Eddie Bernice Johnson, also of Texas. It has since amassed an additional fifteen cosponsors.

In a letter to heir congressional colleagues the two key sponsors wrote that the legislation

would allow the first generation of astronauts to retain spaceflight artifacts that have been in their possession. In many cases for more than 40 years.

Under the proposed measure, astronauts from the Mercury, Gemini and Apollo programs would be allowed to keep items such as personal logs and checklists. The only thing off limits would be rock samples gathered on those early lunar missions. The so-called ï¿½_oMoon Rocks.ï¿½__

After meeting with Lovell and several other former astronauts last month, NASA Administrator Charles Bolden said that these are American heroes. He called them fellow astronauts and personal friends who have acted in good faith. As such, Bolden says that they are committed to working together to find the right policy and legal paths forward to address outstanding ownership questions.

H.R. 4158 has bi-partisan support and is expected to make it all the way through the Congressional rule making process.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

This was not the first time that NASA has challenged the sale by an astronaut of a piece of space memorabilia. In 2010, NASA challenged Apollo 14 astronaut Edgar Mitchell's attempt to sell a camera he took to the moon. Mitchell eventually agreed to donate the camera to the Smithsonian's National Air and Space Museum. (collectspace.com; physorg.com, others)

159. AM vs. SSB technical question

Newsgroup: rec.radio.cb
Date: 2012-03-20 12:01:49 UTC
From: JWG <jgovostes@gmail.com>
Message-ID: <9209945a-44db-4afa-953d-b5acea74219b@w5g2000vbv.googlegroups.com>
Source record: 251263

In short, how does a 5-watt CB produce 12W PEP in the SSB mode?

Once the carrier and one sideband are filtered out of the signal to produce a SSB signal, and this is fed to the CB's RF amplifier (which would generate 4-5W of AM), why wouldn't the result just be 4-5W of SSB?

It is often described as the power being focused into one sideband, and the increased bandwidth efficiency is clear, but: if the power input to the final amplifier is the same as with AM, where do the "extra watts" come from? Or is the amplification somehow applied in a different way to the SSB signal? Not sure how to conceptualize this.

Thanks!

A 4 watt AM signal sends out 4 watts when there is no modulation (A0)
To fully modulate an AM signal to 100%, you mix 50% more to it, in this case, your audio. This creates 2 identical mirror image sidebands, each being 1 watt. Added together, this would show 6 watts on an RMS (average) reading meter. Ohms law being what it is, and power being related to ohms law, when you increase the voltage 50% to a fixed resistance (your antenna), the current also increases by 50%, and now your PEAK TO PEAK power is now 16 watts. The allowed increase from 4 to 12 comes from the fact that the FCC allows the power of the selected sideband to be the amount of peak power that 80% AM modulation would put out. That is part of the increase. The other part of the increase is that the receiver is more sensitive when it only has to listen to half the bandwidth of an AM signal.

All told, sideband is a much more efficient use of power and radio spectrum.

Lets break it down into a easier way to explain it.
If we could see one individual radio wave, we would be able to draw a line (carrier) though the center and the upper side band (the radio wave above the carrier) would be above the carrier and the lower side band (the radio wave below the carrier) would be below the carrier.

When we subtract one of the carriers, the forward power is transferred into the other band.
Now the carrier is a power hog and probably wastes 60% of the transmitted power.
So at that rate - if both side bands combined had 5 watts and you removed one of the side bands - you would effectively double the transmit power.

However, you have to account for losses, the loss of the connectors, the loss in the coax, the values of all the components in the radio, to be conservative lets say it is 12 watts PEP when it is new.

PEP stands for Peak Envelope Power.
http://en.wikipedia.org/wiki/Peak_envelope_power

The PEP output of an AM transmitter at full modulation is four times its carrier PEP; in other words, a sold-state, 100-watt amateur transceiver is usually rated for no more than 25 watts carrier output when operating in AM

When you turn on a vac cleaner, at the initial start up, you have a power spike which is needed to start the motor turning, that can be considered a peak power level. When manufactures sells a vac cleaner, they include the PEP power level to make the motor seem more

impressive.

On the other hand, a VOM meter reads Root Mean Square - RMS power.
http://en.wikipedia.org/wiki/Root_mean_square

Because of their usefulness in carrying out power calculations, listed
voltages for power outlets, e.g. 120 V (USA) or 230 V (Europe), are
almost always quoted in RMS values, and not peak values.
Peak values can be calculated from RMS values from the above formula,
which implies Vp = VRMS √2, assuming the source is a pure sine
wave.
Thus the peak value of the mains voltage in the USA is about 120 √2, or about 170 volts.
The peak-to-peak voltage, being twice this, is about 340 volts.
A similar calculation indicates that the peak-to-peak mains voltage in
Europe is about 650 volts.
It is also possible to calculate the RMS power of a signal. By analogy
with RMS voltage and RMS current, RMS power is the square root of the
mean of the square of the power over some specified time period.
This quantity, which would be expressed in units of watts (RMS), has no
physical significance.
However, the term "RMS power" is sometimes used in the audio industry as
a synonym for "mean power" or "average power".

THANKS Scott and Channel Jumper, I really appreciate the clear and thoughtful replies. Extremely helpful! What I could find in texts and online has either been too technical or just glosses over this without stating "why" the increased wattage level is achieved on SSB.

JG

You are welcome.

One thing I did not mention was the fact that since AC - alternating current - is harder to measure then DC current / so when we talk about RMS power.
(Root Mean Square) we are talking about the amount of power necessary to produce a certain amount of heat into a resistor of a known value at X Volts DC.

This type of measurement is what keeps us from mistaking one countries voltage - at the wall outlet, from another.

My 2950 turned all the way to the left, into a 2x455 driving a 4x2879; feeding my 102" stainless whip kicks big bad butt on 10 meters! In the middle of contests, someone will stop for a moment and ask, "you're a mobile?" Happens every contest!

I've busted some serious pile-ups since the 10/11 meter bands opened in September.

I've logged 180 contacts for March and I haven't really spent a lot of time doing it.

It's obvious to me, just by observation over the years (I am 76) that federal law does not supercede local laws. Local courts and judges break constitutional law every day as a routine matter. Our whole traffic court system is an exercise in stealing money from the citizenry by taking away their constitutional rights.

Long before cell phones, I saw people driving while reading pocket books, which they held against the top of their steering wheels while driving. When their cars drifted off the road, they would correct to bring themselves back into the center of their lanes. But how could the police know after a crash whether it was caused by the guy reading a book or not? Probably they couldn't. So the statistics on such a thing are highly suspect. Whenever I

see statistics, I always ask myself, "How would I determine such a thing?" And, If I couldn't figure out the answer to that. I reason that there probably isn't any answer, and they are just blowing smoke......

And, If I couldn't figure out the answer to that. I reason that there
probably isn't any answer, and they are just blowing smoke......

With cell phones, it's pretty easy to determine if they were in use when the
accident happened, since there are records of time/location
(cell)/duration/etc. that the police can access within minutes.

That being said, it would still be conjecture as to whether the person being
on the phone was directly involved in the accident (barring eyewitnesses
seeing the driver texting, etc.)

Yes. I don't text. I don't even know how to text. When my cell phone rings while I am driving, I pick it up and say, "Hang on a minute". then I pull over to the side of the road and continue the conversation after I am stopped. I can't see how this could result in an accident, unless it is impossible for me to pull over, in which case the person calling me would just have to wait. I see no purpose in texting anyone at any time. Speaking is faster and doesn't require the use of your eyes. There is no way to insure that other people on the road with you are driving safely. There aren't enough policemen to have one in every car. So, it is just one of those million hazards that you have to put up with in life that may kill you. If you can't handle it, then you should move into a padded cell somewhere and give up living altogether.

If you can't handle it, then you should move into a padded cell somewhere and give up living altogether.

It's all part of the nanny state. And you can't blame liberals for all of it, conservatives have come up with more than enough of this silly crap as well.

The way I see it, if talking on a hands-free phone or a CB, ham radio, etc., is a hazardous distraction, then would not talking to a passenger, listening to the radio, or humming your favorite tune also be JUST as dangerous? Are we ready to have a one-person-per-car rule, with no radios/tape players/CD players/mp3 players, ad inf.?

I remember when I was a kid, we were FREE to ride our bicycles/scooters/skates/skateboards without some government entity telling us we had to wear a helmet, knee pads, elbow pads and a sweaty vinyl reflective vest (even in the bright summer sunlight!).

And some are making a big deal of Romney carrying Seamus in a cartop carrier.. I seem to remember that there have been, for some time (not sure about NOW), cartop carriers specifically made for pets, complete with food and water dispensers. And damn... is that any more dangerous for your pet than (or even AS dangerous), say, letting them ride in the back of your pickup (still done in rural areas all the time)? Or, for that matter, letting them ride in your car with a window open?

Point being, I'm so tired of having our "servants" tell us how we must live. Allow people the freedom to make their own choices and their own mistakes. Yeah, WARN them of the possible consequences of a given action, but don't force them to go to ludicrous extremes just to be able to do anything.

Well, I mostly agree. I blame it on the liberals, whether they are Republicans or Democrats. I agree that it isn't the governments business how I go about protecting/not protecting myself. Its my head, and using our socialized medical system as an excuse to force me to protect it is wrong. However, when it comes to forcing me to protect my dogs and children, that's a different matter. Until they are 18, I think its OK for the government to make laws that protect them from harm. After all, both you and I know that there are some people who should never have children....Or pets, for that matter.

> then would not talking to a passenger,

THAT argument is the one that cuts to the core
of this idiocy.

Don't forget how much Police, Fire, Ambulance,
Taxi, City Bus and package delivery services
depend on being able to talk while driving!

It's incredible to me that we were warned long ago
that for a government to try to be all things
to all people, to try to be a PARENT over all
citizens and to try to eliminate all hazards
quickly becomes a nightmare.

Franz Kafka and George Orwell's warnings have
not been heeded and the horrors they depicted
seem OPTIMISTIC as things progress to levels
even worse than what they warned about.

The USA used to berate the USSR for the abuses
that STATEISM represent, but our government
has become even worse than what we once berated.

Uneducated boobs posing as "social workers" are
attempting "social engineering" in various ways.

They won't be happy until we live in a world of nerf foam.

Already, more kids have allergies not because they
are exposed to pollen, cat hair, dog fur, etc.
but because they were NOT exposed to many of
those things as kids when they would have
developed an ability to cope.

Immunizations are a double edge sword like that as well.

If you are immunized against whatever disease,
you are not protected against as many variants
as you would be if you actually got the disease.

Kids were vaccinated against Polio long after
Polio was gone and vaccination deaths outweighed

the risk of the disease. NOW Polio is a threat
again because of heavier international travel.

I'm not against vaccinations but the "back end"
problems need to be considered more carefully
and contamination hazards need to be addressed
more seriously, and without legal immunity or
actuarial tables car companies made so famous
when Pintos were killing people.

(Ford decided the insurance risk and death payouts
were smarter than recalling the fire trap car.)

I'm not arguing against seat belts, but lots of
people overlook that seat belts actually do kill
people too. It's a matter of actuarial tables.
Statistically you are better off to use them
than not, but writing off the down side is a lie.

If you found out that your Mom died because
the seat belt killed her, you won't like
being told that it's an anomoly or having the
risk/benefit ratios explained to you.

As a kid I wore helmets for snowmobiling and
mini bike riding. I've often wondered if the
WEIGHT of these helmets don't actually cause
some extra problems.

Then again, when I was a teen I actually
brought a shotgun into the local high school.
(Firearms safety classes)

And trap shooting (clay pidgeons at a gun range)
was a unit in school psysical education classes.

I think we are being regulated to death
by STATEISM guided by fake "social workers"
with a "Chicken Little" mindset.
Government as PARENT over all of us.

I thought that making cell phones and
ham radios "hands free" was good enough.

Video and cameras catching people reading
or texting while driving
(like the bus driver a few months ago)
seemed like a good solution.

Going after hands free really does compare
to having a converstion with passengers.

Some people just can't walk and
chew gum at the same time.

We must all be dumbed down to the
most incapable common denominator.
That is the government way.

Below is a proposed cell phone law for the city of Evanston. NOTE that there
are NO provisions for or CB or Amateur radios mentioned.
And yet another web site mentioned that this politician wants to also ban
```

the use of "other, portable electricic devices" while driving. Nowhere is ANY mention made of Amateur or CB (hard to tell the difference these days) radio.

"Nearly two years after an alderman successfully pushed for an ordinance making it illegal to use a hand-held cell phone while driving, she is now seeking a total ban.

Speaking during the aldermanic comment portion of the Evanston City Council meeting, Alderman Jane Grover, 7th Ward, said Monday she plans to press for a total ban on cell phone use while driving in Evanston, going beyond last year's move which allowed hands-free use of a phone while driving.

Grover said she plans to present the issue for discussion at the Feb. 6 City Council Human Services meeting.

She said her ordinance would ban any use of the cell phone while driving within city limits.

"In a city where we have four or five miles anywhere you want to go, it doesn't make sense your business is so urgent on the phone it can't wait until you get to that destination," she said.

Evanston City Council members approved an ordinance, effective March 15, 2010, that requires hands-free device use in an effort to curtail distracted driving.

Under the city ordinance, violators face a $50 fine, with an added $200 penalty if the violation occurs at the time of a traffic accident."

Non Libertarians never think of things like that when they make laws. They think that they are the only ones who exist, and if a law doesn't bother them, then it shouldn't bother anybody, and therefore, it must be a good thing. So new laws will continue to be put on the books, as long as each one only interferes with the lives of a minority of the people, until we are all cowering in a padded cell somewhere, unable to move without breaking some law or other...

That's true. And pets and children both should qualify as a, "me", who deserve to be protected from idiots who would harm them.

Take it apart, look inside to see what you can see.
Test the leads coming out of the display for cold solder joints.
Look at the schematic's to see how it is driven.
http://tinyurl.com/czwoeq8

The factory has test points which you can check the voltages and outputs
to see if everything else is ok.
Maybe you could purchase a service manual - probably $40.00

If you had a oscilloscope - there are some other things you could
check.
But since you don't and since it is probably only worth $40.00
The best thing you can do is take it to a CB shop and ask for a
estimate.
I would venture to say as long as they do not have to replace much - it
will cost $40.00 to fix and align.

If it had a Peak and Tune done - chances are the components are out of
value and the radio was squeezed and the repair bill will exceed the
value of the transceiver.

ps - if you can't read the schematic - chances are there are no user
serviceable parts inside that you can repair with no technical knowledge
and no tools - other then a soldering iron.

Yeah, but...

No fair just quoting the "laboratory" results. In the real world, the DELIVERY system is everything.

The human lung is made to process AIR, not smoke...and it has been proven conclusively time and again that smoking (of any substance) CAUSES cancer...and emphysema...and cardiovascular problems...and a host of other ills.

So, nice self-serving rationalization, but no cigar.

Then why is there no elevated cancer rate among chronic pot smokers? No cigar but perhaps a blunt?

"People who smoke marijuana do not appear to be at increased risk for developing lung cancer, new research suggests.

While a clear increase in cancer risk was seen among cigarette smokers in the study, no such association was seen for regular cannabis users.

Even very heavy, long-term marijuana users who had smoked more than 22,000 joints over a lifetime seemed to have no greater risk than infrequent marijuana users or nonusers.

The findings surprised the studyï¿½s researchers, who expected to see an increase in cancer among people who smoked marijuana regularly in their youth.

ï¿½We know that there are as many or more carcinogens and co-carcinogens in marijuana smoke as in cigarettes,ï¿½ researcher Donald Tashkin, MD, of UCLAï¿½s David Geffen School of Medicine tells WebMD. ï¿½But we did not find any evidence for an increase in cancer risk for even heavy marijuana smoking.ï¿½ Carcinogens are substances that cause cancer.

Tashkin presented the findings today at The American Thoracic Societyï¿½s 102nd International Conference, held in San Diego.Boomers Reaching Cancer Age"

Then why is there no elevated cancer rate among chronic pot smokers? No
cigar but perhaps a blunt?

"People who smoke marijuana do not appear to be at increased risk for
developing lung cancer, new research suggests.

While a clear increase in cancer risk was seen among cigarette smokers
in the study, no such association was seen for regular cannabis users.

Even very heavy, long-term marijuana users who had smoked more than
22,000 joints over a lifetime seemed to have no greater risk than
infrequent marijuana users or nonusers.

The findings surprised the studyï¿½s researchers, who expected to see an
increase in cancer among people who smoked marijuana regularly in their
youth.

ï¿½We know that there are as many or more carcinogens and co-carcinogens
in marijuana smoke as in cigarettes,ï¿½ researcher Donald Tashkin, MD, of
UCLAï¿½s David Geffen School of Medicine tells WebMD. ï¿½But we did not find
any evidence for an increase in cancer risk for even heavy marijuana
smoking.ï¿½ Carcinogens are substances that cause cancer.

Tashkin presented the findings today at The American Thoracic Societyï¿½s
102nd International Conference, held in San Diego.Boomers Reaching

Cancer Age"

IM (libertarian)O, this is a law made to be broken. I would record (with a small hidden camera) everytime I was stopped for any reason and broadcast the recording on Youtube. I would also encourage others to do the same, and I might even start a bsiness installing the recording equipment on cars. If it happens, especially on either my, or public, property, it is my constitutional right to record it. After all, just what are the police afraid of? The truth? If they don't commit any crimes, then they have nothing to worry about. Don't forget. These guys are our public servants.....

radioguy <radioguy222@yahoo.com> writes:

5> Newsgroups:
comp.os.os2.advocacy,alt.usenet.kooks,rec.radio.amateur.policy,alt.fucknozzles,rec.radio.c
b

5> Palmdale California are the butt pirates. They totally outlawed
5> portable ham hts, while restricting antennas to all other hams
(other
5> than AZubaru eho is allowed to have only a vhf uhf antenna and is
NOT
5> allowed to transmit on all of the frequencies his FCC license says
he
5> can and upheld in Palmdale's fabor by the California s tate court)
to
5> no higher than one inch above the roof of a ham's house and no
higher
5> than one inch above the roof of a ham's vehicle.

5> Since EVERY mobile ham antenna I have seen so far is taller than
that,
5> then Palmdale has also effectively completely outlwed mobile
operation
5> of ham radio within the city limits also besides just outlawing
5> portable ham ht's.

5> And the California court upheld that Palmdale is allowed to
restrict
5> ham radio like this no matter what the FCC says.

5> so it is now very obvious that the FCC commited the crime of fraud
5> when they fraudently told ham radio operators (and by default CB
5> operators and mobile shortwave listeners) that they can just
operate
5> mobile if they can't operate from their homes because of CC&R's and
5> HOA's and city zoning laws.

5> It is now clear they also committed the crime of fraud when they
5> fraudently told ham radio operators that cities cab NOT restrict
ham
5> radio transmissions.

5> If what the FCC said was actually true instead of fraud, then
Zubaru
5> would be allowed to transmity on all of the grequencies his FCC

5> license says he can. However he can't because Palmdale said he
isn't
5> allowed to and the California state court upheld Palmdale's
decision
5> and ruled that Palmdale is allowed to prevent Zubaru from
transmitting
5> on frequencies that his FCC license says he is allowed to transmit
5> on. And other cities are allowed to prevent hams from transmitting
on
5> frequencies that their fcc license says they are allowed to
transmit
5> on.

5> Therefore, it is very obvious the FCC does not have authority over
5> radio transmissions in Palmdale, California nor anywhere in
California
5> for that matter.

5> Otherwise, as stated many many times in these newsgroups, both FCC
5> officials and federal marshalls would be coming down on both
Palmdale
5> and the California state court since only the FCC has the authority
to
5> regulate what radio frequencies hams are and are not allowed to
5> tramsnit on.

What does any of that have to do with OS/2, radioguy?

I gotta hand to it to you, you keep coming up with the damndest bullshit
that even tops my stuff.

No it is not illegal to videotape an officer performing his duty in public.
When they say it is illegal, have them identify the law. I'll bet they
won't do it.
And there certainly is no law preventing anyone to broacast an officer's
conversation.

Why? There's this little thing known as "Freedom of speech", for starters.

If they are in public, there is a diminished expectation of
privacy.
An officer filmed giving a citation to a driver, for whatever
reason, shouldn't expect his actions are private.

>And there certainly is no law preventing anyone to broacast an officer's
>conversation.

Yes and no. It would depend on the context.
A simple speeding ticket probably could be broadcast. If it's
something that could harm an investigation, probably not.

>Why? There's this little thing known as "Freedom of speech", for starters.

How does that apply?

Wouldn't broadcasting an officer's conversation be considered 'disclosing
the contents of a radio transmission to a third party'? It always was a
part of the communications act. I guess it would apply to video
'broadcasts' also.

Oh, and Radioguy, I don't usually do this in public forums, but since every
poster chose to include your screed in their response, please repeat after
me: they themselves.

248. INTRO TO MARQUEER, KB9RQZ

Newsgroup: rec.radio.cb
Date: 2012-05-03 22:09:34 UTC
From: norminn nimm <norminn.nimm@gmail.com>

http://tinyurl.com/2cs67f

For those of you just getting to know "Mark Morgan, KB9RQZ" via
his spamming and cross-posting of RRAP and other "rec.radio" groups,
a
little intro is due.

Mark started in here about 8 years ago with his functionally
illiterate diatribes, mostly trying to get support for his "waivers"
for Morse Code due to alleged neurological deficits, among which he
alledges being "dyslexic".

The problem is Morkie tried to get an allergist to write his
"waiver" for him. After having claimed an IQ of over 240, one has
to
wonder on what two fingers he added that up on. It was suggested he
see a neurologist, but like every attempt to help him, he told those
who suggested it to get ####ed.

On finding out that I was an enlisted retiree from the USMC,
Morkie started in on tales of how >>>HE<<< was not only an officer,
but
a COLONEL in the US Army "chemical corps", and that he was DRAFTED
ta-boot!...As if that meant a rat's pack of snot in this forum!

Of course Morkie didn't count on anyone actually being able to
do
math better than he...You see, based upon his birthday (which was
once
in QRZ), Morkie would have only been SEVEN years old when the
drafted
ENDED in the United States...

Anyone seeing a pattern here?

When he was busted with this fact, he then relented and
"admitted"
that he was "only" a lieutenant, but that his unit CO wouldn't let
him
resign even though he's an admitted sexual deviate. Of course he's
since changed even THAT story, and he now tells a tale of how he was
an
enlisted clerk in the Army, discharged for emotional problems.

Yeah...Right. A "clerk" who can't even SPELL
"clerk"... ! ! ! !

Over the past several years, Morkie has alternatively denied being
a mental health patient, then admitted that he's being treated for
"anger issues". He's also lied about being in trouble with the
law...You see, Markie likes to "care" for his elderly father by taking
advantage of him, then skirting the law. It's been a close shave.

Now Morkie's moved from his previous QTH in south-central Illinois
to the Michigan Upper Penninsula in order to (A) avoid the
aforementioned abuse issues, and to (B) take advantage of more lenient
welfare laws that allow him to pork out at home while allowing you and
I to "earn" his income for him.

Among his many NG credits are his claims of being stalked, his
admission (and only redeeming attribute) that he not only lies, but
does so without moral reservation, and that he believes that children
should be TAUGHT to lie.

Morkie now "claims" to be married, but can't seem to produce any
evidence of it, other than to point to the recent licensure of a
female-sounding named person who shares his POB in Chassell,
Michigan.

Oh yeah...His "wife"...Allegedly a law clerk or paralegal of some
sort, they were allegedly married in Israel. No doubt a green card
scam if they are indeed "married". Obviously she doesn't care enough
about him to take his name, even to have it hyphenated with hers.

So ...for those of you just tuning in, sit back and enjoy the
flailings of Mark C. "I Am A Drafted Gay Pagen Chemical Corps Officer"
Morgan.

He never disappoints!

>>>The FCC rules require that amateur stations operating in the 23 cm band
may not cause harmful interference to stations in the
Radionavigation-Satellite Service, the Aeronautical Radionavigation
Service, the Earth Exploration Satellite Service or the space
research
service. Nobody is arguing with that. What is questionable are
letters being sent to hams telling them that they are the source of
interference to this new radar system even if they or their repeaters
have not been on 23 centimeters in years.

it's the same thing as hoas. There were hoas who knew the ham did not
have any radios or any antennas at all, yet knew he was licensed as a
ham by the fcc, sso complained that his mere presence in the
neighborhood caused radio frequency interference to all sorts of
things in the properties of all the homes in the hoa, including one
hoa resident who complained he kept hearing both sides of the ham's
conversations coming out of his toilet 24/7 just because of the mere
presence of the ham radio operator being in the neighborhood (without
any radios or antennas at all).

and he wanted the radio frequency interference to his toilet stopped
pronto, immediately.

I have recently learned of a HOA group who have blamed their diarrhea
problems on the RF that is allegedly being sent from one of their
neighboring Amateur Radio operators.
The group is stating that their collective problems with runny bowels is
caused by a local Amateur Radio operator who transmits on various UHF
frequencies.
The spokesperson said that they grouped together and kept track of their
bowel movements and timed them, and that their bowel movements were most
active during the evening hours when the Ham Op was on the air.
The group maintains that their bowel movements are "loose and liquid" in the
evening hours, but that during the morning hours, when the Amateur is
asleep, that their bowels exhude, "large and solid masses with little or no
discomfort."
This concerned group has contacted several city officials and have made
their issues known. One city official seemingly scoffed at their concerns
and alleged that the group "was full of it."

The group is now considering whether or not to take their case to the FCC but lack funding to do so.

> When they say it is illegal, have them identify the law. I'll bet they
> won't do it.

This is currently in the courts. And it's very much under test in the courts in Chicago, where such an ordinance WAS passed recently.

> And there certainly is no law preventing anyone to broacast an officer's
> conversation.

Actually, rebroadcast of anyone's conversation without their knowledge and consent is illegal, according to the regulations of many radio services. And, recording the voice of anyone without their consent is illegal in many states. You can video them, but you can't capture the audio. That's why security cameras are silent.

And, again, it's currently under court test for live action audio/video of police activities to be broadcast without consent.

>
> Why? There's this little thing known as "Freedom of speech", for starters.

You may wish to review that Amendment, for starters. "Freedom of Speech" only refers to the ability of the citizen to speak out against the government without the government striking back in petty retribution. It does not confer a consequence free right to publicly disseminate someone else's speech without permission. "Freedom of Speech" also refers ONLY to the government not attempting to silence criticism of the government.

But considering several persons in Congress, including, to name only one, Senator Barbara Boxer calling for the censure, defunding, and summary termination from their positions, of meteorologists who do not sign onto the Global Warming Agenda; and the current program of silencing, isolation, and revocation of permit for protests in Chicago related to the NATO conference, you may wish to speak your protests to your representatives before 'Freedom of Speech" is a noble memory of a day before The Tyranny.

258. Solutions Manuals, Instructor Manuals, Test Banks collection 2012

Hello,

We would like to inform you that we have updated our list with the following new titles.

You can contact us directly at Student.p24(at)Hotmail(dot)com .

If the title you are looking for is not listed, do not hesitate to contact us,
we will try to help.

==========

2011 Federal Taxation, 5th Edition 2011, Pratt.Kulsrud, Instructor Manual & Solutions Manual

2011 Federal Taxation, 5th Edition 2011, Pratt.Kulsrud, Test Bank

21st Century Astronomy, 3rd Edition, Blumenthal.Hester.Kay.Smith.Voss, Instructor Manual

21st Century Astronomy, 3rd Edition, Blumenthal.Hester.Kay.Smith.Voss, Test Bank

A Concise Introduction to Logic, 11th Edition 2012, Hurley, Test Bank

A Framework for Human Resource Management, 6th Edition, Gary Dessler, Instructor Manual

A Framework for Human Resource Management, 6th Edition, Gary Dessler, Test Bank

A History of Modern Psychology, 10th Edition 2012, Schultz.Schultz, Instructor Manual

A History of Modern Psychology, 10th Edition 2012, Schultz.Schultz, Test Bank

A History of Modern Psychology, 9th Edition, Schultz.Schultz, Test Bank

A History of Narrative Film, 4th Edition, Cook, Test Bank

A History of Western Music, 8th Edition, Burkholder.Grout.Palisca, Instructor Manual

A History of Western Music, 8th Edition, Burkholder.Grout.Palisca, Test Bank

A Second Course in Statistics; Regression Analysis, 7th Edition 2012, Mendenhall.Sincich, Solutions Manual

Abnormal Psychology, 11th Edition, Kring.Neale.Johnson, Instructor Manual

Abnormal Psychology, 11th Edition, Kring.Neale.Johnson, Test Bank

Abnormal Psychology, 4th Edition, Seligman.Walker.Rosenhan, Test Bank

Abnormal Psychology; An Integrative Approach, 6th Edition 2012, Barlow.Durand, Instructor Manual

Abnormal Psychology; An Integrative Approach, 6th Edition 2012, Barlow.Durand, Test Bank

Abnormal Psychology; Perspectives with MyPsychKit_Fourth Edition, 4th Edition, Dozois.Firestone, Instructor Manual

Abnormal Psychology; Perspectives with MyPsychKit_Fourth Edition, 4th Edition, Dozois.Firestone, Test Bank

Access to Health, 12th Edition 2012, Donatelle, Solutions Manual

Access to Health, 12th Edition 2012, Donatelle, Test Bank

Accounting Information Systems, 12th Edition 2012, Romney.Steinbart, Instructor Manual & Solutions Manual

Accounting Information Systems, 12th Edition 2012, Romney.Steinbart, Test Bank

Accounting Information Systems, 7th Edition, James Hall, Solutions Manual

Accounting Principles, 10th Edition, Weygandt.Kimmel.Kieso, Instructor Manual & Solutions Manual

Accounting Principles, 10th Edition, Weygandt.Kimmel.Kieso, Test Bank

Accounting Using Excelr for Success, 2nd Edition 2012, Reeve.Warren.Duchac, Solutions Manual

Accounting, 24th Edition 2012, Warren.Reeve.Duchac, Instructor Manual & Solutions Manual

Accounting, 24th Edition 2012, Warren.Reeve.Duchac, Test Bank

Accounting, 9th Edition 2012, Horngren.Harrison.Oliver, Instructor Manual & Solutions Manual

Accounting, 9th Edition 2012, Horngren.Harrison.Oliver, Test Bank

Adober Dreamweaverr CS5; Complete, 1st Edition 2011, Shelly.Wells, Instructor Manual & Solutions Manual

Adober Dreamweaverr CS5; Complete, 1st Edition 2011, Shelly.Wells, Test Bank

Adober Dreamweaverr CS5; Comprehensive, 1st Edition 2011, Shelly.Wells, Instructor Manual & Solutions Manual

Adober Dreamweaverr CS5; Comprehensive, 1st Edition 2011, Shelly.Wells, Test Bank

Adober Dreamweaverr CS5; Introductory, 1st Edition 2011, Shelly.Wells, Instructor Manual & Solutions Manual

Adober Dreamweaverr CS5; Introductory, 1st Edition 2011, Shelly.Wells, Test Bank

Adober Photoshopr CS5 Revealed, 1st Edition 2011, Elizabeth Eisner Reding, Instructor Manual & Solutions Manual

Adober Photoshopr CS5 Revealed, 1st Edition 2011, Elizabeth Eisner Reding, Test Bank

Advanced Accounting, 11th Edition 2012, Fischer.Taylor.Cheng, Solutions Manual

Advanced Accounting, 11th Edition 2012, Fischer.Taylor.Cheng, Test Bank

Advanced Financial Accounting, 9th Edition 2011, Baker.Christensen.Cottrell, Instructor Manual & Solutions Manual

Advanced Financial Accounting, 9th Edition 2011, Baker.Christensen.Cottrell, Test Bank

Advanced Visual Basic 2010, 5th Edition 2012, Irvine.Gaddis, Solutions Manual

Advertising & IMC; Principles and Practice, 9th Edition 2012, Moriarty.Mitchell.Wells, Instructor Manual

Advertising and Integrated Brand Promotion, 6th Edition 2012, O'Guinn.Allen.Semenik, Instructor Manual

Advertising and Integrated Brand Promotion, 6th Edition 2012, O'Guinn.Allen.Semenik, Test Bank

Advertising and Promotion; An Integrated Marketing Communications Perspective, 9th Edition 2012, Belch.Belch, Instructor Manual

Advertising and Promotion; An Integrated Marketing Communications Perspective, 9th Edition 2012, Belch.Belch, Test Bank

Agricultural Economics, 3rd Edition, Drummond.Goodwin, Instructor Manual

Agricultural Economics, 3rd Edition, Drummond.Goodwin, Test Bank

Algebra and Trigonometry, 4th Edition 2012, Beecher.Penna.Bittinger, Solutions Manual

Algebra and Trigonometry, 4th Edition 2012, Beecher.Penna.Bittinger, Test Bank

Algebra and Trigonometry, 9th Edition 2012, Michael Sullivan, Solutions Manual

Algebra and Trigonometry, 9th Edition 2012, Michael Sullivan, Test Bank

Algebra for College Students, 5th Edition, Mark Dugopolski, Solutions Manual

Algebra for College Students, 5th Edition, Mark Dugopolski, Test Bank

Algebra for College Students, 7th Edition 2012, Lial.Hornsby.McGinnis, Instructor Manual & Solutions Manual

Algebra for College Students, 7th Edition 2012, Lial.Hornsby.McGinnis, Test Bank

Algebra; A Combined Approach, 4th Edition 2012, Elayn Martin-Gay, Instructor Manual & Solutions Manual

Algebra; A Combined Approach, 4th Edition 2012, Elayn Martin-Gay, Test Bank

Algebra; Form and Function, 1st Edition, McCallum.Connally.Hughes-Hallett.Cheifetz.Davidian.Lock.Lovelock.Schmierer.Shure.Swenson.Marks

America's Courts and the Criminal Justice System, 10th Edition 2011, Neubauer.Fradella, Instructor Manual

America's Courts and the Criminal Justice System, 10th Edition 2011, Neubauer.Fradella, Test Bank

America; A Narrative History, 8th Edition, Tindall.Shi, Instructor Manual

America; A Narrative History, 8th Edition, Tindall.Shi, Test Bank

America; A Narrative History_Brief, 8th Edition, Tindall.Shi, Instructor Manual

America; A Narrative History_Brief, 8th Edition, Tindall.Shi, Test Bank

American Constitutional Law; Sources of Power and Restraint_Volume I, 5th Edition 2012, Stephens.Scheb, Instructor Manual

American Criminal Courts, 1st Edition 2012, Roberson.DiMarino, Instructor Manual

American Criminal Courts, 1st Edition 2012, Roberson.DiMarino, Test Bank

American Foreign Policy; The Dynamics of Choice in the 21st Century, 4th Edition, Jentleson, Test Bank

American Government and Politics Today 2011-2012 Edition, 15th Edition 2012, Schmidt.Shelley.Barbara.Bardes.Ford, Test Bank

American Government and Politics Today; Essentials 2011 - 2012 Edition, 16th Edition 2012, Bardes.Shelley.Schmidt, Instructor Manual

American Government and Politics Today_Texas Edition_2009-2010, 14th Edition, Schmidt.Shelley.Bardes.Maxwell.Crain.Santos, Test Bank

American Government and Politics Today_Texas Edition_2011-2012, 15th Edition 2012, Schmidt.Shelley.Bardes.Ford.Maxwell.Crain.Santos, Test Bank

American Government; Power and Purpose, 11th Edition, Ginsberg.Lowi.Shepsle.Ansolabehere, Instructor Manual

American Government; Power and Purpose, 11th Edition, Ginsberg.Lowi.Shepsle.Ansolabehere, Test Bank

American Government; Power and Purpose_Brief, 11th Edition, Ginsberg.Lowi.Shepsle.Ansolabehere, Instructor Manual

American Government; Power and Purpose_Brief, 11th Edition, Ginsberg.Lowi.Shepsle.Ansolabehere, Test Bank

American Politics Today, 1st Edition, Bianco.Canon, Instructor Manual

American Politics Today, 1st Edition, Bianco.Canon, Test Bank

American Politics Today, 2nd Edition, Bianco.Canon, Instructor Manual

American Politics Today, 2nd Edition, Bianco.Canon, Test Bank

American Public Policy; An Introduction, 10th Edition 2012, Cochran.Mayer.Cayer.McKenzie.Peck, Instructor Manual

American Public Policy; An Introduction, 10th Edition 2012, Cochran.Mayer.Cayer.McKenzie.Peck, Test Bank

An Introduction to Mathematical Statistics and Its Applications, 5th Edition 2012, Larsen.Marx, Solutions Manual

An Invitation to Health; Choosing to Change_Brief Edition, 7th Edition 2012, Dianne Hales, Instructor Manual

An Invitation to Health; Choosing to Change_Brief Edition, 7th Edition 2012, Dianne Hales, Test Bank

Analysis for Financial Management, 9th Edition, Higgins, Solutions Manual

Analyzing Politics, 2nd Edition, Shepsle, Solutions Manual

Anatomy & Physiology for Health Professions; An Interactive Journey, 2nd Edition, Colbert.Ankney.Lee, Instructor Manual

Anatomy & Physiology for Health Professions; An Interactive Journey, 2nd Edition, Colbert.Ankney.Lee, Test Bank

Anatomy & Physiology; The Unity of Form and Function, 6th Edition 2012, Saladin, Test Bank

Applied Basic Mathematics, 2nd Edition 2012, Clark.Brechner, Instructor Manual & Solutions Manual

Applied Basic Mathematics, 2nd Edition 2012, Clark.Brechner, Test Bank

Applied Business Ethics; A Skills-Based Approach, 1st Edition 2012, Dean Bredeson, Instructor Manual

Anyone who is pissed off by having his/her constitutional rights violated today, is in for an early heart attack. The liberals are fast deep sixing the document..... If you don't want that to happen, they you better start doing something about it. Staying silent is going basckward. You are either for it or against it.

Actually it's added a new dimension. I don't have to talk to people anymore.

Bill Graham:
On usenet, misfits, Aspergers Syndrome,
Disability cases and LIBERAL politics dominate.
The lunatics run the asylum.
They see Constitutionalists as nut cases.

You're preaching to the other sides' choir, Bill.

I don't think the Fabian "gradual socialists"
are quite ready to cast off their sheeps clothing
(as in their wolf in sheeps clothing crest)
and admit they are against the US Constitution.

Their motto (with the tortoise logo) asserts they
will "strike hard" some day, but I suspect
they aren't quite ready for their

"end game" scenario.

It's possible though.

The Fabian Society and its War On America
Posted on August 14, 2011 by jmrodkey
The Fabian Society and its War on America.

Today we hear a great deal about Progressives in America but fully understanding Progressivism begins through the exploration of its roots and those roots begin in The Fabian Society. The Fabian Society began in England in 1887 by a relatively small group of intellectual elitists who embraced Marxist Socialism forced upon a society through slow gradual and incremental steps. The logo (pictured above) is a symbol of the Fabian Society. One should immediately questions why an organization would consider using a shield that pictures a wolf in sheep's clothing as an image to promote their beliefs and the answer should be an obvious one. It is the arrogance of the intellectual elite. More importantly though should be the question "If they are the wolf, who are the sheep?"

The gradual transition to a Marxist Socialist regime is also represented in another image popular with Fabian Socialists.

The Fabian's gave this gradual change a policy directive. They called it: "The Doctrine of Inevability of Gradulaism"

This doctrine established that "without breach of continuity or abrupt change of the entire social issue," by infiltrating educational institutions, government agencies, and political parties. Prominent Fabian and writer, George Bernard Shaw, revealed that their goal was to be achieved by "stealth, intrigue, subversion, and the deception of never calling socialism by its right name."

George Bernard Shaw was a beloved satirist in England who is still noted for his wit and in educational circles, some of that wit is carefully concealed although Shaw himself never concealed his intent.

"I don't want to punish anybody, but there are an extraordinary number of people who I might want to kill…I think it would be a good thing to make everybody come before a properly appointed board just as he might come before the income tax commissioner and say every 5 years or every 7 years…just put them there and say , 'Sir or madam will you be kind enough to justify your existence…if you're not producing as much as you consume or perhaps a little bit more then clearly we cannot use the big organization of our society for the purpose of keeping you

alive. Because your life does not benefit us and it can’t be of very much use to yourself.’
-George Bernard Shaw

This is the core of Eugenics, or the philosophy of applied science or the bio-social movement which advocates the use of practices aimed at improving the genetic composition of a population, usually referring to human populations.

Shaw also said “A part of eugenic politics would finally land us in an extensive use of the lethal chamber. A great many people would simply have to be put out of existence simply because its wastes other peoples time to look at them”
Shaw is calling for the program implemented by Germany to purge its society of those the government deemed drains upon their society. Shaw’s principles put into action gave birth to the gas chambers in Nazi Germany.

One principle the Fabians fully grasped was that to fundamentally transform Society it would be necessary to move that Society towards a Welfare State. In order to accomplish this they understood that they had to change the dialogue to focus on the weaknesses in human nature in order to gain sympathy and popularity for this cause. If they could manipulate societies, preying upon poor to use them to advance their causes, while at the same time preying upon the human nature by making them feel guilty and responsible for the condition of the poor they could accomplish the second phase of their goals.

The second phase is to replace Free Market Capitalism with State Capitalism. They believed that State should control aspects of business such as electric power production, transportation, precious metals and of course, credit. The remaining balance of economic systems would be left to the private sector however; it, in their thinking, must be highly regulated by the State and operated according to the wishes of the State.

There is nothing tolerant about the Fabian Socialist, they are and were statists. The long term goal was to delude the populace into believe that Democracy and Socialism were compatible while pushing towards a Socialistic Dictatorship through a legalistic view of morality where the individual is simply a part of a greater collective. No individual has any worth except the worth that individual provides to the collective. If the collective does not benefit from the individual than that individual has absolutely no worth.

It is obvious that Adolph Hitler yields what happens when this model is put in to practical purpose. The only difference between the Fabian Society and Hitler was that they believed he moved to fast for society to accept their goals.

The philosophy was embraced by intellectual elitists in America. Knowing that Socialist meant Communist in the average American mind and Communism was a known enemy of American Values, they could not identify themselves as being openly Socialist so they called themselves something different. They used the word Progressive.

It was essential that, in order to establish global dominance through a world dictatorship, the principle of American Exceptionalism must fail. In less than 100 years America had gone from being an upstart new Government to the leader of the principles of freedom and individual liberties and that this had given birth to an entrepreneurial spirit that had made the American dollar the standard of measurement for the value of world currency.

To the pure Socialist, this is unthinkable and unacceptable. This does not exemplify their collective will. The free-market ideology must be forced to collapse. If society was to be purged from the undesirables, a system had to come into place that would replace the free market individualism to remove competition from the largest corporation while at the same time regulating those large corporations to comply with a word governance ideology. They could not have competition; they must regulate to create the level playing field.

In order to accomplish this the conversion of America from the viewpoint of free market Capitalism to State Capitalism, something had to be done to collapse American economy from a market that could function prosperously without Government interference into a country that would become dependent upon the government in order to maintain its power that would be equally beneficial to both the Corporate power structure and the Government.

At the same time, the Government needed to replace the spirit of entrepreneurialism of the individual with a Welfare State of dependency. This would call for a dramatic shift of the paradigm within the realm of the intellectually elite in this country. In the most daring strategy of the Fabian Progressive movement, the spirit of Charity through moral conviction of the individual had to be replaced with the mandated theft of monies to create a dependent society in what Hayak referred to as the Road to Serfdom.

The wolf needed to identify the flock that it was going to feed upon in order to accomplish that aim and this task fell upon Margaret Sanger.

Margaret Sanger, the mother/founder of Planned Parenthood who has successfully deceived the masses into embracing them as holding compassion for the poor, made her intentions clear but few then and now listened to her intent. Modern Progressives seek to hide what Sanger said in public because in this politically correct world, the real heart and spirit of her words betray the aims and goals of the image Planned Parenthood had fabricated for themselves. Consider these three quotes from Sanger.

“Our failure to segregate morons who are increasing and multiplying … demonstrates our foolhardy and extravagant sentimentalism … [Philanthropists] encourage the healthier and more normal sections of the world to shoulder the burden of unthinking and indiscriminate fecundity of others; which brings with it, as I think the reader must agree, a dead weight of human waste. Instead of decreasing and aiming to eliminate the stocks that are most detrimental to the future of the race and the world, it tends to render them to a menacing degree dominant … We are paying for, and even submitting to, the dictates of an ever-increasing, unceasingly spawning class of human beings who never should have been born at all.”

“Eugenics is … the most adequate and thorough avenue to the solution of racial, political and social problems”

“The most merciful thing that a large family does to one of its infant members is to kill it.”

To implement this Eugenic Control of Society, the wolf recognized the sheep it needed to devour. Again, quoting from Margaret Sanger:

“We should hire three or four colored ministers, preferably with social-service backgrounds, and with engaging personalities. The most successful educational approach to the Negro is through a religious appeal. We don’t want the word to go out that we want to exterminate the Negro population. and the minister is the man who can straighten out that idea if it ever occurs to any of their more rebellious members.”

Sanger’s ideology was radical for its time and the fact that so many of her supporters choose to ignore these statements from her demonstrates that her direct attempts at the Eugenic destruction of the black race and those that were identified as the social morons and dredges of society by the intellectually elite was never realized. That is not to say it was not tried. Through Sanger’s progressive ideology several states adopted a forced sterilization program that resulted in in the sterilization of an estimated 60,000 Americans.

The concept of the turtle moving slowly replaced Sanger’s radical Hitleresque destruction of classes that was deemed non-productive towards meeting the Fabian ends.

In order to replace entrepreneurialism the first step had to be to find a way to remove the competition of the free market system by replacing it with a governmentally controlled economic standard. Enter the Federal Reserve.

While the excuse of a depression was its impetus, the goal of its establishment is evidenced in its results. The Federal Reserve could now control and regulate Wall Street through economic manipulations in implementation of interest rates, securities and bonds. The Authority of the Federal Reserve, while supposedly separate from the powers of Congress, falls under an appointed office through the Presidency effectively now giving the President some control over

market fluctuations and pricing.

A new way of manipulating the market had to be developed and this fell to a man named John Maynard Keynes

Keynes stated “Lenin is said to have declared that the best way to destroy the Capitalist System was to debauch the currency. By a continuing process of inflation, governments can confiscate, secretly and unobserved, an important part of the wealth of their citizens. By this method they not only confiscate, but they confiscate arbitrarily; and, while the process impoverishes many, it actually enriches some. The sight of this arbitrary rearrangement of riches strikes not only at security, but at confidence in the equity of the existing distribution of wealth. Those to whom the system brings windfalls, beyond their deserts and even beyond their expectations or desires, become ‘profiteers,’ who are the object of the hatred of the bourgeoisie, whom the inflationism has impoverished, not less than of the proletariat. As the inflation proceeds and the real value of the currency fluctuates wildly from month to month, all permanent relations between debtors and creditors, which form the ultimate foundation of capitalism, become so utterly disordered as to be almost meaningless; and the process of wealth-getting degenerates into a gamble and a lottery.”

This new philosophy of economics is now referred to as Keynesian and is the only method of economics that the liberal progressives embrace in spite of its continual and historic evidence of complete failures.

The economic manipulations of the Federal Reserve were not enough though. The President’s powers had to be extended to other institutions and this was realized through FDR’s New Deal. The New Deal was the brainchild of a man named Stuart Chase. Stuart Chase was a member of the Fabian Society at Harvard University.

He laid out the basis of the New Deal. The New Deal would empower the President through newly created agencies run by appointed positions to manipulate the government’s regulations of the business world effectively choosing which companies would fail and which would succeed through fees, duties and regulations.

The New Deal was only Stuarts short term goals. The long term goals were established in 1942 through a book he wrote entitled “The Road We Are Traveling”. In it he laid out the Fabian/Progressive plan for the future of America

1.A strong, centralized government.
2.An executive arm growing at the expense of the legislative and judicial arms.
3.The control of banking, credit and security exchanges by the government.
4.The underwriting of employment by the government, either through armaments or public works.

5.The underwriting of social security by the government – old-age pensions, mothers' pensions, unemployment insurance, and the like.
6.The underwriting of food, housing, and medical care, by the government.
7.The use of deficit spending to finance these underwritings.
8.The abandonment of gold in favor of managed currencies.
9.The control of foreign trade by the government.
10.The control of natural resources.
11.The control of energy sources.
12.The control of transportation.
13.The control of agricultural production.
14.The control of labor organizations.
15.The enlistment of young men and women in youth corps devoted to health, discipline, community service and ideologies consistent with those of the authorities.
16.Heavy taxation, with special emphasis on the estates and incomes of the rich.
17.Control of industry without ownership.
18.State control of communications and propaganda.
Perhaps the most egregious part of this movement has been the way in which the government has become the Fabian Society in its deluding the poor into believing they are the Savior of the poor while the plan all along has been the fattening of the sheep to prepare society to accept their annihilation so openly embraced by the likes of Shaw, Sanger and others in the foundation of the Progressive movement.

We are on the precipice. Have you ever believed that the government needs to step in and do something about the reckless morality of many in our society who bear more children than they can support? Isn't this exactly one of the excuses used by Progressives embracing Pro-Choice position to justify the wholesale slaughter of the most innocent among us?

As we watch the downward spiraling of our economy, would we justify purging those who contribute less or nothing by our estimation in order to preserve our own existence?

This has been the trail of the Fabian turtle in its slow path towards The Doctrine of Inevability of Gradulaism. The journey of this turtle does not end with the surrender of moral values and replacing them with Fabian intellectualism in America. The turtles journey ends when this is the rule for the world and this can only be accomplished by the fundamental transformation of America.

The most dangerous things to human sanctity is that Progressives believe this is compassion. Their understanding about compassion is vastly different from our own but to help us all understand how they define compassion consider this quote in 2010 for progressive author and commentator Virginia Ironside

"If a baby's going to be born severely disabled or totally unwanted, surely an abortion is the act of a loving mother. If I were the mother

of a suffering child – I mean a deeply suffering child – I would be the first to want to put a pillow over its face…My feeling of horror at suffering is much greater than getting rid of a couple of cells. If it was a child I really loved, who was in agony, I think any good mother would."

That, my friends is Progressive compassion. "My Feeling of horror at suffering is much greater than getting rid of a couple of cells."

Why yes.... They do feel that way. And, actually, some of them did. They
wandered on to my property, liked the cut of my jib, and decided to stay.

Hah. Doesn't matter to the FCC. Anyone running more than 4 watts on CB and interfering with other services will certainly get a knock on their door and get a stiff $10,000 fine to pay.

A friend of mine though, once did run a 1,000 watt CB radio, NO linear. LEGALLY!
How?
When the FCC inspector came knocking on the trailer he was using, it was explained that this was an emergency communications excercise and under the rules, the power was legal. The inspector left with out issuing a citation.

When he keyed down on the damn thing, it spread over 20 channels!
Nobody within 30 miles of him could talk.

Precisely.
This november let your voice be heard!
Vote out any person now in office!
Regardless of the level of office.
We need to wipe out the old crooks and put in new ones.

You forgot about the shower curtain.

Lots of families use the rest of
the bathroom while somebody is
in the shower, behind a shower curtain.

You should know that, Gary Lee!

He has two convictions for BEATING his ex-wife. He has a
garnishment order against him, though it's very possible the SoL has
expired on it.
He was sued by Eagle Property Management a few times for failure
to pay rent.
And he thinks tax payers should pay for any and all of his
storage needs.
A few years ago he was outted as a pro-CPS shill. He's been

butthurt about that ever since. It upsets him more than any other
TRUTH that's been exposed about him.

Which of these women is Lisa Rene Watkins:

es

With the Christmas season upon us again, my stepdaughter was launching
into her usual tirade of "I need this" (Nintendo 64 games, Pokemon,
videos, Rhianna CD, etc.) After enduring a trip through Kmart, I
was at my wits end. I took the kid home and filled the bathtub with
water. Then I dunked the brat's head under the water and counted out
a full minute, with her flailing her arms. I brought her up and she
gasped for air. When she'd caught her breath, I asked her, "When you
were under that water, did you 'need' Nintendo? Pokemon? Rhianna?"
She shook her head. "What were you thinking about?" I
prodded. She told me "I was thinking that I needed air."

"Now you know the difference between 'need' and 'want'" I exclaimed
triumphantly.

--a true story

As of Wednesday, August 31, 2011:

SMALL CLAIMS ORIGINAL NOTICE

You go right ahead and claim BS.
It happened. I was at my house which was 15 miles away or more as the crow
flies and I checked the channels. At least 10 channels on either side.
I don't recall all the detaila about the radio but I believe it used to be
a military radio. And the FCC has no jurisdiction over military radios.
They might have some now but not when the radio was built.

Another time I talked to a NG guy who was using a military radio.
His radio could dial in the frequency precisely. He was transmitting on my
frequency as his radio detected. When I told him what frequency to transmit
on, his signal and audio was better.

I'll have to get in touch with my friend and see if he has the radio or
recalls what make it was.

You should get your transmitter put on frequency.

The FCC has jurisdiction over frequencies. Doesn't matter the
equipment.

Actually, they also have jurisdiction over most of the equipment as well,
including non-intentional radiators such as fluorescent lamps, dimmer
switches, ad inf.

However, they do NOT have total jurisdiction over emissions on radio
frequencies.. just on most of them. The NTIA regulates and polices use of
government radio transmissions. They do coordinate with the FCC, though, to
reduce interference (mostly to the government users) from band edges and
harmonics/images.

I'm going to call bullshit on that. I'm not sure on the rules, but I
don't think there's an exemption made for an emergency communications
exercise.

There is no such exemption within part 97(?). The only thing even CLOSE to
an exemption for power or even frequency would be the rule that allows that
any frequency and any power may be used in a LIFE THREATENING EMERGENCY.
This rule, however, is not blanket, and is basically only a defense against
a rule violation.

>When he keyed down on the damn thing, it spread over 20 channels!
>Nobody within 30 miles of him could talk.

Bullshit again.

That does sound like a bit of an exaggeration, however the basic setup is
not unheard of. Back in the 1970's, there was a CB operator using ham
equipment (back in the early 50's, 11m was a ham band), kicking 1KW of
power into a beam antenna (a total of about 2.5KW EIRP). In the local area,
you couldn't use a CB when he was keyed up. In the direction that beam was
pointed, it could easily swamp all 23 channels for up to 25-30 miles.

To reply via e-mail, remove The Obvious and .invalid from my e-mail address.

I believe you are speaking of "Candy Girl"?
I had heard she had one hell of a setup that included one of the tightest
and most expensive set of quad beams around. She had been busted like 3 or
4 times and that didn't phase her one bit.

One time I was leaving a "ham fest" in Cincinnati and she was on the air.
Just for kicks, I shouted at her and she actually replied.

I was running 4 watts legal. So her beams must have been pointted in my direction.

As for the legal side of that event, that law is correct. That is the law my friend pointed out to the inspector.

I was actually partially the reason why the FCC changed their rules.
A Radio Shack near where I lived was a hang out for a few friends of mine who were heavy into CB and radios. So we put up an antenna that was sixty feet higher than the roof of the building. Which was the law then. We had it set up with two antennas. the tall one and the short one. We asked people to watch their signal strength and when we switched to the tall one, the signal jumped royally.
Two weeks later, an FCC inspector sat out in front of the store while we were on the air.I stood there looking right at him while keyed down. After an hour of looking through his books, he left. He was pissed because we were legal!
They changed the law to limit the antenna height to 60 feet above ground. Period.

Evan is the "know it all" guy. He thinks that because he is a ham, radio
wise that is, he knows all about radios and the legal stuff behind them.

As for electrical devices which are not "radios", the only thing the FCC
can do about them is enforce the manufacturers to slap a label on the stuff
stating the equipment must accpet any interference and not cause any
interference.

Your standard 40 channel CB radio can't. It is controlled by circuitry that
must transmit on precise frequencies.

>
>>He was transmitting on my frequency as his radio detected.
>
> Huh?

Obviously, you've never seen a radio that can dial in a khz at a time.
I've seen some that get even tighter than that.
He told me he had a display that showed him my frequency as he saw it.
It was like 2khz off the actual frequency.

Newsgroups: misc.kids,alt.support.foster-parents,uk.people.parents,alt.support.child-protective-services

With the Christmas season upon us again, my stepdaughter was launching into her usual tirade of "I need this" (Nintendo 64 games, Pokemon, videos, Rhianna CD, etc.) After enduring a trip through Kmart, I was at my wits end. I took the kid home and filled the bathtub with water. Then I dunked the brat's head under the water and counted out a full minute, with her flailing her arms. I brought her up and she gasped for air. When she'd caught her breath, I asked her, "When you were under that water, did you 'need' Nintendo? Pokemon? Rhianna?" She shook her head. "What were you thinking about?" I prodded. She told me "I was thinking that I needed air."

"Now you know the difference between 'need' and 'want'" I exclaimed triumphantly.

The last time a friend needed Part 15 certification he had to send a
production prototype to a specialized facility in Utah, terrain shielded
and in an anechoic chamber.

According to Greg, the altering of the group list is an admission
of failure. This was his claim when Dan would change the groups, and
Greg wouldn't hold someone else to a standard he is unwilling to hold
to himself, would he?
Wait, he does this with nearly every post.

Which of these women is Lisa Rene Watkins:

With the Christmas season upon us again, my stepdaughter was launching into her usual tirade of "I need this" (Nintendo 64 games, Pokemon, videos, Rhianna CD, etc.) After enduring a trip through Kmart, I was at my wits end. I took the kid home and filled the bathtub with water. Then I dunked the brat's head under the water and counted out a full minute, with her flailing her arms. I brought her up and she gasped for air. When she'd caught her breath, I asked her, "When you were under that water, did you 'need' Nintendo? Pokemon? Rhianna?" She shook her head. "What were you thinking about?" I prodded. She told me "I was thinking that I needed air."

"Now you know the difference between 'need' and 'want'" I exclaimed triumphantly.

Doesn't the sticker state something to the effect of, "In
compliance with FCC regulation [insert number here], this device may
not cause interference and must accept all interference."? I could
look up the exact quote, but my paraphrase should get the idea across.

Anyone can tell anyone else to turn something off so long as they
have the power of speech. Without the authority to compel the other
person to comply, it's may be pointless to do so.

One hopes one's neighbors are civilized and follow the law. It says
right on the sticker if someone reports interference you must cease
operating the device. Willfully interfering with licensed communications
is a Federal Felony, punishable by jail time and and a $10,000 fine for
EACH DAY the interference occurs.

How's that for "Authority to Compel" mister smarty pants?
```

You are mistaken.

The following link show a scan of the most recent electronic
purchase I made. An Android Netbook.
Note what the sticker actually has written on it.

http://i212.photobucket.com/albums/cc127/kwills_photo/384e7a1e.jpg

The following is included to show when the Netbook passed the QC
inspection. March of 2012. Presumably it's in compliance with current
laws and regulations regarding what must be included on the sticker.

http://i212.photobucket.com/albums/cc127/kwills_photo/3d83be33.jpg

There is nothing about anyone having to cease operation due to
interference.

>Willfully interfering with licensed communications
>is a Federal Felony, punishable by jail time and and a $10,000 fine for
>EACH DAY the interference occurs.

There's the difference. Willful interference is a crime. If
it's not intended, it probably isn't.

>
>How's that for "Authority to Compel" mister smarty pants?

Since the sticker doesn't state what you claim, your claim is in
error.

I was in a *nasty* mood when I got home. I had to get ready for the fisting party at the bookhouse, but I had the house to myself, and hours to waste. I needed to do something extreme, even before the party... I decided to do the shit scene that had been on my mind for the past couple of months... I got out the big enema bag [2.5 gallons], and filled it up. I hung the bag high, on the shower head, and set out poppers and some sex towels by the side of the tub.

I stood there, just for a moment, staring at the tub, thinking about what I was going to do. Shit. Not something I'd done before... I almost chickened out, but then said, "Hell with it," and climbed into the tub.

I worked the long end of the colonic tube up my ass and then leaned back in the tub and opened the catch on the hose. As I felt my guts filling up I decided there was no turning back and put the plug in the tub's drain.

I took as much water in the first shot as I could, but I was a little disappointed -- it was only three quarts. I shut the clamp and got into a squat in the middle of the tub. My brain screamed, "No, you're going to make a mess!" but I said, "Fuck it," and let my load of water rip.

I heard the wet splats as a pile of turds gathered under my ass... The release felt good. Without turning to look at what I'd done I put the hose back up my ass and opened the clamp once again. As the familiar rush of water in my ass returned I carefully turned around and looked at the pile of shit and the brown puddle in the deep end of the tub.

I stared, fascinated, like I was looking at a snake, ready to strike. I laid there, my guts rapidly filling with another load of water, unable to go forward, unwilling to go back.

The load of water was starting to make me cramp. I squeezed off the hose and looked up at the bag. I'd taken a gallon this time -- that was more like it. I closed off the hose and sat up again. As I did I nearly lost my balance. To catch my balance I slapped my hand down on the bottom of the tub -- right in the pile of shit. I barely had time to be surprised when my ass let go. A gallon of water up your ass has an urgency all its own.

For a while I was too preoccupied with the wonderful release of my guts emptying to think about the shit. Slowly though, I became aware

of the warm, slimy pile enveloping my hand. I grabbed one of the larger lumps and squeezed it out between my fingers. The smell wasn't nearly what I'd expected and it felt good -- real good.

I laid back down, put the hose back up my ass, and started to play with the pile of shit between my knees. I rubbed it all over my hands, like I would with Crisco before I fisted someone. It was warm and thick. I stared at the brown stain covering my hands and spreading up my arms.

I grabbed another handful of the shit and slapped it on my chest, rubbing it across my pecs and into my light covering of chest hair. My dick sprang up. I hung my head over the edge of the tub and took a deep hit of the poppers. Weee Haa, now I was flying.

I got up into a kneeling position just as the giant enema bag gurgled the last of its load into my ass. I scooped up the remainder of the pile of shit with my left hand and then used it to grab my cock. As I started to jack myself off with the handful of slick shit I put my other hand over my asshole and let my last load of water shoot between my fingers, catching the hard stuff for later. The thick, brown water running over my fingers felt almost as good as my cock which was now coated with thick brown slime.

The puddle of water at the deep end of the tub had grown considerable, but it wasn't enough. I let go of my cock just long enough to open the warm water tap. Brown soup started to rise around my ankles.

Slowly, I lowered myself to lie in it full length. I felt bits of shit squish between my body and the cool bottom of the tub. I took the handful of shit I'd strained from my last load of water and started to smear it all over my thighs, across my belly, and into my groin. My cock was rock hard, standing at stiff attention. I grabbed it and started to jack it again. I started to rub my other hand all over. I looked down at my shit-covered body and felt the thick brown slime covering me -- I loved it!

I jacked my cock desperately now, willing myself to come. Time stretched, my ass cheeks tensed, sending a last little jet of shitty water into the soup that filled the bottom of the tub. Finally, just as the warm brown water started to lap at my balls, I came. I shouted--screamed as the orgasm washed over me. I flopped like a fresh-caught fish as my cum sprayed out over my brown belly.

Spent, I lay back, one hand still jacking my softening cock, contemplating the mess I'd made. With my other hand I lazily rubbed my quaking belly, mixing the fresh cum and drying shit, making a fresh coating of creamy brown slime. Not bad for a first try, I thought to myself. Not bad at all...

Do you have a condensed version of this tripe? I have a really short
attention span.

"Echo Charlie" frequency bands

Not many North American radio hobbyists are aware of the "Echo Charlie" bands. They are CB type "freebands" in different parts of the HF spectrum. There hasn't been much activity here in North America up to 2006 (but that is changing!). There has been, for some time, activity in Europe. Check the following frequency ranges:

85 meter band: 3.450 - 3.495 MHz LSB. This Echo Charlie band's calling channel is 3.475 LSB. The band is about 25 kHz either side of the call frequency, with occasional traffic from the UK, Germany, and Holland appearing. There's heavy QRM at times from utility (commercial/military) traffic. Avoid interference with what you may hear, and never, ever attempt communication with any "official" traffic! TAKE CARE!

45 meter band: 6.600 - 6.700 MHz LSB. This is an Echo Charlie range of frequencies with the calling frequency of 6.670 LSB. It's a good band for European traffic. There are often lots of stations from the UK, Germany, France, the Netherlands, and Belgium. Some stations are running power as low as 2 to 5 watts, with other stations reportedly running up to 1,000 watts. Again, there are utility stations in this area (like long range air traffic control!). NEVER GO TO USB! This is very important!

22 meter band: This band has also been experimented with. Channels such as 12.105, 12.130, 12.160, and up to 12.256 MHz have been used, with any clear spots in between. (The originator of this information did not indicate mode, but one would think it is USB.)

21 meter band: This band runs from 13.630 - 13.995 MHz, and modes are AM/USB. It has transcontinental traffic and is only used occasionally. 13.360 - 13.960 MHz is the main hobby pirate broadcasting range. There is also an international CB band where the calling frequency is 13.995 MHz. (In the U.S.A., 13.995 is NOT recommended for CB type communication due to military and MARS traffic! Instead, U.S. stations are encouraged to use 13.555 MHz USB, which is a Part 15 allocation.) Refer to FCC rules and regulations as to what constitutes Part 15 stations.

Non-government frequencies in the U.S.A.

Few U.S. radio hobbyists are also aware of the following frequency ranges that are listed as "non-government exclusive" by the FCC. (The Citizen's Band, and most Ham bands are examples of non-government exclusive allocations.) These are generally considered "safe" areas around 12, 11, and 10 meters for Freebanding.

1) 25.010 - 25.070 MHz -- use CB antenna & tuner
2) 25.210 - 25.330 MHz -- use CB antenna & tuner
3) 26.175 - 26.480 MHz
4) 26.950 - 26.960 MHz
5) 27.410 - 27.540 MHz
6) 29.700 - 29.890 MHz
7) 29.910 - 30.000 MHz

-- (Also, a number of freeband stations have been known to use HF marine frequencies.) --

*In Europe this has been a 'pirate' band for many years, referred to by the users as '45 meters'. Users seem to be radio enthusiasts , often ex 27Mhz SSB operators who use this as an alternative band. This 'band' appears to extend from around 6600 Khz to 6700. There is a 'calling frequency ' on 6670Khz where you will often hear stations calling 'CQ45'. Similar nets also seem to take place just below 3500Khz.

Additionally, it has been reported that 18.030 MHz LSB has been in use

In the United States operating anywhere other then the CB radio frequencies, or GMRS - 1 watt / FRS .5 watt will get you in a lot of trouble.

You must possess a FCC license to operate on HF bands and if the HF band is not allocated for operation, operation there is illegal....

The only other place you can operate - again with a license is the MARS Frequencies.

Amateur Radio & CB enthusiasts future ;-)
http://www.scribd.com/doc/97654252/Pour-Les-Futurs-Cibistes-Par-Dundee-33
-
Good morning.
Before you continue reading, this page is mainly for those who are
curious about what Cibi and also to those who wish to gain a position
without knowing'' or'' set foot. => Also very useful in road safety.
Therefore, no technique here.
-
The Cibi is still very active.
Its use is very simple and free today because any license (or other) is
requested.
-
Communications are of course free, two or more they are regional or
global scale (with the spread) as at the moment.
-
The Cibi: This is the best way to break the solitude.
To discuss with strangers. Their voices heard. Meet people.
On the road, it's just great ...
All you need is a good antenna position Blooming, and a well regulated
power supply if it is for use at home. The contacts are generally very
friendly.
-
Prefer positions multimode (FM, AM, USB, LSB). They are more efficient.
Also in some difficult conditions locally, you can simply switch to USB,
LSB or FM to retrieve the caller.
-
The different modulation modes:
FM: Always used this mode is appeared today in France with the first
post Cibi approval. The 22 FM channels. Communications are clear with a
strong background as soon as you release the microphone. The use of
squelch (noise limiter) is recommended for the ears.
-
AM: The method most used for local calls and on the road. Sensitive to
atmospheric effects and other parasites. It is also a victim of its
success by the hubbub that one can sometimes find. The AM appeared with
the new standard of 40 channels in 1983.
-
USB / LSB: Mainly used for long distance view of the very long upper
channels to 40 channels and approved following the spread.
Some is used in large local. Sensitive to frequency deviations.
We will use the Clarifier for fine adjustments on the frequency of the
corresponding. Appeared on the positions approved in 1983.
-

The calling channels:
In AM: 19 (and maybe even some departments of the 27)
USB: 4 and 12 of the 40 top channels (for positions unbridled export version).
-
Here are some useful links:
-
=> The Journal of 11 meters: http://www.27mhz-news.info/ =>
http://www.mappemonde.net/carte/Les-Cibistes-de-France/france.html
-
=> A bit of oral expressions for better understanding:
http://membres.multimania.fr/quenmac/cibi/code.htm
-
=> Divisions and Prefixes in Cibi:
http://pmr446.free.fr/index_divisions_cb.htm
=> Table of Frequency CB: http://14adf01.free.fr/canaux% 20CB.htm
-
My Videos (See also the comments made with each video). :
=> Http://www.youtube.com/watch?v=WzGF3EIf04k
=> Http://www.youtube.com/watch?v=glRoU_FPZTk
=> Http://www.youtube.com/watch?v=N_KxkeBh7Mc
=> Http://www.youtube.com/watch?v=eizcEcm6bqI
=> Http://www.youtube.com/watch?v=NkfL8Dz-mac
=> Http://www.youtube.com/watch?v=e_dNxMqlk6M
=> Http://www.youtube.com/watch?v=Q9lT-9A9FZI
=> Http://www.youtube.com/watch?v=inf07zqa9Fs-
-
=> Http://www.youtube.com/watch?v=2jlGoH3Tukw
Here we have the opportunity to listen to radio amateurs around the world: http://www.websdr.org/ (Big Brothers of CB enthusiasts).
More active in the morning (early, whatever ...).
-
- If you have a problem reading my videos, you can also find them here:
http://www.dailymotion.com/relevance/search/r% C3% A9my33fr / a
-
There are some additional details that I find interesting to make.
-
1 - Road Safety: The information given by the spontaneous Cibi is free and without any influence by any statute, much less altered by a third party, since it's you, me, anyone else who will be given this information. In the early 90s, she was used as a weapon against "danger zone".
Furthermore, it limits falling asleep at the wheel at night because of the fact that you're all alone at the wheel, and suddenly no one to talk. In other words, there are more people on the Blooming and mind remain alert for that you will be in the process of chatting. (Ps.: The Cibi driving is managed in the same way as mobile phone).
-
The state does not recognize (yet) that is in the public Cibi. Yet the

examples are not lacking on the Internet around the world and also in France.
For my part, I am equipped Cibi as much at home in the car, and as soon as I arrive on the bridge of Aquitaine (Bordeaux), I never fail to give the channel 19 on the traffic conditions on This bridge is always a place quite complicated and even more at peak times.
-
2 - The Road Safety: More and more often, trailers and trucks are'' visited'' with no one moves for various reasons. But if all the road were equipped with Cibi, they could more easily be called one another and it is well known, the number is strength. (I am talking of deterrence).
-
Nothing better to make them think and scare away thieves. In other words, the essential tool for professional drivers.
The mentality of CB enthusiasts is the same as that of Motorcyclists. So why deny it.
-
3 - How to choose a material: A type of equipment use. (Now everyone does what he wants).
For me, this is a post Multimode (see my videos) and a large antenna (1.90 m).
- Hikers in 4X4 in the woods prefer to have a small post with small antennas for their small size and without the risk of tearing the antenna with a branch.
-
- The road will prefer to have a way station (AM / FM) or upscale (multimode) with an antenna of 70 cm and 1.45 m in order to pass under bridges.
- For other road users (cars, campers), well anything is possible. The small post in multimode antennas with small or large antennas like me. In the latter case, we must remember before you get to an underground car park for example.
-
- At home we take care to choose a power amp overvalued in order not to see it overheat. The position will necessarily be a multimode (FM / AM / USB / LSB) for all types of 'contacts'.
-
At the antenna, I have a preference for 5/8 th (between 5 and 7 m long) with a low-pass filter located between the station and antenna. The antenna must be located above the TV antennas with the best possible clearance.
-
- In all cases, and can not be repeated enough. The antenna must be properly adjusted.
1 - Not to toast the post.
2 - To that communication is optimal.
3 - to minimize the risk of disruption.
-
One thing is sure, a good job with an incorrectly adjusted antenna will never give good results. The best setting of the antenna is with a

measuring device (tosmeter) must be equal to 1.1. This is the measure
that we generally find in the manuals.
- There is one thing to know about antennas is that the antenna is
little more is the scope will be reduced.
The reception will also be affected.
-
I add some videos.
=> Http://www.youtube.com/watch?v=-xsRiNl7B6c
=> Http://www.youtube.com/watch?v=CTjRjvYTLgY
=> Http://www.youtube.com/watch?v=J7fVhFOqfTA
=> Http://www.youtube.com/watch?v=uolCejT2ROg
-
These are not mine but that of American Road. Let us recall that it is
there that everything has to start.
You'll find plenty of other on YouTube.
-
I prefer not to give advice on any particular site or used equipment
dealer not to favor one over others.
-
Have a question? Ask where the Cibi.
-
YouTube: There are two films (full version) on Cibi. My goal here is to
show a more interesting what Cibi.
-
"Citizen Band" (1977 (v.o)
The cover: http://content7.flixster.com/movie/10/95/65/10956529_det.jpg
The film: http://www.youtube.com/watch?v=S9ywkAAri-A
-
Historic films: http://www.youtube.com/watch?v=3MXDgyBc02Q
-
"Convoy" (1978 (v.o)
The cover: http://www.posters555.com/pictures/Convoy-% 281978%
29-picture-MOV_5a33a158_b.jpg
The film: http://www.youtube.com/watch?v=P5XGvNpWXqA
-
This shot below, the Amateur Radio:
"If every guy in the world" (1956 (v.Fr)
The cover: http://f5kkd.free.fr/images/Si-tous-les-gars-du-monde.jpg
The film: http://www.youtube.com/watch?v=j6j8_erFINE
-
One last detail: The advantage of Cibi, is that we do not see spelling
errors.
-

Good deal. The DX is opening back up now quite nicely. Heard Germany earlier today. Here's a decent link for DX information on 11 meter and the freeband. http://www.irdx.net/org/ The link includes some useful information like propagation forecast and what stations are active and what places are in demand for contacts. Catch you out in space. Happy DXing.

If you're a DX fan, come play on U.S. channel 6 if you have the power
to be heard. Never any swearing there just good old DX, a quick tag
and more DX. Of course, you can always come mess around on some of the
SSB frequencies.

Um, no, it won't result in "a lot of trouble." It will result,
usually, in the enjoyment of talking with other similar-minded radio
enthusiasts. Don't blow a lot of power and splatter the frequency and
you'll be fine. Here's a link to an international DX group making
great use of some of the freeband, they've been at it for many years
and have many members here in the U.S.

335. how do you deal with benefit ?

Newsgroup: rec.radio.cb
Date: 2012-07-07 15:56:15 UTC
From: sergio@tiscali.net
Message-ID: <3cc804@neptun.beotel.yu>
Source record: 251589

Hi Folks,

this site seems appropriate sourceforge.net/projects/usbms/ when studying the benefit;
It is therefore obvious that it should be helpful to increase the focus on the supervision of the economy
differently;
why do you define the benefit optimization and the connection with the economy supervision?

Thanks

Australia has the same as New Zealand in the UHF CB band 80 channels.
Cheers

Neither Australia or new zealand cb sets have hf/uhf radios in one
(well not that i know of anyway)and only fm is on uhf...26/27mhz both
have am and ssb.
I am going to import a uhf mobile from China and it covers 400 to
490mhz.
New Zealand was first to allow eighty uhf cb channels then Australia
followed (i think) but Australia has yet to allow use on 26mhz.

I prefer to have a uhf radio that i can program myself and also have a wider range of freq's.A similar situation with hf cb,I don't want to be limited to just eighty channels,i want to be able to tx/rx elsewhere.It is so quiet and boring here on 11mtrs at the moment.Most people including the idiots have gone up to uhf cb. The standard uhf cb radios here in new zealand are way overpriced for what they can do.Heck a person just needs to go to the alibaba.com site just to see some of the great prices there

That's great if you live in New Zealand and Austrailia - but it is not legal for radio operators in the USA to operate on those bands - both from a power standpoint and because you have to have a license and those frequencies are not in the band plan for amateur radio and it is illegal to DX GMRS / FRS and LMRS frequencies.

The quality of the DX is great in the U.S., too. Many operate the freeband on frequencies just above and below the U.S. CB band with little problem. Run SSB and you won't require crazy power and you can talk to other freebanding CB'ers and ham ops all around the world. 27.555 USB is recognized as an international calling frequency. If one is worried about breaking the law, don't key the mic. It's legal to listen.

There is no one of any intelligence on the CB radio anymore, and it is illegal for Amateur Radio operators to FREE BAND and or to talk to anyone that does not possess an amateur radio license on amateur radio bands.

Why would someone with a license even want to bother to listen to someone that does not.
The purpose of the license is not to penalize the non hams but to educate them as to the basic requirements of what is necessary to operate on the amateur radio bands.
Where it is permissable to operate and where it is not, what bands and modes are permissable and power levels allowed.

CB radio is anyone that can afford a couple of dollars for a radio and an antenna.
Most of those people over compensates with the use of beam antenna's and massive amounts of power.

Rule of thumb on 10 meters - a little power is great, and all the power in the world doesnt do anything more for your signal - when the band is open or closed.
There is only 1 MHz difference between 10 meters and 11 meters.

The other frequencies you are talking about - it is not legal for anyone in the USA - without a license to operate on.
Get caught - and the Federal Candy Company will come a knocking on your door..

ps: they don't do it with spotters and white vans anymore.
Now they do it with sattelites and cell phones, and if they have to send someone any appreciateable distance, it is probably going to cost you more then you can afford.

Now they have "listening stations" like the one on Farmhouse Lane
in Columbia, Maryland. I'm told it can really pinpoint a signal...

.....
Well i have met some really nice american people on 11mtrs.There seems
to be quite a few idiots in Australia who have bad sounding gear,also
here within New Zealand.

There's plenty of intelligent life out there and plenty of hams making the DX journey on CB. Just because you're unable to comprehend why hams do what they do doesn't mean others share your affliction. See https://www.facebook.com/groups/cbradiotalk/ and scroll on down to Lonnie's question posted on June 16. These are but a few examples of hams DXing and as one ham plainly puts it on the page, "We are all just radio operators." Fuck elitism. People like you who intentionally foster a division between ops have a name: lid. Having a ticket doesn't make any op better than another.

You're becoming redundant with mention of legality. Point taken, note made. Repeating yourself doesn't equate enforcement. However, if it's a debate you're after regarding the law as it pertains to CB, we can do that, too.

CB radio is plug and play. Liking it or disliking it is akin to liking or disliking the blue sky. It simply *is.*

I agree with your take on power. I DX'ed all over the world with 100 watts (or less)on SSB. You are initiating and resurrecting the tired, old "CB vs. ham" argument. The allure is simple. It's -much- more difficult to tag all countries (and get the DX cards to prove it) on HF DX on CB and nearby frequencies than the allocated frequencies.

Scott is correct, there is a monitoring station in Maryland but the employees are not listening for CBers (who have little to fear). IF one is a splatter monster AND the FCC receives a complaint they may or may not deem it worthy of follow up. If so, a warning letter is ALWAYS sent first giving the scofflaw a chance to clean it up. Even if the op ignores the initial warning an FCC employee MUST witness a law violation before any legal action is taken. They're not sitting around waiting to bust CBers, or even CBers talking DX, talking on 27.045 or running a hundred watts or so from your rig.

Even some of the splatter monsters can hold their own in areas some ops can't, such as in standard civility. Channel 6 is big time CB DX as it's all AM HF. While some of these guys may splatter and bleed, their mannerisms and language is better than most frequencies on CB OR amateur and you'll rarely hear even a disagreement. Many ops can take lessons on civility from these guys. You can take some lessons from the hams on the CB radio talk page. They understand we're not the conjured boogie man you need us to be and don't judge

people by their preferred mode of hobby communication. Lids do that.

This group has dealt with people like you before who can't get past the legal issue in any discussion. You're like broken records. Pity. You could learn plenty if you weren't so prejudiced and preoccupied. With your dim look of CB, one must wonder why you refer to yourself as "Channel Jumper." Most hams don't refer to their frequencies as channels.

Blah blah blah blah blahhh...

If a person has a street legal 4 watt AM CB radio - they can talk as they please on the CB radio frequencies - legally as long as they do not break any commission rules.

Operating out of band or out of the band plan is a real good way of getting yourself in trouble....

Suggesting to anyone that they ought to operate out of the band plan - isn't real good amateur radio practice...

Sounds like you are trying to get people into trouble....

Amateur Radio Newsline(TM) Report 1824 - July 27 2012

Amateur Radio Newsline report number 1824 with a release date of July 27 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The International Amateur Radio Union to vote on admitting two new members; Solar Cycle 24 heats up with a massive East coast VHF band opening; the London 2012 Olympics ham radio stations take to the air and four new ham radio CubeSats go skyward. Find out the details are on Amateur Radio Newsline(TM) report number 1824 coming your way right now.

HAM POLITICS: IARU VOTING ON TWO PROPOSED NEW MEMBERS

The International Amateur Radio Union could have two new members before years end. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the details:

--

The Federation of Radio Sport of Azerbaijan or FRSA and the St. Vincent & Grenadine Amateur Radio Club are being proposed for membership in the International Amateur Radio Union.

The FRSA based in Baku. It so far has 50 members. The St. Vincent & Grenadine Amateur Radio Club has 21 members. Both have made their proposals through IARU Region 2 for membership.

The International Amateur Radio Union Calendar notes that the groups have declared that they can satisfy the requirements of the IARU Constitution and Bylaws. As such, their proposed membership has been put up to the vote by all International Amateur Radio Union member societies who have until November 1st to cast a ballot.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Berwick, Pennsylvania.

--

Meantime, Jim Linton, VK3PC reports on two International Amateur Radio Union member certifications that have been rescinded. Linton says that despite a request, no proof has been provided that the former PNGARS of Papua New Guinea and BARTS in Burma or Myanmar still exist and have been withdrawn from membership. (VK3PC)

**

VHF DX: BIG VHF OPENING ALONG THE EAST AND SOUTH CENTRAL USA

They are calling it one of the best VHF band openings since the late 1950's. This as hams along the Eastern seaboard and South-Central states report what appears to be both a tropospheric duct and some double-hop E layer skip that permitted QSO's from Vermont south to Tennessee and Texas on bands as high as 220 MHz on Tuesday, July 24th.

One interesting report came to us from Kevin Duplantis, W4KEV. He says that at about 5:30 pm EST in Knoxville, Tennessee that he was tuning around the FM broadcast band when he stopped on WRJK 106.7. That's when he heard a commercial that seemed out of place so he kept listening. It turned out that instead of WRJK he was hearing a station identifying as 106.7 the Wizard, Burlington, Vermont. After a number of fades happened and the Vermont station came back so strong that it totally wiping out the local Knoxville station that was only 15 miles away.

At that point W4KEV reports that he took to the 2 meter band where he made what he describes as a ton of contacts into the northeast and southeast and Canada. Some well over 1000 miles distant. He then switched to the 222 MHz band where he noted a definite E-skip opening that lasted a solid half hour. During this time he hears Canadian stations make contact with the lower parts of Alabama and Mississippi.

W4KEV hays that they do not get many tropo openings in his area so this was a thrill to say the least.

Meantime the dxworld.com Propagation Logger for 2 meters shows several likely record breaking contacts in sheer numbers if nothing else. By way of example, Mike Larsen, KC0CF in Stanhope, Iowa posted that he worked 32 stations from Florida to Virginia during the opening and his report was just one of many.

In all, it appears as if July 24th, 2012, is one that will go down in the VHF and UHF record books and operators world wide are hoping its only a precursor of what may be still soon to come in DX in the world above 50 MHz. (ARNewslineT, 2 Meter Prop Logger)

**

RADIOSPORTS: 2O12L AND 2O12W ON THE AIR TO COMMEMORATE THE LONDON OLYMPICS

The 2012 Summer Olympics are on the ham radio airwaves. On Wednesday, July 25th, two special event call signs were activated in the United Kingdom to celebrate the London 2012 Olympic and Paralympic Games.

As previously reported here on Newsline, 2O12L will operate from London, while 2O12W was to take to the ham bands from Barry in Wales. Both stations will be on the air through August 12th for the games themselves and will continue operations through September 9th.

Updates on both operations will be available on the Twitter social networking site using the screen names of @2012L and @GW0ZANA respectively. Organizers hope to make 80,000 or more contacts during the time that 2O12L and 2O12W are on the air. (RSGB, Audio bite from YouTube)

**

BANDSHARING: THE AMERICAN UHF WOODPECKER STRIKES AGAIN

Its yakety-yak time on the 70 centimeter band near San Diego, California. This as a new radio system takes to the air on a military base. Amateur Radio Newsline's Bruce Tennent, K6PZW, has the rest of the story:

--

Southern California's Fallbrook Amateur Radio Club reports that it recently began receiving a random ticking interference superimposed over weak incoming signals on its 440.600 MHz repeater inputs channel. Club members have tentatively located the signal as originating at the nearby Marine Corps Camp Pendleton.

It now appears as if the base has deployed a number of Enhanced Position Location Reporting System radios, or EPLRS devices that use the entire 420 to 450 MHz band in a spread spectrum mode. As hams share the 420 to 450 MHz band with the U.S. Government, and the government has priority its likely that the Fallbrook ham community will likely have to live with the problem until such time as the devices are turned off, if that ever occurs.

Hams are secondary users in the 420 to 450 MHz band and must accept any and all interference from those designated as primary users. Also, the amateur community must not in any way interfere with the operations of those assigned as primary users. In this case the United States military.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

According to the Southgate News, it's believed that at least two dozen EPLRS systems are slated for deployment or are already deployed across the continental United States as well as in Alaska and on Hawaii. (CGC, Southgate)

**

RADIO REGULATION: VANITY CALL SIGN FEE TO INCREASE BY 80 CENTS

The price of a Vanity ham radio callsign is going up. On July 20th the FCC announced that the cost of a set of amateur radio vanity call letters will increase 80 cents to $15 for a 10 year license term. That works out to 8 cents a year for anyone applying for or renewing a Vanity ham radio call. The new fee goes into affect 30 days after notice of the increase is published in the Federal Register. As we go to air, that publication is still pending. (FCC)

**

RADIO REGULATION: FCC PROPOSES RE-EVALUATING ITS FEE SYSTEM

The FCC wants to overhaul its entire regulatory fee system and is asking for public input on that effort through MD Docket 08-65.

According to the agency, extensive changes have occurred in the communications marketplace since its current system for assessing and collecting regulatory fees for all of the entities it regulates was enacted in 1994. Commissioner Robert McDowell calls the reform long overdue, adding that the agency should update its fee structure to ensure that they are levied not only in a fiscally prudent manner, but in a nondiscriminatory and competitively neutral way.

Comments to MD Docket 08-65 are due 30 days after publication in the Federal Register. What impact such a re-evaluation might have on regulatory fees imposed on radio amateurs is impossible to assess at this time. (FCC, RW)

**

HAM RADIO IN SPACE: 4 CUBSATS TAKE THEIR FIRST STEPTS TOWARD ORBIT

Japan's HTV-3 cargo vessel carrying five satellites blasted off on an H-IIB rocket to the International Space Station in the early hours of Saturday, July 21st. Onboard were four amateur radio CubeSats, along with a scientific satellite

known as Raiko. The ham radio birds are the F-1, We-Wish, FitSat-1 and TechEdSat CubeSats.

By way of background The F-1 CubeSat carries a pair of Yaesu VX-3R handheld transceivers to provide communications on 145.980 MHz and 437.485 MHz FM using AX.25 packet radio data.

FITSAT-1 is an optical communications experiment that as previously reported will attempt to write Morse Code across the night sky, although only when in range of Japan. It will also transmit CW on 437.250 MHz, FM AX.25 data on 437.445 MHz and high speed data on 5840.00 MHz.

We-Wish will transmit on 437.505 MHz FM AX.25 data while TechEdSat will transmit on 437.465 MHz and will also communicate via the Iridium and Orbcomm satellite phone networks. This is a first for a CubeSat.

The CubeSats will remain on the International Space Station until September. Thats when they will be deployed to orbit by Japan astronaut Akihiko Hoshide, KE5DNI, using the ISS robot arm. And we will have more ham radio space related news later on in this week's Amateur Radio Newsline report. (AMSAT)

ENFORCEMENT: ALASKA CB OPERATOR ISSUED PROPOSED $12500 FINE

The FCC has issued a $12,500 Notice of Apparent Liability to Monetary Forfeiture to Glenn S. Yamada, of Kenai, Alaska. This based on allegations that he essentially operated his C-B station in a manner that interfered with international aviation traffic. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

This story goes back to last January. Thats when the FCC received a complaint regarding interference to an authorized user on 21.964 MHz in the aeronautical band. According to the regulatory agency, the problem concerned a male subject

talking and interfering with the control and monitoring of air traffic over the North Atlantic.

The FCC's High Frequency Direction Finding Center was called into action. On January 31, its operators observed a subject matching the details of the compliant transmitting on 21.965 MHz using the call sign 1600 Alaska. Of even more interest, the actual operating frequency was 27.025 better known as CB channel 6. Direction finding techniques placed the transmissions were coming from Kenai, Alaska. Subsequently, an agent from the FCC's Enforcement Bureau in Anchorage used direction finding techniques and found the source of the interfering signal to be coming from the residence of one Glenn S. Yamada.

The agent, accompanied by an officer from the Kenai Police Department, inspected Yamada's station on February 6th. At that time the agent found a non-certificated CB transmitter and a linear amplifier as part of Yamada's CB station. During questioning, Yamada admitted to the agent that the linear amplifier was capable of generating a power output level of 200 watts. The agent observed that the transmitter and the linear amplifier were connected to a transmission cable and ultimately to the directional antenna in the back of Yamada's residence. Yamada told the agent that this was his hobby setup and that he had been operating it for the last several weeks using the made up call of 1600 Alaska.

Now, in its July 14th finding authorizing the proposed $12,500 fine, the FCC says that Yamada apparently willfully and repeatedly violated Section 301 of the Communications Act of 1934 and Sections 95.409(a) and 95.411(a)(1) and (b) of the FCC Rules. This by operating his CB radio without requisite Commission authorization. In simpler terms, it means that his station equipment was not FCC certified and he was running power in excess of the maximum allowed on the 11 meter band.

And when it issued the Notice of Apparent Liability, the regulatory agency also stated that given the public safety concerns of the violations that it was directed Yamada to submit a statement signed under penalty of perjury confirming whether he is still engaged in CB operations. If so, he is to state whether he is using a certified CB transmitter. Also, to certify that he has not attached any linear amplifiers to his CB station." Yamada must submit this statement to the FCC Office in Anchorage no later than August 17th. That's the same day when payment of the $12,500 Notice of Apparent Liability is also due.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

As is usual in these cases, Yamada was given the customary 30 days from issuance of the proposed fine to file an appeal. (FCC)

**

ENFORCEMENT: FCC PROPOSES A PAIR OF BROADCAST TOWER RELATED FINES

The FCC levied two unrelated fines for tower violations. In the first action, the agency says that Equity Communications, licensee of WCMC AM located in Wildwood, New Jersey failed to enclose its tower in a locked fence.

In issuing the proposed $17,000 fine, the FCC noted that during an inspection in 2011, agents with the Philadelphia Enforcement Bureau determined the tower was in a residential neighborhood but what it called the remnants of a fence would not restrict access to it. At a later date when they re-inspected, the agents found the fence in the same condition. As such, the FCC has proposed a the to fine for the ongoing infraction.

The other case involves JMK Communications, which was fined $7,000 for not having a locked fence around the four-tower array for WPWC AM in Dumfries, Virginia. The FCC says that during an inspection in 2011, the Enforcement Bureau agents found no fencing around the base of one structure and only partial fencing around the base of the other three. There was also no perimeter fence around the property, according to the commission.

In this matter the FCC has proposed a $7,000 fine. It has also directed the licensee to submit a sworn statement telling the commission the broadcaster is now in compliance with the tower regulations.

Both companies were given the customary 30 days from the date the Notices of Apparent Liability were issued to pay or file a response. (FCC)

**

ENFORCEMENT: FCC LEVIES $55000 FINES TO UNLICENSED FLORIDA BROADCASTERS

The FCC issued a total of $55,000 in proposed fines to three men whom it says operated unlicensed broadcast station in the state of Florida. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is here with more:

--

In the first two cases, the regulatory agency alleges that Michael Downer and Damian Allen operated an unauthorized station together on the FM broadcast band in the city of Pompano Beach. According to the FCC, it used direction finding techniques to trace a signal to an FM transmitting antenna located atop the storage room of a commercial property.

The property owner told agents he rented the space to Downer and Allen. The owner called Downer and handed the phone to an agent. Shortly thereafter the other renter, Damian Allen, came and removed the equipment.

Now its tike to pay the piper. While the base fine for operating an unauthorized station is $10,000 per person, the FCC proposed a $20,000 fine for Downer and Allen each. This is because the commission had previously issued several Notices of Unlicensed Operation to both men for operating unlicensed stations from other Florida locations. The FCC says that the fact that they continued operating constitutes a deliberate disregard for the commission's rules.

In the third case, the commission has proposed a $15,000 fine against McArthur Bussey. This for operating an unlicensed station on 89.1 MHz in the city of Fort Lauderdale.

In this matter the agents not only traced the signal to a residence leased by Bussey but also found a fan page on Facebook ad for the illegal station and a picture that matched Bussey's Florida driver's license photo. The domain name for a website: www.891radio.net, was found to be registered to Bussey's residence.

Bussey's fine was also over the $10,000 base amount because the Miami Office of the Enforcement Bureau had previously issued a Notice of Unlicensed Operation to him for operating an unlicensed station on the same frequency from a different Florida location.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

All three have the customary 30 days from the date the fines were proposed to pay them or to file appeals. (FCC)

**

HAM HAPPENINGS: PERMANENT AMATEUR STATION AT THE OLD BETHANY OHIO VOA RELAY STATION

Ohio's West Chester Amateur Radio Club has set up a working ham radio station at the closed down Voice of America relay

station in Bethany Ohio. A temporary, single position has been activated in the VOA building. It is connected to a temporary trailer mounted beam antenna.

The Bethany site is located not far from Dayton Ohio. According to the club website, more funding is needed to complete the project. Information about this project can be found on-line at www.wc8voa.org. The history of the Voice of America Bethany Relay Station is at www.voamuseum.org. (KC9VZA)

**

HAM HAPPENINGS: EMCOMM EAST POSTPONED TO 2013

The EmComm East emergency communications conference will not be held in 2012. According to an announcement from the Board of Directors for Monroe County ARES which hosts the event, they have decided to postpone EmComm East until the fall 2013 due to circumstances beyond their control..

According to their news release the group is running into a fist-full of scheduling conflicts that are making it difficult to plan an emergency communications conference that is of the same quality as the past conferences that they have hosted in years past. This is because they have several competing events in the region that will significantly take away from normal attendance. Also their call for programs did not have enough responses to fill all of the slots needed for this year's conference.

Monroe County New York ARES says that it will be announcing its plans for 2013 early next January. If you have any questions, do not hesitate to contact them by e-mail to info (at) emcommeast (dot) org or simply keep an eye on www.emcommeast.org for updates. (Monroe County ARES Inc.)

CHANGING OF THE GUARD: LEGENDARY HAWAII VHF - UHF EXPERIMENTER LAID TO REST IN CALIFORNIA

Hawaii's legendary VHF/UHF experimenter Paul Lieb, KH6HME, has been laid to rest following a Catholic Mass on Saturday, July 21st. The service was attended by Lieb's family, friends, and several dozen ham radio operators. Many of the latter were members of California's San Bernardino Microwave Society of which Lieb was a long time member. A number of the radio amateurs drove many hours to attend the service.

According to his longtime friend Gordon West, WB6NOA, Lieb's ham radio activities played a major part in the memorial service. This included the front cover of a written remembrance program showing KH6HME at the Mona Loa beacon site door that was etched with visiting ham radio call signs. Below his name was his KH6HME call.

At the end of the Mass, each of the 6 candles surrounding Lieb were extinguished one-by-one. West says that this signified the end of an era when Paul would head for the 8200 foot site on the Mona Loa Volcano. From there he would switch from beacon mode to voice and CW , and complete the 2500 mile path on every VHF and UHF band from 6 meters up through 5 GHz .

KH6HME was buried at the Holy Sepulcher Cemetery in Orange, California. West says that the very last line of the memorial program read - and we quote: "He will never be forgotten, and his beacon will continue to delight and amaze us all. 73 Paul. "

As reported last week, Paul Lieb, KH6HME passed away on Sunday night July 15th while visiting his sister and other relatives on the U.S. mainland. (WB6NOA)

**

HAM RADIO IN SPACE: BAOFENG REPEATER TO THE EDGE OF SPACE

Spanish radio hams have used two low cost handheld FM transceivers to build a cross-band repeater which they then launched to the edge of space on a high altitude balloon. The radios used in the experiment were identified as Luther TL-44 but appear identical to the popular Baofeng UV-3R available on E-Bay from many online dealers world-wide at a cost of between $30 to $45 each.

The balloon flight lasted 2 hours 44 minutes during which 179 contacts were made. The furthest was over a distance of 670 km. You can read the entire story in electronically translated English at tinyurl.com/Baofeng-Repeater (G6UIM)

**

HAM RADIO IN SPACE: KE5DAR TO BE ON-ORBIT DJ AUGUST 3

NASA astronaut Joe Acaba, KE5DAR, will play Disk Jockey in space on Friday, August 3rd. That's when he will do a live remote from the International Space Station as a part of a two-hour music and talk show to be streamed over Internet station Third Rock Radio.

Third Rock Radio is calling this outing "The Joe Show." It describes it as a blend of science, technology, engineering and mathematics and art.

For those not aware, Third Rock Radio is a project of Houston, Texas radio veterans. It is produced under a NASA Space Act Agreement with RFC Media.

The "Joe Show" is mainly aimed at younger Americans. It can be heard as an audio stream at ThirdRockRadio.net with Acaba's appearance beginning at 4 p.m. Eastern time, as we said, on Friday, August 3rd. (Third Rock Radio)

**

ON THE AIR: HONEYMOON TRIP TO MARITIUS IN SEPTEMBER

On the air, Alex Landi, IW5ELA, says that he will be on the air stroke 3B8 from hotel Le Cannonier on Maritius between September 6th and the 12th. This as a part of an extended honeymoon trip with his wife Michela that will take them through Corsica, Mongolia, Finland and Africa. From Maritius his operation will be on 20, 17, 15 and 12 meters using CW and SSB. Because of the nature of this trip all operation is holiday style. QSL via his home callsign either direct or via the bureau. And less we forget, the couple does have a web page. You can visit it on-line at honeymoonafrica2012 (dot) jimdo (dot) com. (OPDX)

**

ON THE AIR: WORK PROGRESSES ON NEW TRANS-ATLANTIC 2 METER BEACON

A new trans-Atlantic 2 meter propagation beacon is well on its way to becoming a reality. RSGB news reader Jeremy Boot, G4NJH, has the latest:

--

Brian, WA1ZMS, is making the final preparations to ship the GB3WGI 144MHz transatlantic beacon transmitter over to Northern Ireland.

Thanks to the kind donation of antenna parts and clamps from G4CQM at Powabeam Antennas, beacon keeper Gordon, GI6ATZ, is in the process of building the antenna system for the beacon, and installing the emergency shutdown system. It is hoped to have the beacon up and running before the end of

the year.

Im Jeramy Boot, G4NJH, in Nottingham.

--

Once the beacon is placed into service it will act as a marker to tell hams in the America's when a 2 meter path is open to the UK and possibly beyond. (GB2RS)

**

DX

In DX, F4EZG will be active between September 1st and the 3rd from Madagascar as 5R8VE. Operations will only be on 20 and 15 meters. QSL via F4EZG.

EA2BD will be active from Malta as 9H3BD until July 30th. His operations are low power on 20 meters using CW and SSB. QSL via his home EA2BD callsign.

WB6OJB is on the air from Botswana as A25JB through the end of July. He can be heard on 40 through 10 meters using mostly SSB with some CW. Again, QSL this station also direct to his WA6JOB home callsign.

JJ2NYT will be active as stroke FK from Grande Terre New Caladonia between July 29th and August 2nd. His operation will be on 40 through 10 meters using CW, SSB and RTTY. Like the last two, QSL this one also via his home callsign.

G3SWH will activate the special callsign M0RSE on CW only over the weekend of August 18th and 19th. As you might expect, this is a CW only operation with QSOs to be uploaded to Logbookof the World immediately after the weekend operation concludes. Special QSLs will be available via the bureau or direct with Self Addressed Envelope and adequate return postage or even via the traditional bureau route.

Lastly, members of the Gemilang Amamteur Radio Club and the Mediterraneo DX Club will team-up to sponsor a DXpedition to Brunei. The multi-national team will be on the air as V-84-S-M-D between November 11th and the 23rd. Operations will be on 160 through 10 meters, including the 30, 17 and 12 meter bands. Modes to be supported are CW, SSB and RTTY. QSL via IK2VUC, direct or via the bureau.

Above from various DX news sources

**

THAT FINAL ITEMS: WIND FARMS MAY CONTRIBUTE TO CLIMATE WARMING

And finally this week, word that's what some call green power might not be so green after all. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reprts:

--

Research in the United States has shown that large wind turbine farms used to generate so-called green power might have a warming effect on the local climate, and there-by casting a shadow over the long-term sustainability of wind power.

Its been long believed that carbon dioxide and other greenhouse gases from burning fossil fuels contribute to the so-called global warming effect. Some scientists believe this could lead to the melting of glaciers, sea level rise, crop failure and other devastating effects. So in an effort to cut such emissions, many nations are moving towards cleaner energy sources such as wind power.

Now, researchers at the State University of New York at Albany have analyzed over the period 2003 to 2011 the satellite data of areas around large wind farms in Texas, where four of the world's largest farms are located,. The results, published in the journal Nature Climate Change, showed a warming trend of up to 0.72 degrees Celsius per decade in areas over the farms. This as compared with nearby regions without the farms.

The study attributed this warming primarily to wind farms. It says that the temperature change could be due to the effects of the energy expelled by farms and the movement and turbulence generated by turbine rotors. It concluded that these changes, if spatially large enough, may have noticeable impacts on local to regional weather and climate. That said, the researchers say that more studies are needed at different locations and for longer periods, before any firm conclusions could be drawn.

Previous research in 2010 by other U.S. scientists found wind farms could make the nights warmer and days cooler in their immediate vicinity, but those effects could be minimized by changing turbines rotor design or by building the farms in areas with high natural climatic turbulence.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

According to the Global Wind Energy Council in 2011 the world's wind farms had the capacity to produce 238 gigawatts of electricity at any one time. That was a 21 percent rise over 2010 and capacity and is expected to reach nearly 500

gigawatt by the end of 2016 as more, and bigger wind farms are built. More on this story is on-line at http://tinyurl.com/wind-farm-warming. (UK Telegraph, CS Monitor, Forbes, others)

353. The Golden Age of Radio: An Unscientific Poll

Newsgroup: rec.radio.cb
Date: 2012-08-03 00:39:37 UTC
From: Truth Teller <saltyfishsa@gmail.com>
Message-ID: <9cd6ff79-535f-48f1-821b-dcdff02273c5@y1g2000vbx.googlegroups.com>
Source record: 251607

If there are any Old Time Radio listeners in this group I would be interested in your input. Using creativity, production, acting, writing and your totally unobjective personal taste as the criteria, rank your top ten old
time radio programs. Mine are:

1. The Adventures of Harry Lime
2. Crime Classics
3. Mr. President
4. Suspense
5. Frontier Gentleman
6. The Whistler
7. Gunsmoke
8. I Was a Communist For the FBI
9. You Are There
10. Unit 99

Points will be awarded inversely e.g. 10 points for a #1 ranking, 9 points for #2, etc. Totals will be calculated weekly for one month or however long interest in the topic remains.

Leader in the clubhouse:
The Adventures of Harry Lime: 10 points.

Incidentally a fantastic website devoted to Old Time Radio is http://www.otrcat.com/index.php/ I have no stake in the site, just feel they deserve a plug for their contribution to keeping the OTR hobby alive and well. One could spend many evenings reading the well written
synopses and histories of hundreds of OTR programs produced during that wonderful era.

354. Amateur Radio Newsline[TM] Report 1825 - August 3 2012

Newsgroup: rec.radio.cb

Amateur Radio Newsline[TM] Report 1825 - August 3 2012

Amateur Radio Newsline report number 1825 with a release date of August 3rd 2012 to follow in 5-4-3-2-1.

The following is a QST. The United States prepares for W-R-C 2015, The FCC denies a request to create an emergency calling channel on 2 meters; South Africa's hams wonder if a change in the nations regulatory structure will affect them; the European Union provides protection for hams in interference cases and a new 2 meter radio will soon be on its way to the International Space Station. Find out the details are on Amateur Radio NewslineT report number 1825 coming your way right now.

RESTRUCTURING: A LOOK AT THE UPCOMING WRC 2015

A proposed permanent secondary allocation to the amateur service at or near 5 MHz is among agenda items for the World Radiocommunication Conference in 2015. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

There are numerous items on the 2015 World Radiocommunications meeting agenda, as spelled out at the end of the recently concluded 2012 conference. One is the proposal for a possible new allocation to the amateur service on a secondary basis within the band 5.250 to 5.450 MHz. The International Amateur Radio Union has described such an allocation as being among the best for hams to use to provide around the clock emergency communications. So far, little in the way of objections has been heard in public.

According to the publication Radio World, it is the National Telecommunications and Information Administration that coordinates United States participation in the WRC conferences, doing so though a number of government departments and agencies are involved. According to N-T-I-A's website, the next conference will consider spectrum requirements for uses ranging from mobile service allocations for broadband to controlling unmanned aircraft

from space.

These conferences are held by the International Telecommunication Union every few years to talk about international radio regulations. An FCC advisory group will start to meet this month in preparation for the next one. The commission also has set up a website with information about WRC-15. While WRC-15 may seem far away, the planning for it is already getting underway.

For the Amateur Radio Newsline, I'm norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Another item of interest on the WRC 15 agenda is the feasibility of achieving a continuous reference time-scale. This either by the modification of coordinated universal time or some other method. (RW)

**

RADIO RULES: FCC DENIES PETITION ASKING FOR EMERGENCY CALLING FREQUENCY ON 2 METERS

Don't hold your breath waiting for the FCC to create a nationwide emergency calling frequency on 2 meters or any other Amateur Service band. That's because in denying a petition filed by Bryan Boyle, WB0YLE, of Morrisville, Pennsylvania, and Jim Dixon, WB6NIL, of Alhambra, California, the regulatory agency basically said that it's not necessary to have such a frequency cast in stone in the Part 97 rules. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

Bryan Boyle, WB0YLE, and Jim Dixon, WB6NIL had jointly filed a rule making request that asked the FCC to designate 146.55 MHz in the 2 meter band as a non-exclusive nationwide Amateur Radio Service emergency communications FM channel. In their petition the pair noted that other services, such as Citizens Band Radio, the Aviation Service and the Maritime Service have specific channels set aside for emergency communications. They argued that a similar designated channel in the Amateur Service could serve the same purpose.

But in its denial order dated July 31st the FCC claimed that Dixon and Boyle had not shown that a problem existed that would be addressed by designating a nationwide Amateur Service emergency calling frequency. To the contrary, the regulatory agency noted that the rules as they now stand

provide the Amateur Service with what it calls the flexibility to provide emergency communications in a way that takes into account frequency availability and other local conditions.

The FCC observed that under the current Amateur Service rules that licensed operators can use multiple channels on the same or different amateur bands if needed for an event. They can also use multiple channels in the same band when multiple, but different events occur.

Translated into plain English, what the Commission is saying is that plenty of spectrum exists on 2 meters and other ham radio bands for radio amateurs to provide emergency communications services. This, without the regulatory agency stating that a given frequency is designated for that purpose.

The agency also noted that the Boyle and Dixon proposal for the channel to be a non-exclusive nationwide is essentially no different from the way things are right now. This is because all Amateur Service frequencies are already shared and as such they may be used for providing emergency communications as the need arises. If hams in a given region or even nationwide want to create such designated channels on a voluntary basis that the Amateur Radio community already has the authority to do so.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Berwick, Pennsylvania.

--

The bottom line. The FCC seems to be saying that if such a non-exclusive nationwide emergency calling frequency is needed, nothing in the Part 97 rules prevents the amateur community from voluntarily establishing such channels, be it on 2 meters or for that matter, any other Amateur Service band. (FCC)

**

RESTRUCTURING: WILL SOUTH AFRICAS NEW ELECTRONIC COMMUNICATIONS AMENDMENT BILL AFFECT AMATEUR RADIO

The South African Department of Communications is planning to create another body parallel to its Independent Communications Authority of South Africa or ICASA. This, to take over the singular duty of spectrum management.

This move comes as one of the many changes proposed in the Electronic Communications Amendment Bill of 2012. That is a measure that among other things calls for the establishment

of a new Spectrum Management Agency within the portfolio of the Minister of Communications with the overall responsibility for the country's electromagnetic spectrum.

Along with the proposed law comes an explanatory document. It states that the Minister of Communications will act as the custodian of the spectrum on behalf of the people of South Africa as well as representing that nation before the International Telecommunications Union. This includes the allocation of the radio frequency spectrum to various radio communication services including amateur radio. The minister will also be responsible for all international spectrum matters pertaining to South Africa, including Regional and sub-Regional spectrum planning, all cases concerning international harmful interference and international frequency coordination.

The South Africa Radio League Council says that it is currently studying the draft bill to see what impact it might have on that nations amateur radio service. South African radio amateurs are invited to send comments to the South Africa Radio League by August 15th. Please address them to secretary (at) sarl (dot) org (dot) za.

(SARL)

**

RADIO LAW: EUROPEAN UNION ACCEPTS EMC DIRECTIVE THAT PROTECTS HAMS

It appears as if ham radio operators in the European Union are safe from being treated as sources of massive radio frequency interference. On July 10th the Internal Market and Consumer Protection Committee of the European Parliament voted on a the new version of the an Electromagnetic Compatibility directive containing an amendment fostered by Germany's Deutscher Amateur Radio Club and the Political Relations Committee of the International Amateur Radio Union to protect the rights of radio amateurs. The original draft amendment to the definition of an "electromagnetic disturbance" could in the worst case have led to the signal of an amateur station being treated as an annoyance or intrusion. (Southgate)

**

HAM RADIO IN SPACE: NEW 2 METER RADIO TO LAUNCH TO THE ISS

A new VHF ham radio system will soon be headed to the International Space Station. At the July 17 ARISS meeting Kenneth Ransom, N5VHO, reported that his group is in the final stages of preparing the flight certification for

of the replacement hardware for the degraded Ericsson 2 meter radio. That rig is part of the 2nd ISS amateur radio station that is located in the Columbus module.

According to Ransom, they had been hoping to launch of the equipment on flight 33-S on December 5th. Now however comes word that the new radio could be carried aloft ob flight 49-P that's slated to launch on November 1st. As such, Ransom's group is trying to finish the certification process in time for this earlier flight option.

The degraded Ericsson VHF radio may be returned on flight 32-S in October. The team is very interested in trying to determine what the problem has been with this particular piece of gear. And we will have more space related ham radio news later on in this weeks Amateur Radio Newsline report. (ARISS)

ENFORCEMENT: UNLICENSED OREGON OPERATOR FINED $15000

The FCC has issued a Notice of Apparent Liability in the amout of $15,000 to Joshua McMurchie of Prineville, Oregon. This for his alleged operation of a an unauthorized station on 97.9 MHz.

Back in 2011 agents from the FCC's Portland Office of its Enforcement Bureau responded to a complaint and traced the signal to McMurchie's home. Local law enforcement officers accompanied the FCC agents and left a Notice of Unlicensed Operation with another resident of the house and also mailed a notice as a backup. According to the FCC McMurchie signed for the latter notice in October 2011,

This past May, the FCC's Portland Enforcement Bureau received another complaint about an illegal station on 97.9 MHz. Both the FCC and Prineville Police officers went to his home, were granted admittance and found a transmitter broadcasting at that location. The FCC says that McMurchie admitted he operated the station and offered to surrender his equipment to the agents.

Now the FCC has issued a proposed penalty. In reaching its decision, the agency boted that the base fine for operating an illegal station is $10,000. However the commission fined McMurchie $15,000 because of his repeated violations. He too has the customary 30 days from receipt of the notice to pay the proposed fine or to file an appeal. (FCC)

**

ENFORCEMENT: FCC FINES CALIFORNIA CB OPERATOR $7000 FOR REFUSAL TO PERMIT STATION INSPECTION

The FCC has affirmed a $7000 fine issued to a California Citizens Radio operator. This after he refused to let the FCC inspect his station on several occasions. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

This case dates back to March 19, 2010. That's when agents from the San Francisco FCC Office responded to a complaint of interference to the radio communication system equipment of the Merced County Fire Department. The agents then monitored the radio transmissions on frequency 27.165 MHz and used radio direction finding techniques to locate the source of the signal associated with the interference to a CB radio station operating from an Ira Jones' residence in Merced.

The agents approached Jones, identified themselves and told him about the interference. He denied being the source of the interference. They then asked to inspect Jones CB radio station but he refused.

The scenario was basically repeated on August 27th, 2010 when FCC agents, this time accompanied by officers of the Merced Police Department again visited Jones residence. Once again they were refused admittance. On both occasions the FCC issue Jones written warning notices that he refused to accept.

On March 10, 2011, the San Francisco Office issued a Notice of Apparent Liability for Monetary Forfeiture in the amount of $7,000 to Jones for failing to allow authorized FCC personnel to inspect his CB radio station. Jones responded to the N-A-L on March 30th. At that time he argued that he has not seen the complaints of the alleged the interference, that he did not receive the described warnings from the San Francisco agents, and that the agents did not produce valid identification cards.

But the FCC was not persuaded by any of Jones claims. On July 27th it affirmed the Forfeiture Order that gives Jones the customary 30 days to pay the $7000 fine or to file a

further appeal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

This is the second time in recent weeks that an 11 meter C-B operator has been fined in relation to radio gear that in some way was found to interfere with some form of public service communications. In this case the fine is based not on the interference caused by the C-B operators station but rather because he refused an order from the FCC to inspect it. (FCC)

**

ENFORCEMENT: UNLICENSED OPERATOR CAUGHT ON VK REPEATER

An unlicensed operator who haunted an Australian repeater has been caught.

About three weeks ago several members of a radio club were contacted by what appeared to be a person operating with a phony call over the Redcliffe repeater. The operator was using the call sign VK4NFL. It did not take very long for that unidentified operator to get caught after authorities became involved.

Australia's Communications and Media Authority or A-C-M-A located the station and the matter is now in the hands of the Commonwealth legal authorities. It appears as though they do not waste very much time with unlicensed violators like this one, down-under. (WIA)

**

RADIO BUSINESS: HEATHKIT FILES FOR BANKRUPTCY

The Herald-Palladium newspaper says that the remnants of the famed Heathkit Company that once employed up to 1,800 people in St. Joseph Township, Michigan, is now on the auction block.

Owner Don Desrochers told the paper that the company, which was down to half a dozen employees at the end, defaulted on its lease and has filed for bankruptcy.

The organization was last known as Heathkit Educational Systems. Desrochers told the Herald-Palladium that this business was primarily dependant on federal and state funding for schools. Unfortunately, spending in education continued to drop and as such it was economically unfeasible to continue operating.

Founded in 1926 as an aircraft company, Heathkit shifted its focus to electronics after World War II when it bought surplus electronic parts to build kits. Heathkit left the kit business in 1992, focusing on educational materials, then announced it was getting back into the kit business in 2011. According to Desrochers it was losing the educational business faster than it could grow the electronics business, which was not sustainable.

(Published news reports)

**

RADIO TECHNOLOGY: AN FDMDV OPEN SOURCE 1400 BPS HF MODEM

David Rowe, VK5DGR, has made available open source software for a 1400 bps High Frequency FDMRV modem.

FDMDV stands for Frequency Division Multiplexed Digital Voice and is described as basically being a grouping of slow modems running in parallel. For example FDMDV has 14 carriers spaced 75 Hz apart, each running at 50 symbols a second. Due to multipath problems on the High Frequency bands this approach is claimed to work better than one carrier running at 700 symbols per second.

One of the applications of this modem technology will be Digital Voice since it offers fast sync, no multi-second training sequences, the ability to recover quickly after a fade, and no automatic re-transmit of "bad" packets.

Those interested in experimenting with HF digital voice using this technology can find further information and source code at tinyurl.com/hf-digital-voice-modem (Southgate)

NAMES IN THE NEWS: W1HEO RESEARCHING DXPEDITION COSTS

Dee Logan, W1HEO, is researching an article for the DX Magazine on the rising costs of DXpeditons and would like to hear from DXpeditioners for their comments on how to these ever increasing costs. Specific areas of interest include examples of specific costs and reasons for their larger amounts and suggestions for new sources or approaches to donations. If you can help please contact W1HEO by e-mail as soon as possible at deverelogan (at) gmail (dot) com (W1HEO)

**

NAMES IN THE NEWS: KA3HDO RETURNS TO AMSAT AS VP OF HUMAN SPACEFLIGHT

Frank Bauer, KA3HDO, has returned to AMSAT North America as Vice President for Human Spaceflight programs. Bauer stepped down from this position in May 2009 due to increasing work responsibilities at NASA. At the time he was the Chief Engineer for the Exploration Systems Mission Directorate at NASA Headquarters.

Bauer retired from NASA in September 2011. but has been unable to fully support ARISS or other human spaceflight pursuits. This is due to a post-retirement one year "cooling off" period with NASA and with the International Space Agencies. That period ends in about a month.

The Vice President for Human Spaceflight is a position that is appointed by the AMSAT President. It provides leadership and guidance to the AMSAT President, BoD and executives on AMSAT's Human Spaceflight Operations and Development. (AMSAT)

**

HAM HAPPENINGS: RADIO AMATEURS OF CANADA CANCELS 2012 NATIONAL CONVENTION

The 2012 Radio Amateurs of Canada National Convention slated for the weekend of August 10th to the 12th has been cancelled. According to a press release, planners cite a low number of per-registrants as one of the reasons that the Canadian national Amateur Radio society has taken this action. The organizers will be immediately refunding any registrations received prior to cancellation and say they are already working on plans for their 2013 show. They also apologized to anyone who had arranged other vacation or travel plans around this convention. What little else is known about the cancellation can be found on-line at convention 2012 dot rac dot ca. (VA7AEJ, RAC)

**

HAM HAPPENINGS: WEST VIRGINIA'S TARA CLUB TO CELEBRATE 50th HAMFEST

And a word of congratulations to West Virginia's Tri-State Amateur Radio Association which will host its 50th annual hamfest from 8:30 a.m. to1 p.m. on August 11th. For ithis golden anniversary the event will be at the Life and Health Center of Christ Temple Church complex in the city of Huntington. This is a new location will offer unlimited free parking and a new, modern facility for the event. More about the group is on-line at www (dot) orgsites (dot) com/wv/taraclub. (TARA)

HAM RADIO IN SPACE: EME CONFERENCE IN THE UK AUGUST 15 - 19

The 15th international EME conference hosted by the U-K Microwave Group is being held at Churchill College Cambridge between August 15th and 19th. It will also feature a star studded scientific cast. RSGB news reader Jeremy Boot, G4NJH, has the details:

--

This is the first time that this conference has been held in the UK, and it provides an opportunity to learn about this most technically challenging aspect of our great science based hobby. Earth-Moon-Earth communications has much in common with radio astronomy and deep space communications and, in addition to EME specific lectures, there will be presentations on both these subjects.

Two Nobel Physics Laureates from the world of Radio Astronomy will be present at the conference. Joe Taylor, K1JT is a keen EME enthusiast and will be presenting a paper on MAP65, while Professor Antony Hewish, FRS, is the speaker at the conference gala dinner on Saturday 18th.

With over 150 delegates and 60 partners from five continents already registered, this promises to be a great event.

I'm Jeramy Boot, G4NJH, and you are listening to the Amateur Radio Newsline.

--

More information on this event can be found on-line at www.eme2012.com.
(GB2RS)

BEACON NEWS: THE KH6HME BEACONS ARE WELCOME TO STAY ON MONA LOA

The late Paul Lieb, KH6HME's beacon system located at the 8200 foot of Hawaii's Mona Loa Volcano in Hawaii is welcome by the site manager to continue to operate from that location.

According to Don Mussell, the KH6HME beacons are located in the building that was formerly under the control of KGMB-TV. Over the past few years that site was taken over by Hawaii Public Radio, and put under Mussell's supervision.

Mussell says that Hawaii Public Radio is happy to have the beacons located at the site and will leave the operation and maintenance to a ham radio club that also operates equipment inside the building. It
will be up to them to decide if the beacon operation will continue. (Don Mussell, CGC)

**

EMERGING TECHNOLOGY: NANO COAX CABLES AND THEIR USES

Nano technology is in the news once again. This time as a way to store energy. Amateur Radio Newsline's Don Wilbanks, AE5DW, has more:

--

With all the research on nano-technology, perhaps we shouldn't be surprised that one of the latest involves coaxial cables on a nano-scale.

The main interest in the nano-coaxial cable is as an energy storage device due to the very high capacitance between the inner and outer conductor. A study conduced at Rice University found that the capacitance of the nano-cable is at least 10 times greater than would be predicted with classical electrostatics. The capacitance of the new nano-cable is up to 143 microfarads per centimeter-squared.

Study co-author Jun Lou notes that for energy storage, he can envision a large scale energy storage device consisting of millions of tiny nano-cables side by side in large

areas. Lou also says that this cable might also be used as a transmission line for radio frequency signals at the nano scale. This could be useful as a fundamental building block in micro and nano sized electromechanical systems like lab-on-a-chip devices.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW.

--

It appears as if nano technology has come a long way since we began reporting on it only a few short years ago. (TV Technology)

**

HAM HAPPENINGS: ILLW REGISTRATION STILL OPEN FOR AUGUST 18 - 19 EVENT

With 315 registrations so far, the 15th annual International Lighthouse and Lightship Weekend is headed for what right now appears to be yet another record year for participation.

So far, Australia has the most registrations followed by the United States and Germany. With many other nations represented. Among the new ones are Austria, Chile, China, Curacao, Gibraltar, Honduras, Island of Man, Italy, Northern Ireland, Romania, Spain, Sri Lanka, Switzerland and the Ukraine.

With only a few weeks to go, there is still time to register a lighthouse or lightship for the 48 hour fun event slated for August 18th and 19th. To do this, simply visit illw.net for online registration and guidelines of the popular unique event. (VK3PC)

**

RADIOSPORTS: CQ TO REVAMP PUBLICATION SCHEDULE FOR CONTEST RESULTS

In contesting news, CQ magazine says that it will embark on a major reorganization of its editorial content in order to publish contest results significantly sooner. According to Editor Rich Moseson, W2VU, on average, contest results will appear four months sooner than at present.

This change has been made possible by the fact that the majority of contest entrants submit their logs online along with advancements in technology for log-checking. Also assisting are the earlier log submission deadlines announced last month and advances in publishing technology.

The new schedule will be phased in over the course of 2013 and will be fully in place by 2014. A complete calendar of contest results issues for 2013 and 2014 will be posted on the CQ website at www dot cq-amateur-radio dot com. (CQ)

**

DX

In DX, Bill Moore NC1L, the ARRL Awards Branch Manager has announced that the 2012 H44UD operation from the Solomon Islands has been approved for DXCC credit. Cards for that operation may now be submitted.

On the air, listen out for HA9MDN who will be active stroke 9A from Vir Island. Operations will be on SSB, RTTY and SSTV. QSL to HA9MDN via the Bureau or using eQSL.

JH1DVG will be active as V63JX from Pohnpei Island between November 23-26th. His operations will be on 40 through 10 meters using various modes. QSL to his home callsign, direct or via the bureau.

Three operators will be on the air from Praslin Island between October 21st and November 4th. Their activity will be holiday style on 80 through 10 meters using CW, SSB and RTTY. QSL S79LC via I5IHE direct only. QSL S79YY via I5OYY direct with an SASE or electronically using Logbook of the World. QSL's for S79XX go via IK5RUN, also direct with an SASE or using Logbook of the World.

Lastly, JA1XGI will be active as V63XG from Yap Island between December 5th to the 12th. His activity will probably be on 20 through 6 meters using mainly CW, with some SSB and Digital modes. QSO's will be uploaded to Logbook of the World as soon as possible. QSL via JA1XGI, direct or by the bureau.

Above from various DX sources

**

THAT FINAL ITEM: THE CASE OF THE VANISHED VENTURA CALIFORNIA UNLICENSED BRIADCAST STATION

And finally this week the story of the vanishing unlicensed broadcaster in the city of Ventura, California. Did he get scared off the air or did he simply get tired of playing a want-to-be broadcaster, Amateur Radio Newsline's Bill Pasternak, WA6ITF, has what we know about this interesting here and gone station:

--

Actually, what we know comes by way of Bob Gonsett, W6VR, and his CGC Communicator broadcast industry electronic newsletter. According to Bob, this past July 11th a complaint was filed with the FCC field office in Los Angeles concerning a n unlicensed station on 89.7 MHz reportedly operating from Channel Drive in the coastal city of Ventura, California. The station referred to itself as "KSSR... The People's Radio." It even had its own business card and Website.

But on July 25th the CGC Communicator received word that the station had vanished from the airwaves and has shut down their Website. In fact the last Web update was reported on July 24th and said - quote -- "It was nice while it lasted."

According to the CGC Communicator, one of the people involved with the complaint isn't sure if the FCC paid the station a visit, or if the broadcaster saw his vehicle pass by in front of the alleged station location with an antenna in the middle of the vehicle roof and decided to shut it down before the FCC showed up. Either way, the unlicensed broadcaster is gone, at least for now.

So where does this all lead? According to the CGC Newsletter, for many the temptation to find such an unlicensed station is almost overwhelming. It is something most can do with simple direction finding equipment. That's fine if it can be done secretly. The problem with obvious and overt DFing is that the unlicensed station may shut down prematurely only to surface again elsewhere.

The CGC Communicator says that in dealing with unlicensed broadcasters that there is a definite advantage in letting the FCC handle these cases from start to finish. The CGC Communicator notes that once a federal case is opened, the unlicensed station is more likely to stay off the air and that means a lot less work for everyone involved.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, not all that far from Ventura in the Newsroom in Los Angeles.

--

By the way, according to Bob Gonsett, W6VR, the real KSSR-FM is located in the city of Santa Rosa, California and operates on 95.9 MHz. (CGC Communicator)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX

Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline[TM]. Our e-mail address is newsline (at) arnewsline (dot) org. 355. Cobra 139 XLR help

Newsgroup: rec.radio.cb
Date: 2012-08-07 02:33:24 UTC
From: a2phil <pj12161@hotmail.com>
Message-ID: <a8308270-6ff1-471b-a4ea-7ad1e51a2c59@googlegroups.com>
Source record: 251609

I recently bought a Cobra 139 XLR at a garage sale for $15. The guy didn't have an antenna for it, so I couldn't check TX/RX, right then, but it lit up and didn't LOOK like it's seen the "golden screwdriver" (no extra switches, no missing/stripped out screws or knobs, no holes in the case, etc...I've always been told to STAY AWAY from those radios unless you know the person who did it and you know they know what they're doing)and I've seen the "it lights up, but I don't know what's wrong with it" ones go on eBay for $40+, so I bought it. I took it home, and found that the radio receives GREAT (TONS of skip with an indoor antenna!!) but no transmit (meters dim and deflect momentarily, but no "dead key" even with whistling) No power out indicated on my watt meter. Is there an easy and/or cheap fix for this? Can you still find the needed part(s) for this 35+/- year old radio?

The components are all surface mount.
If you can read the schematic's and if you can solder and if you have
the proper tools to do the proper measurements - you can repair it
yourself.
The problem is with a $15 radio - you probably aren't going to spend
$50.00 to repair it...

ULTIMATE DX: LISTENING FOR THE MARS RECONNAISSANCE ORBITER
AND LANDER

Want to try your hand at some truly out of this world DX
listening? With the successful lading of NASA's rover
Curiosity on Mars, some hams are thinking of trying to catch
signals from the new rover directly or those from the Mars
Reconnaissance Orbiter circling the Red Planet. Is it
possible? Amateur Radio Newsline's Bruce Tennant, K6PZW
takes a look at the communications aspect of the mission:

--

Thanks to some research by the Southgate News, it turns out
the Curiosity rover transmits on frequencies around 401 MHz
but the transponder on the Mars Reconnaissance Orbiter or
MRO has a CCSDS Forward Frequency in the 437 MHz Amateur
Satellite Service band. This is because 435 to 438 MHz is
shared with the Military and 432 to 438 MHz is also a Space
Surveillance Radio Band. In fact, general space usage
extends beyond that.

So how does it all work? Well the Mars Reconnaissance
Orbiter has a UHF transponder known as MELACOM that operates
between 401 to 437 MHz. It also has a pair of patch
antennas to communicate with any landed asset on Mars
surface supporting the CCSDS Proximity-1 protocol. And with
it all working the way it has throughout this mission,
signals from the Mars Reconnaissance Orbiter are being
received back on Earth.

While NASAs Deep Space Network has no problem in hearing the Mars Reconnaissance Orbiter, the question might be if a ham radio station with its simple equipment might be able to do the same. If you want to give it a try there are two papers from NASA that might be of assistance.

The first describes the operation of the Mars Reconnaissance Orbiter. It can be found at tinyurl.com/mro-operations. The other is titled Mars Express and the NASA landers and rovers on Mars - Sustaining a backup relay in an interplanetary network. Its URL is tinyurl.com/space-communications. Both of these documents are in Adobe .PDF format.

For the Amateur Radio Newsline, I,m Bruce Tennant, K6PZW, in Los Angeles.

--

Oh, if you are successful in hearing either the lander or the orbiter please be sure to record any audio you hear along with the story of how you accomplished it. We will be happy to share it with our listeners, world wide. (Southgate, ARNewsline)

RESCUE RADIO: HAMS RESPOND TO MASSIVE INDIA POWER FAILURE

Back here on planet Earth, ham radio was called out after the world's worst blackout in recent times cut power to 700 million people in India on July 31st.

Jayu Bhide VU2JAU is the National Coordinator for Disaster Communication in India. He reports that the North-East grid failed due to a fault in the plant and 20 states were affected by the power failure.

VA2JAU said that hams in and around the affected areas provided emergency communications during the outage. He noted that all voice repeaters in the areas hit by the blackout remained in operation despite the heavy duty back-up power that was required.

Up to 20 of India's 28 states were plunged into darkness as suppliers failed to meet the growing demand caused by heavy demands. The blackout halted hundreds of trains, took out traffic lights were out and caused surgical procedures to be cancelled. Several miners were trapped underground when their elevators failed. The blackout raised concern about India's infrastructure. (VK3PC, VU2JAU)

**

RESCUE RADIO: GAREC 2012 PUTS OUT CALL FOR PAPERS

Delegates representing their amateur radio emergency communications services, national societies or clubs are being invited to submit proposals information papers and reports. This for the 8th Global Amateur Radio Emergency Conference or GAREC which will be held November, 12 to 14th in Port Dickson, Malaysia.

Of primary interest will be information regarding the activities of any given group in regard to any emergency or disaster relief operations that it may have actively participated in from September of 2011 onwards.

The closing deadline of submission to the GAREC Secretariat is this coming September 31st. Documents should be submitted electronically in Microsoft Word format to secretariat (at) mygarec2012 (dot) com. (IARU)

**

RADIO RECOGNITION: UNESCO RECOGNIZES IRESC WITH SPECIAL CONSULTATIVE STATUS

A major coup for a relatively new ham radio emergency communications radio group. This as the United Nations Economic and Social Council known by the acronym UNESCO adopts the recommendation of the Committee on Non-Governmental Organizations to grant Special Consultative Status to the International Radio Emergency Support Coalition. A group better known by its initials of IRESC.

For those who may have never heard of it, the International Radio Emergency Support Coalition bills itself as a global coalition of volunteer communicators, with dedicated members spread around the world providing assistance to those in need at all times of day or night. The main objectives of IRESC are to foster efficient collaboration between radio amateurs, extending friendships across the world and providing international emergency communication in times of need when all else fail.

Currently, IRESC has members in at least 40 countries. Most are also affiliated with national organizations such as the International Red Cross, the Salvation Army, the United Kingdom's RAYNET, the Israel's Magen David Adom, local amateur radio clubs, and many other groups the world over.

The decision to grant the International Radio Emergency Support Coalition this status was made at the recently concluded UNESCO session held in July. More about this important milestone for the IRESC can be found on-line at www.irescintl.com. (9Z4FX)

THE BPL WAR: RSGB CONCERNED OVER PUSH TO LEGITIMIZE PLT

Broadband over Powerline called PLT in Europe is once again raising its noise generating head and that's of special concern to ham radio operators in the UK.

Now, the Radio Society of Great Britain has issued a statement expressing grave concern at what it calls the continuing headlong rush to legitimize high levels of emission from various Broadband over Powerline devices. This, in direct contravention of the Essential Requirements of the nations EMC Directive.

You can read the full statement on the RSGB website at www.rsgb.org. Simply click on Update on Draft PLT Standard. (RSGB)

**

RADIO POLITICS: RAC ANNOUNCES NEW STRUCTURE FOR ONTARIO

Radio Amateurs of Canada has announced that as of September 1st that its current Ontario Section will be replaced by four new Sections. These are Ontario North, Ontario East, Ontario South, and the Greater Toronto Area. A map depicting the new section boundries is available for viewing at tinyurl.com/ontario-new.

Meantime, word that the American Radio Relay League has already recognized the four new sections and they will be effective for the ARRL November Sweepstakes contest.

Radio Amateurs of Canada adds that several vendors of logging and contest software have also announced changes to coincide with the new make-up of the Ontario sections. Unfortunately, some of these will not available or effective until January of 2013. (RAC)

HAM HAPPENINGS: EUROPE YOUTH ON THE AIR AUGUST 19 To 26

Two European national amateur radio societies are teaming up to give young people a chance to find out what ham radio is all about first hand. Called Youngsters on the Air from Belgium and the Netherlands 2012, many young radio amateurs from nine different European countries will be participating in contesting, direction finding competitions, a Field Day like operation and much more.

Youngsters on the Air will be held the week of August 19th to the 26th at a location in Belgium adjacent to the Dutch border. The sponsors are Belgium's U-B-A Youth Commission and the Dutch national amateur radio socirty society VERON. For more information please contact Tommy Degrande, ON3TD,

by e-mail to tommy (at) uba (dot) be or Lisa Leenders, PA2LS, to pa2ls (at) veron (dot) nl (ON5CFG)

BREAKING DX NEWS: CY9M ST. PAUL OPERATION SHUTS DOWN EARLY

The long anticipated CY9M St. Paul Island DXpedition was forced to go QRT earlier then expected at the request of their transport ships skipper due to a forecast of poor weather conditions. As a result they departed from St. Paul at about 1900 UTC on July 31st.

The good news is that in the short four and a half days of operating, the team made over 33,000 QSO's. All contacts will be verified electronically via Logbook of the World once the operators return home.

Those in need of paper cards should QSL to Tim Beaumont, M0URX. Meantime their logs are now available for viewing on ClubLog, and we will have more DX related news later on in this weeks Amateur Radio Newsline report. (OPDX)

RADIO TECHNOLOGY: NXDN DIGITAL AUDIO SPEC TO BE MADE PUBLIC

Another Digital protocol will soon be available. Amateur Radio Newsline's Jim Davis, W2JKD, has more:

--

The Southgate news reports that the technical specification for NXDN which is an FDMA digital voice technology supported by Icom and Kenwood, is being opened to the public domain. According to a press release the chair of the NXDN Forum has announced that the Forum Steering Committee has decided to open the NXDN technical standards to the telecommunications industry.

For the past 5 years both ICOM and Kenwood have been producing VHF/UHF mobiles, handhelds and repeaters to the NXDN standard. The equipment has a transmitted bandwidth of 4.0 kHz and is typically used in 6.25 kHz channel spacing systems. NXDN Digital products are deployed throughout the

world in hundreds of thousands of professional radio applications.

The specification is currently available in response to an e-mail request but the NXDN Forum indicates it will be available for direct download later in the year. Interested companies can obtain the information for the NXDN technical standards by following the instructions on the forum web site at www.nxdn-forum.com/instructions

For the amateur Radio Newsline, I'm Jim Davis, W2JKD

--

The NXDN Forum says that it will continue to accept new members after opening the technical specifications and will govern the NXDN specification and related interoperability testing and certification. (Southgate)

**

ENFORCEMENT: FCC AFFIRMS $11000 TOWER VIOLATION FINE

The FCC says Ely Radio, licensee of KWNA - AM of Winnemucca, Nevada must pay an $11,000 fine for various tower violations. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

The case began in 2008 when the San Francisco office of the Enforcement Bureau originally fined Ely Radio $13,000 because its red obstruction lights were out and the licensee had not notified the Federal Aviation Administration of the outage. The commission also found that Ely had apparently and repeatedly failed to notify the FCC about a change in ownership information for the tower.

In its appeal, Ely denied owning the tower and said it wasn't responsible for the structure's upkeep. As a result, the FCC sent a Letter of Inquiry to KWNA's former owner, Sheen Broadcasting Company. In its reply Sheen confirmed it's no longer a commission licensee. Sheen told the commission the company sold all of the equipment used to operate the station, including the tower, to Ely in 2006.

In its appeal, Ely urged the FCC to reverse its decision, arguing that it's really a tenant, not an owner. It is said was because it leases the station building and land from Sheen. But the commission did not find that argument credible, saying in its decision that at best, it appears that Ely and Sheen may have a continuing disagreement about how each of them interprets their sale agreement. That said the FCC says that it has determined that Ely is indeed the

tower owner and that it's the only licensee using the structure. It also claims that Ely's personnel actually improperly extinguished the tower lights that resulted in the fine.

Because of Ely's past history of good compliance with commission rules, the agency lowered the original fine by $2,000 bringing the amount to $11,000. But it says Ely Radio must pay the fine.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Ely Radio was given the customary 30 days to pay or to file a further appeal. (RW, FCC)

**

HAM HAPPENINGS: DIGITAL ATV PARTY AUGUST 24 - 25

The World QSO Digital Amateur Television Party takes place on Friday August 24th and Saturday the 25th. This years event will involve California and Arizona in the United States, plus Australia and the British Amateur Television Club website in the U-K.

Here in North America, Bob Minnick W8ARZ and Lee Weitzel K0CCU, both in Arizona, will use the resources of linked ATV repeaters. Also, K0CCU has Skype video of very high quality and tested through the VK3RTV Digital A-T-V repeater.

The first such QSO Party organized by Peter Cossins VK3BFG occurred during the Centenary celebrations of Amateur Radio Victoria last year. (VK3PC)

**

HAM HAPPENINGS: NCDXF RECEIVES $4000 FUNDING BOOST

The Northern California DX Foundation is the recipient of a $4000 donation from the Northern California DX Club. This is said to be the largest donation ever received by the group from a club.

Of late more and more DX oriented clubs are making donations to the Northern California DX Foundation. The organization thoroughly analyzes the financial needs of planned DXpeditions and helps provide critical funding to operations high on the DX'ers Most Wanted List. Its been said that without support many DXpeditions would not be possible. (OPDX)

**

HAM HAPPENINGS: FLORIDA RADIO CLUB SEEKS TO EXPAND MUSEUM EXHIBIT

The Florida-based West Palm Beach Amateur Radio Group Inc. has announced the start of what it calls an ambitious project to expand the WS4FSM exhibit at the South Florida Science Museum. This is an exhibit that it calls "Lasting Moments of First Excitement."

According to the group, the exhinit combines technology available over the Internet with the world wide communications offered by Amateur Radio. This, to lead to a new generation of creativity and scientific advancement.

To help raise funding for the expansion the group has launched a project on KickStarter to take its story to the world. You can more about it on-line at tinyurl.com/palm-beach-kickstarter.

The West Palm Beach Amateur Radio Group bills itself as the largest amateur radio club in Palm Beach County with a history that dates back to the 1930's. More about the group is on the World Wide Web at www.wpbarc.com (AJ4XM)

**

NAMES IN THE NEWS: YU1YU ELECTED PRIME MINISTER OF SEREBIA

Some names in the news. Former Serbian Internal Affairs Minister Ivica Dacic, YU1YU, was elected as that country's newest Prime Minister on July 27.

Dacic is the leader of the Socialist Party of Serbia. From 2008 until his election as Prime Minister he served as First Deputy Prime Minister, as well as Minister of Internal Affairs. In March 2012, Serbia became a candidate for membership in the European Union.

In the world of amateur radio Dacic is a member of the Amateur Radio Union of Serbia which is Serbia's IARU Member Society. He is said to be a member of his local club known by its call letters as YU1AAV.

Dacic succeeds Mirko Cvetkovic who served as Serbia's Prime Minister from 2008 to 2012. (Southgate)

NAMES IN THE NEWS: WB4NWS REPLACES KG4IUM AS ARRL SOUTHEASTERN VICE DIRECTOR

ARRL President Kay Craigie, N3KN, has appointed James Millsap, WB4NWS, of Acworth, Georgia appointed to the position of ARRL Southeastern Division Vice Director, effective August 1st. This after former Vice Director

Andrea Hartlage, KG4IUM, resigned because she has accepted a job outside of the Division.

In a message sent to members of the Southeastern Division, KG4IUM stated that while she is incredibly excited about her new career and her future, it has not come without cost. That because her move is to be outside of the division, that she is no longer eligible to serve as Vice Director.

Hartlages replacement, Jim Millsap began his ham radio career at age 12, operating 6 meter AM from Atlanta. Over the years he has served as Assistant Emergency Coordinator for Cherokee County Amateur Radio Emergency Service since 2002, was appointed ARRL Emergency Coordinator in 2010, and has been the District Emergency Coordinator for Metro Atlanta District since 2011. He was selected Georgia's "Ham Operator of The Year" in 2010 for his volunteer work in Georgia ARES. Millsap's appointment runs until noon January 1, 2014.

And for those of you who many not remember, Andrea Hartlage, KG4IUM, was the 2004 Amateur Radio Newsline Young Ham of the Year. (ARRL)

**

NAMES IN THE NEWS: VE3LC APPOINTED TO CITIG 700

Norm Rashleigh VE3LC, has been appointed by Radio amateur of Canada to serve on the Canadian Interoperability Technology Interest Group or C-I-T-I-G 700 Mhz definition working group. This group will help to define the network architecture and technical interoperability requirements for a Nation wide broadband mobile data network operating in the 700 Mhz band. VE3LC is currently on the RAC Radio Advisory Board of Canada and has just completed a term as Vice President Industrial Liaison. (VO1DTM/VO1DM)

HAM RADIO IN SPACE: ECUADOR TO LAUNCH AN EDUCATIONAL CUBESAT LOADED WITH FIRSTS

An upcoming launch of 17 amateur radio satellites will also carry one with several firsts to orbit. Amateur Radio Newsline's Don Wilbanks, AE5DW, reports:

--

Among the birds to be lofted this November will be an innovative educational satellite built in Ecuador and known as NEE-01 Pegasus. This tiny 1 Unit CubeSat has a large fold-out solar array and carries a 902 MHz, 720 line Progressive Scan High Definition camera and associated TV transmitter. The latter will send video of the Earth to school students in Ecuador.

The NEE-01 Pegasus engineering team was led by Commander Ronnie Nader who was Ecuador's first astronaut. The satellite was featured in the July 15 edition of Ecuador's El Murcurio newspaper. That article in electronically translated English is on-line at tinyurl.com/Ecuador-in-Space

Im Dom Wilbanks, AE5DW.

--

Cubesats are tiny satellites that are economical to both build and carry to orbit making them attractive to institutions of learning as well as to the ham radio community. (ANS)

WORLDBEAT: UK NATIONAL RADIO CENTRE OPENS

The United Kingdom's National Radio Centre is now officially open This after Mr. Ed Vaizey, who is the Minister for Culture, Communications and the Creative Industries officially opened the National Radio Centre at Bletchley Park in Milton Keynes.

After a tour of the new building and unveiling a plaque in the entrance, Mr Vaizey stated that the Centre will do an enormous amount to spread the knowledge about the history of radio and its continuing importance in the 21st century.

The National Radio Centre is open Thursdays, Saturdays and Sundays from 11.00 to 16:30 local UK time. More details, and photographs of the event, can be found on-line at www.nationalradiocentre.com (GB2RS)

**

RADIO HISTORY: MARCONI CHELMSFORD SITE TO BE RE-DEVELOPED

The BBC reports that the Marconi New Street factory in the United Kingdom city of Chelmsford is to be redeveloped after being left derelict for several years.

Marconi New Street was the world's first purpose designed and built wireless factory. It was opened in June 1912 by radio pioneer Guillermo Marconi and where he carried out his research work and built a large electronics and telecommunications business. It also provided housing for many of those who were employed by Marconi.

According the BBC that business dissolved in 2006 and the building has stood empty since 2008. The new owners says that it wants to build homes, offices, shops and community facilities at the site, which covers about 10 acres near Chelmsford city center but also retain and refurbish the main 1912 Marconi building for office space.

You can read the entire story on-line at Read the BBC story at tinyurl.com/marconi-factory. (WIA News)

**

DX

In DX, the International Telecommunications Union has updated its Table of International Call Sign to reflect a call sign change for the island of Niue which will now have the entire E6 prefix block. Prior to the change the island used ZK2 callsign prefix.

On the air, word that a team of European operators will be active as D64K from the Comoros Islands through August 20th. Their license covers from 160 to 6 meters, so they hope to be active on all bands and modes and were even considering the possibility of working on 60 and 6 meters. They will have four stations on the air using Elecraft transceivers, amplifiers and at least two Spiderbeams and several vertical antennas. The QSL Manager for this operation is IV3DSH.

DJ7RJ will once again be active stroke FR from Reunion Island as between September 26th and October 21st. His operation will be on 160 through 10 meters using, CW and SSB, and he will pay special attention to the low bands for United States and Japan. QSL direct to his home callsign.

DG5LAC will be active stroke P from Amrum Island between August 11th and the 24th. His operation will be holiday style on 80 through 10 meters SSB. Log will be uploaded to Logbook of the World and eQSL when he returns home. QSL via his home callsign, direct or by the Bureau.

A team of Saudi operators will activate Al-Dhahrah Island as 7Z7AB between October 5th to the 11th. More details and a Web page will be forthcoming. Meantime you can see their logo on QRZ.com.

Lastly, listen out for an all Y L DXpedition to be active as GB2YLS from Fair Isle between August 16th to the 22nd. Their activity will be on the HF bands using CW and SSB. They also plan to be operational as an entry in the International Lighthouse and Lightship Weekend scheduled for August 18th and 19th from the Fair Isle South Lighthouse. QSL via MM5YLO, either direct or via the bureau.

Above from various DX news sources

THAT FINAL ITEM: JOE WALSH WB6ACU SAYS HE IS THINKING ABOUT RUNNING FOR CONGRESS

And finally this week, famed rock guitarist Joe Walsh, WB6ACU, has joked about running for political office since way back in 1980. That's when he ran a tongue in cheek campaign for the presidency. Now it appears as if Joe has decided to take politics more seriously, and according to a new radio interview, he could run for Congress. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the details:

--

In a recent discussion aired over WASH-FM in Washington DC, famed rock guitarist Joe Walsh, WB6ACU, said, and we quote: "I think I would run seriously, and I think I would run for Congress."

Walsh went on to tell WASH that: "The root of the problem is that Congress is so dysfunctional. We're dead in the water until Congress gets to work and passes some new legislation to change things."

Walsh believes he could represent the concerns of real people better than politicians who live in a different world to the rest of the country. He said that he thinks that if you pay attention to Congress and vote for people from where we're all from, and if we can elect people who are not politicians that are from where we're from, that he thinks we can get something done.

Walsh added - and again we quote: "So I might run for Congress and see if I can stir up the hornets."

Meanwhile, WB6ACU is touring his new solo album "Analog Man" at intimate venues nationwide. And of coarse you can always hear his playing the opening theme at the beginning of each episode of Ham Nation on TWiT.tv.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

For those interested in hearing all of what WB6ACU has to say, take your web browser to ultimateclassicrock.com/joe-walsh-to-run-for-congress. Then scroll down until you see the window containing the actual interview and click the arrow key to make it play.

RESCUE RADIO: HAMS RESPOND AS FLOODING HITS THE PHILIPPINES

The Philippine Amateur Radio Association known as PARA
activated its Ham Emergency Radio Operations on two meters
and 40 meters passing essential traffic during the
widespread flooding that recently hit the capital city of
Manila and surrounding areas. Amateur Radio Newsline's Norm
Seeley, KI7UP, has more:

--

Nearly two weeks of monsoon rains across the Philippines
main island of Luzon peaked with a 48 hour deluge that
battered Manila and surrounding regions on August 6th and
7th. This was the worst rain to hit Manila since Tropical
Storm Ketsana killed 464 people in 2009. .

Eddie Valdez DU1EV, is the Chief Operating Officer of the
Philippines Amateur Radio Association. He said that members
of the Ham Emergency Radio Operations group were on air from
Monday the 6th through Thursday the 9th as the flood waters
rose and then receded.

Through the organizations website DU1EV had warned the ham
radio community of the pending rains. He asked those radio
amateurs involved in emergency communications to be prepared
by monitoring the emergency frequencies of 7.095 MHz and
144.740 MHz.

DU1EV said the sun finally, but only partially, showed up on
the Thursday, August 9th with the flood waters receding in

most areas. He said tones of garbage litter roads, parks and drains in Manila and surrounding provinces.

A big clean-up is under way. In the worst affected areas like Marikina City, the Metro Manila Development Authority said it would take about a month to clean and clear the drainage canals.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

According to news media reports 66 people died in the torrential rain and officials estimated 300,000 fled their homes in the capital city of Manila. According to DU1EV, during the storm one of the volunteer radio operators had to leave his home after two days because of the intense flooding. (VK3PC, DU1EV)

RESCUE RADIO: E-MAIL FROM NET SAVES SAILOR IN DISTRESS

The Coast Guard with the aid of amateur radio coordinated the rescue of a mariner in distress approximately 287 miles northeast of Hilo, Hawaii on Friday, August 10th.

Duty officers at Joint Rescue Coordination Center in Honolulu received an e-mail report from a member of the Amigo Net. It said that a mariner aboard the Australian flagged sailing vessel the Q-Wave was disabled and requesting assistance.

According to news reports, the sailor reportedly had less than one liter of water and no food. The vessel's motor was disabled, it had lost its dingy, its communications equipment was unreliable and it had sustained a tear in its mainsail.

A Coast Guard HC-130 Hercules aircraft from Coast Guard Air Station Barbers Point was launched and located the disabled vessel. The crew dropped emergency supplies, including food, water and a VHF radio to the disabled sailboat. The Good Samaritan vessel Fifth Wife was in the area, overheard communications with the disabled vessel and responded to escort it back to Hilo. (Published news reports)

PRO-ACTIVE ENFORCEMENT: CALGARY CANADA FORMS COPPER THEFT UNIT

Anyone thinking of being a copper thief in Calgary Canada may want to think again. Amateur Radio Newsline's Jim Davis, W2JKD, has the reason why:

--

Calgary Canada police have created a special unit to target copper wire thieves. This, as the number of thefts in that nation and world-wide continue to rise.

With the price of this metal on the upswing so are the number of crooks hoping to cash in. Offenders see the crime as extremely high reward as they can easily steal copper and turn it around for cash. In other words there seems very low risk of getting caught.

But that changed in June after the Canadian Broadcasting Corporation was hit when $50,000 worth of copper wire was stolen from its transmitter site in southwest Calgary. Now police are watching very carefully for any signs that metal thieves may be about to strike.

I'm Jim Davis, W2JKD.

--

Calgary police hope that this new initiative will help deter copper thefts in that area. (WIA)

EMERGING TECHNOLOGY: EARLY WARNING QUAKE DETECTION DEMONSTRATED AT CAL TECH

Earthquake prediction may be on the verge of becoming a reality. This, following media reports that a pair of temblors centered near Yorba Linda, California were detected by a new earthquake warning system that's being developed at the California Institute of Technology.

A 4.5-magnitude quake struck one mile northeast from Yorba Linda at 11:23 p.m. Tuesday, August 7th. About ten hours later another a 4.4 magnitude shaker struck two miles from the same location.

News reports quote Douglas Given from the U.S. Geological Survey as saying that in the case of the first event Cal Tech received about nine to ten seconds warning before the strongest shaking was felt at the facility. In regard to the second quake the warning time was in the area of four seconds. Cal Tech is located in Pasadena California which is about 60 air miles from the two quakes epicenter.

Seismologists say that once the technology advances, they should be able to quickly determine a quake's magnitude and

send that information out to the public before the strongest shaking waves reaches a given location. In its current incarnation, the early warning system sounds an audible alert, shows a countdown timer and estimates the intensity of an earthquake.

Experiments in quake detection have been going on for well over five decades but experts say that this new prototype system is the first to ever pick up quakes before the ground started shaking at its location. (Published news reports)

**

RADIO INTERFERENCE: NEW RADIO BURST HEARD ON THE HF BANDS

The IARU Monitoring System Region 1 newsletter reports on a new burst radio system that is affecting the amateur radio operations in the 80, 40, 20 and 15 meter bands.

Writing in the newsletter Wolfgang Hadel, DK2OM, says that he discovered a new burst system operating on 3.5, 7, 14 and 21 MHz, daily.

Hadel who is the IARU Region 1 Monitoring System Coordinator says that the system is active every full hour at plus 1, plus 2 and plus 3 minutes with 10.4 sec. bursts of 20 kHz width. Also, the signals appear to come from France.

DK2OM adds that audio frequency analysis seems to pin this as being similar to CODAR signals. Their real purpose is unknown but DK2OM says that perhaps this is a new kind of over the horizon radar or Ionosonde. As we go to air, Germany's Department of Post and Telecommunications has filed a complaint with its French counterpart. (IARU-R1)

HAM RADIO IN SPACE: NROL-36 CUBSAT LAUNCH DELAYED AGIN

The launch of the NROL-36 mission carrying several new amateur radio micro-satellites has once again been postponed. According to Spaceflight Now, the United Launch Alliance Atlas 5 rocket, its classified payload and the ham radio cubesats remain poised for liftoff at Vandenberg Air Force Base in California. Now, officials say that the twice delayed launch will likely take place on September 6th.

The flight was scrubbed during the initial countdown on August 2nd due to Range Instrumentation problems at the Vandenberg launch complex.
Spaceflight Now says that engineers are on a path to resolution and hope to have corrective actions implemented, tested and certified by late August. The latest developments on this pending launch can be followed at

www.spaceflightnow.com.

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report.

RADIO LAW: HAM IN WALES USES UNUSUAL APPROACH TO WIN TOWER FIGHT

A ham in Wales has won a tower dispute with the town he lives in by taking a very different approach. He accused the town's community council of bordering on racism and won an appeal to erect a fourth tower in his garden. We have more in this report:

--

Michael Butler, GW0MNP, had his planning application for a 21 foot antenna mast rejected three times in under a year but he did not give up. In what may best be called an unprecedented three-pronged attack, Butler not only accused the city council of racism but also wrote letters accusing the Gazette newspaper of being "biased and sarcastic" and calling borough Mayor councilor Marlene Thomas "an idiot".

According to Wales dot com, Butler, of Green Meadow, sent a stinging letter to Cefn Cribwr Community Council last month. In it he claimed that their "prejudice" against his antenna mast installation ideas "bordered on racism".

In March, Bridgend County Borough Council planners denied Butler's request to erect the mast in his garden to further his amateur radio hobby. Those opposed to his installation compared the proposed antennae to "a flying bedstead". A bedstead is a British term for the metal framework that holds a mattress, pillows and the rest of the bedding.

But in the end, Butler's interesting approach succeeded. This when Welsh planning inspector Rebecca Phillips upheld his appeal against the council planners initial decision. Her decision means he can now keep the three towers already has and erect a fourth. The only proviso is the new tower

is only at its full height for three hours a day.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, mulling this one over here in the newsroom in Los Angeles.

--

You can read the entire story of this fascinating tower appeal, including commentary by some of Butler's neighbors on-line at tinyurl.com/wales-antenna-win. (Wales.com, QRZ.com)

**

RADIO LAW: VANITY FEE GOES TO $15 ON SEPTEMBER 4

Mark September 4th as the day that getting a vanity call sign will go to $15 for a full 10 year term. On August 3, the previously approved increase of 80 cents was printed in the Federal Register. The new charge take effect 30 days after publication making September 4th the first day it is in effect. (FCC)

**

ENFORCEMENT: FCC TELLS SPY SHOP TO STOP SELLING JAMMING DEVICES

A California electronics retailer has been ordered to stop selling products designed to jam radio communications equipment. Amateur Radio Newsline's Jeff Clark, K8JAC, reports:

--

The FCC has issued an official Citation and Order to Spy Shop of Sherman Oaks, California that also does business as IQ Tronics, Inc., SpyShopOne.com, and SpyGadgetsShop.com. This, for marketing cell phone, and Global Positioning System and other signal jamming devices in violation of Section 302(b) of the Communications Act, and Sections 2.803 and 15.201(b) of the Commission's rules.

In its July 18th Citation the FCC ordered that the Spy Shop should take immediate steps to come into compliance and to avoid any recurrence of this misconduct, including actions such as removing illegal signal jamming devices from displays and declining to sell signal jamming devices in the United States. The FCC said that if after receipt of the Citation, Spy Shop violates the Communications Act or the FCC Rules by marketing unauthorized radio frequency devices within the United States or its territories the Commission may impose monetary forfeitures of up to $16,000 for each such violation. In the case of a continuing violation, the

Commission may impose monetary forfeitures of up to $16,000 for each day of such continuing violation up to a maximum forfeiture of $112,500 for any single act or failure to act. In addition, violations could also can result in seizure of equipment as well as criminal sanctions, including imprisonment.

Im Jeff Clark, K8JAC.

--

As we go to air, a check of the company website shows that all of the gear that the FCC says is illegal to sell has been removed from the company website. (FCC)

**

PUBLIC SERVICE: JIMMY FUND WALK VOLUNTEERS NEEDED

Ham radio volunteers are needed in support of the Sunday, September 9th Jimmy Fund Walk in the greater Boston Massachusetts area. This event is on the Boston Marathon course but most of its activity is on the last half. All communications will be on 2 meter FM with volunteer communicators assigned to buses and first aid Stations along the route from 5 AM to 7 PM. Some half day assignments will also be available. If you wish to volunteer please contact Steve Schwarm by e-mail to w3eve (at) arrl (dot) net and be sure to put Jimmy Fund in the subject line, (W3EVE)

**

RADIO BUSINESS: HAM RADIO DELUXE UPDATED

HRD Software announces an updated release of Ham Radio Deluxe version 5.24.36. This update includes fixes for cross band contacts in Logbook and some PTT issues hams have run into with DM780.

Meanwhile the Ham Radio Deluxe development team continues work on HRD Version 6.0. The specific date release date will be announced in a future press release.

For those who are unfamiliar wit it, Ham Radio Deluxe or HRD is an integrated suite of software products for amateur radio. The five modules provide rig control, logging, digital communications, satellite tracking, and rotator control. More about it is on-line at www.ham-radio-deluxe.com (HRD)

**

NAMES IN THE NEWS: AUTHENTIC RADIO AUDIO NEEDED FOR DOCUMENTARY FILM

Some names in the news. Steve Wystrach who is working on the production of a documentary film about Robert Manry and his 1965 single-handed Atlantic crossing says that he is in seed of two pieces of audio to help complete the project. First he needs an authentic recording of a WWV time signal from that era. It needs to be legible, but it can have a bit of static or hash, just as long as it's clear enough to understand.

Steve also needs a recording of the sound of a Gibson Girl distress transmitter. Manry demonstrates this unit at one point in the film but the actual signal it produced was not receded with a local receiver.

For those not aware, the Gibson Girl was the predecessor of the modern E-L-T or Electronic Location Transmitter but sent out an S-O-S signal on the old International Distress Frequency of 500 KHz. Many of these hit the surplus market in the 1950's and 1960's and were a popular as a parts supply for hams and other radio experimenters of that era.

If you have either of these audio tracks please e-mail Steve Wystrach to info (at) robertmanryproject (dot) com. More information about the documentary film is on line at www.robertmanryproject.com/about-us/. (Steve Wystrach)

**

NAMES IN THE NEWS: NEW RAC ONTARIO SECTION MANAGERS NAMED

With the break-up of Radio Amateurs of Canada's Ontario Section, there are now four newly named Section Managers. Allan Boyd, VE3AJB, has been named as Section Manager Ontario North. Michael Hickey, VE3IPC, takes the reins for Section Manager of Ontario East. The Section Manager for the Greater Toronto Area is George Duffield, VE3WKJ, with Ian Snow, VA3QT, as Section Manager Ontario South. These appointments are effective immediately, and will be merged into the normal election process at the end of a two year term. (RAC)

**

HAM HAPPENINGS: W9DXCC DX CONVENTION SEPT 14 - 25 IN ELK GROVE IL.

On the social scene, a reminder that the 60th annual W9DXCC DX Convention will be held September 14th to the 15th at the Holiday Inn in the Chicago suburb of Elk Grove, Illinois. W9DXCC is very much a fun gathering with presentations focused on DXing. Also available will be on site QSL card checking for CQ and ARRL awards. An optional Friday afternoon class will help get aspiring DX'ers up to speed. For more information and on-line registration for this

gathering please take your web browser to www.w9dxcc.com. (N7US, W9DXCC)

**

HAM HAPPENINGS: WESTERN STATES VHF - UHF WEAK SIGNAL 75M NET

The Western States VHF/UHF Weak Signal 75 meter net meets every Sunday night from 5:30 to 6:30 pm Pacific time. This net is an informal opportunity to discuss recent operating activity, future plans for contests, rovers, and a wide variety of topics for the non repeater folks who inhabit the world above 50 MHz. The frequencies used are 3.920 MHz Lower Sideband region wide and 144.200 MHz Upper Sideband in Southern California. Anyone with an interest in weak signal communications is invited to take part. (VHF Reflector)

EMERGING TECHNOLOGY: WWVB PHASE MOD TEST STARTS AUGUST 21

The National Institute of Stands and Technology radio Station WWVB will be conducting a test of a phase-modulated broadcast format beginning at 1800 UTC on Tuesday, August 21st and ending at 1800 UTC on Friday, August 24th. During the test period the broadcast will be randomly switching between the normal WWVB broadcast and the new phase-modulated broadcast format.

According to WWVB Radio-controlled clocks and watches will not be affected by the test. However phase-locking 60 kHz timing and frequency standard receivers may lose lock during this period. However, they will restore during the normal broadcast period.

For more information, e-mail WWVB broadcast manager John Lowe at john.lowe (at) nist (dot) gov (CGC, John Lowe)

**

EMERGING TECHNOLOGY: PRINTABLE HF TRANSMITTER DEVELOPED

The British Broadcasting Corporation reports that a new science has been developed to permit high frequency radio transmitters for 13.560 MHz to be printed using electronic inks at a cost of that cost just a penny each.

The transmitters use Near Field Communication technology and are seen as a replacement for Quick Response Codes. The latter consists of black square dots arranged in a square pattern on a white background. The story of this new technology is on-line at tinyurl.com/printed-transmitter. (BBC, Southgate)

**

WORLDBEAT: CHRISTIAN VISION LEAVING SOUTH AMERICA TARGETED SHORTWAVE

Yet another shortwave broadcaster is cutting back on over the air operations. This time it's the U-K based Christian Vision that has announced that it will cease its shortwave service to Latin America, likely by the time this newscast has gone to air.

According to its announcement, the main reason for abandoning this targeted shortwave operation is the shifting emphasis to media that reach younger listeners. It says it has about 413 affiliates in 23 countries and is using Internet, mobile and social platforms to increase consumption by those in the important 18 to 35 year-old demographic many of whom are not shortwave listeners.

In 2010 the Christian Vision closed two other shortwave sites. One was in Darwin, Australia, and had served audiences in Asia. The other was sited in Juelich, Germany, that aired Russian, Arabic and English programs.

Christian Vision is not completely abandoning the shortwave bands. It says that it will continue to use shortwave in India and parts of Africa, where audiences continue to be significant. RW

**

WORLDBEAT: TWO RADIO STATIONS LOOSE TRANSMITTERS DOWN UNDER

North Queensland, Australia radio stations Hot FM and 4RFM have both had their transmitters stolen. Southern Cross Austereo had its 91.3 MHz HOT FM transmitter stolen from its site at the Carborough Range. The 91.3 MHz transmitter taken consisted of a Crown Broadcast FM30 Exciter, PA1000 Power Amplifier, and PS1000 Power Supply.

The local community station 4RFM also had its transmitter stolen at the same time from a nearby site. Its gear was not described.

The thieves used a crow bar to get through the door of the 91.3 MHz site and an angle grinder through the door of the community radio location. Both thefts seem targeted as none of the two-way radio equipment was taken from either location

Matt Paton is a Southern Cross Austereo Engineer. He has asked that those involved in radio to keep a look out for the stolen equipment. Paton notes that the market for broadcast transmitters isn't massive in Australia. As such, if anybody gets offered a black market deal for such equipment could they please call the Moranbah Australia Police at 07 4941 6200. (WIA News)

**

WORLDBEAT: LONDON OLYMPIC OVER BUT COMMEMORATIVE STATION SETTING RECORDS

The summer 2012 Olympics may be over but operations at 2o12L, the flagship station celebrating the Olympic and Paralympic Games continues. Further information about the station can be found on the website at www.2o12L.com. (RSGB)

**

HAM RADIO IN SPACE: 2012 OLYMPICS ON THE HAM-SATS

Meantime, another Olympic Special Event Station, 2o12W has been active on the amateur radio satellites working stations in the USA and across Europe. The 2o12W satellite station is being operated by Ken Eaton, GW1FKY, using a Kenwood TS-2000 feeding a 5-element dual-band Elk antenna mounted on a rotator on the portable cabin. For details of his operation please check out www.rsgb.org/operating/ and click on London Olympics 2012. (RSGB)

**

RADIO IN SPACE: RUSSIA LAUNCHES NON-HAM RS-40

A Russian research satellite called RS-40 carrying experiments built by students and research staff of the Siberian State Aerospace University was launched on July 28. Signals from the new bird have been heard on 435.365 MHz and were first reported by Maik Hermenau on the AMSAT-DL mailing list.

While the new satellite uses amateur 70 cm band downlinks it does not appear to include an amateur radio mission. In fact, as we go to air details of the downlink signaling protocol have not been made available. About the only thing certain is that systems aboard this 65 kilogram satellite includes testing advanced technological solutions to be

incorporated into future missions. More about RS-40 is on-line at tinyurl.com/99ryrw8 (PE0SAT, ANS)

**

DX

In DX, preparations for the ZL9HR DXpedition to Campbell Island are on schedule for activation from November 28th to December 9th. The containers to carry all required equipment are currently being prepared and loaded, ready to be shipped out of Sydney around September 15th. More information is on-line at ZL9HR dot com.

IZ2WMW will be on the air stroke 9Afrom Krk Island between August 18th to the 25th. Activity will be holiday style on the HF bands. QSL via hs home callsign, direct or by the bureau.

W9XY will be active from the Bahamas as C6AXY between November 4th to the 9th. His operation will be holiday style on 40 through 10 meters using mostly CW and SSB,with maybe some RTTY or PSK31. QSL via W9XY.

AA5UK will be operating stroke EA6 froma in the Balearic Islands between October 20th and the 31st. Activity will be holiday style on 80 though 6 meters using SSB, RTTY and PSK31. QSL direct via his home callsign, by the bureau or electronically using Logbook of the World or eQSL.

4F2KWT will be active as DX0N from the rare Bongao Island located in the province of Tawi-Tawi, Philippines, sometime in September. Look for more details o be forthcoming at www.qrz.com/db/DX0N

Lastly, a group of Polish radio amateurs will be operational as from Mauritania as 5T0SP between November 24th and December 10th, from Mauritania. Activity will be on all HF bands, 160-10 meters using CW, SSB an RTTY. There will be a focus on Japan and the Far East.

(Above from various DX news sources)

**

THAT FINAL ITEM: MORSE CODE ON MARS

And finally this week, the story of Morse code on Mars. When the Mars rover Curiosity moves around the red planet it leaves a series on dots and dashes on the surface. These dots and dashes are a part of Curiosity's wheels and are made by square and rectangular imprints on the rovers treads.

According to Jet Propulsion Laboratory's Mars Rover Mechanical Engineering Team, these holes or imprints actually have a purpose as odometer markers. JPL Engineers are looking at the tread marks to verify that Curiosity has traversed the distance it expects.

So what pattern did JPL choose to put on Curiosity's wheels? The holes are in a pattern of short squares and longer rectangles as in the ancient and honorable Morse code. And what does it spell out in C-W? Simply the three letters JPL.

The full story of this Morse code on Mars is on-line at tinyurl.com/cw-on-mars. And less we forget, you can follow Curiosity on Facebook at www.facebook.com/MarsCuriosity. (Various sources)

Amateur Radio Newsline[TM] Report 1828 - August 24 2012

Attention bulletin stations. Please note that this is an extended newscast and contains three breaks. Thank you.

Amateur Radio Newsline report number 1828 with a release date of August 24 2012 to follow in 5-4-3-2-1.

The following is a QST. The FCC releases the text of its report to Congress on the role of amateur radio in emergency communications but provides no relief for hams living with deed restrictions or CC&R's. Also, hams in Quebec Canada get an implied exemption to that Provinces restrictive cellphone law and we take you to the Huntsville Hamfest where Erin King, AK4JG, receives the 2012 Young Ham of the Year Award. Please join with us on an extended Amateur Radio NewslineT report number 1828 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FCC RELEASES TEXT OF ITS R&O IN IMPEDIMENTS TO HAM RADIO

The FCC has released its long awaited report to Congress into the uses and capabilities of Amateur Radio Service communications in emergencies and disaster relief operations. It also delves into the existence of impediments to this aspect of personal communications. Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:

--

Don't look for Congressional action to override private land use restrictions more commonly known as Conditions Covenants and Restrictions or CC&R's even if hams believe that these restrictions hamper them in times of emergencies. This is because in its report to the legislative body, the FCC says that, in its view, such restrictions do not constitute a significant impediment to ham radio or those in the United States amateur radio service.

In its report, the FCC noted that some of what it calls "commenters" recommend that CC&Rs be preempted if they

prohibit antennas that are within certain limits. Others suggest that private land use restrictions on amateur antennas should be permitted only for safety considerations, and not for aesthetic reasons.

However, another group believes that it is not necessary to preempt private land use restrictions in order to promote amateur emergency communications. This, given the ways that even amateurs subject to CC&Rs can communicate effectively and the nature of amateur emergency communications.

Moreover, while commenters suggest that private land use restrictions have become more common, the FCC's says that its own review of the record does not indicate that amateur operators are unable to find homes that are not subject to such restrictions. Therefore, at this time, the Commission does not see a compelling reason for it to revisit its previous determinations that preemption should not be expanded to CC&Rs.

In relation to other impediments, the Commission says that it has already preempted state and local regulations that do not reasonably accommodate amateur radio communications and do not represent the minimum practicable regulations to accomplish the local authority's legitimate purpose. The Commission says that it has also addressed regulations regarding possession and operation of amateur radio equipment while driving. These are state and local laws that prohibit cellular telephone and texting devices and are many times very broadly written as to catch hams, CB operators and even commercial radio users into a confusing maze of legal webs.

And as to any FCC rules that may be an impediment to the various technical aspects of enhanced - read that as digital amateur service emergency communications, the FCC believes that these matters can be considered through the Commission's rulemaking process. Consequently, it does not believe that Congressional action is necessary to address that issue either.

On the other side of the coin, the FCC notes that the ham radio community and the emergency response and disaster communications communities all agree that amateur radio can be of great value in emergency response situations. The regulatory agency notes that amateur radio carries with it a wide range of advantages that allow it to supplement other emergency communications activities during disasters. This says the FCC, has been demonstrated time and again in a wide variety of emergency and disaster situations including Hurricane Katrina.

But at this point the regulatory agency sort of contradicts itself regarding CC&R's, albeit it may not have noticed its own mistake.

Here, the FCC notes that amateur radio emergency communications require not only stations in a position to originate the emergency message, but also as an alternative to the commercial communications infrastructure impacted by the emergency. This alternative infrastructure is the network of amateur radio operators and their stations that relay messages, build and maintain repeater stations and repeater networks, operate High Frequency message networks to send messages greater distances than are practical with mobile or transportable transmitters, and develop new technologies to improve the reliability of these networks. As such, the FCC contends that this value could potentially be increased, through cooperation among Department of Homeland Security, public safety, emergency management, and amateur radio emergency communications associations and groups to develop future training protocols.

But what the FCC fails or refuses to address is how radio amateurs living with CC&R's that restrict or outright forbid antennas can possibly pass along emergency traffic using the High Frequency bands. It's not likely that a long wire or dipole hidden in a hams attic is going to break through to any emergency net or pass traffic under adverse conditions. Operating effectively on the High Frequency bands requires decent outdoor antennas hung in the clear and this is something that the FCC fails to address in this section of its report.

Finally, the FCC recommends that the Department of Homeland Security work with state, local, and tribal authorities to develop disaster area access policies and qualifications for trained amateur operators who provide emergency communications support. The only question here is how you get the attention of these agencies, many of whom consider themselves autonomous are not interested in assistance from the public at large.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM in Reno.

--

You can download and read the entire 15 page FCC accounting to Congress at tinyurl.com/FCC-To-Congress-Report. It's written pretty much in plain language and might well make an excellent program for radio clubs and on-air discussion nets. This is because it could easily set precedent in regulation of the United States Amateur Service for decades to come. (FCC)

**

THE BPL WAR: EU VS RSGB OVER BPL STANDARD

A battle appears to be brewing between the Radio Society of Great Britain and the chairman of the European Union Committee. This after the latter attacked the RSGB's call to arms in the battle against Powerline Transmission radio pollution. A technology better known as Broadband Over Powerline here in the United States. Amateur Radio Newsline's Norm Seeley, KI7UP,has more:

--

The chairman of the European Union committee on Powerline Networking has responded to the Radio Society of Great Britain's call to arms, claiming that every minute of filibustering pollutes the radio spectrum more.

According to the UK newspaper the Register, the Radio Society of Great Britain says that the new standard for broadband powerline transmission, will water down existing requirements. This it says will open the way to greater spectrum pollution. As such, the RSGB has asked members to lobby their local representatives.

But Ronald Storrs, Chair of the committee defining the standard refutes that. He claims that it is the RSGB that is risking the airwaves with - and we quote" "their pointless protests and inflexible attitude."

The problem is that sending data signals over unshielded mains wiring, as Broadband Over Powerline transmissions does generates radio interference. And as the manufacturers push to increase speeds that interference is spreading into the frequencies used by other radio services. That, says the RSGB, is unacceptable.

But BPL or PLT equipment manufacturers have a totally different view. They say that the devices don't generate significant interference. Rather it's the mains wiring is the culprit. The manufacturers also contend that in many homes the wiring is sufficiently shielded that no interference is generated. As such they will continue to sell their devices legally.

Meantime UK telecommunications regulator Ofcom has taken a back seat in this matter. It says that it can't do anything as the devices themselves aren't radio transmitters so fall outside their purview. Ofcom says it's waiting for the new standard to be enacted which will give it some authority to regulate Broadband over Powerline technology.

So it appears that a proverbial line has been drawn in the sand between the UK ham radio community represented by the Radio Society of Great Britain and those who want to sell Broadband Over Powerline or PLT gear. And while the European Union's Storrs agrees that BPL is generating unacceptable interference, he says that every day there isn't an applicable standard in place more unrestricted gear is getting into the marketplace. He adds that the intransigence of United Kingdom's ham radio community isn't helping.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

According to Storrs, the manufacturers of this equipment are dead set against the proposed new standard. He also notes that the new standard already has the support of the International Amateur Radio Union and that this leaves the UK hams standing alone against the European Union. You can read the entire Register article on-line at tinyurl.com/UK-PLT-Fight (Southgate, The Register)

CHANGING OF THE GUARD: JOEL KLEINMAN, N1BKE, S-K

Ham radio has lost one of its most ardent supporters with the untimely passing of QST Managing Editor Joel Kleinman, N1BKE, who died in a house fire on Saturday, August 18th. Amateur Radio Newslines Mark Abramowicz, NT3V, has the details on this truly sad moment for all of us:

--

Neighbors of the Kleinman family were first to discover the fire that claimed the life of Joel Kleinman and left his widow, Jayne, hospitalized.

According to several news accounts, the fire inside Kleinman's Meriden, Connecticut home was pushing out heavy smoke when neighbors discovered it and some of them raced into the burning dwelling. Reports say they first pulled out Kleinman's wife, Jayne, who was already unconscious and

is hospitalized at MidState Medical Center. Investigators say the rescuers saved her life.

But news accounts quote the neighbors who were involved in the daring and dangerous action as saying the heavy smoke prevented them from reaching the second floor where Joel Kleinman was found by firefighters. The medical examiner says the 64-year-old Kleinman died of smoke inhalation and he ruled the death accidental.

Joel Kleinman had been the managing editor for the American Radio Relay League's QST magazine since 2001. But his history with the ARRL goes all the way back to 1976 when he was hired by the organization to target young people with science, and amateur satellites.

A graduate of the University of Montana with a journalism degree, Kleinman - who didn't have a ham license at the time - embraced the role.

It didn't take long for his ARRL bosses to recognize his skills and he quickly moved into the operations of QST where among the jobs he held was editorial assistant and features editor. By 1988, Kleinman was promoted to book team supervisor for ARRL's publications and other media. His return to QST as the top boss a few years later, clearly was a recognition by the ARRL management of his value to the monthly publication that reaches thousands of amateurs every month.

QST Editor Steve Ford, WB8IMY called Kleinman: "...the quiet man behind the scenes, shouldering much of the burden that comes with creating 164 pages of new content every month. Joel set a high standard for all who may follow him."

_
ARRL President Kay Craigie, N3KN issued a statement: "With the passing of Joel Kleinman, N1BKE, we have lost not only a respected professional colleague, but also a friend."

_
Kleinman was the former president of the Newington Amateur Radio League and was a member of the Quarter Century Wireless Association.

Funeral arrangements for Joel Kleinman were still pending as we were going to air.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Our hearts and prays go out to the Kleinman family on this very tragic loss.

(ARNewslineT, ARRL, Meriden Patch, Meriden Record-Journal)

ENFORCEMENT: FCC LOWERS FINE ISSUED TO FORT MEYERS UNLICENSED STATION

The FCC has lowered a fine imposed on an unlicensed broadcaster. This after he provided proof that the initial amount would prove a hardship that he could not afford to pay.

As previously reported, this past June 5th the Enforcement Bureau's Tampa Florida Office issued a $15,000 Notice of Apparent Liability for Forfeiture to Albert R. Knighten, Jr. of Fort Meyers. This for his alleged operation of an unlicensed radio station.

In response to the proposed fine Knighten admitted to, and apologized for, the violation. He also urged cancellation or reduction of the proposed $15,000 forfeiture, asserting that his financial situation could not the permit payment of the fine that the FCC had levied against him.

After examining the financial documents provided by Knighten, the FCC found sufficient basis to reduce the forfeiture to $1,200. However, it also cautioned Knighten that a party's inability to pay is only one factor in its forfeiture calculation analysis. It told him that it had previously rejected inability to pay claims in cases of repeated or otherwise egregious violations. In closing it warned Knighten that future violations of this kind could result in significantly higher forfeitures that may not be reduced due to financial circumstances.

Knighten was given the customary 30 days from the August 21st date of the order to pay the reduced forfeiture. If he fails to do so the matter could be turned over to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: LACK OF EAS GEAR BRINGS $10000 FINE

The license holder of a low-power FM in Mission, Texas will likely have to pay a $10,000 fine. This, for its admitted failure to install and maintain working Emergency Alert System or EAS equipment. Amateur Radio Newsline welcomes George Bowen, W2XBS, who has this report:

--

Intercity Christian Youth Program, Inc. is the licensee for low power station KCYP. Responding to a complaint, agents from the Enforcement Bureau's Houston Texas office inspected

the station this past March. At that time the manager admitted to the agents the station had operated without EAS gear since the facility went on the air in 2007. KCYP also had no EAS logs to document that the facility had ever had such gear installed or that it had ever conducted the required weekly or monthly EAS tests.

The base fine for not having operational EAS gear is $8,000. The commission tacked on another $2,000 because it appears the station has not had working EAS gear for the better part of five years.

The station was 30 days to pay the fine or to file an appeal. KCYP must provide a sworn statement to the Houston office of the Enforcement Bureau certifying that it now has had E-A-S equipment installed.

For the Amateur Radio Newsline, Im George Bowen, W2XBS, in Albany, New York.

--

According to the FCC, every broadcast station is part of the nationwide Emergency Alert System network and is categorized as a participating national EAS source. This in turn means that all stations must ensure their EAS encoders and decoders are installed and working properly. (FCC, RW)

**

ENFORCEMENT: UNLICENSED BROADCASTER BUSTED UNDER FLORIDA LAW

Romayne Davis, who local Florida police say operated an unlicensed radio station, is now free on bond. Police say Davis operated an illegal station out of a warehouse since March using a laptop running iTunes.

The investigation began in July when a listener to American Public Media's Classical South Florida WKCP FM in Miami complained that rap music was interfering with the legitimate signal on 89.7 MHz. Police recovered a computer, transmitter and other gear which they said was used to broadcast the unauthorized station on an adjacent frequency of 89.5 MHz.

Unlike the FCC which normally issues fines for unlicensed operations, under Florida's strict state law regarding unauthorized transmissions, Davis, who had turned himself into authorities, could face up to five years in prison for his unlicensed station operation. (RW, WPEC)

**

RADIO LAW: FCC SEEKS COMMENT ON REGULATORY FEES FOR INDUSTRIES IT OVERSEES

Public comments to the FCC about the best way to collect regulatory fees from the industries that the agency oversees are due in mid-September.

The agency notes a lot has changed in the telecommunications marketplace since its current system for assessing and collecting regulatory fees was enacted in 1994. Back then, commission regulation centered mostly on wired local and long distance. Since then the wireless industry exploded, shifting agency resources to that industry.

Complicating things further, telephone companies have entered the video market, cable operators are winning voice customers, satellite operators offer competitive radio, television and broadband services and wireless services abound.

Comments to MD Docket 12-201 are due September 12th. Payment of the existing fees for this year are due by September 13th. This commentary period does not apply to amateur radio or other personal radio services. (FCC, RW)

**

RADIO LAW: FCC SAYS YES TO TOWER IN WILDLIFE VS. TOWER CHALLENGE

In a case involving the possibility of bird collisions with towers, the FCC has decided in favor of both the tower and its owner American Tower Corporation. Amateur Radio Newsline's Skeeter Nash, reports:

--

RADIO LAW: FCC SAYS YES TO TOWER IN WILDLIFE VS. TOWER CHALLENGE

In a case involving the possibility of bird collisions with towers, the FCC has decided in favor of both the tower and its owner, American Tower Corporation

Last April Michael Pearson of Marshall, Arkansas, raised several issues before the Commission related to a 314 foot structure registered to American Tower that was under construction in the area. American Tower suspended construction while the "Emergency Petition to Compel Compliance" order was reviewed.

In his petition to the FCC Pearson said that because the tower would be in wooded and pasture land area, and also within 4,000 feet of a wildlife management area, that the tower would negatively affect migratory birds and endangered

species. This included mountain lions, bobcats and even skunks.

But in giving American Tower the green light to resume construction, the FCC said his complaint did not meet the standard for requesting environmental review. It said that Pearson didn't identify endangered species that could be specifically affected by the tower. Rather he had listed non endangered species in the area.

Possibly more important, the FCC also stated that the proximity of a tower to a wildlife management area does not, by itself, mean that a structure may have a significant effect on the environment.

As previously reported, environmental assessments are now required for proposed new towers over 450 feet above ground level, for replacement or modification of existing structures over 450 feet that involve a major size increase or for certain lighting changes to towers over 450 feet tall. This decision is very significant as it gives insight as to how the agency will likely handle these cases in the future.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH.

--

As we go to air its unknown if Peasrson will accept the FCC's decision or if he will appeal it up the Administrative Procedures chain. FCC, RW

BREAK 2

With you 52 weeks a year, every year since 1976, we are the Amateur Radio Newsline with links to the world from our only official website at www dot arnewsline dot org and being brought to you by the following volunteer bulletin station:

(5 sec pause)

**

WITH NEWSLINE: WHO IS STILL USING PHONE LINE ACCESS SURVEY

This note to those of you who still receive these newscasts over our 661-296-2407 dial in line rater than downloading the MP3 file from our website. Of late we have noticed a major decline in the number of those calling into it and as such we are giving consideration to discontinuing it by years end. But before we do, we want to know how many people are actually using it. If you are one of those who

call in each week on the phone, please send us a note telling us who you are and the reason you are using telephone access rather than simply downloading the newscast from the Internet. Our address is the Amateur Radio Newsline, 28197 Robin Avenue, Saugus California, 91350. Or you can e-mail us at newsline (at) arnewsline (dot) org. We look forward to hearing from you. (ARNewsline)

**

RADIO BUSINESS: NEW CHINA BUILT DUAL BAND MOBILE FOR UNDER $225

Get ready for the first 2 meter and 70 centimeter dual band mobile selling for under $225 including shipping. At least that's the price being quoted in an on-line advertisement from the Hong Kong-based 409 Shop for the new Baojie model BJ-UV55 dual band mobile radio.

Like its Japan built counterparts, the BJ-UV55 has most of the features one expects from a basic dual band mobile. The radio features a large blue back lit LCD display that shows both frequencies programmed in at the same time. The transmitter runs 35 watts out on 70 centimeters and 45 watts on 2 meters. The manufacturer claims a receiver sensitivity of between .18 to .22 microvolts depending on selected bandwidth, 128 memory channels, both CTCSS and Digital CTCSS tone encoding, a DTMF microphone and even a built-in FM broadcast band receiver.

The negative on this radio is that nowhere in the advertisement is there any mention of the Baojie BJ-UV55 being FCC certified either under Part 15 or Part 90 making it illegal to import to the United States. Nor is there any service or repair station in the United States. That means returning a radio to the China-based manufacturer should it require maintenance. And as with any product purchased from a non-United States dealer, this can be more expensive than the price of the radio itself.

You can see this new dual bander on-line at tinyurl.com/Baojie-dual-band-mobile. And as we say with anything purchased from an overseas dealer, be certain that its legal to import and use here in the United States. Even more important are two words Caveat Emptor, which means buyer beware. (ARNewsline)

**

NAMES IN THE NEWS: NZ4O MF/HF/6M PROPAGATIONS FORECASTS GO DAILY

Thomas Giella has announced that his NZ4O Medium Frequency, High Frequency and 6 Meter Radio Wave Propagation Forecast is now published on a 'daily' basis. It can be found on line at www.solarcycle24.org and www.wcflunatall.com/propagation.htm. Thomas notes that each new edition will be available at around 1300 UTC, but that there will be no daily e-mail notice about its being posted. Just check the websites for the daily updates. (NZ4O)

**

HAM HAPPENINGS: AMATEUR RADIO AND POLITICS MEAN LOTS OF PEOPLE

North Carolina's Charlotte Observer reports that the 1,500 hotel rooms in Gaston County are solidly booked because of the Democrat Party's National Convention and a rather famous amateur radio Hamfest.

The newspaper says that the Shelby Hamfest takes place Labor Day weekend September 1st and 2nd. Meantime the 2012 Democratic National Convention is being held in the city of Charlotte from September 3rd to the 6th. And while no delegates to the convention are staying in Gaston County there are support people such as FBI agents, U.S. and foreign media and peripheral groups such as lobbyists who need places to stay.

The annual Shelby Hamfest is one of the nations best attended amateur radio events. It is held at Biggerstaff Park in Dallas, North Carolina. The paper says that in 2011 about 12,800 ham radio enthusiasts from 30 states showed up. Many camped in RVs, but lots more stayed in local hotels. More on the hamfest is on-line at shelbyhamfest.com. (Charlotte Observer, Southgate)

**

ON THE AIR: N1Y TO COMMEMORATE THE 9/11 2001 TERRORIST ATTACKS

Members of the Symbol Technologies Amateur Radio Club will once again be operational as N1Y on September 8th and 9th. This in commemoration of those who lost their lives in the September 11th, 2001, al Quida lead terrorist attacks that felled the twin towers of the World Trade Center in New York City.

N1Y will be operating on 40, 20 and 15 meters using CW and SSB, in the General portions of those bands. A special QSL may be had by sending a SASE to W2SBL at the address found on QRZ.com. (Southgate)

**

WORLDBEAT: HAM ROAD RALLEYER REACHES MONGOLIA
Despite a small war in Tajikistan, a pair of road rally enthusiasts have reached Mongolia. Neil Melville, PA9N, and Helen Woolnough, driving their 9 year old 1.1 liter Fiat Panda are taking part in the Mongol Rally where participants drive, in no more than six weeks, from the United Kingdom to Ulaanbaatar in Mongolia, using a thoroughly unsuitable car of 1.2 liters or less.

Woolnough and Meloville's entry is called The Uncertainty Principle and they started on their epic journey from the UK on July 14th. On Sunday, August 19th their location was given as 46.37 North and 96.25 East placing them near their goal.

The pair are driving the race to raise money for the Lotus Children's Centre Charitable Trust and UNICEF. By the time the event ends, they will have covered more than 10,000 miles through 19 countries, with no outside support.

Over the years PA9N has given many presentations to the AMSAT-UK International Space Colloquium in Guildford, England. His first spacecraft project was the eXpress-OSCAR 53 satellite better known as XO-53. Here on Earth you can follow their route and blog at theuncertaintyprinciple.co.uk. (Southgate)

**
WORLDBEAT: THE BBC TO TEST TURNING OFF MEDIUM WAVE TRANSMISSIONS

The British Broadcasting Corporation is undertaking a five week trial of switching off existing Medium Wave services for four BBC local radio stations. The experiment runs from the 17th of August to the 24th of September and affects BBC Radio Kent, BBC Radio Lincolnshire, BBC Radio Merseyside and BBC Radio Nottingham.

The BBC say one way to make savings and preserve value to licensee fee payers is to switch off Medium Wave services except where listeners depend upon Medium Wave as an alternative to FM or Digital Audio Broadcasting. Medium Wave services in the UK mainly duplicate what is already available on FM and DAB, and most listeners will be able to hear their local stations on FM. Medium Wave is a European term that describes what we call the AM broadcast band here in the United States.

The BBC notes that the aim of the trial is to get a better understanding of the impact of the loss of Medium Wave would have on its core listeners and also enable the broadcaster to ensure adequate coverage is available on other platforms in these regions. (BBC)

RADIO LAW: QUEBEC ANTI CELLPHONE WHILE DRIVING LAW NOW EXCLUDES TWO WAY RADIO

Some good news for hams living in the Canadian Province of Quebec. A four year old law banning the use of cellular phones while driving now has an implied exemption for those using two-way radio gear including radio amateurs. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the latest:

--

According to a news release from Radio Amateurs of Quebec, the ban on the use of cellular telephones while driving came into force in April of 2008. Since that time different police departments have issued tickets for the use of various types of devices which in each departments view could be construed as a mobile telephone system.

Those who have received these tickets have vigorously contested them. But over the years the various courts hearing these cases have expanded considerably on what they believed the meaning of the law was to include a multitude of communications equipment far from cellular telephones.

Now, after four years of uncertainty the situation has now been clarified by amendments to the Highway Safety Code which came into effect this past June 6th. A new article of the code simply says that no person may, while driving a road vehicle, may use a hand-held device that includes a telephone function. More important, the first paragraph does not apply to a two-way radio or any cordless voice communication device which does not allow the parties to speak simultaneously.

For the Amateur Radio Newsline, I'm Heather Butera_Howell, KB3TZD, near Berwick, Pennsylvania.

--

According to the new version of the law, for the purposes of enforcement, a driver in Quebec who is holding a hand-held device that includes a telephone function is presumed to be using the device. This prohibition does not apply to drivers of emergency vehicles in the performance of their duties. (VE2LGL, RAQI)

**

RADIO THROUGH SPACE: MARS ROVER GETS SOFTWARE UPDATE

NASA's Mars Science Laboratory at JPL team has sent a software update to the Curiosity Rover on Mars, more than 160 million miles away. According to Venturebeat dot com, the software had to be updated because Curiosity needed different directions to drive around on Mars than it did to land on the planet's surface.

The computer hardware in the Curiosity Rover is powered by a pair of computers built by BAE Systems. These RAD750 computers use a 10-year-old IBM PowerPC microprocessor running at a relatively slow 132 megahertz. These machines also have only 120 megabytes of random access memory, but are built to withstand wild temperature swings, radiation, and physical shaking.

The drawback is that the computers on the robot vehicle did not have enough memory for both the landing and its surface missions. So NASA had to swap out the software over four days of communication through the void of space. It took so long because it takes about 14 minutes to send the signal to the rover and another 14 minutes to get a response back. (Venturebeat.com)

**

DX

In DX, K7BV, having recovered from a serious medical condition, is returning to Asia for a short visit between August 25th and September 2nd. He will be using his HS0ZKS callsign on HF bands from the home of HS1CHB, and hopes to QSO friends from around the world. He may also get on the air from Japan as well using his call JF1XJR. QSL via K7BV's new address at 290 West Road, Turkey, North Carolina 28393.

W7XA will be active stroke DU1 through August 27th from near Tagaytay Ridge which is about 40 miles south of Manila in the Philippines. His operation is on 20, 17 and 15 meters using mostly CW and some SSB. QSL via his home callsign as found on QRZ.com.

OE4JHW will be operational as 8Q7OE from the Maldives between September 3rd and the 14th. Activity will be holiday style on 40 through 10 meters using SSB and BPSK. He will focus on stations from DL, HB0, HB9 and OE, as well as on North and South America. QSL via his home callsign, direct or by the bureau. Also electronically using either Logbook of the World or eQSL.

Lastly, CT1FJZ says that he is now in Angola and is expected to be there for one year working in Benguela and Huambo. Look for him to be active as D2FJZ, mainly on the weekends and limited times during the weekdays. Activity will be on 80 through 10 meters SSB. QSL to his home callsign, by the bureau or direct.

(Above from various DX news sources)

THAT FINAL ITEM: HONORING ERIN KING, AK4JG - THE ARNEWSLINE 2012 YOUNG HAM OF THE YEAR

And finally this week, we want to take a moment to congratulate 18 year old Erin King, AK4JG, and receiving her award as the 2012 Amateur Radio Newsline Young Ham of the Year. The ceremony was held at the Huntsville Hamfest where I had the honor of being the award presentation emcee, but it was truly AK4JG's moment to shine:

--

AE5DW: "Ladies and gentlemen it is my pleasure to introduce to you a very impressive young lady. This is Erin King. She is your 2012 Amateur Radio Newsline Young Ham of the Year. Erin, the floor is yours. (Applause)

AK4JG: "Thank you. Thank you. Thanks Don. Thanks to everyone who has helped to make this possible.

"When I did my project with the tube and with all the ham radio stuff that I've been doing so far, I had no idea that it going to bring me this far. I had no idea that I was going to have the opportunity to earn this award or that any of this would be possible.

"Its been a lot of fun. I've been a ham for about four years now and I have learned so much and have met a ton of great people and ham radio has become an integral part of my life and its one of the primary reasons that I'm making the decisions for the future that I'm going to have.

"So it's all very exciting. I'm very excited to be here to earn this award, so thank you very much (applause).

--

The Amateur Radio Newsline Young Ham of the Year Award is jointly underwritten by Yaesu USA Corporation, CQ Publishing and Heil Sound. Yaesu has been with the award since its inception some 27 years ago. This year the company was represented by its Executive Vice President of Amateur Radio Sales and Marketing Dennis Motschenbacher, K7BV:

--

K7BV: "Hi Erin and congratulations from Yaesu. We don't want you to go off the air while you are traveling around with all of your schooling, We want you to have a radio that you get on the air with no matter where you go and that would be our portable FT-817ND. We hope that you will pack it in your bag and take it with you all the way to your CEO position with a Fortune 500 company sometime soon. So congratulations."

AK4JG: "Thank you. (applause)"

--

Part of the award is an expense paid trip to Spacecamp Huntsville courtesy of CQ Publishing. CQ Magazine Editor Rich Moseson, W2VU, took a bit of time to comment on quality of those nominated:

--

W2VU: We've had a tremendous time being involved with the Young Ham of the Year Award and I've been honored to be one of the judges since we became involved and the quality of the young people who have been nominated has been just wonderful and it makes me very optimistic for the future of our hobby. And this is year after year."

--

Last but by no means least the awards newest corporate sponsor Heil Sound. Not only did founder Bob Heil, K9EID, present Erin with a pair of the company's new headphones, but he also gave her a very special invitation to appear with him on his TWiT TV program Ham Nation:

--

K9EID: "Well we are so happy for you and we want to stay in touch with you as you get through all the wonderful things that happen in ham radio. Come and visit us on Ham Nation and I really hope that we can have you as a guest real soon."

--

And there you have it for yet another year. The 27th consecutive year that this award has been presented and the 19th consecutive year that the presentation has been made at the Huntsville Hamfest. And in that regard we want to express our thank you to Charlie Emerson, N4OKL, and his team that puts on this annual event and to Dave Bell, W6AQ, who sponsors the Young Ham of the Year plaque. And also to Tom Medlin, W5KUB, who live streamed the presentation over the Internet for all to see on W5KUB.com and to Gary Pearce, KN4AQ, of Amateur Radio Video News who video recorded it for posterity. We thank you all. (ARNewsline[TM])

For all intents and purposes. A bunch of locals
getting into each others personal business, just
with call signs. I spent 25 years on CB before
getting a ham ticket almost a decade ago, and I
can say that from experience. The only difference
is less cussing and people still say things they
shouldn't on 2 meters. Same stuff, different band.

If you don't have a thick skin, sell the shit!

I don't like 2 meters. I play on 10 meters and
talk local on 440 repeaters. I'm almost never
on 2 meters. I turn on my CB more then my 2!
That's what's wrong with CB, they're afraid to
turn the big knob or the volume control down...
...they might miss another seatcover announcement!
(actually, most radio ops are afraid to turn the knob)

369. Amateur Radio Newsline[TM] Report 1829 - August 31 2012

Newsgroup: rec.radio.cb
Date: 2012-09-01 01:24:32 UTC
From: Scott in Baltimore <scott_unit_69@yahoo.com>
Message-ID: <k1ro4h$8cn$1@dont-email.me>

Amateur Radio Newsline[TM] Report 1829 - August 31 2012

The following is a closed circuit and is not necessarily for air. With a report on the Amateur Radio Newsline current financial picture here's our producer Bill Pasternak, WA6ITF:

--

Well, the last time I was on here with a financial report I told you that I thought we had enough in the bank to hopefully hold us over the summer months June, July and August, and that I would not be asking for any contributions unless the sky was falling. Sadly, the sky is falling this year. This is mainly because we did not get some of the larger donations that we have come to count on to keep us going over the lean summer months when people are away on vacation.

Right now, we only have a couple of hundred dollars left in our bank account. Most of that will vanish as we pay off our financial obligation in regard to presenting this years Young Ham of the Year Award and the outstanding bills for the month of August which are quickly piling up. And unlike the years up through October 2009 when I retired from full time employment, I'm now living on fixed income and honestly cannot afford to underwrite the cost of bringing these newscasts to you.

To be candid, I do not like to lead off a newscast with an appeal such as this, but we have no other method of getting the word out to you that we need your financial assistance to keep Amateur Radio Newsline on the air, and that we need it now. To all of us involved, each donation is looked upon as an ongoing vote of confidence in the quality of the news and information that we provide each week. And for this I add my personal thank you.

Remember, Amateur Radio Newsline is a 501c3, not for profit corporation and your donations are tax deductible. The easiest way to donate is by going to our website at www.arnewsline.org and clicking on the Pay Pal button. Or you can mail a donation to the address you will hear at the end of this weeks newscast.

Whichever method you choose, the all volunteer Amateur Radio Newsline team says thank you so much for caring. We promise to do all that we can to continue bringing you the news and information you want to hear about amateur radio and personal communications in the coming years.

Thank you. I'm Bill Pasternak, WA6ITF, and now this weeks newscast.

--

Thanks bill. Now, Amateur Radio Newsline report number 1829 with a release date of August 31 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Amateur radio assists as Hurricane Isaac hits the U.S. Gulf shore; the London Olympics ham radio station may have set a world record and a star is found devouring a planet. Find out the details on Amateur Radio Newsline report number 1829 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO WAS READY FOR HURRICANE ISAAC

Amateur radio first responders along the United States Gulf shore were ready when Hurricane Isaac slammed ashore on August 28th and 29th. We have the more in this report:

--

As Hurricane Isaac made its way across the Gulf of Mexico and then made landfall several miles West of New Orleans, Louisiana, members of the Hurricane Watch Net took to the air to track its approach:

--

(Ham in Florida) ".Victor-Radio-4-Golf. The handle here is Bill and Im located in Pensacola, Florida and we've had some winds gusts up to about 44 miles an hour. We went out for a ride along the beach this afternoon and they do now have some roads closed and water was coming over the sand dunes and starting to flood some of the roads, over"

--

While band conditions on 20 and 40 meters were not the greatest, the net continued and began passing storm conditions to the National Hurricane Center in Miami:

--

(Ham in New Orleans: ".we have wind gusts of about 70 to 75 miles per hour right now. Its really coming bad on us but my antenna is located in the attic."

--

One report was rather interesting from a scientific point of view:

--

(Ham in New Orleans) "The Mississippi river at the Carrolton gate in New Orleans is flowing backward."

--

Also taking reports for the National Hurricane Center was the V-O-I-P Hurricane Watch net. This group gathers information mainly from local repeaters within the storm area and also passes it along to the National Hurricane Center:

--

(VoIP Net Audio) "K3-November-Foxtrot-Uniform in Slidell, Louisiana. Estimated winds of 30 and no rain as of this time."

--

Hams on the V-O-I-P net also provided ongoing damage assessment:

--

(VoIP Net Audio) "I was informed that the power has hone out in mid-city New Orleans, Louisiana near the steets of Murat and Bowden."

"Roger. I have Murast and Bowden. Did I copy correctly that was mid-city New Orleans?"

--

As this report is being prepared, Issac has been downgraded from a category 1 hurricane to a tropical storm but is soaking Louisiana and surrounding states for yet another day. As such, the job of ham radio operators in coping with the storm is far from over.

With thanks to K3VR for the recordings of the 20 meter Hurricane Watch Net, Im Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

We will have more on the role of amateur radio in the wake of Hurricane Isaac in upcoming Amateur Radio Newsline reports. (ARNewslineT with audio from Hurricane Watch Net and VoIP Hurricane Watch Net.)

**

RADIO LAW: IARU SAYS IT WOULD WELCOME DOT RADIO DOMAIN

The International Amateur Radio Union says that it will back the European Broadcasting Union proposal that the top level Internet domain dot radio be used to help to create a global radio community. IARU President Tim Ellam, VE6SH, says that his organization believes that the proposal, to be submitted by the European Broadcast Union, could provide a unique opportunity to standardize radio domain names on the Internet.

In a recently made public letter, VE6SH said that he recommends that the dot radio domain proposal be approved by the Internet Corporation for Assigned Names and Numbers. European Broadcast Union Director General, Ingrid Deltenre said the International Amateur Radio Union comments are an expression of confidence in the proposal. The complete story on the new dot radio domain and how it will impact all spectrum users is on-line at tinyurl.com/iaru-dot-radio (IARU, VK3PC)

**

HAM HAPPENINGS: LONDON OLYMPICS COMMEMORATIVE STATION MAY HAVE SET WORLD RECORD

The Radio Society of Great Britain reports that the team at 2O12L, the amateur radio station for the London Olympic and Paralympic Games, believe that they have now broken the world record for the number of Q-S-O's by a Special Event Station. As of 21:42 UTC on August 21st, 2O12L had logged contact number 47,791.

2O12L goes QRT on September 9th at the end of the Paralympic Games closing ceremony. As such the operators are fairly confident that they can achieve their target of 60,000 contacts.

It is believed the previous standing record for a ham radio Special Event station was held by the group that operated DQ2006X during the 2006 World Cup. That station was on the air from May 13th through July 16th of 2006 and made 47,790 contacts.

More on the operation of 2O12L is on-line at www.2O12L.com. (RSGB)

**

HAM RADIO IN SPACE: APRS TO ASSIST VULTURE 2 SPACEPLANE TRACKING

The Low Orbit Helium Assisted Navigator Vulture 2 space plane will carry an amateur radio Automatic Packet Reporting System or APRS system.

The UK newspaper the Register reports that Anthony Stirk, M-Zero-U-P-U, who was involved in the Raspberry Pi In The Sky mission, is working on the custom control board for the Vulture 2 space plane.

As of now, the communications subsystem has a Radiometrix 300 milliwatt HX1 144 MHz band module for APRS and a Radiometrix 10 milliwatt NTX2 433 MHz band module for RTTY. More information on frequencies will ve announced at a later date.

More on this upcoming near to space adventure can be read on-line at tinyurl.com/vulture-2. And we will have more ham radio space related news later on in this weeks newscast. (UK Register)

RADIO LAW: VOTE ON ADDING ENGINEERS TO COMMISSION STAFF SEEMS STALLED IN CONGRESS

Legislation working its way Congress that would add a technical expert to the staff of each FCC commissioner may not come up for a vote this fall. This is because the House and Senate versions of the bill to allow each of the five commissioners to hire one additional staff engineer are still in committee. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

Maine Republican Senator Olympia Snowe introduced S. 611 in May 2011. The measure seeks to amend the Communications Act of 1934 to provide commissioners additional technical expertise. However Snowe's intention to retire at the end of this year has led supporters to push for a vote before the end of this Congressional term.

The companion House companion measure is H.R. 2102: FCC Commissioners' Technical Resource Enhancement Act. The Society of Broadcast Engineers better known as the SBE is a major supporter of these two pieces of legislation. In a recent press statement, SBE President Ralph Hogan said that his organization has scheduled a trip to Washington to meet with key members of Congress in Washington, This to further groups efforts to move the bills through the House and Senate before the end 2012.

However, SBE General Counsel Chris Imlay, W3KD, acknowledged in a column that appeared in the August edition of the SBE publication "The Signal" that time is of the essence.

According to Imlay, the SBE's last chance this fall to get H.R. 2102 through the House is `on suspension.' That means the measure is without the usual hearing and report procedure.

To move a bill along in these cases normally requires that the bill have a large number of cosponsors. Imlay says that in an election year, this is not easy, noting that there are only four co-sponsors for the House bill now.

Currently, FCC commissioners can appoint only three legal advisors to counsel the Commissioners on the wired, wireless and cable media. As part of its legislative agenda, the Society of Broadcast Engineers has sought greater technical expertise on the commission for several years.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Passage of these measures is important to the ham radio community as it will put technical expertise to the highest level of the Commission which for decades has lead primarily by members of the legal profession rather than technologists and engineers. This could lead to a better understanding of our needs than is possible right now. (SBE, RW)

**

ENFORCEMENT: RAC ACTS TO PREVENT UNLAWFUL USE OF 2 METERS BY PARAGLIDING COMPETITION

Radio Amateurs of Canada took action after a Paragliding competition in British Columbia told its contestants to communicate using a frequency in the 2 meter amateur band. Bob Holowenko, VE7WNK, has more:

--

Radio Amateurs of Canada received a report by a British Columbia ham who notified them of what appeared to be the use of the two meter band for the operation of a paragliding competition. Dave Cameron, VE7LTD, witnessed this radio traffic and I was able to talk with him over the phone.

-

VE7LTD: "I was at a local repeater site helping the locals there by doing a sweep trying to find a source of interference. I had my HP8920A Service Monitor and I was monitoring around the band trying to find what the sources of intermod could be, and I noticed a few spikes in the ham band. Knowing that there is not a lot of VHF activity in the Pemberton area, I decided to tune into each of those and one was on 146.415 simplex where I heard lots of intercommunication between both paragliders in the air and some kind of race coordination on the ground."

-

This "race coordination" which Dave was hearing was the Canadian Paragliding National Championships held in Pemberton, BC. Dave reported this to The Radio Amateurs of Canada who became extremely concerned about the organizers assertion that all participants must use a VHF radio tuned to 146.415 Mhz for launching and landing.

Southern BC is popular for paragliding and hangliding thrill seekers, and the ham community here knows many of those who take part in these events are licensed hams, however it has become apparent that many are not.

-

VE7LTD: "There was never a call sign used, and never any identification used. Although the communication was very structures, you could tell it was not by ham operators"

-

Dave did go on to say that of the registered Canadian participants at the event, at least 40% of their names were found in the Radio Amateurs of Canada database.

RAC has been in contact with representatives from the Paragliding community and has also requested enforcement action to be taken by government officials at Industry Canada.

For the Amateur Radio Newsline, I'm Bob Holowenko, VE7WNK, in
Vancouver, British Columbia.

--

According to Radio Amateurs of Canada, protecting the ham radio spectrum from intruders is all in a days work for the group. (RAC, VE7WNK)

**

HELPING HAMS: RFINDER.NET SEEKS INPUT FROM FREQUENCY COORDINATORS

The on-line repeater directory RFinder is inviting Frequency Coordinators to use the World Wide Radio Directory help them in conducting their work. The hams who operate RFinder say that they have already heard from several frequency coordinators who have told them that being able to see the repeaters across borders is very helpful. As such, RFfinder says that frequency coordinators in several countries are using RFinder/Web as a tool in their activities. They are also looking to compile a wish list from the coordination community to build a special portal for them to have the tools they need to make frequency coordination easier. If you are a coordinator who wants to contribute to this wish list please send your thoughts by e-mail to w2cyk (at) rfinder (dot) net. You lraen more about RFinder and the services that it provides all who use repeaters on-line at www.rfinder.net. (RFinder)

**

HAM HAPPENINGS: ARRL CENTENNIAL CONVENTION IN HARTFORD CT

On the ham radio social scene, the ARRL has announced the organization will hold its 2014 national Centennial Convention in Hartford, Connecticut, from July 17th to the 20th. The Convention will mark 100 years of the ARRL's founding that took place in the city of Hartford. The theme for ARRL's Centennial year is Advancing the Art and Science of Radio Since 1914. More information is on-line at www.arrl.org/expo. (ARRL)

**

RADIO HAPPENINGS: NRCDXAS SWITCHING FROM TAPE TO CD MAILOUTS

According to Amateur Radio Newsline's Fred Vobbe, W8HDU, the September and October issues of the National Radio Club's D-X Audio Service will be the last to issue on cassette tape. Beginning in November these reports will switch distribution to CD's after 27 years of tape mailouts.

Fred asks that if you know someone who is blind or otherwise visually impaired, and who loves the topic of broadcast radio, to please tell them about the DX Audio Service. More information about it can be found on-line

at www.nrcdxas.org. (W8HDU)

**

NAMES IN THE NEWS: BRITISH SOPRANO SARAH BRIGHTMAN MAY BE THE NEXT SPACE TOURIST

A world famous entertainer may be the next to travel to the International Space Station. Amateur Radio Newsline's George Bowen, W2XBS, has the details:

--

British soprano Sarah Brightman could become the next space tourist to visit the International Space Station. This according to a senior official at the Russian Space Agency who hinted on August 22nd that the 52 year old songstress best known for her creating the role of Christine Daae' in the Andrew Lloyd Webber musical The Phantom of the Opera is being considered as candidate for such a trip.

The Interfax news agency cited a space industry source as saying that the name of the next space tourist, who will most likely fly to the ISS in 2015, will be officially announced in around a month. The source also told Interfax that Brightman visited Russia around a month ago and was given the go-ahead by the medical commission to train at the Yuri Gagarin Cosmonaut Training Centre in Star City outside Moscow.

Previous space tourists visiting the ISS have included the Canadian founder of the Cirque du Soleil, Guy Laliberte, and computer game creator Richard Garriott, W5KWQ. As most of you know, Richard Garriott is the son of retired Astronaut Owen Garriott, W5LFL, who was the first radio amateur to ever operate from space. This on shuttle mission STS-9. Iranian-American entrepreneur Anousheh Ansari is so far the only woman to make the trip to the I-S-S.

For the Amateur Radio Newsline, I'm George Bowen, W2XBS, in Albany, New York.

--

More about Sarah Brightman's proposed trip to Earth orbit is on-line at tinyurl.com/brightman-iss. (Interfax, AFP)

**

THE CHANGING OF THE GUARD: MIRAGE AND RF CONCEPTS FOUNDER EVERETT GRACY, WA6CBA - S.K.

The man responsible for many pieces of equipment in the shacks of so many hams has become a silent key at age 91. Amateur Radio Newsline's Don Carlson, KQ6FM, brings us the story of Everett Gracey, WA6CBA.

--

On Sunday morning, August 26, the Amateur Radio world lost a gentle giant, as Everett Gracey, WA6CBA became a silent key. For the many of us who knew Everett, it is loss unlike any other. We have lost a great source of knowledge, but most of all, a dear friend. For everyone else who did not know him, the word "giant" is not adequate to describe him. His contributions to the Amateur Radio world were immeasurable.

For those of you who ever owned a piece of gear with the name RF Concepts or Mirage Communications on it, you held a piece of his life and legacy, since he was a co-founder of both companies, which he started with Ken Holaday, K6HCP. Later in life Everett became a consultant to LDG Electronics, who, according to Everett put out one of the greatest automatic antenna tuners on the market, and are sold world wide.

Everett spent most of his life in and around Reno, Nevada, where he married his wife Dorothy on July 6, 1940. He was devoted to her, since she was always first and foremost in his mind. He took care of her in their later years, and finally, it was his concern for her well being that prompted his move from Reno to Grass Valley, California, so that her care could be shared with medical professionals.

Everett was also a decorated veteran, who fought in with the Army in Europe during WWII, and was awarded both the Bronze Star and Silver Star for bravery in Germany. He was also recipient of the Purple Heart. He was also author of several books, "From A 13 year old Hobo to an Entrepreneur" "My 20 Years of RV Adventures" and "Buying and Selling Real Estate by Owner". One of my most treasured possessions is an autographed copy of his autobiographical book, "From Freight Trains to Airplanes", published in 1999.

Everett was always ready to lend a friendly hand with a good piece of advice, Elmering and plenty of wisdom which helped many a ham in need, and always seemed to have exactly what they needed to complete the project, or get back on the air. He even gave away parts used for fixing antennas and gear, at no charge.

As a dear mutual friend of Everett's and mine said of his passing, Everett, "I will miss you.you rascal..Oh, and while you are winging your way around the heavens, and you had best not tamper with my RF signal when I am attempting to work DX, or someday, you and I will have a long discussion about that!".

With sincere thanks to Joe Wolfe, WA6RKN for his informative help, for the Amateur Radio Newsline, this is Don Carlson, KQ6FM in Reno.

--

Per his request no service or memorial will be held. Instead his ashes will be placed next to his wife Dorothy. Everett and Dorothy Gracey had been married 70 years. (KQ6FM, WA6RKN)

**

HAM RADIO IN SPACE: KEPLARIAN ELEMENTS CHANGE WITH ISS HIGHER ORBIT

Space-Travel.com reports on August 22nd that a European ATV-3 unmanned supply spacecraft was used to raise the International Space Station's orbit to about 261 miles. The orbit adjustment was done in two stages, with the ATV-3 engines firing for 348 seconds to lift the orbit to 257 miles followed by another burn four hours later that brought the space station to its final altitude.

The maneuver was conducted to prepare for the return to earth of Russia's Soyuz TMA-04M manned spacecraft on September 17 and the docking of the Soyuz TMA-06M manned spacecraft with the ISS on October 15th. For amateur radio space enthusiasts this means that you will have to readjust your Keplarian elements when tracking the I-S-S at its new higher altitude. The complete story of this orbital maneuver is on-line at tinyurl.com/ISS-Reboost. (ANS, Spece-Travel.com)

**

HAM HAPPENINGS: REGISTRATION OPEN FOR 2012 AMSAT SPACE SYMPOSIUM

AMSAT says that registration for its 2012 Space Symposium is now open on-line. To register over the World-Wide-Web

simply take your computer to store (dot) amsat (dot) org/catalog and click on the "AMSAT 2012 Symposium" item in the top left box.

A mail-in option is also available for those who wamt to register the old fashioned way. A downloadable paper registration forms in MS-Word and PDF format are available on the 2012 Symposium page at tinyurl.com/amsat-2012-reg.

This years AMSAT Space Symposium takes place October 26th through the 28th at the Holiday Inn Orlando-International Airport in Orlando, Florida. This hotel is located at only one mile north of the Orlando International Airport. at 5750 T.G. Lee Blvd, in Orlando. (AMSAT)

**

HAM RADIO IN SPACE: CPUT CUBESAT TO LAUNCH END NOVEMBER

A CubeSat designed and built by students at the Cape Peninsular University of Technology in Bellville, South Africa, will be launched towards the end of November.

Still known by its engineering name ZA Cube-1, the satellite will be shipped in the next few weeks to Holland. There it will be integrated with two other CubeSats in the launch carrier before being shipped for integrating with the rocket.

ZA Cube-1 is rare for a ham radio bird in that it carries a High Frequency transmitter operating on 14.099 MHz in the 20 meter band. Also on-board is a small camera and a telemetry transmitter. (SARL)

**

DX

In DX, N6MW and possibly 1 or 2 other operators will be active stroke KH8 from American Samoa between November 8th and the 19th. Operations will be on 160 through 10 meters using mainly CW, but some SSB and RTTY. QSL via Logbook of the World.

A group of radio amateurs from Poland will be on the air as 5T0SP from Mauritania between November 24th and December 10th. Their activity will be on 160 through 10 meters using CW, SSB and the Digital modes. As of airtime no QSL route has been announced

Bill Moore, NC1L, at the ARRL says that the 1998 X-U-one-A operation from Cambodia has been approved for DXCC Credit. Moore says that if you have had QSLs rejected please send an e-mail to bmoore (at) arrl (dot) org to be placed on the

list for update. If you remember the submission in which you included the QSL please note this to expedite the search for the rejected QSO.

Lastly, SM0JHF reports that he has retired and can no longer afford sending out QSL cards automatically. He notes that for the past 50 years that he has personally filled out and shipped more than 100,000 QSL cards for his activities using numerous past callsigns. He says that he will clean house and dispose of blank cards by the end of this year. If you need a card for any of his calls please contact him by e-mail to sm0jhf (at) gmail (dot) com. A complete list of his operations over the years is under SM0JHF on QRZ.com

(Above from various DX news sources)

**

THAT FINAL ITEM: STAR FOUND DEVOURING PLANET

And finally this week, radio and radio astronomy have brought some new light on the way nature works out in the cosmos. Amateur Radio Newsline's Cheryl Lasek, K9BIK, takes us to the far reaches of space:

--

Astronomers have found evidence of a planet being devoured by its star, yielding insights into the fate that will befall Earth several billions years in the future.

The team uncovered the signature of the planet that had been absorbed by looking at the chemistry of the host star. They also think a surviving planet circling this star may have been kicked into its unusual orbit by the destruction of a neighboring world.

The US-Polish-Spanish team made the discovery when they were studying the star BD+48 740 - which is one of a stellar class known as red giants. Rising temperatures near the cores of red giants cause these elderly stars to expand in size. This in turn results in any nearby planets to be absorbed by the expanding star or otherwise destroyed.

It's the way of the universe now brought to us thanks to the art of radio and the science of Astronomy.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Details of the work have been published in Astrophysical Journal Letters. The complete story is on-line at

tinyurl.com/planet-hungry-star. (ScienceToday, BBC, others)

RESCUE RADIO: IARU REGION 3 HAMS RESPOND TO TWIN DISASTERS

A powerful storm called Typhoon Bolaven battered Korea on August 27th and 28. Then on August 31st a major earthquake occurred off the coast of the Philippines. Responding to both disasters were ham radio operators equipped to provide emergency communication. Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

--

The South Korean state disaster management agency reported ten deaths as a result of Typhoon Bolivan. It was the strongest storm to hit the country for almost a decade and left hundreds of thousands without electricity and suffering property damage. It also churned up rough seas that smashed two fishing ships into rocks off southern Jeju island.

Yong-Surke Lee, HL1FB, is the spokesperson for the Korean Amateur Radio League. He said when Bolaven hit that emergency traffic between the affected areas kept flowing to the authorities via its D90IK, 2 meter repeater. In charge of the ham radio relief operations was 6K2BUF acting as the network control officer. At the height of the severe weather outbreak almost two million South Korean homes and businesses were without power or telephones.

Meantime the strongest earthquake in more than two decades, measuring 7.6 on the Ritcher scale, hit the Philippines on August 31st local time. Almost immediately after the event members of the Ham Emergency Radio Operations group were exchanging messages with the affected coastal areas.

Eddie Valdez DU1EV, is the Chief Operating Officer of the Philippines Amateur Radio Association. He says that Roberto Vincencio, DU1VHY, handled traffic and got reports from the affected areas.

Valdez said the area of DU5 was nearest the epicenter. Lester Price, DV5PO said that there was a power outage in Borongan, on Samar Island. Reynaldo Tan, DV5RAY reported that people had been evacuating because of the tsunami alert. The alert was lifted after officials reported that only small waves had been generated. Tens of thousands of people who headed out of the danger zone have since returned.

According to DU1EV, many hams in the affected areas showed up on the 2 meter and 40 meter emergency channels. He added that other districts were on standby if needed.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The Philippine National Disaster Risk Reduction Management Council initial assessment was that there was no major structural damage in the affected areas. It noted that most structures destroyed were built from light material. (VK3PC, Post World, BBC)

**

RESCUE RADIO: YAESU DONATES NEW GEAR TO HELP REBUILD RAST STATION HS0AC

Yaesu has donated a pair of FT-2000D transceivers to the Radio Amateur Society of Thailand. This to help rebuild its headquarters station HS0AC that lost its radio gear during severe flooding last year.

The presentation of the two transceivers to the Radio Society of Thailand was made by Dennis Motschenbacher, K7BV, who is the company's Executive Vice President Amateur Radio Sales and also holds the call sign HS0ZKS.

In his note, K7BV said that Thailand is what he called extremely "radio active" with over 300,000 hams most of whom are on VHF. However, that is in the process of changing.

Dennis says that after seven years of waiting, Thai hams are once again able to test for a license that gives them operating privileges on the High Frequency bands. According to K7BV some 40 applicants have already passed the new exam this year and at least one more test is schedule before years end.

Photos of the presentation of the new Yaesu transceivers can be seen at tinyurl.com/yaesu-thailand-radios (K7BV)

RADIO LAW: EUROPEAN COMMISSION RECOMMENDS NEW SHARED SPECTRUM PLAN

The European Commission has unveiled plans to deal with the exponential growth in mobile and wireless data traffic. This, by enabling wireless technologies, including broadband, to share the use of the radio spectrum with other services.

The European Commission notes that with new technologies it is possible to share radio spectrum among several users such as internet providers or use the spectrum available between TV frequencies for other purposes.

The Commission says that national spectrum regulation often does not reflect the new technical possibilities, leaving mobile and broadband users at risk of poor service as demand grows. It also prevents a single market for investment in such communications growth. Because of this the Commission believes that a coordinated European approach to sharing spectrum will lead to greater mobile network capacity, cheaper wireless broadband, and new markets such as tradable secondary rights for a given spectrum allocation.

The proposal is 12 pages long and does not seem to exclude any service from the possibility of sharing spectrum with another. What impact this proposal might eventually have on amateur radio operations across Europe is at this point unknown. You can download the proposal in PDF format at tinyurl.com/european-shared-spectrum. (Southgate)

**

INTRUDER WATCH: RADIO BANGLADESH VACATES 7.105 MHZ

Some good news for users of the low end of 40 meters. The Radio Society of Great Britain reports that Radio Bangladesh has left 7 point 105 MHz after the broadcaster finished its experimental transmissions and is now using 7 dot 250 MHz in the shared portion of the band.

The move is likely due to the many amateur radio operators world wide who reported the infringement on the band.

Particular thanks go to the German telecommunications authority which filed the official complaints to Radio Bangladesh. (GB2RS)

**

RADIO PROPAGATION: SOLAR CME HITS EARTH ON SEPTEMBER 3RD

If you were wondering about the strange band conditions this past week you can blame it on old Sol. This after a Coronal Mass Ejection or C-M-E hit Earth's magnetic field on at approximately 1200 UTC on Monday, September 3rd.

According to Spaceweather.com the impact induced measurable ground currents in the soil of northern Scandinavia and sparked bright auroras around the Arctic Circle. In fact, at the time the alert was issued, a moderately strong geomagnetic storm that lasted several days was underway.

For current and future information on what the Sun is up to and how it might affect radio propagation here on Earth, simply take your web browser to spaceweather.com for the very latest updates. (Spaceweather)

**

RADIO HISTORY: CELEBRATING 100 YEARS OF STANDARDIZED RADIO PREFIXES

To commemorate the 100th anniversary of the use of ITU callsign prefixes, special event station PB-100-PREFIX will be on the air between October 4th and the 31st.

The back story on the standardization of calls came following the loss of the ocean liner Titanic in April of 1912. The Titanic used the call letters MGY with the "M" representing the Marconi company.

As a result there was an acknowledgement that there should be international standards for radio communications. This lead to several international meetings in the aftermath of the Titanic's sinking and the emergence of the callsign prefix system that has evolved into what we have today.

For more details, visit on this special commemorative operation please take your web browser to www.PB100PREFIX.nl. And if you make contact with PB100PREFIX QSL via PB0P. (OPDX)

**

BREAKING DX NEWS: GROUGH ISLAND "SLIM"

Hams making contact with a station signing ZD5KN on Gough Island will not be getting any credit for the contact. This

is because Zed-D-9-K-N is what DX'ers call a "slim" or a "pirate" operation.

According to the Ohio Penn DX Newsletter several sources report that ZS1A, has confirmed that the callsign ZD9KN has never been issued. As such the advice being given is to not waste time working this station if you happen to hear him.

But there is some good news regarding this rather rare entity. Word is that ZS6KX will be going to Gough Island sometime this month and will be there for a year. He is hoping to be issued the callsign ZD9KX and is waiting for the approval of his license. No QSL route has yet been announced so look for more details to be forthcoming. And we will have more DX related news later on in this weeks Amateur Radio Newsline report.

RESTRUCTURING: NEW RULES AND MORE SPECTRUM FOR PHILIPPINE HAMS

Restructuring has come to ham radio in the Philippines. This according to an announcement by the Philippines Amateur Radio Association which says that following meetings between the Amateur Radio Consultative Panel and the National Telecommunications Commission or NTC, numerous changes to that nations amateur service have been enacted. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Nelson, New Zealand with more:

--

As reported by Philippines Amateur Radio Association that organization has now been officially recognized by the National Telecommunications Commission as the nations only national amateur radio organization with the NTC to maintaining a database of licensees that will be made available in the public domain.

Under the revised rules an applicant for a Philippine amateur license who passes an exam but does not own a radio will be given an operator certificate with his own call sign. Also a new entry level Foundation License or Class D certificate with VHF-only privileges has been created with a minimum age requirement of 9 years. And in the area of administering Philippine Amateur Service exams, new question pool and oversight committees have been officially organized.

One other very important change is that the NTC will now allow Philippine radio amateurs what it calls convergence with the Internet. In other words it has authorized interconnects for operations such as Echolink, IRLP and other VoIP operations.

Lastly, hams in the Philippines have been granted to some additional spectrum. Depending on license class, hams will be permitted to operate from 135.7 kHz to 137.8 kHz; 472 kHz to 479 kHz and 7.201 MHz to 7.300 MHz with Class B and Class C allowed to operate High Frequency mobile.

For the Amateur Radio Newsline, Im Jim Meachen, ZL2BHF.

--

These changes to the Philippine Amateur Radio Service regulations came into effect on August 30th. More details can be found at www.para.org.ph/news.htm (PARA)

**

ENFORCEMENT: THE VANISHED VENTURA UNLICENSED STATION BUSTED BY THE FCC

A follow up to a story from a few weeks ago involving an unlicensed station in Ventura, California, on 89.7 MHz that called itself KSSR, The Peoples Radio. It has now been established that this station has been busted by the FCC with a Notice of Unlicensed Operation issued to the station itself as well as to the property owners that hosted it. Amateur Radio Newslines Jim Damron, N8TMW, reports:

--

In a pair of letters dated August 14th the FCC notified the station as an entity well as property owners John and Lisa Darby that KSSR was found to be operating without a license and must leave the air immediately. Both letters also advised the recipients that they had ten days from the date of the notice to respond with any evidence that they have authority to operate granted by the FCC.

The notices said that the FCC staff will use all relevant material information before it to determine what, if any,

enforcement action is required to ensure your compliance with FCC Rules. This will include any information that the station management or the property owners disclose in their reply.

This notification from the FCC ends speculation that perhaps the pirate saw private DF'ing activity taking place and voluntarily suspended operations. But the station my have had the final word. As of August 26th the unlicensed stations website carried the following message: "Due to unforeseen circumstances KSSR had the leave the FM airwaves for a while."

Whether that means the station operator plans to return to the airwaves at a later date or is just a smug way of bidding its audience a fond farewell, is unknown. But if the FCC has its way, the unlicensed KSSR will never be heard on the Ventura, California airwaves, ever again.

From Charleston West Virginia, Im Jim Damron, N8TMW reporting.

--

As is normal in these cases both the station and the property owner were give the customary 30 days to file a response. (CGC, FCC)

RESCUE RADIO: SUFFOLK COUNTY NY SEEKS DONATION OF TRAILER

New York's Suffolk County Radio Club is seeking a donation of a mid-sized trailer to continue its Emergency Communications Field work. This after its present communications vehicle has become unusable due to its age.

For those not aware, the Suffolk County Radio Club was established in 1947 and is the oldest radio club on Long Island. Its members provide free manpower as a public service for special events in addition to their volunteer emergency communications during disasters such as hurricanes and wildfires.

If you have a covered trailer in the 12 by 8 foot category that you would consider donating, please contact club Vice President, Jim Fehling, N2JFD by telephone at area code 631-926-4370. Or you can e-mail him to n2jfdny (at) gmail (dot) com. (Suffolk Radio Club)

RADIO TRAGEDY: COLORADO HAM RADIO OPERATOR AND WIFE DIE FROM INJURIES SUFFERED IN CAR COLLISION

A Colorado Springs, Colorado, ham radio operator and his wife who were involved in an automobile accident on their way home from church have died from their injuries. This, after their car was broadsided by a driver alleged to have been going the wrong way down a one-way street. Amateur Radio Newsline producer Bill Pasternak, WA6ITF, has the details on this tragic event:

--

According to police reports, Teddy Allison, N0NKG and his wife Mary Ann were in their Saturn headed home from church services at about 10:45 a.m. on Sunday, August 12th. That's when a Chevrolet Malibu, driven by 18 year old Khalil Sanders allegedly drove the wrong way on a one-way street, entered an intersection without stopping and slammed into the Allison's car.

The couple was taken to the hospital, both in critical condition. Teddy Allison, who was age 67, died on August 15th. Mary Ann Allison succumb to her injuries on August 18th.

Khalil Sanders was also taken to the hospital and was treated and later released. Police continue to investigate the crash and are still determining what charges, if any, he potentially faces.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, I the newsroom in Los Angeles.

--

Teddy Allison, N0NKG, was an electronics technician at Hewlett Packard and Mary Ann Allison was a homemaker and accountant at Young life. The Allison's had just celebrated their 49th wedding anniversary on July 7th. (N0RDC)

NAMES IN THE NEWS: K3EST RETIRES FROM DIRECTOR OF CQWW DX CONTEST

Some names in the news. CQ Magazine has announced that Bob Cox, K3EST, has retired as Director of the CQ World Wide DX Contest and as CQ's Director of Contesting. Cox has been at the helm of the CQ World Wide DX contest for 35 years. During his tenure he guided the competition through numerous changes in technology and growth to become the world's most popular amateur radio contest. Cox's retirement is effective immediately. A successor has not yet been named. (CQ)

**

NAMES IN THE NEWS: MIKE BAXTER KA0XTT OF LAST MAN STANDING GETS NEW ANTENNA FARM

According to a posting on Facebook by the lead character of the situation comedy Last Man Standing, as soon as it get closer to the shows season two premiere of Friday, November 2nd, they will be holding a combined HF, VHF, UHF and D-Star ham radio operating event. This will put all of the amateur radio gear used on the show and the licensed staff members on the air for you to contact.

The shows producer is John Amodeo, NN6JA. He has just uploaded to Facebook close to a dozen photos of the new outdoor antenna installation on the roof of the Studio City, California sound stage where the Last Man Standing is recorded. If you are on Facebook you can see them by putting the words "Last Man Standing Season 2 Antenna Farm" into the search line at the top of any Facebook page.

For those of you who have not yet seen the show, Last Man Standing follows the adventures of Mike Baxter played by actor and comedian Tim Allen. Baxter's character is the director of marketing at an outdoor sporting goods store in Denver, Colorado, whose world is dominated by women. This is especially true at home with his wife and three daughters. His hobby turns out to be amateur radio with Baxter using the call letters KA0XTT. Last Man Standing airs on the ABC television network. (ARNewslineT)

HAM RADIO IN SPACE: NASA ANNOUNCES OPPORTUNITIES FOR CUBESAT LAUNCHES

Want to put a small satellite into orbit? Well now is your chance providing the bird you want to launch meets some specific criteria. Amateur Radio Newslines Don Wilbanks, AE5DW, has the details:

--

NASA is seeking proposals for small satellite payloads to fly on rockets planned to launch between 2013 and 2016. These miniature spacecraft, known as CubeSats, could be auxiliary payloads on previously planned missions or on yet to be announced orbital opportunities.

CubeSats are a class of research spacecraft called nano-satellites. These cube-shaped satellites are approximately four inches long, have a volume of about one quart and weigh less than three pounds.

Proposed CubeSat investigations must be consistent with NASA's Strategic Plan and the NASA education vision and goals. The research must address aspects of science, exploration, technology development, education or operations.

Applicants must submit proposals electronically by 4:30 p.m. EST, November 12th. NASA will select the payloads by next January 31st. Selection does not guarantee a launch opportunity but the selected spacecraft will be eligible for flight after final negotiations when a launch opportunity arises. It should be noted that NASA provides only a possible launch opportunity but it will not provide funding for the development of the small satellites.

Meantime from the first three launch initiatives, 64 payloads made the short list for launch opportunities between now and 2014. These satellites come from 25 states and are eligible for la ride to orbit pending an appropriate opportunity and final negotiations.

I'm Don Wilbanks, AE5DW.

WORLDBEAT: ZAMBIA MAKES READY FOR DIGITAL BROADCASTING

The Zambian government has issued 10 licenses and 16 construction permits to radio and TV stations in the country.

Those chosen are expected to switch to digital broadcasting before the 2013 deadline set by the Southern Africa Development Community.

According to the nations Minister of Information and Broadcasting Services, the move is intended to enhance participation in the affairs of the country, as well as offer people an opportunity to air their views on issues of national interest. (RW)

**

ON THE AIR: COMMEMORATING THE LIBERATION OF KNOKKE BELGIUM

On the air, special event station ON44CLM will be operational from October 16th through November 15th in commemoration of the liberation of the town of Knokke in Belgium by the Canadian Army in 1944. The C-L-M suffix stands for Canadian Liberation March. More information is on-line at www.on44clm.be. (Southgate)

**

ON THE AIR: CELEBRATING THE DUBLIN BUS

Hams in Erin's Isle have taken to the air to celebrate the 25th anniversary of the Dublin Bus with special event special event station E-I-25-D-B operational from now through June 30th of 2013. The station will be operated by current and former employees of Dublin Bus Company led by EI9HQ and EI4GZB. QSL this operation to EI9HQ or electronically using either Logbook of the World or HamLog.eu. The Dublin Bus Company is a major public transportation supplier through out the city of Dublin, Ireland. (Southgate)

**

ON THE AIR: VOODOO CONTEST CLUB TO BE ACTIVE FROM LIBERIA

For the 24th straight year look for the VooDoo Contest Group to again be active from Liberia between November 21st and the 27th. Operations will be from a location just South of Monrovia, the capital of Liberia. Their main goal is to be an entry in the CQ World Wide DX CW Contest on November

24th and 25th as a Multi-Multi category using the callsign E-L-2-A. Outside of the contest the operators will use their own personal callsigns. QSL as directed by each operator. (OPDX)

**

DX

In DX, SM1TDE will be active portable 5Z4 from Diani Beach, Mombasa, Kenya between November 5th and the 22nd. This will be a family vacation and activity will be limited to how much his XYL and kids allow. His operation will be on 40 through 10 meters on CW only. QSL via his home callsign, either direct, via the bureau or electronically using Logbook of the World.

JA7SGV is now operational as 9J2JA from Zambia. His length of stay is unknown. Activity has been on the 30, 20, 17 and 15 meters using CW only. QSL via his home callsign.

W4XP who was expected to be active now as VQ9XP from the club station VQ9X on Diego Garcia Atoll has been forced to cancel the operation. He says that this is because the station has been placed off-limits by the installation Commander.

PA0FAW will be operating PC12WSF through September 30th for the World Statues Festival in Arnhem in the Nethlands. Modes mentioned are CW, SSB and PSK. QSL to PA0FAW either direct, via the bureau or electronically via eQSL. This operation will not accept Logbook of the World confirmation requests.

Lastly, CT1FJZ will be working in Angola for the next year or so and will be operational on 80 through 10 meter SSB using the callsign D2FJZ. His activity will be mainly at the weekends but he will try to get on the air whenever possible during weekdays. QSL as directed on the air.

(Above from various DX news sources)

**

THAT FINAL ITEM: CONTROLLED CARRIER AM -SOMETHING OLD IS NEW AGAIN

And finally this week, an old modulation technology is making a comeback for A-M broadcast stations in a new and money saving way. Amateur Radio Newsline's George Bowen, W2XBS, has the details where something old is new again:

--

Back in the days of full carrier A-M transmission one very popular and low cost way to put ones voice onto a carrier wave was to modulate the final power amplifier's screen grid. A variation on this that required no heavy modulation transformer was to vary the output power of the transmitter at an audio rate by varying the final amplifier's screen voltage at an audio rate. This system was called controlled carrier A-M and it was made very popular on the ham bands in the 1940's, 1950's and 1960's in such budget priced transmitters as the Heathkit DX-35, DX-40 and DX-60 to name only a few.

With the advent of single sideband transmission, full carrier A-M fell out of favor in the ham radio world but it has remained a staple in the broadcast industry and other services that want to get their message to the public. And now, carrier control modulation is making a comeback among broadcasters but not in the way it was done by radio amateurs of the past.

For broadcasters who spend 10's of thousands of dollars a year paying for electric service, the ability to raise and lower power levels can be a major cost cutting factor. And because of this a number of stations have received waivers from the FCC to experiment with several new forms of carrier control technology.

In one instance, transmitter manufacturer Harris Broadcast and New York City powerhouse WOR-AM say they have had success with a power-saving Modulation Dependent Carrier Level algorithm. This with no effect on Arbitron Portable People Meter data encoding/decoding, the stations H-D Radio signal coverage or digital audio quality.

Harris engineers worked with Tom Ray, W2TRR , who is the Corporate Director of Engineering WOR AM in New York, to test the compatibility of two Harris Modulation-Dependent Carrier Level algorithms. Amplitude Modulation Companding provided the largest reduction in transmitter power consumption, by saving 37 percent in average AC power input to the transmitter. WOR estimated this translates up to a $3,000 per month savings on the electric bill at his New Jersey transmitter site.

So will this new form of Amplitude Modulation Companding bring back full carrier AM to the ham bands? While a tiny segment may decide to experiment with it more than likely SSB will remain the preferred voice system among ham radio operators world wide. At least until it's replaced by a digital voice system at sometime in the future.

For the Amateur Radio Newsline, I'm George Bowen, W2XBS, at the North East Bureau in Albany New York.

--

Nautel, another transmitter manufacturer has estimated that a 50 kilowatt AM transmitter using this technology and operating 24 hours a day, 7 days a week could easily save $20,000 a year or more in electricity costs. This based on modest electricity rates of 10 cents per kilowatt hour.

The complete story can be found on-line at tinyurl.com/harris-modulation (RW)

373. Palomar 200-x Linear Amplifier

Newsgroup: rec.radio.cb
Date: 2012-09-13 01:34:17 UTC
From: HighFreq <HighFreq.a9720d8@radiobanter.com>
Message-ID: <HighFreq.a9720d8@radiobanter.com>
Source record: 251477

Hello everyone, I'm restoring a 1974 Palomar 200-X linear amplifier. I have the original schematic, and am in the process of replacing out of spec components.

I need help to figure out where 1 of the components connects to - a 33pf capacitor that goes to one of the relays. I think my relays have been replaced, so the corresponding numbers on the schematic are useless.

Would anyone happen to have one that they could provide a photo of where this components connects to? One side of it is still connected to the 2N2905A transistor.

Any help would be greatly appreciated.

I gave honest replies. Your reply is more bullshit than fact since
it's the deviation from the norm. Once every so often you'll have a
clown operator who gets popped only AFTER drawing attention to
himself. Many operate regularly on 27.555 USB with no concern of
anything you say. This isn't an amateur forum it's a CB forum. You're
using scare tactics that aren't applicable in the real world. I'm
nobody's mother and don't advocate or dissuade anyone from doing
anything. You on the other hand sound like you're more interested in
playing radio enforcer because of something you don't agree with. Get
over yourself.

ENFORCEMENT: TWO COMMERCIAL OPERATIONS EVICTED FROM 2
METERS IN CANADA

Radio Amateurs of Canada has announced that two cases of
frequency incursion to the 2 meter band by business users
have been resolved. Amateur Radio Newsline's Aaren Jensen,
VA7AEJ, reports:

--

In the first incident, a transportation company based in
Reinfeld, Manitoba was observed to be operating illegally on
144.100 Mhz. The company in question had purchased VHF
radios from a US based supplier who failed to indicate
correct licensing procedures.

Once contacted by Radio Amateurs of Canada the company
agreed to immediately cease operating in the two meter band
and shifted its operation to a business band frequency.
Industry Canada was notified of the incursion and continues
to work with the company to secure a licensed channel. In
addition to illegally transmitting inside the amateur radio
two meter band, this operation posed a threat to low signal
operations across a wide portion of North America

In the second matter, a home moving company was observed to
be operating on 144.940 Mhz. The company in question is
based in Winkler, Manitoba, but the operation was observed

in Alberta during the moving of a house.

In this case, the company had already been licensed to specific frequencies with Industry Canada. However it had requested 144.940 Mhz as a channel. Their request was denied and a business band channels were issued. However, the company failed to check tits license paperwork and assumed it had been approved for their requested frequency.

As in the first case, the moving company was also contacted by Radio Amateurs of Canada and agreed to move their operations to their correctly licensed frequencies. Given their wide geographic operations Industry Canada had licensed their operation on four separate frequencies including 140.730, 154.325, 158.940 and 151.730 MHz.

In both cases, it appears that frequencies in the two meter band were chosen by these businesses because their new vhf radios defaulted to that frequency range. This is definitely an indicator that the actual radio gear being used is likely to be modified amateur radio transceivers.

For the Amateur Radio Newsline, I'm Aaren Jensen, VA7AEJ, in Lumby, British Columbia Canada.

--

The use of equipment intended for amateur radio operation outside of the amateur bands or by persons who do not hold an Canadian Amateur Radio Certificate is illegal. What punitive action Industry Canada might impose on the two companies for their incursion into the 2 meter band is at this time unknown. (RAC, VE4WO)

RADIO LAW: RSGB ASKS IARU R-2 TO RECONSIDER PLT STANDARD

The Radio Society of Great Britain has formally asked the International Amateur Radio Union Region 1 Electromagnetic Compatibility Working Group to reconsider its policy on the draft European Broadband over Powerline or PLT standard. One that the RSGB claims to threaten a 38 dB increase in R-F pollution over much of the short wave radio spectrum

The request from the RSGB came in an August 28th letter to C.M. Verholt, who is the Chairman of the IARU Region 1 EMC Working Group from the RSGB's Don Beattie G3BJ. In it, Beattie says that there is no way that the emissions from devices meeting this new standard can satisfy the essential requirements of the EMC Directive outside the notched frequencies. As such, G3BJ says that the IARU Region 1 EMC Working Group is in effect condoning overriding the

essential requirements of the Electromagnetic Compatibility Directive by backing the standard. He says that this action of the Commission is clearly contrary to the law of the European Union and therefore open to judicial review.

Beattie goes on to say that the new emission levels, if sanctioned, will inevitably become the baseline for future standards. In this context he notes that that there are already some new drafts that are circulating which reference the more liberal proposed emission levels.

Beattie ends his letter by saying that the RSGB hopes that common sense will prevail and that IARU Region 1 will amend its position on this matter. The IARU Region 1 EMC Working Group had previously added its support to the new Pan-European Electromagnetic Compatibility standard that the RSGB so vigorously opposes. (GB2RS)

RADIO LAW: PLMRS NARROWBANDING TAKES EFFECT ON JANUARY 1 2013

The FCC has sent out a notice to the manufacturers, importers, distributes and users of Private Land Mobile two-way radio that the deadline to switch to 12.5 Khz narrow band transmission is January 1, 2013. This is for two way radio gear that operates in the 150 to 174 MHz and 421 to 470 MHz frequency bands, not including the 2 meter or 70 centimeter Amateur Service spectrum from 144 to 148 MHz or 430 to 450 MHz. Amateur Radio Newsline's Jim Davis, W2JKD, reports:

--

According to the FCC the reason for this mandated change is to promote the efficient use of private land mobile radio spectrum and to facilitate the introduction of advanced technologies. In other words, this government edict is not only applicable to analog FM based communications but to current and all future digital modes as well.

The FCC also notes that Private Land Mobile Radio licensees are not required, at this time, to modify their licenses to remove wideband emission designators. However, the presence of a wideband emission designator on a license does not authorize operation after January 1, 2013 that does not comply with the new narrowbanding standards.

The FCC release also reminds manufacturers, subject to the limited exceptions, that they must cease manufacturing and importing equipment that is capable of 25 kHz mode operation in the VHF and UHF bands by the narrowbanding transition

deadline.

I'm Jim Davis, W2JKD.

--

While the Amateur Service is exempt from the new narrowbanding mandate, do not be to surprised if future generations of off the shelf VHF and UHF ham gear is built to conform to this new commercial radio standard. Especially if a manufacturers primary business is in supplying Private Land Mobile Service radio gear with ham gear as a secondary product line. Its simply less expensive for them to do it that way. (FCC)

**

RADIO LAW: NEW ZEALAND TO ENFORCE UHF CB NARROWBANDING

In a similar move, New Zealand's telecommunications regulator has issued an edict to all manufacturers and importers of UHF CB radio equipment with 25 kHz channel spacing. It notes that in accordance with the nations General User Radio License for citizen band operation, equipment that does not comply with a new narrowbanding specification cannot be sold in that nation if it is manufactured or imported after December 1st. Only current stock of 25 kHz radios on hand and merchandise in the domestic New Zealand distribution pipeline can be sold after that date. (NZART)

**

RESTRUCTURING: TV SPECTRUM AUCTION UPDATE

According to top FCC officials, FCC Chairman Julius Genachowski will soon circulate the FCC's long-awaited framework for reclaiming and re-auctioning broadcast spectrum for wireless use, and repacking remaining stations. This, with the target of having a report and order voted by mid-2013 and the auctions completed by the end of 2014.

The document is described as a comprehensive treatment rather than the first of a series of items. As such it's expected to contain many detailed proposals that the FCC will then seek comment on and adjust as needed. The FCC is trying to move far enough down the road with this initial proposal to make that auction goal of 2014 a realistic one.

While ham radio is not directly involved in this frequency shuffle, there is always the chance that some bands like 222 to 225 MHz and 50 to 54 MHz could be impacted. This is because 222 to 225 MHz lies between what is known as the spectrum between the VHF low and VHF high band TV channels.

50 to 54 MHz that we call 6 meters is actually VHF low band TV channel 1. If the sell-off of the coveted UHF broadcast spectrum results in a lot of TV stations returning to the VHF bands then both these spectral parcels could come under some future reallocation scrutiny. We are not saying that it will happen that way, but ham radio has to keep a careful watch on how it might be affected in the years to come. (Published reports)

RADIO LAW: FAA TO BEGIN INVESTIGATION OF BROADBAND DEVICES ON FLIGHTS

It's going to be a while before airline passengers can use their wireless electronic devices during an entire flight. Amateur Radio Newsline's Stephen Robertson, KB3HGM, is near the nations capital with the details:

--

On Monday, August 27th the Federal Aviation Administration said that it is starting a process to study the issue, with a timeline that means it will take at least until March 2013 for a recommendation and likely longer for action.

Smartphones, laptops and tablet computers are common in the passenger cabin, and some pilots are using these devices in flight. But passengers have to shut off electronic devices when the plane is below 10,000 feet because of worries that they might interfere with electronics in the cockpit. And anything that has a broadband connection that cannot be disabled must be kept off for the entire flight.

Now, in its recent statement, the FAA says that it will form a committee to study the issue for six months and then make recommendations. The group will include representatives of the mobile technology companies, aircraft manufacturers, airlines, pilots, flight attendants, and even representatives of passenger associations. The agency will also ask for public input. The FAA often uses such aviation rulemaking committees when it is considering regulatory changes and their discussions often last months and sometimes even years.

It should be noted that the FAA doesn't actually ban the devices. However its rules state that airlines can only allow devices that have been tested and proven not to interfere with a given make and model aircraft's electronics. With thousands of devices on the market and new ones coming out each day, airlines simply ban them all during takeoff and landing. And it looks as if that's the way it will continue for some time to come.

For the Amateur Radio Newsline, Im Stephen Robertson, KB3HGM, in Silver Spring, Maryland.

--

As to ever getting permission for hams to use radio gear like handie talkies on a commercial airline flight? There is no consideration being given to ever permit any hobby radio electronics to be used. The FAA says that allowing cellphone use during flights isn't under consideration either. (FAA, RW, other published reports)

**

RADIO LAW: FENDER AND THE FCC ENTER CONSENT DECREE

Fender Musical Instruments Corporation and the FCC's Enforcement Bureau have come to an agreement regarding how the company marketed digital RF devices and how it will do so in the future.

The case which began in June of 2010, involves how the company marketed bass amplifiers, preamplifiers, tuners, wireless microphones and audio mixers. Imported digital RF devices are subject to the agency's equipment verification or declaration of conformity procedures.

As part of the agreement, Fender Musical Instruments Corporation will designate a compliance officer within 30 days and set up a plan within 60 days to ensure the company complies with the FCC's equipment marketing rules. The company has also agreed to develop and implement an online compliance training program for all if its overseas Original Equipment Manufacturers that build some of its equipment. The company is to report to the commission within 15 days any discoveries of noncompliance and submit regular equipment compliance reports to the agency.

Based on a consent decree, Fender will make a voluntary payment of $265,000 to the U.S. Treasury and admits no guilt. In turn, the commission will end its investigation. The first installment of its U.S. Treasury payment of $132,500 is due within 30 days of the signing of the Consent Decree. (FCC, RW)

**

ENFORCEMENT: BROADCASTER FINED $20000 FOR UNLIT TOWER

Not lighting a broadcast tower for more than a decade will likely cost Renacer Broadcasters Corporation a hefty $20,000 fine from the FCC.

Renacer owns the antenna structure located in Maricao, Puerto Rico. Responding to a complaint, an FCC Enforcement Bureau agent inspected the tower and found the structure had never been painted and had no lights installed. Because the tower had been that way for more than 10 years, the commission found the violation to be egregious and doubled the proposed penalty to $20,000.

Renacer was given the customary 30 days to submit a sworn statement certifying that the tower is now in full compliance with FCC rules and also to pay the penalty or file an appeal. (FCC)

**

ENFORCEMENT: FCC SAYS RADIO STATION MUST REVEAL ALL CONTEST RULES

The FCC has affirmed a $4000 Notice of Apparent Liability against Good Karma Broadcasting. This, for airing contest information without fully disclosing the terms.

The case concerns WKRN AM in Cleveland. The FCC received a complaint alleging that from November 2007 to September 2009, the station conducted what the complainant called a "bogus" contest called "Who Said That?" In it, those calling into the station were required to accurately identify who actually voiced a clip that was played on-air.

In 2009, the FCC wrote to WKRN asking about the contest. The agency said that in its reply WKRN admitted the bit aired regularly from early 2007 until the summer of 2008, and then sporadically thereafter. Once someone guessed the voice a new clip would air.

The station admitted that for more than 20 months, no one guessed the voice behind the clip. Also that the station was not announcing all the prizes, but rather focusing on the new prize. Also that it eventually stopped announcing them unless a listener called in and tried to guess the voice behind the last clip.

Good Karma also said that by September 2009, some of the original prizes were no longer available. It claimed that if a listener correctly identified the voice in a clip, the station would have offered a similar prize package to the one that was originally announced. As such, Good Karma

disputed that it violated the contest rules, arguing that "Who Said That?" was better characterized as a feature or bit rather than a real contest. It argued that as such the material was not subject to the FCC's contest rules.

But the FCC would not buy that explanation. In affirming the fine it stated that licensees must accurately disclose all of the material terms of a contest. Also that licensees must conduct the contest substantially as announced or advertised.

Good Karma Broadcasting was given the customary 30 days to pay the fine or to file a further appeal. (FCC, RW)

**

HAM HAPPENINGS: YOUTH IN AMATEUR RADIO PODCAST #3 RELEASED

If you are a young ham or know of one, you might want to spread the word that Episode 3 of the Youth in Amateur Radio Podcast is now on line and ready for download. In this installment the young hosts discuss what you should do after earning your amateur radio license including getting your first radio and joining a radio club. Heres a sample:

--

Net Audio: ".to find a ham who will be able to assist you in finding your first radio go to a local radio club and become a member. Radio clubs will help you find your first radio and they usually have monthly meetings which discuss local issues in amateur radio and also organize fun activities like Fox Hunts."
--

The Youth in Amateur Radio Podcast is produced by and for the youngsters in amateur radio. Its primary hosts are Anthony Spinelli, K2RCN, Sterling Coffey, N0SSC and Jacob Keogh, KD0NVX. Other voices include Joe Andrews, KD0LOS, and Matthew Chambers, NR0Q. Jerry Taylor KD0BIK serves as the shows Executive Producer. To hear the complete program and the two that preceded it simply take your web browser to yarphams.com. You can also find it on itunes under Youth in Amateur Radio podcast. (Youth in amateur Radio)

NAMES IN THE NEWS: NORM ACES THE AZ TEST

Some names in the news. We lead off with Amateur Radio Newslines own Norm Seeley, KI7UP who tells us that recently scored 100% on the State of Arizona Traffic School test. While he does not know if he broke any records, Norm says that he finished the exam in less than 4 minutes and 30

seconds. At that point he got up and left his computer, after seeing that he had answered all questions correctly. We say, congratulations.

(ARNewslineT)

**

NAMES IN THE NEWS: W7EQI BEING EYED TO HEAD THE REPUBLICAN NATIONAL CONGRESSIONAL COMMITTEE

Regardless of the upcoming outcome of the November presidential election, don't be too surprised if Oregon Representative Greg Walden, W7EQI, is named to the chairmanship of the Republican National Congressional Committee. News reports say that House Speaker John Boehner recently gave a broad hint when he praised Walden by saying that he would soon have a "bigger job."

While the post doesn't get much attention from the general public, it's of major importance on Capitol Hill and is often viewed as a step up on the House leadership ladder. This is because thee chairman plays a key role in distributing millions of dollars in campaign help, in recruiting candidates and in making the tough calls on which districts to bet heavily on. (Published news reports)

THE SOCIAL SCENE: CELEBRATING MFJ 40th ANNIVERSARY OCT 5 AND 6

Turning to the ham radio social scene, all eyes will be on the city of Starkville, Mississippi, the weekend of October 5th and 6th. That's when hams from around the country and around the world are invited to join in on the 40th anniversary of the founding of MFJ Enterprises by the company's founder Martin Jue, K5FLU:

--

K5FLU: "Its going to be a fun event. We're opening all the factories up for tours. We will have people working there with the machines up so that you can see everything.

"We are going to have a free lunch. You can come over and we will feed you some good fried chieken.

"We are going to have free tailgating. You bring your stuff (to sell).

"We will have a VE session for taking license tests. And we will have a special event station with our club K5MFJ.

"And we are going to have door prizes from each of our companies. From MFJ, Ameritron, Hy-Gain, Cushcraft, Mirage and Vectronics.

"And everybody is invited and we hope that everyone comes."

--

Again the dates for the MFJ Enterprizes 40th anniversary party are October 5th and 6th at the company's headquarters in Starkville, Mississippi. For more information take your web browser to www.mfjenterprises.com. And oh yes, Ill see you there. (MFJ)

**

THE SOCIAL SCENE: PACIFICON IN SANTA CLARA CA. OCT 12-14

Two weeks later on October 12th, 13th and 14th the joint Pacificon and ARRL 2012 National Convention will take place at the Mariott Hotel in Santa Clara, California. Hosted by the Mt. Diablo Amateur Radio Club, Pacificon is considered the premiere West coast ham radio gathering and this year with the addition of the ARRL Expo, planners are going all out to make it the best ever. And by going all out we mean some 80 forums, a huge exhibit hall featuring all of the well known ham radio manufacturers, distributors and retailers; a huge flea market and several special gatherings.

Among those who will be appearing at these years Pacificon is Amateur Radio's best known educator and the co-host of the T-V webcast Ham Nation, Gordon West, WB6NOA. Gordo will be the keynote speaker presenting the Saturday Opening Address and word is that this is already a complete sellout.

Also attending is NASA Astronaut Lee Morin, KF5DDB. He has been announced as the evening banquet featured speaker. Morin served as a Mission Specialist on the space shuttle Atlantis for STS-110 mission that launched in April of 2002.

And flying in all the way from Lincoln, Nebraska is ham radios favorite kit building enthusiast, Joe Eisenberg, K0NEB. Eisenberg will be giving his acclaimed talk and demonstration titled Kit Building 101 and 102 at Pacificon.

Add to that the ARRL Expo, an all day Friday antenna seminar, special event station W1AW/6 and so much more that there's no time to mention it all and you have the makings of a great West coast ham radio gathering. And you can find out more by simply going to www.pacificon.org on the World Wide Web. (Pacificon)

EMERGING TECHNOLOGY: WB2MGP WORLDRADIO COLUMN ON FRACTAL ANTENNA MEETING

An upcoming article in a popular ham radio on-line publication will peak your interest if you are interested in the future of the hobby and what some of those in it now are doing to insure its future. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

If you are a reader of Worldradio On-Line, then keep an eye open for an interesting column by Carole Perry, WB2MGP. Back in June, WB2MGP and one of her Radio Club of America Young Achievers, Austin Schaller, KD0FAA, accepted an invitation from Dr. Chip Cohen W1YW to visit his facility in Waltham, Massachusetts.

Dr. Cohen is the inventor of fractal antenna technology and in 1988 built the world's first fractal element antenna. He is also the founder and Chief Technology Officer of Fractal Antenna Systems and was interested in meeting with the 17 year old ham. This after KD0FAA gave a presentation on fractal technology at a Radio Club of America Technical Symposium in Dallas, Texas, last November.

According to Perry, W1YW attributes his ham radio background as being responsible for his career choices and interests. She tells Amateur Radio Newsline that KD0FAA was inspired by the experience. Even more so when Dr. Cohen invited the teenage ham to co-author an article with him.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, in Berwick, Pennsylvania.

--

WB2MGP says that this is what she calls the ham radio ripple effect at its very best. You can read the entire story in the next issue Worldradio Online when it hits you e-mail in box. (WB2MGP)

**

NEWS FROM SPACE: EXPLOSION ON JUPITER NOTED BY AMATEUR STAR GAZERS

Amateur astronomers last week reported a bright fireball on the planet Jupiter that appears to be the result of a small asteroid hitting the planet during the early hours of September 10th. As the fireball faded, attention has turned to trying to discover any possible debris around the impact site. Observers will be monitoring the region in the nights ahead to see what if anything surfaces. Updates will be posted on-line at spaceweather.com (Spaceweather)

**

HAM RADIO IN SPACE: ISS TO GERMANY STUDENT Q AND A SESSION

A fascinating Amateur Radio on the International Space Station or ARISS contact was held on Friday, September 7th. This, between astronaut Sunita Williams, KD5PLB and students at the Michelstadt Gymnasium in Michelstadt, Germany. The clarity of the space to Earth link via ham radio was amazing. It enabled Williams to answer 14 questions posed by the students during the ten minute pass. Here's a sample:

--

Jessica: "What was the most scientific project you have been involved in on the ISS?"

KD5PLB: ".I think the most interesting thing is the investigations that we are doing on ourselves to see what happens to the human body after being in space for a long time. We are doing bone density; muscle measurements; workouts; different nutrition projects and all of that is going to help us understand what happens to the human body after a long time so that we can prepare the next generation which is your generation to go further. Back to the Moon and on to Mars."

--

With this being a political season here in the United States, one student was curious if astronauts can vote from space:

--

Arissa: "How do American astronauts vote for the president?"

KD5PLB: "Great question. Actually we vote by state in the U.S. and I am a Florida resident so I actually voted before I left. But you can vote from space. People have done that who are from the state of Texas."

--

Over 1600 students, teachers, and others were in attendance, as well as representatives from German radio, television and newspapers. The entire contact was video recorded and is posted on-line at tinyurl.com/iss-german-contact (ARISS)

**

RADIOSPORTS: ICOM D-STAR QSO PARTY SEPT 21 - 23

This years Icom sponsored D-STAR QSO Party runs from 00:00 UTC on Friday, September 21st to 24:00 hours on Sunday the 23rd. The goal of the D-STAR QSO Party is to communicate through as many D-STAR repeaters as possible throughout the world. All operators who submit an approved log will be eligible for the prize draw with winners randomly selected for each prize. For more information on this year's event take your web browser to tinyurl.com/DSTAR-contest-2012. (ICOM)

**

DX

In DX, word that DL3JH, is active stroke 6Y5 from Jamaica through September 22nd. His operation should be on all of the High Frequency bands using CW and SSB. QSL via his home callsign only.

PT2OP will be operational as 3D2OP from Fiji between October 7th and the 14th. His activity will be holiday style on the High Frequency bands. QSL via his home callsign, either direct or via the bureau.

And speaking about Fiji, PY7ZY will be on from there as 3D2ZY from there between October 11th and the 15th. This just prior to his participation in the Tarawa Island, Western Kiribati, DXpedition. His operation will also be on the High Frequency bands with QSL's also going via his home callsign.

F6ICX will be active as 5R8IC from Saint Marie Island, Madagascar between November 10th and December 9th. His operation will be holiday style operating CW, RTTY, and PSK63 on 20 through 10 meters. QSL via his home callsign as listed on QRZ.com.

SQ1DWR, will be active signing stroke CE3 from Chile between October 10th and the 22nd. Operations will be on 40 through 10 meters using CW only. QSL as directed by the operator.

YJ8RN is currently visiting Loh Island in the Torres Island Group and is active as YJ8RN stroke P. The length of stay unknown and his operation has been mainly on 20 meter SSB.

QSL direct only to Rod Newell, Box 905, Port Vila, Vanuatu.

Lastly, Members of the "Invoker Team" will be active as EG5INT from Columbretes Island between September 20th to the 24th. No frequencies or operating schedule has yet been announced. If you work them please QSL only via EA5KA.

(Above from various DX news sources)

**

THAT FINAL ITEM: KEEP YOUR KIDS AWAY FROM BUTTON BATTERIES

And finally this week a warning from the Center for Disease Control saying that children and small button batteries are a dangerous and increasingly common problem for one another. Amateur Radio Newsline's Bruce Tennant, K6PZW, tells us why:

--

According to a new Center for Disease Control report, in 1998 battery related injuries sent 1,900 children to the emergency room. In 2010 that number had risen to 4,800 cases being reported.

Overall, more than 40,000 children were admitted to Emergency Rooms nationwide between 1997 and 2010. Almost three quarters of them were 4 years old or younger. One in 10 children required hospitalization. 14 of them died.

Now the CDC has singled out button batteries as the most potentially harmful type for young children to be near. These are the small, thin round batteries often used to power watches, hearing aids, and other small devices. They are easy to swallow and can get stuck in a child's esophagus leading to serious injury or death. In fact, the C-D-C report says that twelve of the fourteen child mortalities were attributed to button batteries and that the remaining two also likely involved them.

The data, primarily from the National Electronic Injury Surveillance System was collected and analyzed by the federal Consumer Product Safety Commission. The report states that the C-P-S-C is urging the electronics industry and battery manufacturers to develop warnings and industry standards to prevent serious injuries and deaths from button batteries.

The symptoms of battery ingestion include vomiting, abdominal pain, fever, and diarrhea, as well as difficulty breathing and swallowing. As these symptoms can be attributed to numerous causes, it is difficult to diagnose battery ingestion quickly. The

report's authors point out that this is especially true when a child swallows a battery when no one is around to see them do it.

Battery safety standards for children's toys are dictated by law. All batteries must be inaccessible in toys designed for children under age three, while toys for kids under age twelve must make batteries under a certain size inaccessible. Even so, at least three of the deaths noted in the report were caused by batteries from devices not meant for children. These including a remote car alarm, a garage door opener, and a radio remote control.

A new law is being considered by Congress that may require child-proofing for button battery enclosures on all consumer products. Meantime its important that parents and caregivers should be aware of the potential hazards associated with battery exposure and ensure that products containing them are either kept away from children or that the batteries are secured safely in the product.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The Consumer Product Safety Commission says that if a child swallows a battery that you immediately contact your local poison control center, your family doctor, or the 24-hour National Battery Ingestion Hotline at 202-625-3333. You can learn more about this hazard and how to proceed in the event a child does swallow a battery at tinyurl.com/kids-button-batteries. (CDC)

What does a sitting President have to know to be PUBLICLY corrected by
his own State Department?

How humiliating for the empty suit Obama...

http://abcnews.go.com/blogs/politics/2012/09/obama-says-egypt-neither-ally-nor-enemy/

President Obama says the U.S. would no longer consider the Egyptian
government an ally, ï¿½but we donï¿½t consider them an enemy.ï¿½

http://www.realclearpolitics.com/video/2012/09/13/state_department_egypt_is_an_ally.html

September 13, 2012. During the State Department Press Briefing, the
State Department reaffirms Egypt as an ally even though President Obama
said that was not the case.

REPORTER: Egypt is an ally. It is a major non-NATO allyï¿½

STATE DEPT. OFFICIAL: Correct.

hi not sure if you have fixed the radio at all but it sounds like the final or driver or both have failed , this is what gives the rf power output , these to transistors are based usually on the rear of the radio chasis most common part numbers for driver is 2sc2166 / PA is 2sc1969 you might find one or both transistors have failed and pulling the postive rail to ground rail (hence the dimming of the radio) parts should cost around $20.00

The problem is - if a service tech charges $40.00 to repair it and
$20.00 of parts - you now have $100 into a $25.00 transceiver - with no
warranty.

THROW IT AWAY!
SELL IT
OR USE IT A A DONOR RADIO

There isn't a lot of high technology in a AM CB radio.
But for a person that does not even OWN a VSWR meter or a VOM meter - I
can't with a straight face - tell them how to repair them and guarentee
them that their repair - with no technicial experience or background -
can fix it.

You would want to use some type of heat sink when you soldered the
transistors in and you would want to replace what ever else it took out
when someone operated it with a bad match - which is usually what takes
most finals out. Or a near lightning strike - which fries more then
just the transistors.

http://www.cbtricks.com/radios/cobra/139/index.htm

When you take the 4 screws out of the back and the one big screw from
under the radio, it will slide out of the cabinet.

If you look on the one side - you will see 3 transistors - those are the
first place to look.

Cross reference them via online - see if they are PNP or NPN
transistors.
NPN are the most common - since they are cheaper to manufacturer.

USE A VOM METER that has a transistor checker and do a internet search
to find the gate, drain, source - to check them out.
Then I would throw them away and put new ones into it and see if it now
works.

With a radio of that age, it probably needs all the capacitors replaced also - which is very expensive.

Even after all of that, usually one of the bulbs - (AM) goes out in the display - since it was used the most.

The switches will need cleaned, the pots will need cleaned, the selector will need cleaned and adjusted.

After all of that, if you are really lucky, it will work again, like it did 30+ years ago when it was new.

So, these wires are all original, as can be seen by the wear on them, and the original solder joints. Since the disconnected lead can only reach a few pins, I think that it may belong on PIN #11. I've been suggested to try testing for continuity between PIN #11 and #12; no continuity is what we hope to find, as this should be connected to the Normally Closed (NC) terminal. Does this make sense?

Amateur Radio Newsline[TM] Report 1832 - September 21 2012
(audio at http://www.arnewsline.org/storage/audio/nsln1832.mp3)

Amateur Radio Newsline report number 1832 with a release
date of September 21 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Political wrangling over making spectrum available to expand
broadband could impact on ham radio in years to come; the
South African Radio League backs the Radio Society of Great
Britain in is stand on in-home B-P-L; a bunch of new
cubesats reach orbit; a dozen operations approved for DXCC
and the upcoming Last Man Standing on-air celebration gets
the special event callsign K6T. Find out how to make
contact with the sound stage on Amateur Radio Newsline[TM]
report number 1832 coming your way right now.

(Billboard Cart Here)

RADIO POLITICS: HOUSE MAJORITY REPORTEDLY WANTS SPECTRUM
CLEARING RATHER THAN SHARING

According to news reports, the majority control in the
United States House of Representatives favors clearing
federal spectrum for commercial use instead of seeking
sharing arrangements. This, according to the majority staff
memo circulated for a House of Representatives hearing prior
to a meeting held recently in Washington D.C.. And there is
a chance that any decisions could impact on future access to
the highest Ultra High Frequency and Super High Frequency
bands used by ham radio. Amateur Radio Newsline's Don
Carlson, KQ6FM, takes a look at what's transpiring in the
national capital:

--

On September 13th, House members of the Communications and
Technology subcommittee were to discuss the subject of
Creating Opportunities through Improved Government Spectrum
Efficiency. But in rejecting a report from the President's
Council of Advisors on Science and Technology, the memo said
that sharing spectrum in the way it envisions is less useful
than clearing spectrum and too untested to be the focus of
the subcommittee's spectrum strategy.

The memo went on to say that such sharing should be reserved for cases in which federal clearing is impossible. However the President's Council of Advisors on Science and Technology and the National Telecommunications and Information Administration both endorse public-private spectrum sharing. They also claim that clearing the spectrum would cost more than $18 billion and 10 years to clear the targeted airwaves.

But the staff memo claims that this figure was inflated and unconfirmed by independent analysis. Instead it calls the figure merely aggregated the estimates of the federal agencies currently using the spectrum. The memo claims that the NTIA and the President's Council of Advisors on Science and Technology never fully investigated the agencies' relocation estimates. Nor has it determined whether the agencies need all the spectrum they have, or whether they could get by with less if they had more efficient equipment or relied more on commercial services.

At this moment its not known exactly what spectrum would be impacted if a non-sharing plan is eventually passed. That said, it could impact negatively on amateur radio if the reallocated spectrum was that shared between Part 97 users and government agencies as quite a bit of the U-H-F and higher bands are today. And while am eventual compromise between the two factions is most likely, this is yet another matter that the nations ham radio community will have to watch closely in the days, weeks and months ahead.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

For its part, the President's Council's proposed a sharing arrangement is similar to unlicensed devices in the broadcast bands, which use a dynamic database to check for open frequencies. However the majority House staff appears to have rejected that approach. (Adapted from TV Technology)

**

RADIO POLITICS: SARL SAYS IT SUPPORTS RSGB STAND ON BPL/PLT

Over on the other side of the world, the South African Radio League says that it supports the Radio Society of Great Britain's concerns over Access Broadband over Powerline also known as Powerline Technology. These are the internet access ports carried on unshielded in-home and powerline to home wiring.

As reported last week, the RSGB had written an official letter to the International Amateur Radio Union Region 1 Electromagnetic Compatibility Working Group. In it the U-K national ham radio society asked that the Working Group reconsider its policy on the draft European Broadband over Power Line standard. One that the RSGB claims to threaten a 38dB increase in RF pollution over much of the short wave radio spectrum.

Now, in its own public statement, the South African Radio League days that it fully supports the RSGB's views. It says that any relaxation in emission levels can have far reaching negative effects which ultimately may impact on South Africa as well. (SARL)

**

HAM RADIO IN SPACE: NEW CUBESATS NOW ON-ORBIT

What might best be called a flotilla of new cubesats operating in the ham radio bands are now on-orbit. Amateur Radio Newsline's George Bowen, W2XBS, has the details:

--

The long awaited launch of a number of new ham radio cubesats has finally taken place. The group of tiny birds winged their way to Earth orbit on September 13th on board a The Atlas 5 launch vehicle from Vandenberg Air Force Base in California.

The launch carried a satellite for the National Reconnaissance Office. Also aboard this flight at four cubesats as part of NASA's Educational Launch of Nanosatellites mission and seven cubesats for government use. The non government mini-birds include the Cubesat for Ion, Neutral, Electron, Magnetic fields that downlinks its science telemetry is in 2200 to 2300 MHz range.

Also now on-orbit is the Colorado Student Space Weather Experiment that can be heard on 437.345 MHz transmitting 9k6 modulation in AX.25 protocol. Another is CP5 also known as PolySat with its downlink at 437.405 MHz at 1 watt, AFSK on Lower Sideband in AX.25 protocol. Rounding out the set is XBN which is a Cosmic X-Ray Background Nanosatellite with its downlink 437.525 MHz running G-F-S-K also in AX.25 protocol.

Several hours after launch Justin Foley, KI6EPH, announced via the Cubesat Internet Rely Channel that all of the microsats had been successfully deployed. A detailed article of the launch can be found on-line at tinyurl.com/microsats-to-orbit.

For the Amateur Radio Newsline, I'm George Bowen, W2XBS, monitoring the sky at the North East Bureau in Albany New York.

--

A detailed article on the payloads of this mission and the reason for the launch delays can be found on-line at tinyurl.com/multi-microsat-launch. (ANS)

**

HAM RADIO IN SPACE: FIVE CUBSATS TO GO ON-ORBIT FROM ISS

The long awaited deployment of five CubeSats from the International Space Station will take place on Thursday, September 27. Four of the micro sized birds carry amateur radio payloads. These are identified as F-1, FITSAT-1, WE-WISH and TechEdSat. More about this microsat project is on-line at tinyurl.com/iss-micro-birds. (AMSAT-UK)

**

AMATEUR RADIO IN SPACE: THREE HAMS RETURN TO EARTH

Three astronauts hams have returned safely to Earth after completing a four month mission aboard the International Space Station. The Expedition 32 crew made up of American Flight Engineer Joe Acaba, KE5DAR with Russian Commander Gennady Padalka, RN3DT, and Flight Engineer Sergei Revin, RN3BS, undocked their Soyuz TMA-04M spacecraft from the orbiting space lab at 7:09 p.m. EDT. They landed in northern Kazakhstan at 10:53 p.m. EDT Sunday night.

The homeward bound Soyuz fired its orbital engines one last time at 9:56 p.m. The descent module then separated from the spacecraft and fell through the atmosphere. It then deployed its parachutes and fired landing engines shortly before touchdown to soften the impact.

The successful landing wraps up a mission that began on May 17 with the Expedition 32 crew spending 125 days in space. (ARRL, Southgate, others)

**

DXCC NEWS: ARRL APPROVES A DOZEN OPERATIONS FOR DXCC

A busy day at the ARRL's DXCC Desk with word that an even dozen operations have been approved for DXCC credit. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the newsroom with the list:

--

According to Bill Moore, NC1L at the ARRL Awards Desk, the following 2012 operations have been approved for DXCC credit. In no particular order they are the 3B8 stroke IW5ELA operation from Mauritius Island; E40VB from Palestine; JY8VB from Jordan; 9A8VB from Croatia; E7 stroke UA4WHX from Bosnia-Herzegovina; 4O7VB from Montenegro; Z38VB from Macedonia; ZA stroke UA4WHX from Albania; YU9VB from Serbia, EY8 stroke UA4WHX from Tajikistan and the UN stroke UA4WHX operation from Kazakhstan.

And that's quite a list.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

If you missed any of that you can find the entire list in this week's printed Amateur Radio Newsline report. (ARRL DXCC Desk)

BREAKING DX NEWS: N8HS SWAINS ISLAND OPERATION GOES QRT EARLY

The NH8S team on Swains Island is now QRT and is reported to be in the process of tearing down their camp. This, for a possible early departure.

Sanford Houston, K5YY, who is the DXpedition's Pilot Station. He says that the decision to go silent before the announced September 18th end of operations date was due to several factors. This included bad weather conditions, antennas that had come down, a number of operators that had fallen ill with some wounds requiring medical care.

During its stay on Swains the NH8S team has made a total of 105,455 QSOs with 26,010 Unique callsigns. Of these 43,126 were on SSB, 54,128 on CW and 8,201 made using RTTY.

Direct QSLs can be mailed to the Swains Island DXpedition, P.O. Box 5005, Lake Wylie, South Carolina. 29710, in the USA. Bureau QSLs go to AA4NN.

More information on this operation is on-line at http://nh8s.org And we will have more DX related news later on in this weeks Amateur Radio Newsline report. (OPDX)

**

RADIO CRIME: HAM RADIO EMCOMM REPEATER VANDALIZED

Steven Tidwell, KF5NDG, reports to Amateur Radio Newsline on a recent case where a repeater used for Skywarn and other ham radio emergency communications was criminally damaged. The only good news us that it appears the perpetrators have been caught. Amateur Radio Newsline's Cheryl Lasek, K9BIK has the details:

--

It all happened a few weeks ago at about 4:15 a.m. local time on August 20th. That's when the 147.12 MHz hub of the W5RHS linked repeater system in Benton, Arkansas, was taken off the air by an act of vandalism.

The repeater site is located on a water tower that sits behind a fence and locked gate. The suspects managed to break in to the site, and cut the hard-line going to the repeater and the link antennas. They also cut the coax going to the Water Association radio system. The latter is the commercial radio system communicates between the plant and the water tower.

According to KF5NDG the system owner is Kelly Hesters, whose call is W5RHS. He reportedly noticed that his repeater was off the air when he was leaving work about 7 AM. He made a stop at the repeater site and noticed a Toyota pickup truck outside the gate. He then went inside he found the damage.

The next day when he went back to see what parts and supplies he needed to get the repeater back on the air he found a key that the suspects dropped on the ground. He contacted the Saline County Sheriffs office which determined that the key belonged to the vehicle. As a result of some detective work by the local authorities the suspects in the break-in have been arrested.

Meantime W5RHS is waiting on the delivery of some new hard-line to get the repeater back on the air.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

By way of reference, the W5RHS repeater is the main hub for a multi-linked repeater system in Arkansas. This repeater

system is also very involved in Skywarn operations as well as carrying NOAA weather radio alerts. (KF5NDG)

**

ENFORCEMENT: FCC AFFIRMS $15000 NAL TO UNLICENSED MIAMI BROADCASTER

The FCC has affirmed a $15000 monetary forfeiture previously issued to Jeffrey Darius. This for his alleged operation an unlicensed transmitter in the Miami, Florida area.

Back on March 6th the Enforcement Bureau's Miami Office issued a Notice of Apparent Liability for Forfeiture to Darius after tracing an unlicensed broadcast operation on 88.7 MHz to him. To date, Darius had not filed a response to the proposed fine. As a result the forfeiture has been affirmed.

As is the custom, Darius was given the usual 30 days from the September 14th release date of the order to pay or file an appeal. (FCC)

**

RADIO BUSINESS: ICOM AMERICA ANNOUNCES NEW SUBSIDIARY IN BRAZIL

Icom America has announced the establishment of Icom Brazil. This as a subsidiary with headquarters located in Belo Horizonte which is the capital city of Minas Gerais state.

The creation of the new subsidiary will allow the radio manufacturer to solidify its brand visibility in an emerging South American market. According to the Central Intelligence Agency's "World Factbook" publication, Brazil became the world's seventh largest economy in terms of gross domestic product in 2011.

The initial objective of Icom Brazil will focus on the public safety industry with Brazil's government. The new subsidiary will also help existing distributors expand their dealer networks nationwide. (Icom, Southgate)

**

NAMES IN THE NEWS: BECKY SCHOENFELD, W1BXY, NAMED QST MANAGING EDITOR

The ARRL has announced that Book Editor Becky Schoenfeld, W1BXY, has been promoted to QST Managing Editor. A Connecticut native, Schoenfeld has more than two decades of publishing experience.

Prior to her employment at ARRL Headquarters, Schoenfeld served as Senior Editor at Teaching Kindergarten through 8th grade magazine and Senior Project Editor for textbook publisher Macmillan/McGraw-Hill. She is also the founder of Amaranth magazine which is a highly successful poetry journal.

W1BXY holds a Masters of Fine Arts from Emerson College and a Bachelor of Arts from Fairfield University. Her Amateur Radio activities include chasing grid squares in pursuit of her 6 meter VUCC award and DX hunting on 10 meters.

Schoenfeld replaces the position formerly held by Joel Kleinman, N1BKE, who died tragically in a house fire several weeks ago. (ARRL)

**

NAMES IN THE NEWS: AMSAT 2012 BOD ELECTION RESULTS ANNOUNCED

Tom Clark, K3IO, Lou McFadin, W5DID, and Gould Smith, WA4SXM, will serve on the AMSAT North America Board of Directors for the next two years. The first alternate is Mark Hammond, N8MH and the second alternate is Patrick Stoddard, WD9EWK. In all some 700 AMSAT North America members cast ballots in this year's election. (AMSAT)

**

HAM HAPPENINGS: HUNTSVILLE ARC TO ACTIVATE THREE LIGHTHOUSES

The Huntsville Alabama Amateur Radio Club says that it will be activating three light houses in Mobile Bay for Alabama Lighthouse Weekend. The event takes place beginning at 1800 Central Time on October 5th and runs through 1800 Central on the 7th. During that period the club will be on the air as N4L from the Sand Island lighthouse near the entrance to Mobile Bay, W4L which is the Mobile Point lighthouse at Fort Morgan , and K4L at the MidBay lighthouse in Mobile Bay. Operations will be on the High Frequency bands. For more information please contact the event organizer Warren Alford by e-mail to KJ4RAQ (at) comcast (dot) net. (HARC)

**

HAM HAPPENINGS UPDATE: W5KUB TO WEBCAST MFJ 40TH ANNIVERSARY

The 40th anniversary hamfest gathering of MFJ Enterprises will be streamed live to the Internet thanks to Tom Medlin, W5KUB. The event takes place October 5th and 6th from the grounds of the company's production complex in Starkville Mississippi. As reported last week, there will be all sorts of fun activities and now those hams unable to travel to the

gathering will be able to enjoy it vicariously thanks to Tom and his highly skilled video production crew. As in past webcasts Tom will be offering prizes to some of those who tune in. Updated information will be posted to Tom's Facebook webpage at facebook.com/groups/w5kub/. The on-line address to enjoy all of what looks to be a fun gathering at MFJ is simply w5kub.com. (W5KUB)

**

HAM HAPPENINGS: PACIFICON TO FEATURE NEW MEDIA AND SOCIAL NETWORKING

And an update on plans for the joint Pacificon and ARRL 2012 National Convention. A major theme this year is New Media and Social Networking. And to emphasize its importance the Mount Diablo Amateur Radio Club and Pacificon have teamed up to host "Night of the New Media Elmers" with well-known amateur radio podcasters.

At airtime, speakers scheduled to appear include Jerry Taylor, KD0BIK, Randy Hall, K7AGE, Chris Matthieu, N7ICE, and Ham Nation co-host Gordon West, WB6NOA.

Jim Siemons, AF6PU, is the event's co-General Chairman. He says that forums and seminars are the very heart and soul of Pacificon:

--

AF6PU: "Pacificon specifically is a forum driven event and we have fantastic speakers from all over the country. We've had Nobel Laureates and astronauts and all sorts of folks come out and talk about whatever you are into in amateur radio we are going to have something for you."

--

The New Media and Social Networking gathering takes place at 7 P.M. on Friday night, October 12th. The location is in the Sedona Ballroom of the Satern Conference Center at the Mariott Hotel and Convention Center in Santa Clara, California.

Pacificon has also created a Facebook page where you can post photos, videos, comments, and get up-to-date announcements about what's happening at the convention. To join it sign onto Facebook and then go to facebook.com/Pacificon2012 and click "Like" to join the page.
(MDARC, Pacificon)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: ULTRA HIGH DEFINITION TV SYSTEM EXPECTS ITU APPROVAL

The next generation of super high definition television may soon be on its way as we hear from Amateur Radio Newsline's Jim Damron, N8TMW:

--

Ultra High Definition Television also known under the acronym Super Hi-Vision, will likely be approved by the International Telecommunication Union as the next generation universal global television standard.

Developed by public broadcaster NHK at its Science and Technical Research Laboratories, Ultra High Definition Television is a system that delivers 16 times the resolution of current high definition images. The new format can deliver images with 33 million pixels through 7,680 horizontal lines and 4,320 vertical lines. It also boasts a video refresh rate of 120 frames per second, as well as 22.2 channel multi-dimensional sound.

The system is collaboration between NHK along with electronics manufacturers Panasonic and Sharp.

From Charleston West Virginia, I'm Jim Damron, N8TMW, reporting.

--

Test broadcasts are scheduled to begin in Japan by 2020. (Published News Reports)

**

RADIOSPORTS: CALIFORNIA AND PENNSYLVANIA QSO PARTIES COMING

Two of the nations most popular radiosporting events are looming on the near horizon. Amateur Radio Newsline's Mark Abramowicz, NT3V, is here with the details:

--

The first weekend of October, it's the granddaddy of all state QSO parties - the California QSO Party. It's sponsored by the Northern California Contest Club.

The action starts on Saturday, Oct. 6 and wraps up Sunday, Oct. 7.

The following weekend, Saturday, Oct. 13 and Sunday, Oct. 14, it's the Pennsylvania QSO sponsored by the Nittany Amateur Radio Club in State College, PA.

It's promoted as the "Friendly QSO Party."

Let's start right up front here.

You don't have to be a contester to take part in either of these events.

In fact, most of the operators competing in either of the parties like to hear from the many casual operators who might turn on their radios during the weekend, hear some activity, and tune up and down the HF bands offering a simple contact and, perhaps, a much needed multiplier.

So, you're just as valuable, sometimes even more valuable, than you might think.

Don't be afraid. Squeeze the mic or touch the CW paddles or the key and give a fellow ham a hand.

California's party features activity from all 58 counties in the Golden State and has special competitions for Y-Ls, youth operators, first-time contesters and even school clubs.

Club competitions are highly encouraged, so if you decide to jump in, put the name of your radio club into the entry form.

The California Party gives away a host of plaques for various operating categories, offers unique T-shirts to those who are interested, and even awards special prizes for the top 20 California and top 20 non-California single operator stations. See their website for more on that.

The following weekend, the bands get active again as operators fan out across Pennsylvania's 67 counties for a great operating event.

It's one of the few competitions where lots of non-contesters get together with friends to set up Field Day-style stations to activate some of the rare Pennsylvania counties.

There's lots of buzz in the months before the party on a reflector operated by the party organizers.

And, there are plaques and certificates awarded to contestants both within Pennsylvania and across the country. Even DX stations are recognized.

First-timers also are welcome in the PA Party. And, there are T-shirts for those who to get one.

So, is your station ready?

If you're a contester, maybe you consider each of the parties a warm-up for the fall contest competition.

If you're not a contester, get on anyway. Pick up a few counties in Pennsylvania or California, maybe a few unique call signs if you're a prefix hunter.

The bottom line: Have some fun.

We'll see you on the air!

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the California QSO Party is on line at tinyurl.com/cal-qso-party. The website for the Pennsylvania QSO Party is simply tinyurl.com/pa-qso-party. We say good luck in both contests.

(NT3V)

**

Radiosports: ARRL 2011 EME CERTIFICATES IN THE MAIL

Sean Kutzko, KX9X, who is the ARRL's Contest Branch Manager says that Certificates for the Leagues 2011 E-M-E Contest were mailed out on September 18th. Winners should see them begin to arrive shortly. Awards processing for ARRL contests can be tracked at arrl.org/plaques-and-certificates. (ARRL)

**

ON THE AIR: GB1LM CELEBRATES UL LIVERPOOL MARATHON

On the air, listen out for GB1LM which is the special event call sign for the United Kingdom's famed Liverpool Marathon. The station will be active on the High Frequency bands through October 14th. For QSL information please check GB1LM on QRZ.com. (Southgate)

**

DX

In DX, The Republic of South Sudan has issued its first amateur radio license. The call Z81A went to Jim Pratt who holds the United States call letters of K7QI. The second license issued was Z81D. It went to Diya Al Sadi, YI1DZ. Both are reportedly now on the air.

Also new, on September 17th, shortly after 1700 U-T-C, a combined group of international and local operators started operating as Z-6-zero-K from near Pristina, Kosovo on both 20 and 17 meter SSB. Operators included 9A9A, MD0CCE, OH2BH and OH2TA. Local television recorded the historic moment live on air. QSL via G3TXF.

And word that the Martello Tower Group will be activating the Island of Herm which from October 4th to the 8th. Operations will be on 80 through 10 meter SSB and RTTY. QSL via G6NHU.

Lastly ON6KE will be active as 9H3AK from Gozo Island through September 28th. His activity will be holiday style on 40, 30 and 20 meters operating about 5 watts QRP on CW only. QSL only electronically via Logbook of the World or eQSL. No printed cards will be available for this operation.

(Above from various DX news sources)

**

THAT FINAL ITEM: LAST MAN STANDING GETS SPECIAL EVENT CALL K6T

And finally this week, word from Last Man Standing Producer John Amodeo, NN6JA, that the callsign K6T has been approved for use for the shows special event operation to be held on Sunday, October 28th. NN6JA says that K6T will take to the air at approximately 9 a.m. Pacific with exact bands and frequencies to be announced as the date gets closer. And according to Amodeo, he wants this to be a fun event that everyone can share in:

--

NN6JA: "We at the show are so excited about ham radio and we have so much incredibly cool amateur radio here; not to mention some 12 licensed amateur radio operators on the staff; that we decided why not share our good fortune with hams out around America and our ham (radio) fans in particular and get on the air and talk directly to our ham (radio) fans through all of our great gear.

"So we took a few minutes, put all of our antennas on the roof so we could improve our range; tuned everything up; and we are ready to go.

"So we are hoping everybody from around the country will take a few minutes away from contesting, because that is a big contest afternoon, and come on over (to where we are operating) and call us up."

--

NN6JA says that the current plan is to operate on the High Frequency, VHF and UHF bands as well as D-STAR, Echolink and IRLP. This should make it possible for hams anywhere to make contact with K6T.

--

NN6JA: "We are going to provide a large number of paths for people to get in so we kind of feel that everyone in the country should be able to find some path to get to our stage (ham radio operation) to talk to our crew and the PAPA members who are helping us out."

--

According to Amodeo, members of the LA based PAPA System will assist the licensed operators who are part of the shows the crew in running the event. They will use several PAPA System repeaters to run its local and linked communications. The operators will also be monitoring other linked repeater systems from around the country as well.

As the day approaches further information will be posted on Facebook at www.facebook.com/KA0XTT. Amodeo also says to monitor @nn6ja on Twitter for the fastest updates.

Last Man Standing stars actor and comedian Tim Allen as Mike Baxter, KA0XTT. The show airs on ABC.

HAM RADIO IN SPACE: DEDICATED CUBESAT DOWNLINKS FOR
DISCUSSION AT WRC-18

IARU Secretary Rod Stafford, W6ROD, reports that the
International Amateur Radio Union's Administrative Council
will meet in the next 45 days to address the agenda items
for the 2015 World Radiocommunication Conference. Planning
for the dedicated spectrum for university research cubesats
will begin at that gathering, but the actual allocation of
frequencies may not occur until the 2018 World
Radiocommunication Conference.

In an article posted on the ARRL web, Stafford noted, "A lot
of radio amateurs are aware of the increasing use of amateur
spectrum by small satellites, mainly by universities. It is
becoming an increasingly difficult situation to accommodate
the number of small, non-commercial satellites within the
amateur bands. These education-based satellites do not
really fit within the definition of the Amateur Radio
Service, but have been accommodated there.

According to W6ROD, these small birds are categorized as
nano-satellites weighing between 1 to 10 kilogram and pico-
satellites weighing less than 1 kilogram. The International
Telecommunications Union is trying to deal with this issue
in an orderly manner and a `preliminary' WRC-18 agenda item
is to consider whether these satellite operations can be
accommodated in an already crowded radio spectrum is being
researched.

Stafford concludes by noting that as these issues develop, the IARU will keep its Member-Societies, such as the ARRL, aware of developments with an eye to building the best strategy to deal with those agenda items in a way that is most favorable to the Amateur Radio Service.

You can read the full article, including many other IARU agenda items at tinyurl.com/looking-at-tinysats. (ANS, ARRL)

RESCUE RADIO: UK PARISHES ABANDONING EMCOMM SYSTEM FOR CELLPHONES AND RAYNET

An emergency radio system that has provided a lifeline to Heathfield in the United Kingdom for 25 years is to be scrapped and to be replaced by cellular telephones. But users of the ageing service have criticized the decision to rely on patchy mobile phone service in an emergency. Bill Pasternak, WA6ITF, has the details:

--

That's right Jim. It is supposed to go away and here's why.

The radio system was created back in 1987 after what has been called the Great Storm. Six parishes still have the gear in service to use emergency situations.

But the district council now wants to abolish them because they are too expensive to maintain. The council pays 3,600 British Pounds a year to maintain the radio gear and a repeater that they are used through.

Parish councilor Bob Wood who has one of the old radios. He says that while thee gear my be old and possibly inadequate for what they want, that doing away with them is silly. He notes that mobile phone networks can only hold a certain number of calls at a time if an emergency happens.

But according to Jim van den Bos, of the District Council, the Wealden emergency radio network radio equipment is now old, less reliable and more difficult to repair. He says that last year a survey of parishes was conducted asking which had been active in the network over the past three years. Out of the 15 who took part, only seven were in favor of continuing.

So what will happen when the old emergency radio system falls silent? According to van den Bos it will likely be ham radio that will be used to augment the cellular network. In a statement he said that the council supports local members of a network of amateur radio users called RAYNET who are willing to respond in an emergency.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

RAYNET in the UK would be quite similar to a combined RACES and ARES here in the United States. (Sussix Courier, Northcliff Media, Southgate)

**

RADIO LAW: OFCOM LIFTS TEMPORARY SPECTRUM RESTRICTIONS ON UHF AND SHF BANDS USED FOR OLYMPICS

UK telecommunications regulator Ofcom has announced that as of midnight on September 23rd, temporary operating restrictions on parts of the 70 centimeter and several microwave bands have come to an end. The restrictions on spectrum usage by British radio amateurs had been put in place to permit use of several spectral parcels in relation to the now conceded 2012 London Summer Olympic and Paralympic Games. (RSGB)

**

BREAKING DX NEWS: KOSOVO NOW OFFICIALLY ON THE AIR

The Republic of Kosovo is now officially on the air. Station Z-60-K near Pristina commenced amateur radio operation shortly after 1700 UTC on September 17th. The call had been issued to the club station of the Amateur Radio Association of Kosovo. For this operation QSL via G3TXF or using ClubLog.

It has to be noted that as Kosovo is not yet a member of the United Nations nor does it have an assigned callsign block allocated by the International Telecommunications Union, it does not meet the established requirements of the ARRL's DXCC program at this time. However CQ has recognized Kosovo as a separate entity for its award and contest programs since 2007. More is on line at www.art-ks.org (DXNL, CQ Newsroom)

**

DX SPECIAL: AZORES 9 ISLANDS HUNT SEPT 29 - 30

While short notice, all nine of the Azores islands will be operational from 12:00 UTC on Saturday, September 29th through 12:00 UTC on Sunday September 30th. This a part of the Azores 9 Islands Hunt operating event.

Callsigns to be used are CU1ARM from Santa Maria; CU2ARA from San Miguel; CU3URA on Terceira; CU4ARG from Graciosa; CU5AM on Sao Jorge; CU6GRP on Pico; CU7CRA from Faial;

CU8ARF on Flores and CU9AC operating on Corvo.

Operations on CW will be from 7.000 to 7.015, 14.050 to 14.065 and 18.080 to 18.090 MHz. SSB phone operations will be found on 7.175 to 7.195, 14.250 to 14. 275 and 18.120 through 18.135 MHz.

But that's not all. Those holding a QSO with at least 5 different islands will have a corresponding number of tickets placed into a lottery for a free trip to the Azores. Additionally, the first 25 operators making QSOs with all 9 islands will be eligible for a second lottery.

All QSOs will be confirmed through the bureau network with special full-color cards. Direct QSL requests via CU2CE. More information on this activation and trip give-away is on-line at azores-islands-hunt.com. And we will have more DX related news at the end of this weeks Amateur Radio Newsline report. (OH2BH)

ENFORCEMENT: YET ANOTHER FLORIDA UNLICENSED BROADCASTER BUSTED BY THE FCC

From the seemingly never ending Florida unlicensed radio station scene comes word that the FCC's Miami Office has issued yet another Notice of Apparent Liability to Monetary Forfeiture. This time the recipient of a proposed $10,000 fine is Burt Byng of Miami who the regulatory agency claims operating an unlicensed radio transmitter on the frequency 107.1 MHz. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

By way of background, this past February 9th agents from the Enforcement Bureau's Miami Office T-hunted the source of a signal on the 107.1 MHz to a transmitting antenna mounted on the roof of a commercial property in Miami. The agents determined that the signals on 107.1 MHz exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license. While monitoring the transmission, the agents also heard the station identify

itself on the air as "WEROC Radio." Commission records showed that no authorization was issued to Burt Byng or to anyone else for operation of an FM broadcast station at or near this address.

On the same date, agents from the Miami Office, accompanied by the property owner, inspected the unlicensed station's antenna and transmitter located on the rooftop of the commercial building. According to information provided by the property owner, a company called J & B Enterprise US, Inc. was the tenant of the particular area where the transmitting equipment was located.

The property owner provided a copy of Burt Byng's driver's license and identified him as the individual who rented the rooftop space. According to Florida records, Byng is the President of an inactive business named "J & B Enterprises US, Inc."

While researching the matter the agents also discovered that Mr. Byng registered the domain name, ww.werocradio.com, a webpage for "WEROC Radio." The agents also noticed that the phone number listed in the domain registration was the same phone number listed on in the information provided by the property owner.

In issuing the $10,000 NAL the FCC says that it finds that the record evidence in this case is sufficient to establish that Burt Byng violated Section 301 of the Act by operating radio transmission equipment without the required Commission authorization. As such he is liable for the proposed fine.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles

--.

As is usual, Byng was given the customary 30 days to pay the $10,000 NAL or to file an appeal. (FCC)

**

RADIO LAW: FCC EXTENDS COMMENTARY DEADLINE ON MD DOCKET 12-201

The public as well as concerned industries have been given more time to tell the FCC what they think of the agency's process for collecting regulatory fees as outlined in MD Docket 12-201. Originally, comments on commission proposals to reform the way in which it evaluates the regulatory fees for the industries it regulates were due by September 17th. While that date has passed, the agency has announced that the new commentary cutoff date is October 9th, with reply

comments due by October 23rd.

The FCC also says that it would also like to receive comments on a recent report from the Government Accountability Office. That report is titled "The Federal Communications Commission Regulatory Fee Process Needs to Be Updated." In that document the Accountability Office observes, among other things, that the commission's regulatory fee, Notice of Proposed Rulemaking proposes some fundamental changes to FCC's regulatory fee program that relate to many of the concerns raised in its report. (FCC, RW)

**

HAM HAPPENINGS: LAST MAN STANDING K6T SPECIAL EVENT CANCELLED

The highly publicized Last Man Standing K6T operating event will not take place. This according to the television shows Producer John Amodeo, NN6JA.

The thank you to the ham radio community had been slated to happen on Sunday, October 28th. According to Amodeo the decision to cancel was based on concerns about a possible violation of FCC Regulation 97.113(a)(3).

For those not aware, this rule bars any communications using ham radio in which the station licensee or control operator has a pecuniary interest. It also precludes any communications on behalf of an employer.

In making the announcement Amodeo notes that while everyone involved with the planned operation are very disappointed with the cancellation of what would have a fun, one of a kind event, that as a licensed radio amateur and producer of broadcast programs, compliance with FCC rules must take precedence.

Special event station K6T would have worked hams from around world on HF, VHF, UHF, D-STAR and IRLP. While that's not going to take place the good news is that the ham station that is a part of the set of Last Man Standing will remain and continue to be a part of the shows ongoing plot line. (NN6JA)

**

PUBLIC SERVICE: HAM RADIO AT THE USAF MARATHON

David Crawford, KF4KWW, reports that over fifty amateur radio operators from all over the greater Dayton, Ohio. area and coming from as far away as Detroit, Michigan, recently converged on Wright Patterson Air Force Base. This, support

the 2012 United States Air Force Marathon held on Saturday, September 15th.

Ham radio operators provided emergency and logistic communications between the race director and his staff. They also assisted with communications to the hydration stations positioned throughout the course.

The United States Air Force Marathon is described as a world class event with over 15000 participants registered and another estimated 15000 volunteers and spectators in attendance. Amateur radio operators were indispensable in communicating information on runner's locations and status, weather heat indexes settings, severe weather notifications and logistic issues.

Robert Aguiar is the marathon Race Director. He says that the senior base leaders of the event have come rely on the communication skills of the amateur radios operators and use them a as a vital resource. He adds that this race would be extremely difficult if not impossible to accomplish without their support and dedication. More about this event is on-line at www.usafmarathon.com. (KF4KWW)

**

HAM HAPPENINGS: AMATEUR RADIO TO ASSIST AT VK NATIONAL FUN FLIGHT DAY 2012

Amateur Radio will once again be a part of Australia's National Fun Flight Day this coming November 4th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has the details:

--

National Fun Flight Day is an event staged by Australian flying clubs to provide pleasure flights for children and families touched by adversity. Amateur radio began its association with this event back in 2011. Thats when the Victoria-based Midland Amateur Radio Club and its station VK3CMZ were invited to participate in the National FunFlight Day by the Bendigo Flying Club. The Midland Club was more than happy to oblige and an operating High Frequency, VHF and UHF station was set up at the event site. A handheld in a plane also provided communication back to children on the ground.

The operation was deemed a major success and the Midland Committee saw it as a worthwhile national amateur radio event. So it then approached the FunFlight manager regarding other amateur clubs' participation. The result of the meeting was very positive and contact information has now been provided to participating flying clubs so that they

can contact their nearest amateur radio club.

For the amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

More event information on this fun in the sky event down-under is on-line at www.funflight.org. (Midland Amateur Radio Club)

WITH ARNEWSLINE: ARNEWSLINE FACEBOOK PAGES BREAKS 1000 BARRIER

The Amateur Radio Newsline fan page on Facebook has just passed the 1000 subscriber point. In fact, as we go to air, the number of members subscribed stands at 1004.

The page is managed for Amateur Radio Newsline by James Pastorfield, KB7TBT, who devotes a lot of time and energy to it. So as we pass the 1000 mark and hopefully head toward 2000 or more, we want to pause to thank KB7TBT for his volunteerism in making the page possible and to all of you who contribute to it.

If you are on Facebook but have not yet joined the Amateur Radio Newsline family, you can find us there at by simply typing Amateur Radio Newsline in the blue Facebook search line. We would love to have you there with us. (ARNewslineT)

**

NAMES IN THE NEWS: BILL TYNAN W3XO TO RECEIVE RCA BARRY GOLDWATER AWARD

The Radio Club of America has announced that former AMSAT North America President Bill Tynan, W3XO, is to be the recipient of its 2012 Barry Goldwater Amateur Radio Award. The award recognizes Tynan's lifelong service to the public through amateur radio.

The award will be presented to W3XO at the club's annual awards banquet in New York on November 16th. ARRL Chief Executive Officer Dave Sumner, K1ZZ, will be the keynote speaker at the event. (RCA, W2RS)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline

with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

THE CHANGING OF THE GUARD: WIA PRESIDENT MICHAEL OWEN, VK3SI - S.K.

The changing of the guard in our service continues. This, with the sad news that Michael Owen, VK3KI, the Chairman of Region III of the International Amateur Radio Union and President of the Wireless Institute of Australia has became a Silent Key.

Owen's sudden passing came after suffering what is only being described as a medical condition at his home on Saturday, September the 22nd.

During his many volunteer years, Owen, who was age 75 at the time of his passing, participated in many IARU committees and had been a member of the IARU Observer Team at a number of World Radiocommunication Conferences. He served as IARU Vice President from 1989 to 1999 and is perhaps best remembered for his work on a package of revisions to the international Radio Regulations. These were specific to the Amateur Radio and Amateur Satellite services and presented at the 2003 World Radiocommunications Conference.

Michael Owen, VK3KI, is survived by his wife Nan, and his two daughters. His funeral was to be held on Friday, September 28th at St Andrews Anglican Church in Brighton. Australia. Condolence messages can be sent via the Wireless Institute of Australia by e-mail to condolences (at) WIA (dot) org (dot) au or direct to the surviving family members at PO Box 2042, Bayswater, Victoria 3153 Australia. (WIA, VK6POP)

**
WORLDBEAT: NEW FOCUS FOR RADIO NETHERLANDS WORLDWIDE

The Board of Supervisors of Radio Netherlands Worldwide has appointed William Valkenburg as editor-in-chief. This, effective January 1st of 2013.

According to the announcement, Valkenburg will set out the new course for the organization with the recently appointed director general Robert Zaal. The broadcaster will focus on free speech in countries where press freedom is limited and Valkenburg will take responsibility for journalism within the organization.

As of 2013, Radio Netherlands Worldwide's main focus will be on Africa, and the Arab World, as well as countries such as China, Cuba and Venezuela. (RW)

**

WORLDBEAT: FRENCH POLYNESIA GETS BROADBAND ACCESS

Another remote area of the world is now on-line. Amateur Radio Newsline's Skeeter Nash, N5ASH, has the details:

--

High speed Internet access has come to the islands of the South Pacific. This with word that OmniAccess has expanded its network coverage in the remote French Polynesian islands.

The news follows the company's investment into the opening of a high-capacity network on the Intelsat 18 satellite that first became operational in November 2011. This provides the capacity to enable enhanced broadband internet coverage and network services via Ku-band coverage platform to that isolated part of the world.

As a result, for the first time private yachts, charter yachts and commercial vessels cruising in the region can now benefit from high quality uninterrupted broadband connectivity via the new high speed service.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH, reporting.

--

More on this new service can be found by going to www.noonsite.com and using the search engine at that website. (noonsite.com via K4CPX)

**

EMERGING TECHNOLOGY: DARC AND GERMAN NSI COLLABORATE ON FIELD STRENGTH ARTICLE

The National Standards Institute of Germany in cooperation with the Deutscher Amateur Radio Club have jointly authored an article on the calibration of field strength monitors that has been published in the publication Advances in Radio Science'. The article covers a detailed description of a possible calibration setup including uncertainty calculations. You can download an abstract and the full article at tinyurl.com/field-strength-monitors. (DARC)

**

HAM HAPPENINGS: WESTERN STATES VHF/UHF WEAK SIGNAL NET ON SUNDAYS

The Western States VHF/UHF Weak Signal 75m Net meets every Sunday on 3.920 MHz at 17:30 Pacific Daylight Time. This net is a wide ranging discussion dealing with all aspects of VHF to microwave building, contesting, and operating. More about this weekly gathering is on-line at www.weaksig.net (N8DEZ)

**

DX

In DX, G0VJG will be operational stroke 3A from Monaco between October 1st and the 5th. His activity will be on the High Frequency bands using 100 watts on SSB only. QSL via G4DFI.

A multi-national team is on the air from Conway Reef in the South Pacific Ocean. They plan to be there through October 5th using the callsign will be 3D2C. Their QSL manager is YT1AD.

DL7VSN will be active from Tanzania through October 13th. His operation will be from two locations using the 5H1HS from Zanzibar Island and 5H1HS/3 from Lazy Lagoon Island. Activity is expected on 160 through 10 meters using mainly CW and RTTY. QSL via his home callsign. More about his operation is on-line at Visit his Web page at www.qsl.net/dl7vsn

Lastly word that DJ7RJ who was expected to be active stroke FR from Reunion Island between September 26th and October 21st, has announced he had to cancel his trip. No reason for the cancellation was given.
(Above from various DX news sources)

**

THAT FINAL ITEM:

And finally this week, hidden transmitter hunters held their world championships this month and hams from the USA came home with more medals than ever. Amateur Radio Newsline's Joe Moell, K0OV, the details.

--

Every two years, on-foot hidden transmitter hunters get together to see who is best in the world. The Sixteenth World Championships of Amateur Radio Direction Finding, or ARDF, took place at a ski resort in the mountains of central Serbia. In these big forests, about 330 foxhunters from 33 countries searched for transmitters on two meters and 80

meters using direction finding gear, maps, and compasses, but no GPS. USA was represented by nine men and four women from six states. They ranged in age from 27 to 71.

In previous world championships, USA has won no more than two medals, and no golds. But this year, the team members packed thirteen medals into their suitcases, including four golds.

Standing on the medal podium and hearing the Star-Spangled Banner the most times was Bob Cooley KF6VSE of Pleasanton, California. He won two golds in the division for men over age 70 in the World Cup competition for individuals and another gold for his two-meter run during the main ARDF competitions. Also winning a playing of our national anthem was Vadim Afonkin KB1RLI of Newton, Massachusetts, who was this year's Team Captain. His gold medal was in the 80-meter ARDF competition.

Other Team USA members on the podium included Jay Hennigan WB6RDV of Goleta, California, who was a silver medalist on 80 meters. Winning bronze in their divisions on that band were Alla Mezhevaya of Loves Park, Illinois, Ruth Bromer WB4QZG of Raleigh, North Carolina and Karla Leach KC7BLA of Bozeman, Montana.

Team USA members earned their right to go to Serbia by medaling in the USA ARDF Championships this June at Mt. Laguna, California and in earlier US championships.

You can read more about Team USA and the ARDF World Championships at www.homingin.com. There are plenty of photos, plus links to the complete results. That's homingin, as one word, homingin.com.

From southern California, where ARDF activities take place all year long, this is Joe Moell, K0OV, for the Amateur Radio Newsline.

--

Again, more information is on-line at www.homingin.com. And "homingin" is spelled as one word. (K0OV)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's WIA News, that's all from the Amateur Radio Newsline[TM]. CLAIM: OBAMA HID "GAY LIFE" TO BECOME PRESIDENT
Chicago homosexual community shocked he could keep it secret

A prominent member of Chicago's homosexual community claims Barack Obama's participation in the "gay" bar and bathhouse scene was so well known that many who were aware of his lifestyle were shocked when he ran for president and finally won the White House.

"It was preposterous to the people I knew then to think Obama was going to keep his gay life secret," said Kevin DuJan, who was a gossip columnist in Chicago for various blogs when Obama was living in the city as a community organizer and later a state senator.

"Nobody who knew Obama in the gay bar scene thought he could possibly be president," said DuJan.

DuJan, founder and editor of the Hillary Clinton-supporting website HillBuzz.org, told WND he has first-hand information from two different sources that "Obama was personally involved in the gay bar scene."

"If you just hang out at these bars, the older guys who have been frequenting these gay bars for 25 years will tell you these stories," DuJan said. "Obama used to go to the gay bars during the week, most often on Wednesday, and they said he was very much into older white guys."

"If you just hang out at these bars, the older guys who have been frequenting these gay bars for 25 years will tell you these stories," DuJan said. "Obama used to go to the gay bars during the week, most often on Wednesday, and they said he was very much into older white guys."

Obama, DuJan said, is "not heterosexual and he's not bisexual. He's homosexual."

Investigative journalist Wayne Madsen, who worked with the National Security Agency from 1984 to 1988 as a Navy intelligence analyst, confirmed DuJan's claims.

"It is common knowledge in the Chicago gay community that Obama actively visited the gay bars and bathhouses in Chicago while he was an Illinois state senator," Madsen told WND.

WND also spoke with a member of the East Bank Club in Chicago, who confirmed Obama was a member there and was known to be a homosexual. The upscale fitness club, which has some 10,000 members, is not a "gay" facility. But it's one of a number of places identified by the Chicago homosexual community as a "gay gym," where homosexuals meet and engage in sexual activity.

In April, WND reported a federal judge dismissed a libel case against Larry Sinclair, a homosexual who claimed Obama's 2008 presidential campaign had paid to rig a polygraph test regarding Sinclair's sensational charge that he had sex and used cocaine twice with Obama while Obama was an Illinois state senator. Sinclair tells his story in "Barack Obama & Larry Sinclair: Cocaine, Sex, Lies & Murder."

WND also reported former radical activist John Drew has said that when he met Obama when Obama was a student at Occidental College, he thought Obama and his then-Pakistani roommate were "gay" lovers.

In addition, rumors have swirled around Obama's relationship with his personal aide and former "body man," Reggie Love, who resurfaced on the eve of the Republican National Convention to support his old boss. Love resigned from the White House in November 2011 after compromising photographs of him as a college student received wide circulation.

WND also has documented in two separate articles, here and here, that Obama wore a gold band on his wedding ring finger from the time he attended Occidental College through his student days at Harvard Law School.

DuJan said that during Obama's first presidential campaign, "there was fear in the gay community" about talking openly about Obama being homosexual, particularly after the murder in December 2007 of Donald Young, the openly gay choir director at Jeremiah Wright's Trinity United Church of Christ, who was known to be a close friend of Obama.

"People did not want to talk openly about Obama being gay," he said.

"Then, when we saw how Larry Sinclair was demonized, anybody who would expose Obama worried they would be silenced if they dared to speak the truth about Obama's gay life," DuJan said.

"Obama's secrets"

DuJan said he has been told "Obama's secrets would have to come out just like John Edwards" secrets came out."

He said Obama stopped going to gay bars and bathhouses in Chicago when he began running for the U.S. Senate in 2004.

�Back then, Obama could walk around Chicago and people generally wouldn�t recognize him, even though he was a state senator in the Illinois assembly at the time,� DuJan said.

DuJan insisted that while he�s a supporter of Hillary Clinton, he holds no personal animus toward Obama. He said he campaigned for Clinton in 2008 �because I had waited for years for her to be able to run.�

�I opposed Obama not because I�m a racist, or that I hate Obama, I just knew the type of person Obama associated with in Chicago,� he said.

He pointed to Obama�s association with convicted Chicago real estate magnate Tony Rezko, Nation of Islam leader Louis Farrakhan and Rev. Wright.

�Obama was a dirty politician that the media never wanted to vet � that�s what concerned me about Obama,� Du Jan said.

DuJan spoke further of his claims about Obama in an interview Monday night on Andrea Shea King�s show on BlogTalkRadio.com, which included questions from WND during the last half of the show.

Man�s Country

Madsen published an article in his Wayne Madsen Report in May 2010 claiming Obama and Chicago Mayor Rahm Emanuel were members of the same bathhouse in Chicago.

�President Obama and his chief of staff Rahm Emanuel are lifetime members of the same gay bathhouse in uptown Chicago, according to informed sources in Chicago�s gay community, as well as veteran political sources in the city,� Madsen wrote.

He said the bathhouse, �Man�s Country,� catered �to older men,� noting �it has been in business for some 30 years and is known as one of uptown Chicago�s �grand old bathhouses.��

Madsen wrote his 2010 report after traveling to Chicago to interview bartenders and customers at several �gay� bars.

DuJan gave WND a list of �gay� bars in Chicago where older customers hang out and tell stories about how Obama, prior to 2004, frequented visited to pick up men for sex, including several on Halstead Street, widely known as an �uber-gay Chicago street.

Writing in HillBuzz.org Tuesday, DuJan said rooms at Man�s Country bathhouse are still referred to as the �presidential suite,� or the �Oral Office,� because �the current President used to haunt the place when he was a just another Illinois state senator that no one had ever heard of or cared about.�

DuJan said he believes that, someday, ﷺall of this is going to be as public knowledge as JFKﷺs affair with Marilyn Monroe and the other women he cavorted with while married to Jackie.ﷺ

ﷺSomeday,ﷺ he said, ﷺin the next 10-20 years, everyone will know all about Manﷺs Country, and the place will no doubt get a plaque of sometime commemorating that place as a gay hangout for the future leader of the free world.ﷺ

ﷺﷺﷺﷺﷺﷺﷺ

The wire going to the transistor is the input for the receive pre-amp.
At least that's what it appears to be. So you are correct in it being
attached to a NC terminal per your schematic.

If you look at your schematic you'll see that there is one connection
between relay 1 and 2. Now look at your picture of
relay 1. You'll see Pin 11 contains a wire that runs to the relay 2,
and pin 4 of relay 1 contains a wire that runs to relay 2. One of
those pink wires (pin 4) is attached to a diode across the relay and
can be discounted as being part of your supplied schematic. So you
have one common connection between the two relays left, and that is
pin 11 of relay 1.

Attach the black wire to pin 11 of relay 1.

After a closer inspection of your picture there is also a white wire
next to pin 12 of rely 1 that is a possible connection for the black
wire. There isn't enough information to determine which of the two is
correct. Try a magnifying glass and see which of the two connectors
looks like it had the black wire attached to it

HAM RADIO IN SPACE: 200 MICRO HAM BIRDS TO BE LAUNCHED IN ONE MISSION

Two hundred tiny ham radio satellites will be going into space in the not to distant future. The project is called KickSat and we have more in this report.

--

KickSat is an amateur radio CubeSat technology mission designed to demonstrate the deployment and operation of prototype Sprite or tiny ChipSats developed at Cornell University. The KickSat spaceframe is a CubeSat being built to carry and deploy 200 Sprites that will provide an avionics bus that will provide power, communications, command and data handling functions. It will be mated with a 2 unit deployer that has been developed to house the Sprites.

Approximately 200 Sprites will be stacked atop a spring-loaded pusher and secured by a nichrome burn wire system. Once on-orbit, the wire burns away the Sprites will spring out into space.

As to the Sprites, these are tiny spacecraft that includes power, sensor, and communication systems. Its built on a printed circuit board measuring 3.5 by 3.5 cm with a thickness of 2.5 mm and a mass of about 5 grams. The Sprite is intended as a general purpose sensor platform for micro-electro-mechanical or other chip-scale sensors with the ability to downlink data to ground stations from Low Earth Orbit.

After deployment, telemetry and sensor measurements from the individual Sprites will be received through Cornell's ground station in Ithaca, New York, as well as several other amateur radio ground stations around the world. The Sprites are expected to re-enter the atmosphere and burn up

within a few days or weeks depending on atmospheric conditions. Their best case maximum orbital lifetime is estimated at 6 weeks.

The development team is currently investigating uses for the KickSat spaceframe after the Sprite deployment and is seeking collaborators who could make use of its capabilities as part of another extended mission.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in the Studio in Los Angeles.

--

ChipSats like these Sprites represent a new technology that will both open space access to hobbyists and students and enable new types of science missions. A significant portion of KickSat has been financed by over 300 individual sponsors through a funding website. More is on-line at www.spacecraftresearch.com/KickSat. (KickSat)

WORLDBEAT: RAC WINS 5 YEAR EXTENSION FOR HAM RADIO FROM ONTARIO DISTRACTED DRIVING LAW

Some good news for hams living north of the United States and Canadaian border. Radio Amateurs of Canada says that it has received written confirmation from Minister Bob Chiarelli of the Ontario Provincial Government regarding a five year extension of exemption for radio amateurs to the Ontario province distracted driving law.

In his letter, Minister Chiarelli explains that the current exemptions for both Amateur Radio and Two Way Commercial Radios will be extended until January 1st, 2018. He also expresses his hope that in that time commercial hands free alternatives will be found for two way radios.

While Radio Amateurs of Canada says that it finds victory in the five year extension, it also says that a permanent solution is desired. As such it will continue to pursue a permanent exemption for amateur radio operators in Ontario provance.

Similar exemptions already exist in many other provincial jurisdictions in Canada. This, thanks in part to the efforts of local amateurs and Radio Amateurs of Canada's national strategy to address distracted driving legislation. (RAC, VE4WO)

**

THE BPL FIGHT: EUROPEAN PARLIAMENT MEMBERS QUESTION INTERFERENCE FROM PROPOSED OPLT STANDARD

Ham radio operators in the UK have some new allies in their fight against a proposed pan-European Power Line Technology or PLT standard and the interference it could cause to broadcast as well as shortwave radio reception. This as questions are raised by two legislators it in the European Parliament about it. Amateur Radio Newsline's Jim Meachen,

ZL2BHF, reports:

--

Syed Kamall is a Member of the European Parliament or MEP representing the city of London in the UK. He says that he has been contacted by several of his constituents who are concerned about a proposed standard for power line transmission devices. According to MEP Kamall, these constituents believe that if this standard is approved, the level of interference to all broadcast radio reception would increase to a level making it impossible to listen to a radio.

Those concerned explained to him that in 2011 a power line telecommunications electromagnetic compatibility standard was proposed by the European Committee for Electrotechnical Standardization. Kamall's constituents allege that the proposed standard was rejected by a majority of the National Standards Committees while many suggested improvements to the proposed standard. Some comments reaching him questioned the very high radio pollution levels that would be permitted from these devices, while other suggestions were aimed at improving the test methodology.

MEP Kamall goes on to note that while a revised version of the PLT standard is about to be circulated, his constituents believe it to be identical to the previously rejected standard, and that it rejects the suggestions from the National Standards Committees. Also that his constituents claim that representatives of PLT equipment manufacturers dominate the Working Group that wrote the proposed standard and are lobbying National Standards Committees to support that standard. This is because it would provide a legal basis for high PLT emission levels.

MEP Kamall is joined in his concern by Sir Graham Watson who is the Member of the European Parliament for South West England and Gibraltar. MEP Watson notes that his constituents also tell him that even though the Commission's Electromechanical Committee advisor has been notified that the proposed PLT standard does not meet the essential requirements of the EMC Directive, that the European Committee for Electrotechnical Standardization has ignored this advice. Also that it will continue to push the proposed PLT standard to be voted by the National Standards Committees. He then notes that concerns have been expressed that the possible new PLT standard may not be compliant with European Commission law.

Both legislators want to know if the Commission shares the concerns of their respective constituents over the proposed PLT Electromagnetic Compatibility standard. MEP Syed Kamall is even more direct. He asks that if the European Committee for Electrotechnical Standardization approves the proposed standard, is the Commission able to block it, and will it do so until it is deemed to meet the requirements of the EMC Directive?

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, down-under in Nelson, New Zealand.

--

In his questions to the European Parliament Sir Graham Watson asks if the Commission confident that the new standard will satisfactorily comply with the European Union rules as set out in the EMC Directive? He also wants to know what dialogues have Commission officials held with European Committee for Electrotechnical Standardization to ensure compliance. Meantime the UK ham radio community awaits replies to both of these inquiries. PLT in the Europe is very similar to what we call in-home access BPL here in the United States. (Southgate, UKQRM, others)

**

WORLDBEAT: ACMA ISSUES SPECIAL TRIBUTE TO MICHAEL OWEN, VK3KI - S.K.

The Australian Communications and Media Authority has issued a special tribute to Wireless Institute of Australia President and IARU Region 3 Chairman, Michael Owen VK3KI, who died unexpectedly Saturday, September 22nd.

According to the news release, the Australian Communications and Media Authority was saddened to hear of the death of Michael Owen. He was responsible for significant reform of the Wireless Institute of Australia, was well known across the A-C-M-A and had worked closely with many staff on a range of issues, including several meetings and discussions in recent weeks.

The release ends by stating that the Australian Communications and Media Authority extends its condolences to the amateur community that Michael so tirelessly and effectively represented, as well as to his friends and family. (ACMA)

RESCUE RADIO: NTIA ASKS FOR COMMENT ON CREATION OF FIRSTNET

The National Telecommunications and Information Administration, better known by the acronym NTIA has issued a notice of inquiry. This, seeking comment on how it should set up a nationwide, interoperable public safety broadband network that it calls FirstNet. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

By way of background, this past February Congress enacted The Middle Class Tax Relief and Job Creation Act of 2012. One of its provisions was to create a nationwide interoperable broadband network that will help police, firefighters, emergency medical service professionals and other public safety officials to keep in contact with one another during extreme emergency or disaster situations.

The law's governing framework for the deployment and operation of this network, which is to be based on a single, national network architecture, is the new "First Responder Network Authority" or FirstNet. This is an independent authority within NTIA.

FirstNet will hold the spectrum license for the network. It will also be charged with taking all actions necessary to build, deploy, and operate the network. This, in consultation with Federal, State, tribal and local public safety entities, and other key stakeholders.

The NTIA has given the public until November 1st to comment on the conceptual architecture of such a network as outlined at the first FirstNet board of directors meeting that was held on September 25th. It also is seeking input on a business plan and on developing applications for public safety users.

Comments to the NTIA on this proposed first responder system can be e-mailed to firstnetnoi (at) ntia (dot) doc (dot) gov.

For the Amateur Radio Newsline I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

More about the proposed FirstNet system is on line at www.ntia.doc.gov/category/public-safety. (NTIA, B&C)

COMMUNICATIONS HAPPENINGS: NAB PUTS OUT CALL FOR NAB 2013 PAPERS

The 2013 National Association of Broadcasters convention is accepting technical paper or session proposals until October 19th. This for presentation at its gathering slated for next April 6th to the 11th at the Las Vegas Convention Center in Las Vegas, Nevada.

Submissions must relate to the creation and distribution of media and filmed entertainment. Conferences scheduled so far include Broadcast Engineering, Broadcast Management, Cloud Computing, Creative Master Series, Disruptive Media and Military and a Government Summit.

If you have a presentation that you feel might qualify, take your web browser to tinyurl.com/nab-presentations-2013 and read the page titled Speaking Opportunities. (NAB)

**

HAM HAPPENINGS: AA7BQ ANNOUNCES SERVER UPGRADES AT QRZ.COM

Some improvements at QRZ.com. Fred Lloyd, AA7BQ, reports that he has added an additional server to the QRZ system and moved a few things around to improve performance for all users. Among the changes are that all servers have been upgraded to the latest Ubuntu Linux Edition 12.04. Also, various functions have been interchanged between the various cloud servers that host QRZ.com at Amazon Web Services.

AA7BQ says that so far the performance looks really great on all parts of the system. He notes that the callsign server, which was routinely at 90% busy now loafs along at around 50%.

You can read about all the changes made by taking your web browser to tinyurl.com/qrz-improved-service. (QRZ.com)

**

HAM HAPPENINGS: ARRL INTERNATIONAL HUMANITARIAN AWARD NOMINATIONS SOUGHT

Nominations are open for the 2012 ARRL International Humanitarian Award. The award is presented to an amateur or group of amateurs who demonstrate devotion to human welfare, peace and international understanding through amateur radio. Full details on the nomination process can be found at www.arrl.org/international-humanitarian-award. (ARRL)

**

NAMES IN THE NEWS: SUNITA WILLIAMS KD5PLB IS NEW COMMANDER OF THE ISS

Turning to names in the news. NASA astronaut Sunita Williams, KD5PLB, who holds the record for the longest spaceflight by a woman, is the new Commander of the International Space Station. Williams took over the leadership role on Saturday September 15th becoming only the second female commander in the orbiting lab's 14-year history.

Sunita Williams is a captain in the U.S. Navy and flying on her second long-duration space mission. She first launched into space in 2007 and spent 195 consecutive day's on-orbit and setting a record for the longest single spaceflight by a female astronaut.

Williams launched to the station in July. She will command its Expedition 33 crew before returning to Earth in November. (NASA)

**

NAMES IN THE NEWS: K5ZD APPOINTED DIRECTOR OF CQ WORLD WIDE DX CONTEST

CQ Contest Hall of Fame member and WPX Contest Director Randy Thompson, K5ZD, has been named Director of the CQ World Wide DX Contest, effective immediately. Thompson succeeds Bob Cox, K3EST, who retired in September after 35 years at the helm of the world's most popular amateur radio contest.

Thompson, 53, has been a ham since age 13. He is an accomplished contester, having multiple wins in the CQ World Wide DX Contest and the CQ WPX Contest, among others. He has also competed in four World

Radiosport Team Championships. In addition, Randy is a past editor of the "National Contest Journal" and a co-founder of the eHam.net website. He is a longtime member of the Yankee Clipper Contest Club and an instructor at K3LR's Contest University.

Thompson has been Director of the CQ WPX Contest since 2008 and his appointment to the directorship of the CQ World Wide DX Contest creates a vacancy for director of the CQ WPX Contests. Anyone interested in taking on the challenge of leading a major contest should contact Thompson by e-mail to k5zd (at) cqwpx (dot) com. (CQ)

**

PUBLIC SERVICE: HAM OWNED INTERNET ONLY RADIO STATION TO HOLD RADIOTHON TO COMBAT BREST CANCER

A ham that operates an on-line only radio station will be holding a three-day radiothon later this month. This, to raise awareness of, and funding to combat of Brest Cancer.

According to Bill Bergadano, KA2EMZ, of Radio Scooter International, the event will be held on October 19, 20 and 21 and will honor Jeri James who passed away from the disease last December. Bergadano says that James father was a ham radio operator.

More about this very special humanitarian event is on-line at radioscooterinternational.net/id130.html. (KA2EMZ)

**

HAM HAPPENINGS: LA GRANGE GA. 6 METER NET CELEBRATES 1ST BIRTHDAY

A word of congratulations to the LaGrange, Georgia, 6 meter Buzzard Net that celebrated its first anniversary session on Monday, October 1st. According to Bob Yates, W4GCB, this is an informal net, created one year ago with the goal of promoting activity on 6 meters in the LaGrange area.

LaGrange, Georgia, is located 60 miles southwest of Atlanta near the southern boundary between Grid Squares EM72 and EM73. The net control is Ed Ekkebus, KE4EE, with assistance from Rob Momon, N4VPI. The net meets every Monday evening on 50.155 Mhz at 00:30 UTC.

W4GCB says that during its first 12 months of operation the net has garnered close to 1,500 check in's, with a handful coming from E-skip contacts. (W4GCBL)

**

HAM HAPPENINGS: HAPPY 50TH BIRTHDAY TO THE HUNTSVILLE ARC

And congratulations also to the Huntsville Alabama Amateur Radio Club on its 50th Anniversary.

The first Huntsville Amateur Radio Club was organized on October 6, 1947, with Bill Neal, W4FZD, as the first President. The constitution

was approved March 22, 1948. There were twenty-two members of this initial organization but due to a lack of interest, the club was disbanded in the spring of 1949.

The second Huntsville Amateur Radio Club also known as HARC was organized April 18, 1952, at the WFUN Studio. John Garrison, W4FOG, elected as the first President.

The constitution and by-laws were adopted June 20, 1952. 16 members were on the first club roster and the club participated in its first Field Day event on June 21 and 22, 1952. HARC became affiliated with the American Radio Relay League on September 26, 1952, and remains so to this day.

The first club call, K4DTV, was obtained in July of 1954. The club's current callsign K4BFT, in honor of Hammond Carpenter, K4BFT was voted in by the club members on April 3, 1964. More about the history of the Huntsville group is on-line at harc.net. (HARC)

WORLDBEAT: FATHER AND SON AWARDED DOCTORATES IN ENGINEERING

It is not often that a father and son obtain doctorates in engineering during the same week. But it has happened and the latest involves two hams in South Africa. Amateur Radio Newsline's Hewather Butera-Howell, KB3TZD, reports:

--

Dr. Gary Immelman. ZS6YI, and his son Dr. Quintin Immelman, ZS6IY, both acquired doctorates in engineering during the same week, but from different universities.

Gary Immelman obtained a Doctorite is Technologiae Engineering and Technology from the Vaal University of Technology. Quintin acquired his Ph.D. in Mechanical-Nuclear Engineering from South Africas North West University. The two graduation ceremonies were not originally planned to fall within the same time frame, so chance made it at remarkable week to remember.

It should be noted that last year at this time ZS6YI was recovering from gunshot wounds that he suffered as a result of a brutal attack at his home on July 25 of 2011. Late word is that hes almost fully back to good

health but still has pain in his right arm and abdomen. That said, the incident has not slowed him down in any way.

For the Amateur Radio Newsline, Im Heather Butera-Howell, KB3TZD, near Berwick Pennsylvania.

--

Our congratulations to both ZS6YI and ZS6IY and their achievements. (SARL)

**

WORLDBEAT: SOUTH AFRICA REVITALIZES HAMNET DOMAIN

South Africa's Hamnet website was reactivated on October 1st. Hamnet is a voluntary group of radio amateurs who, like ARES in the United States, volunteer their communication skills to assist others during and after disasters.

Their Hamnet domain has been dormant for many years. Now thanks to the efforts of Dawie Conradie, ZR6DHC, an initial site has been put together and will grow with time.

The revitalized Hamnet website is described as filling the gap between the South African Radio League website and the well established Hamnet Facebook page.

All links have been incorporated in the website, including some that are international. Its located in cyberspace at www.hamnet.co.za, (SARL)

**

HAM RADIO IN SPACE: UKCUBE TO LAUNCH IN MARCH 2013

Turning to ham radio space related news, word that UKube-1, the United Kingdom Space Agency's first CubeSat mission, has booked its journey into space on board a Russian Soyuz-2 rocket. The launch from Kazakhstan is expected to take place sometime in March of 2013. The tiny satellite carries an amateur radio 435 to 145 MHz linear transponder built by members of AMSAT-UK. (AMSAT UK)

**

RADIO NEAR SPACE: HIGHEST AND FASTEST EVER SKY DIVE ATTEMPT OCTOBER 8

A high altitude sky-diver plans to leap from nearly 23 miles above the Earth on October 8th. This, in a high sped plunge that, if successful, will be the world's highest ever skydive. Amateur Radio Newsline's Jim Damron, N8TMW, has the details:

--

If all goes according to plan, a helium-filled balloon will lift off from Roswell, New Mexico on that date carrying Felix Baumgartner to an altitude of 120,000 feet in a custom built capsule that will keep him in

radio contact with the personnel at his mission control center on the ground. Once at altitude, Baumgartner will step out of the capsule and jump back toward Earth in his attempt to break a skydiving record that has stood for 52 years.

The current record for world's highest skydive stands at 102,800 feet. It was set in 1960 by U.S. Air Force Captain Joe Kittinger, who serves as an adviser for Baumgartner's mission. If Baumgartner succeeds, he will break not only that mark but also the sound barrier, becoming the first skydiver ever to fall at supersonic speeds. During a July 25th jump, Baumgartner's top freefall speed was 540 mph which is about as fast as a commercial airliner flies.

According to Baumgartner's launch team, this is more than a simple attempt at setting a world's record. If successful it will prove the viability of the next generation of space suits that can be worn by astronauts and cosmonauts working in the near space environment.

For the Amateur Radio Newsline, I'm Jim Damron, N8TMW, reporting.

RADIO IN SPACE: ISS SPACE DEBRIS AVOIDANCE MANUVER CALLED OFF

Plans to move the International Space Station to a slightly different orbit were called off on Thursday, September 27th. This after controllers determined that two pieces of orbital debris would not pose a collision risk.

According to NASA, Mission controllers had been monitoring debris from an old Russian Cosmos satellite and a fragment from an Indian rocket. Some scientists had said there was a chance that the debris could come close enough to require an adjustment in the station's orbit.

But NASA said additional tracking of the debris resulted in a high degree of confidence that neither object would pose any possibility of a collision with the ISS. As a result, Mission Control in Houston canceled the debris avoidance maneuver with concurrence of Russian flight controllers.

Space debris moves at a high orbital velocity rate and has the ability to cause damage to various operational on-orbit birds including the ISS. As such, flight engineers and spacecraft controllers try to give such space junk a wide berth whenever something might come close.

ON THE AIR: CELEBRATING JAPANS HEALTH AND WELFARE FESTIVAL

On the air listen out for special event station 8J7NPMG. It will be operational through October 16th from Miyagi prefecture on Honshu Island to celebrate the 25th All Japan Health and Welfare Festival. QSL only via bureau. (DXNL)

**

ON THE AIR: NATIONAL WILDLIFE REFUGE WEEK SPECIAL EVENT

Also, the National Wildlife Refuge Special Event is slated for October 14th to the 20th and ham radio will again be helping to mark the occasion. The goal is to combine the communication skills of amateur radio operators with their enjoyment of the outdoors as a way to help others learn about the National Wildlife Refuge System. Only authorized, safe, responsible access to refuges are sanctioned by this event. For more information please contact the events coordinator at info (at) nwrweek-radio (dot) info. (Arizona ARRL Newsletter)

DX

In DX, OD5RW is on the air from Lebanon operating on 80 meters through 70 centimeters using CW, SSB, RTTY, SSTV and other digital modes. He also has D-Star capability on VHF and UHF. QSL via K8NA.

F6EXV and DJ8NK will be active from Niger through October 15th as 5U6E and 5U8NK respectively. Operation will be on the High Frequency bands though modes have not been announced. QSL 5U6E via F6EXV and 5U8NK via DJ8NK.

F6AML will be active from Mayotte Island through October 19th as T-Oh-2-M. He will be operational on 80 through 10 meter CW and SSB. QSL via home call.

N6XT and N7CQQ currently active portable KH8 from American Samoa. They are reported to be operational on all of the High Frequency bands using various modes. QSL via home calls

DJ7RJ will be on the air from Reunion Island signing stroke FR until October 21st. He plans to be active on all bands 10 to 160 meters using CW and SSB. QSL as directed on the air.

LZ1CNN has received his Afghan callsign and plans to be active as T6LG until next February. He'll be on all bands, CW and SSB. QSL via L-Zed-1-Zed-F and all QSO's will be uploaded to Logbook of The World.

Lastly, and down the DX road a bit word that K2TTT will be operational as C6ATT from New Providence Island between June 8th to the 15th, 2013. Activity will be on 40 through 10 meters. QSL via K2TTT.

**

THAT FINAL ITEM: JOTA 2012 - OCTOBER 20-21

And finally this week, the biggest event of the scouting season involving ham radio is drawing near. Amateur Radio Newsline's Mark Abramovich, NT3V, is here with the details:

--

It's the largest Scouting event in the world. Last year, it drew more than 750,000 Scouts in 150 countries to the ham radio frequencies manned by 6,000 amateur radio operators.

It's the 55th annual Jamboree on the Air which which runs the weekend of Oct. 20-21.
Jim Wilson, K5ND, national Jamboree on the Air organizer for the United States as well as chairman of the national Radio Scouting committee, says it's a chance for amateur radio to introduce young men and women to the adventure and fun of the hobby...

"It's not a contest, it's a conversation," Wilson says. "And, there's no prizes handed out for the number of contacts that you make. Instead, it's about talking with Scouts, and, ideally, Scouts talking with other Scouts - either across town, across the state, across the nation, or across the world."

Wilson says in the United States, many Scout councils will be conducting camporees on JOTA weekend and amateurs will set up stations and put the Cub Scouts, Boy Scouts and Venturers on the air.

He says the neatest thrill for operators taking part in the event is facilitating a Scout working a DX contact, and ideally talking with a Scout overseas...

"The real excitement is seeing a Scout's eyes light up as they realize that they're communicating over such a long distance and how all this gear comes into play," says Wilson.

Wilson says he's already spoken with a few JOTA station organizers who are planning something special for the Scouts....

"They like to have the Scouts build their own antenna, test the antenna to see what the Standing Wave Ratio is and all that sort of stuff and then put it on the air and make a contact," Wilson says. "So, it's a simple dipole, a very easy way for them to do hands on and then watch as the result of their work makes a contact. It can be a very exciting

experience for that Scout."

Wilson says there will be lots of activity on the air that weekend, including a scheduled contact from the BSA's Scouting museum in Texas with the International Space Station.

But he cautions amateurs need to make sure they brush up on those third-party agreements to ensure everyone stays legal.

Wilson says there's another very important reason to roll out the welcome mat for the Scouts...
"Cub Scouts and Boy Scouts and Venturers that will be participating in Jamboree on the Air are the same people that are going to be writing the regulations for your antennas at your neighborhood level, at the city level, at the state level, at the federal level," Wilson says. "And now is a good time to reach out to them to say amateur radio has real value, it's making a difference in the world. This is the time to reach them.

"And JOTA is a great way to do that not only to grow the ranks of amateur radio, but to just introduce kids who may never participate in amateur radio so that they understand that it's magic, it's fun, and it contributes to our communities in a very positive way."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More information on JOTA 2012 is on-line at www.scouting.org/jota.aspx. The scouts say that they hope to make contact with you on the air.

Amateur Radio Newsline[TM] Report 1835 - October 12 2012

Amateur Radio Newsline report number 1835 with a release date of October 12 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC released a Notice of Proposed Rulemaking aimed at changing the Amateur Radio licensing rules and lots more; the R-S-G-B replies to UK telecommunications regulator Ofcom on the future of 143 to 156 MHz; hams in Sweden effectively loose access to the 2300 MHz band and a ham radio operators success in gaining approval for a 65 foot tower leaves neighbors very unhappy. Find out the details are on Amateur Radio NewslineT report number 1835 coming your way right now.

RESTRUCTURING: FCC PROPOSES MULTIPLE CHANGES INN THE PART 97 AMATEUR SERVICE RULES

The FCC has put forth a series of suggested Part 97 rules changes which when taken as a whole literally redefine many aspects of the United States Amateur Radio Service. Amateur Radio Newsline's Mark Abramowicz, NT3V, takes a look at what the regulatory agency sees in ham radio's future:

--

It's not a done deal by any stretch, but the FCC has put a few proposals out there for public comment and it's interested in hearing from you.

The Notice of Proposed Rule Making or NPRM can be divided into a few basic categories - exam credit for expired licenses and grace periods for expired licenses, a change in the number of volunteer examiners needed for a valid testing session, and emissions and experimentation by amateurs.

Rich Moseson, W2VU, is editor of CQ Magazine, and Amateur Radio Newsline called upon him for his take on the proposals.

Let's begin with one that could have the biggest impact, the proposal to give examination credits for anyone who held a license that expired, thereby eliminating the need for re-testing for someone who has an expired license.

Moseson says he wholeheartedly endorses the idea of being able to recover a license a ham once held. He says right now, the current FCC rules are scattered on this....

"If you held a particular type of license at a particular time then there's no limit on being able to get it back without re-testing," Moseson explains. "But if you held a higher class license or a lower class license or the same license at a different time and it's expired and beyond the grace period, then you can't get it back without re-testing.

"So, the current rules make no sense."

Moseson says he's uncertain how many hams are out there who let their licenses lapse years ago, but he suggests the FCC recognizes they should be allowed to get back in without putting an undue burden on them.

Controversial? Maybe, for some. But Moseson says he believes it's a win-win for the hobby...

"I don't think that we've been greatly damaged from having the ability to re-gain licenses once held without additional testing on the license classes that are permitted," Moseson says. "And, I don't think there will be any great hazard to the hobby. In fact, I think there will be benefit to the hobby of letting people whose licenses have expired return if their interest has returned as well."

If that doesn't quite sit well with you, Moseson suggests considering this:

"There's really very little difference between this and what goes on if you maintain your license," Moseson says. "There are no activity requirements. So, as long as you renew your license every 10 years now, you can be licensed continually without taking a test even if you haven't been on the air in 30 years.

"And, if you want to come back on the air - as long as you've maintained your license - then you just turn on the radio. Well, if you've let your license lapse, there's really not much difference.
"So, if you've passed the test for a license, if you've held that license before, and you want to get back into ham radio, let's welcome you back with open arms and not make you have to take your test again when other people don't have to take that test again."

Now, on to the proposal to have only two volunteer examiners at a testing session.

Moseson says he feels a little uncomfortable with that idea, although the FCC suggests it will open up more exam

opportunities and make it easier for people to get a ham license....

"I think that a minimum of three people is important at first glance," Moseson says. "I would be open to looking at the comments from other people. But from my personal experience, I think it's good to have a minimum of three people because it just reduces the possibility of any kind of shenanigans to a much lower level.

"And, that was the reason for putting in the three-examiner requirement to begin with and I think that's still valid."

There's also the idea of remote testing sessions - that is using the technology for VEs to observe an exam session. The FCC's rationale is colleges and businesses use teleconferencing and maybe it's time to explore that option. Moseson says timing might be right...

"Yes, the technology needs to be acknowledged," Moseson say. "I don't think we should necessarily just jump right into it. I would suggest a pilot program first to see how well it works out and then take it from there."

Moseson says he's encouraged by the proposal looking at the modes for amateur radio transmissions. He says there are too many restrictions and limitations on hams which can stifle rather than encourage experimentation.

He says the FCC is wise to look at the issue, especially considering the area of TDMA or Time Division Multiple Access technology for amateur radio.

"I think that the more that we can do with them as hams, in addition to what the commercial world is doing, the better off we'll all be because that competition is a fact of life," Moseson says. "You know, you look at our microwave bands which are really where a lot of the future is going to be - 2.4 Ghz, 5.8 Ghz - these bands are already shared.

"And if we can make better use of that sharing so that we can do what we want to do without bothering the other people and without having them bother us then that's great we can all get by very well."

Moseson says he still hasn't had a chance to go through the entire NPRM. He intends to study it and encourages hams to take the initiative and digest it before commenting...

"Well, I would encourage people to download the NPRM from the FCC website and read the whole thing, particularly before sending in comments to the FCC on it," Moseson says. "I've seen too many people in other situations send in

comments on an NPRM based on a summary and they haven't read the whole thing and they come off looking uninformed."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V in Philadelphia.

--

WT Docket No. 12-121 is expected to draw a lot of discussion in ham radio circles and we will have more on it in upcoming Amateur Radio Newsline reports. (FCC)

**

RESTRUCTURING: RSGB, BATC AND AMSAT-UK REPLY TO OFCOM ON HF SPECTRUM

Meantime, across the Atlantic, the Radio Society of Great Britain in concert with the British Amateur Radio Club and AMSAT-UK, has submitted a response to telecommunications regulastor Ofcom's Consultation or Notice of Inquiry on the future use of VHF spectrum from 143 to 156 MHz. This being the bandspace that was formally used by the British Home Office.

According to the R-S-G-B, the unique nature of this spectrum, and the fact that it surrounds the existing 2 meter amateur radio band, suggested a creative response. One the R-S-G-B stated that would need to be competitive with the likely responses from Business Radio users. No details of the actual text of the response are known as we go to air.

(RSGB)

**

RESTRUCTURING: SWEDEN HAM COMMUNITY LOOSES 2300 MHZ BAND

Swedish radio amateurs have basically lost the 2300 MHz band although they have gained some spectrum at 1.8 MHz.

The Swedish Amateur Radio Society, the S-S-A, reports the loss of the 2300 MHz band with effect from October 1st. And while 2400 to 2450 MHz is still allocated for amateur radio operation the power there is limited to just 100 milliwatts at the antenna.

However there is good news down lower in frequency. Sweden used to have "Top Band" allocations of 1810 to 1850 kHz at max 1 kW and 1930 to 2000 kHz with a maximum of 10 Watts out. As of October 1st this changed to 1810 to 1850 kHz at 1 kW and 1850 to 2000 kHz with a maximum of 10 watts. Power output is measured at the antenna.

(SSA)

**

HAM RADIO IN SPACE: FOUR CUBESATS DEPLOYED FROM ISS

Radio amateurs around the world have been listening for signals from the four new amateur radio CubeSats that were deployed from the International Space Station on Thursday, October 4th.

FITSat-1 has a CW beacon on 437.250MHz, 1200 bps AX.25 packet radio on 437.445MHz and a high-speed data transmitter on 5840.0MHz.

F-1 has the callsign is XV1VN and the communications subsystem is built around two Yaesu VX-3R amateur radio handheld transceivers. One will transmit 1200 bps packet radio every 30 seconds on 145.980MHz while in darkness. The other will operate only in sunlight sending a 20 second FM transmission of a CW tone on 437.485MHz followed by a 60 second gap.

TechEdSat carries a 1200 bps packet radio transmitter on 437.465MHz.

WE-WISH transmits CW and 1200 bps packet radio on 437.505MHz. Due to the effects of Doppler shift the 70cm downlink frequencies will vary by +/- 10 kHz during an 8 minute pass.

Each could have a life-time of 4 or 5 months before they burn-up on reentry into the Earth's atmosphere.

ENFORCEMENT: FCC REFUSES TO RECONSIDER $10000 NAL

The operator of an unlicensed radio station in Florida will have to pay a $10,000 fine. This after the FCC turns down his petition for reconsideration where he failed to prove he could not afford to pay. We have more in this report:

--

The FCC has refused to reconsider a $10,000 fine issued to Neal Davis of Fort Lauderdale, Florida. In its September 28th release the regulatory agency stated that Davis appeal of the forfeiture order did not meet the criteria set out by the agency in regard to providing proof that such a fine would prove to be a financial hardship.

In his Petition, Davis did not deny that he operated an unlicensed radio station and therefore violated Section 301 of the Communications Act. Rather, he urged the cancellation of the forfeiture based on an inability to pay claim. Specifically he asserted that he is currently unemployed and has no income but Davis did not provide any financial or other form of documentation to corroborate his asserted financial status.

In the absence of any supporting financial or other reliable documentation, the FCC says it has no basis by which to evaluate Davis's inability to pay claim and are constrained by the limited record before it. As such the FCC has denied the Petition and affirmed the Forfeiture Order.

--

Davis was given the customary 30 days to pay the fine. If he fails to do so the matter could be turned over to the Department of Justice for further action. (FCC)

**

ENFORCEMENT: WIRELESS CAMERA IN PALM TREE INTERFERES WITH FAA RADAR

The FCC has issued a Notice of Violation to the Redondo Beach Marina in Redondo Beach, California. This, for operating an unlicensed wireless video surveillance camera that was found to be causing interference to an FAA Radar system.

After receiving a complaint from the Federal Aviation Administration concerning interference to their 1240 to 1300 MHz band radar in San Pedro, California the Los Angeles FCC Office dispatched agents to investigate the matter. The agents used direction finding to locate a radio signal on 1282 MHz emanating from a wireless camera mounted on a Palm tree in the parking lot of Redondo Beach Marina. When AC power to the camera was disconnected, the interference ceased.

Based on this finding, a cease and desist notice was issued telling the Marina that use of the wireless camera must stop immediately. And in its September 20th letter to the Redondo Beach Marina it was warned that operation of radio transmitting equipment without a valid radio station

authorization constitutes a violation of the Federal laws and could subject the operator of this illegal operation to severe penalties. (FCC)

**

HELPING YOUTH: AMATEUR RADIO SUPPLIES ANNOUNCES YOUTH GIVEAWAY

Amateur Radio Supplies of Haverhill, Massachusetts, has announced a new biannual giveaway. This to promote youth in amateur radio DXing and contesting.

Beginning January 1st of 2013, the company says that it will give a complete high frequency station to the selected applicant. The gear to be presented will include Alinco DX-SR8T/E 160 through 6 meter all mode transceiver with a 30 amp power supply, an L-D-G antenna tuner, a choice of an all band G5RV or HyGain DX-77A Vertical plus just about all the accessories to put it all on the air.

Applicants from any country under the age of 21 are invited to provide brief answers to the following three questions. These are how often are you able to operate on the HF bands? Where do you typically operate from and how do you intend to use the equipment provided in the give-away.

Send your answers along with your name, callsign, and license class using the form at www.amateurradiosupplies.com/youth-s/222.htm. Nominations will also be accepted.

For more information please e-mail Randy Rowe at randy (at) amateurradiosupplies (dot) com. Amateur Radio Supplies is a new company that provides a full line of gear, including antennas, transceivers, coax, antenna wires and countless station accessories.

(Michelle Garrett - Project Manager - Amateur Radio Supplies)

SWL NEWS: MORE TV WATCHERS OPTING OR FREE OVER THE AIR PROGRMMING

As cable bills rise and the United States economy remains weak, more Americans are watching television using good old fashioned antennas.

According to the research firm GfK Media, nearly 18 percent of all US households with television sets are watching broadcasts delivered for free over the air. This is up from 15 percent of homes last year according to research the

firm. Translated into numbers, that means 20.7 million homes, or roughly 54 million consumers, now get channels over the air instead of paying a monthly cable or satellite bill.

According to the study, 6 percent of TV households, or 6.9 million homes, canceled their cable service at some point in the past and now rely on free broadcasts. GfK's report also found that 16 percent of households downgraded TV service in the business year through March, while only 11 percent of TV households said they had increased service.

The report also found that people using Web-connected TV increased to 34 million households, or 29 percent. That's almost double the previous year's 16 percent. More is on-line at tinyurl.com/9z4ffj5

SWL NEWS: CANADIAN AM STATIONS LEAVING THE AIR

More AM stations are leaving the medium wave AM broadcast band in Canada than are coming on the air, This is according to the trade publication Radio World that says since 2009, some sixteen Canadian AM broadcasters have gone off the air as several have moved to the FM band and companies closed the least profitable stations.

But in this case more seems better from a profit standpoint. According to the research firm Statistics Canada, the moves have allowed AM operating revenues to grow by 1.1% in 2011, to 311 million Canadian dollars.

A quick search of the Canadian Radio-Television and Telecommunications Commission site shows 727 commercial licensed radio stations, not broken down by service. That compares to 4,754 commercial licensed AM and 6,568 FM broadcast entities in the United States according to FCC figures for the most recent quarter. (RW)

NAMES IN THE NEWS: RADIO AMATEUR FILES SDR PATENT

And Software Defined Radio is coming of age in the world of amateur radio. This with word that Tao Wang, KB3KSR, has filed a patent for a General-purpose software defined radio platform.

The patent disclosure describes Wang's invention as a flexible, compact size, low power consumption, low cost, high performance software defined radio platform. One that can be used in different areas, including industrial applications, amateur radio, and academic research.

In its present form, Wang's unit is a processing platform that packs a complete computer inside a pocket size enclosure. The invention makes use of a graphic user interface and touch screen LCD display for interaction with those who are utilizing it. (Southgate)

HAM HAPPENINGS: HAM-JAM 2012 LWRENCEVILLE GA NOVEMBER 10

On the social scene, HamJam 2012 will take place on Saturday, November 10th at the Georgia Gwinnett College Student Center, in Lawrenceville, Georgia. The event is open to all radio amateurs and admission is free. Gerald Youngblood, K5SDR the C-E-O and President of FlexRadio Systems, will speak on the future of amateur radio while Doug Grant, K1DG will do a presentation on Contesting Ethics and the World Radio Team Championships. More information on the web at www.hamjam.info
(SEDXC)

**

HAM HPPENINGS: FREE CQ WW UPDATE WEBINAR WITH K5ZD

The World Wide Radio Operators Foundation will be sponsoring an open Webinar on Sunday, October 21st at 19:00 UTC titled CQ World Wide Update 2012. Hosted by Randy Thompson, K5ZD, the on-line gathering will provide an update on the status of the contest including new rules for 2012, log entry tips, fair play, and various other topics of interest. Questions will be taken following the presentation. Registration for this free event is on-line at tinyurl.com/cq-ww-webinar. (WWROF)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: SID T. MAY ET3SID/AB3OZ/G4CTQ, SK

The changing of the guard in ham radio continues with word of the passing of Sid T. May, who held the callsigns ET3SID, AB3OZ and G4CTQ. May was the chairman of the Ethiopian Amateur Radio Society and credited with setting up the first amateur radio club of Ethiopia in 1993. He had also been teaching amateur radio courses to Ethiopian students for more than 15 years and was also a volunteer examiner who administered both U-K and United States amateur exams in Ethiopia.

**

INTRUDER REPORT: CHINESE OTH RADAR GAIN HRASSING 40 METERS

The IARU Monitoring System newsletter reports that Radio Hargeisa is operating on 7.120 MHz and that Chinese surveillance radar in the amateur radio 40 meter band is now stronger than ever before

According to the report, the pesky Chinese Over the Horizon Radar had left the 40 meter band for few weeks. But now its reported back with a very strong burst system. One that is at least 10 kHz wide and has an almost S9 signal, world-wide. IARU Regions 1 and 3 are reported to be severely

affected by it.

More about both of these situations is on-line at tinyurl.com/china-radar-again. (IRUMS)

**

EMERGING TECHNOLOGY: DISSOLVABLE BIO-MED ELECTRONICS

Ultra-thin electronics that dissolve inside the body have been devised by scientists in the US and could be used for a range of medical roles.

According to research published in the journal Science the components are made of silicon and magnesium oxide and placed in a protective layer of silk. Once their job has been completed these devices can simply melt away with the speed of melting is controlled by silk.

The technology has already been used to heat a wound to keep it free from infection by bacteria. More is on-line at tinyurl.com/melting-electronics. (BBC)

**

WORLDBEAT: UK AUTO MANUFACTURERS NOT SUPPORTING DIGITAL RADIO BROADCASTING

The United Kingdom's government mandated switchover date for digital radio may need to be extended several years. This following a new survey of car manufacturers that reveals at least half are steering clear of the new entertainment technology.

As part of its Digital Britain vision, the UK Department for Culture, Media and Sport named 2015 as the deadline for turning off its ageing but very popular analogue radio network, in favor of one based on digital standards. The move would mean the majority of today's in-car tuners as well as home radio sets would cease to function overnight.

But new findings from Auto Express Magazine suggest the switchover could now be delayed until 2017 or later. This after a survey of 24 mainstream car manufacturers by the publication has revealed that 50 percent do not offer any digital radio units for their model range, even as an optional extra. Also, almost 60 per cent of new vehicles registered this in the U.K. this year came with no option for the installation of a digital radio receiver. (Auto Express, Southgate)

**

WORDBEAT: BELEGIUM HAMS ASSIST IN NEW FREE WIFI SYSTM

The Belgian national society the U-B-A reports on the involvement of radio amateurs in getting free WiFi in the city of Geraardsbergen. The UBA says that O6RY and ON3FDS worked with the city officials to bring about the new WiFi service and in the process generated some valuable public relations for the amateur radio in that nation. More about this story is on-line at tinyurl.com/ham-radio-wifi (Southgate)

HAM RADIO IN SPACE: EQUISAT HAM-SAT TO CARRY OPTICAL BEAON

Students at the Brown University are developing an amateur radio satellite called EQUiSat that will carry an interesting optical beacon. The bird will use a Xenon Flash Tube that should be visible to the unaided eye of observers on Earth. A radio beacon is planned to operate in the 435 to 438 MHz range. Launch is hoped for in the 2015 time frame into an orbit of about 300 kilometers. That should give the satellite a life-time of a couple of months.

(EQUiSat, Southgate)

**

HAM RADIO IN SPACE: BUAA-SAT PLANNED FOTR 2014 LAUNCH

BUAA-SAT is a micro-satellite project developed by the students of Beijing University carries an amateur radio 435 and 145 MHz FM voice transponder. Plans call for it to be launched into a 600 by 800 kilometer Sun Synchronous Orbit in late 2014. Its primary missions are to study the application of components used in the onboard electronic system, to demonstrate the coil-able mast deployment mechanism and to carry out imaging using three CMOS cameras. More is on-line at http://sat.buaa.edu.cn/

**

DX

In DX, word that ON4AFU will be on the air from Ko Butang Island October 26th to November 4th as HS0ZJF stroke 9. He will be active on High Frequency bands on CW only. QSL via ON4AFU

7L4DXT and K1GI will be operational from Sint Maarten Island from November 18th to the 24th as PJ7XK and PJ7I respectively. They will be active on 160 through 10 meters on CW, SSB and some Digital modes. QSL PJ7XK via 7L4DXT and PJ7I via JG2BRI

KI5SF reports that he will be operational portable KH6 from about 0100 UTC October 26th to 10:00 UTC October 27th. Listen out for him on 160 through 6 meters except for 60 meters on SSB and CW. QSL to KI5SF.

A group of operators from Switzerland will be active from Aitutaki Island in the Cook Island chain from November 12th to the 30th using the call signs E51C, E51ABS, E51BZD and E51CHX. Listen out for them on 80 through 10 meters using CW, SSB, and PSK. QSL this operation via HB9BXU

JA7HMZ and JA7EPO will be active from Pohnpei Island from November 23rd to the 28 as V63DX and V63EPO. They also plan to operate in CQ World Wide DX CW Contest on November 24th and 25th as V6A. QSL V63DX via JA7HMZ, V63EOP via JA7EPO and V6A via JA7HMZ.

JH1EAQ will be active from Palau in CQ World Wide DX SSB Contest On October 27th and 28th as T88EB. QSL via home call only.

Lastly, looking to the future comes word that G3SWH and G3RTE will be active from Guadalcanal Island in the Solomon Islands from February 18th to the 28th of 2013. The callsign to be used will be H44KW operating on 80 through 10 meters using CW only. QSL via G3SWH direct or via the bureau.

**

THAT FINAL ITEM: BIG ANTENNA WIN DOWN-UNDER ANGERS NEIGHNORS

And finally this week, a New Zealand ham has won a major tower and antenna victory but his neighbors are far from happy with the city council's decision. This, even before the antenna system is erected. Amateur Radio Newsline's Jim Meachen, Zed-L-2-B-H-F, reports from down-under:

--

Pyes Pa, New Zealand residents concerned about the proposed installation of a 20 meter high radio antenna are disappointed that the Tauranga City Council won't fight a legal battle on their behalf.

Residents of Veda Glen have petitioned the city council to appeal an Environment Court decision which allows amateur radio enthusiasts to erect radio masts up to 20 meters or 65 feet high. They say a radio antenna proposed by a neighbor would be an eyesore, create wind noise and devalue their properties.

While Councilors seemed to sympathize with the residents' plight they also said that based on their legal advice, an appeal to the High Court would be pointless. The council had previously tried to restrict private radio masts to a maximum height of 9 meters or about 30 feet. However an appeal to the Environment Court by the Tauranga Emergency Communications Group and the New Zealand Association of Radio Transmitters saw the maximum height raised to the 20 meter maximum.

Council senior policy planner Campbell Larking told councilors approximately $100,000 New Zealand dollars had been spent fighting the case in the Environment Court, and he estimated an appeal to the High Court would cost another $50,000. Also that a High Court ruling would not be binding and the matter would simply be sent back to the same Environment Court judge to re-consider.

A resolution proposed by Councilor Murray Guy, which sought to launch an investigation into Environment Court and City Plan processes in order to enhance community consultation did not find enough support and failed.

The bottom line is that the unnamed ham can put up his 65 foot high mast along with the antenna that will sit on top of it. It's unknown when that installation will be completed.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

Outside the chambers, the residents said a legal challenge was outside their reach and they were disappointed the council had backed away from fighting the case on their behalf. (bayofplentytimes.co.nz)

Amateur Radio Newsline[TM] Report 1836 - October 19 2012

Amateur Radio Newsline report number 1836 with a release date of October 19 2012 to follow in 5-4-3-2-1.

The following is a QST. A case to be heard by the U.S. Supreme Court could limit or curtail your ability to resell your personal property including used ham radio gear; the Department of Homeland Security to provide emergency communications training at Hamvention 2013; ham radio gets new responsibilities from Army MARS; the FCC asks assistance in tracking down cellphone and GPS jamming devices. We will look into that and more on Amateur Radio Newsline[TM] report number 1836 coming your way right now.

(Billboard Cart Here)

**

LEGAL WRANGLING: SUPREME ASKED TO RULE THAT PUBLIC HAS NO RIGHT TO RESELL OWNED GOODS

How would you feel if there was a law that kept you from selling or even giving away a piece of ham gear or anything else you think you own without first getting permission from the original manufacturer? Sound crazy? Well this is a legal precedent that the United States Supreme Court has been asked to rule on as we hear from Amateur Radio Newsline's Mark Abramowicz, NT3V:

--

Imagine, if you possibly can, the Dayton Hamvention, the Orlando Hamcation or the Huntsville Hamfest with no flea market.

Or, what about ham gear disappearing altogether from eBay or Craigslist.

Some fear this could be a real possibility, depending on how the U.S. Supreme Court rules in a case that could impact a nearly 104-year-old doctrine recognized by the high court that allows us to resell items without fear of a copyright holder coming after us.

The doctrine essentially says the copyright holder had control only over the first sale.

But a case decided last year in the U.S. Court of Appeals in the Second Circuit in New York has the potential to re-set that doctrine.

The case involves a man from Thailand who came to the United States in 1997 to enroll in Cornell University in Ithaca, N.Y.

The student found that the same textbooks they were asking him to buy in the book store could be had for much less in Thailand.

The man asked his relatives there to help him buy the books and send them back overseas to him in New York.

Later, the man got some entrepreneurial spirit and court documents in the case show he decided to start selling textbooks on eBay. There's some dispute as to how much the man made on the sales.

So, the publisher of the books objects and brings a suit against him.

The publisher admits it was charging less for books sold overseas, but it claims the man was guilty of copyright infringement. But the man counters his sales are covered by that first-sale practice.

The federal appeals court in New York upheld a lower court decision saying, no, that doctrine only applies to stuff produced in the United States and not to anything made overseas.

That court's ruling, in the view of some constitutional scholars, could now throw into jeopardy the whole idea of what you buy at flea markets, or yard sales and on-line sales of used goods.

Polk Wagner, a law professor at the University of Pennsylvania Law School here in Philadelphia, isn't ready to push the panic just yet with that conclusion.

Wagner says in this case, it's about copyrights...

"So the question here that the Supreme Court has got to wrestle with is to try and figure out how these two provisions of the copyright act - one that says that you can't import anything that's copyrighted without the permission of the copyright owner and also one that says lawful owners of books are allowed to do what they want with the copies of the books that they purchase," Wagner says.

He says there's a bit of conflict here...

"So, the legal question is how those two provisions of the Copyright Act work together or don't as the case may be," Wagner says. "Courts have wrestled with this for the last 5 or 10 years and have not reached any satisfactory conclusions. So, hence, the Supreme Court is going to take it up."

eBay has filed a brief on the issue warning that the Second Circuit's ruling would have significant consequences for trade and ecommerce. And, in a broader reach, the company says it could hurt small businesses and consumers and cost jobs in the U.S.

Wagner, the University of Pennsylvania law professor, says there's another area and it may involve patents.

For example, he says in cases involving ham gear, it's legal to buy overseas and import the gear. And, there's nothing under the patent laws that prevents you from reselling the gear.

However, Wagner says there's another matter and it has to do with software that may be included or needed to operate the gear.

And, while most companies or software developers will sell you a license to use their software, it's not the same thing as selling you a book. And, while Wagner says that's not at issue here it eventually it could be sorted out by the courts in the future.

Stay tuned.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The Supreme Court is scheduled to hear oral arguments on the case on October 29th. If it does rule with the appellate court, it's likely that the matter would be brought to Congress to force a change in law. However that could take months if not years or even decades. Until then, consumers, including ham radio operators would be stuck between a rock and a hard place when trying to resell their belongings without breaking the law.

(Marketwatch, other published reports)

**

RESCUE RADIO: DHS TO TEAM UP WITH DAYTON HAMVENTION ON EMCOMM TRAINING

Department of Homeland Security's Office of Emergency Communications is teaming up with the folks in Dayton to provide free emergency communications training in conjunction with Hamvention 2013. Amateur Radio Newsline's George Bowen, W2XBS, reports:

--

The Department of Homeland Security's Office of Emergency Communications will be on hand at the next Dayton Hamvention. This to conduct its nationally recognized NIMS/ICS compliant Auxiliary Emergency Communications course.

The course itself focuses on a number of important aspects of emergency communications. These include auxiliary communications interoperability, emergency operation center etiquette, on-the-air etiquette, FCC rules and regulations, auxiliary communications training and planning, certification and accreditation to mention only a few. The objective of the training is intended to supplement and standardize an operator's basic knowledge of emergency amateur radio communications in a public safety context.

This Office of Emergency Communications workshop is designed for auxiliary emergency communicators who volunteer to provide backup emergency radio communications support to public safety and emergency response professionals and their agencies. Typically this includes amateur radio communicators from groups such as MARS, ARES, RACES, SATERN and the like. The course will actually be held just prior to Hamvention, but still in the Dayton area and as part of Hamvention 2013.

For the Amateur Radio Newsline, I'm George Bowen, W2XBS, st the North-East Bureau in Albany, New York.

--

Details on any pre-required training for this free course is on-line at www.hamvention.org. Information on for registering for this special free course will be posted at the same site in the near future.
(Hamvention.org)

**

ARMY MARS: MORE RESPONSIBILITY FOR HAM RADIO VOLUNTEERS

Stephen G. Klinefelter, Chief of the Arrmy's Military Affiliate Radio System better known as Army MARS has announced a major leadership realignment. This, at a conference of the auxiliary's Region Directors held Sept. 12th to the 14th in Dallas, Texas.

Under the new terms, volunteer ham radio operators have assumed day-to-day management responsibility previously exercised from the MARS headquarters at Ft Huachuca, Arizona. Each of the auxiliary's 11 regions will be under command of its director. Together the 11 directors will form a policy-making Governance Executive Board for the auxiliary as a whole.

This is a striking revision of the military's traditional top-down chain of command. It was symbolically activated at the first national leadership conference in the Military Auxiliary Radio System's 87-year-history.

Army MARS reports to the Network Enterprise Technology Command which manages Army computer networks and communications systems worldwide. Chief Klinefelter, who retired as a full colonel in the Signal Corps after 31 years, returned to the Network Enterprise Technology Command as a senior civilian employee and is Deputy Operations Officer G3. He added the MARS post last spring.

An in-depth article on the changes to Army Mars authored by those involved is on the Web at www.eham.net/articles/29106. (Army MARS, QRZ.com)

ENFORCEMENT: FCC SAYS THAT UNREGULATED PART 15 DEVICES INTERFERING WITH AVIATION WEATHER SYSTEM

The FCC has acted to curb interference to aviation Terminal Doppler Weather Radars Systems coming from unlicensed Part 15 devices. Amateur Radio Newsline's Norm Seeley, KI7UP reports:

--

The FCC's Enforcement Bureau recently took action against several companies for operating devices that caused interference to Terminal Doppler Weather Radars maintained by the Federal Aviation Administration. Terminal Doppler Weather Radars systems operating in the 5600 to 5650 MHz band are used by the FAA to obtain quantitative measurements for gust fronts, wind shear, microbursts, and similar

information.

Investigations have been conducted by the FCC, the FAA, and the National Telecommunications and Information Administration in several areas of the United States and Puerto Rico. These have revealed that much of the interference stems from wireless devices sharing the same band as Terminal Doppler Weather Radars systems, and operating outdoors in the vicinity of airports at high elevations that are line-of-sight to the radar installations. Also that most are operating inconsistent with the FCC Part 15 Rules.

The Enforcement Bureau and the FAA are continuing to investigate additional areas where interference is reported to Terminal Doppler Weather Radars systems. The FCC says that it will continue to take appropriate enforcement action as necessary.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

More information on this matter is available in FCC release DA 12-459 released on September 27th and FCC Enforcement Asdvisory 2012-07 released on the same date. (FCC)

**

ENFORCEMENT: FCC CREATES TOLL FREE NUMBER TO REPORT CELLPHONE AND GPS JAMMING

The FCC wants your help in locating anyone who is using a cellular telephone or GPS jamming device and to do this the Commission's Enforcement Bureau has launched a dedicated jammer tip line at 1-855-55-NOJAM or 1-855-556-6526. This, to make it easier for the public to report the use or sale of illegal cell phone, GPS or other signal jammers.

As has been said many times before, it is against the law to use, import, advertise, sell or ship a cellular telephone or GPS jammer or any other type of device that blocks, jams or interferes with authorized communications, whether on private or public property. As such, members of the public are being asked to call the FCC's toll free Jammer Tip Line immediately if you are aware of the ongoing use of a cell, GPS, or other signal jammer. Also please call if an employer operates a jammer in a workplace; you observe a jammer in operation at a school or college; you observe an advertisement for a jammer at a local store or you observe a jammer being operated on your local bus, train or other mass transit system.

One warning. This number is only for use to report cellphone or GPS jamming devices. Please do not call it to report that your favorite repeater is being jammed or that your QSO on 20 meters is being interfered with. Those matters will not be handled on this telephone line and will be of no interest to those taking cellphone or GPS jamming device calls.

Once again, the number where to report the use of cellphone or GPS jamming is 1-855-55-NOJAM or 1-855-556-6526. And calling that number is toll free. (FCC)

**

HAM HAPPENINGS: K6H - HAM RADIO CELEBRATES HOLLYWOOD FROM CBS STUDIO CENTER STAGE 9

Ham Radio Celebrates Hollywood will be a special event operation held on Sunday, October 28th from 1600 to 2000 hours U-T-C. Sponsored by Southern California's PAPA repeater system, the event using the callsign K-6-H will originate from the Stage 9 of the CBS Studio Center facility in Studio City, California.

The historic Studio Center has been the production facility for such hit programs as Will and Grace, That 70's Show, Malcolm in the Middle, Spin City, Just Shoot Me, and 3rd Rock From the Sun. Nine seasons of Seinfeld were filmed on Stage 9 except for the first four episodes, which were shot at at another facility. Stage 9 is currently the home of ABC TV's Last Man Standing, starring Tim Allen. As such, several of the hams who work on Last Man Standing will be hand to host the PAPA operators.

A number of R-F and non-RF paths will be available to contact the stage 9 commemorative operation. These include HF, VHF, UHF, D-STAR, Echolink and IRLP. The operation will also be monitoring the Broadcast Employees Amateur Radio Society ABC and Disney interconnected amateur repeater system. This links W2ABC in Manhattan, New York, WD4WDW in Orlando, Florida and WB6AJE in Los Angeles. The BEARS system can be accessed on Echolink at WD4WDW-R.

A schedule of operating times and frequencies will be published on the PAPA website at www.papasys.com. To facilitate contacts during the event, operators will blog in real-time at www.facebook.com/KA0XTT and on @NN6JA on Twitter. A special, limited edition QSL card will be issued to all confirmed contacts during this fun national event. (NN6JA)

**

EMERGING TECHNOLOGY: ALL DIGITAL AM HD TESTING ON ITS WAY

Information is surfacing regarding NAB Radio Technology Committee plans to test all-digital AM H-D Radio technology on an existing full carrier AM radio station.

The committee has been meeting since last November to discuss technical options for the revitalization of AM. Testing would quantify both indoor and outdoor coverage. In general, the goal is to verify whether the station coverage and robustness are improved with an all-digital signal in both day and night transmission. Also to quantify any change. There's little technical data in the public arena for all-digital AM operation.

Glynn Walden is CBS Radio Senior Vice President of Engineering. He said during the fall NAB Radio Show that a test station has been chosen with testing likely to begin right after the presidential elections. Walden and other committee members declined to identify the facility but some believe it will be a CBS station in an area that could be characterized as a medium sized market. You can read more about this AM broadcast digital experiment on-line at tinyurl.com/all-digital-am.
(CGC, RW)

HAM HAPPENINGS: 2012 AMSAT SPACE SYMPOSIUM REMINDER

And a reminder that the 2012 AMSAT Space Symposium will be held on Friday, October 26th through Sunday, October 28th at the Holiday Inn Hotel at Orlando-International Airport. Downloadable paper registration forms in MS-Word and PDF formats are available at tinyurl.com/amsat-2012-reg. The Symposium Schedule web page has been updated with links to find more information about the planned activities. You can find it in cyberspace at tinyurl.com/symposium-program. More on the overall event is at www.amsat.org (AMSAT)

**

HAM HAPPENINGS: RAC COLLECTING CLUB MEMBER BIOS FOR 2012 MEMBERSHIP DIRECTORY

If you are a member of the Radio Club of America, please listen up. RCA is in the process of collecting data for the organizations 2012 Membership Directory that will include biographies. If you are a club member who has not yet done so, please go to tinyurl.com/rca-survey-2012 and fill out the online form. Also, please be certain to keep all biographical information on the form as space is limited.
(RCA)

**

AWARDS: CQ INTRODUCES 40 CQ ZONES ON 160 PLAQUE

CQ has announced the availability of a special plaque for those who have achieved contact to all 40 CQ zones on 160 meters. This is considered the most difficult of all amateur radio awards to earn and because of this the Worked All Zones 160 Meter Plaque recognizes that receiving it as one of the elite Top Band DXers. If you believe you qualify, please contact W-A-Z Award Manager Floyd Gerald, N5FG, by e-mail to n5fg (at) cq-amateur-radio (dot) com for further details. (CQ via Facebook)

**

NAMES IN THE NEWS: DX SUMMIT APP

Some names in the news. Kevin Schutz has released a freeware application he calls code.google.com/p/dxer/. Its primary purpose is gather information from DX Summit. Schutz says that with this data and his application, you can easily find out if you already have made a contact or not with that country. More is on-line at the shortcut of tinyurl.com/dx-summit-app. (Via e-mail)

**

NAMES IN THE NEWS: W2ML ORAL HISTORY VIDEO RELEASED

And Steve Mendelsohn W2ML, who passed away earlier this year, was an extremely active, enthusiastic member of the ham radio community. Among other things, he was an ARRL Vice-President and ran the ham radio communications for the New York Marathon. Professionally he was a broadcast engineer for CBS and ABC, and did frequency coordination for the National Football League spending 13 years as the Game Day Coordinator for the New York Jets. Then tragedy struck as he was diagnosed with Pancreatic Cancer and given only a short time to live.

Knowing that he had a vibrant story to tell, his lifelong friend Bill Pasternak, WA6ITF, interviewed Steve at the 2011 Pacificon hamfest. Steve was the conventions guest of honor and it gave them what would be a final opportunity to video record an oral history of Steve's life.

Steve Mendelsohn passed away early in the morning of May 23rd. It was decided that the anniversary of the date of the interview would be apropos for its public release. As such it's now available at two locations.

Gary Pearce, KN4AQ, who edited the production, has it available at his HamRadioNow website at tinyurl.com/w2ml-video. It's also on YouTube at tinyurl.com/w2ml-life-story.

Even if you knew W2ML, and many hams did, you may yet learn a few things you did not know. If you didn't, then take this rare opportunity to hear the story of someone that many call a true trendsetter in the hobby and whose legacy will remain with us for decades to come. (ARNewslineT)

WORLDBEAT: QATAR TO HOST FIRST MIDDLE EAST HAM RADIO FESTIVAL

The city of Doha will host the Qatar's first International Festival for Amateur Radio in December. This according to H E Abdullah bin Hamad Al Attiyah, who is the Chairman of the Administrative Control and Transparency Authority and the vice-chairman of the US Amateur Radio Society.

Al Attiyah, who is also chairperson of the board of directors of the Qatar Amateur Radio Society says that the festival will include a contest between amateur radio operators from all over the world. About 100 hams from across the globe will be invited to the festival to take part in the competition. The Qatar Amateur Radio Society will also establish five amateur radio stations in different parts of Doha during the festival, including the society's office and the festival venue itself.

Announcement of an exact date for this event is expected to be announced shortly. The festival is being dubbed as the first of its kind in Middle East and will take place in conjunction with the Qatar National Day celebrations.

Doha is the capital city of the state of Qatar and is located on the coast of the Persian Gulf. (The Peninsula)

**

WORLDBEAT: INDIA TO ADD 839 NEW FM BROADCASAT STATIONS

India's public service broadcaster, Prasar Bharati Broadcasting, plans to soon set up 839 new FM stations in 290 cities in that nation. According to India's Secretary of the Union Information Broadcasting Ministry, these new

radio stations will be a part of the country's expanding private sector. The regions of Jammu and Kashmir are to be the focal points for what is being termed as this new broadcasting initiative. (Hindu Business Line, The Statesman, RW)

**

WORLDBEAT: HOW SOLAR STORMS CREATE THE NORTHERN LIGHTS

The British Broadcasting Corporation has released a short video that explains in laymen's terms how solar storms affected the Earth's magnetic field to create the Aurora Borealis. The news story features Professor Dag Lorentzen who uses a simple diagram drawn in the snow to explain how this phenomenon of nature takes place. The story was taped in Svalbard and you can see it on line at tinyurl.com/bbc-aurora-story.
(Southgate, BBC)

**

HAM RADIO IN SPACE: HAMS ASKED TO HELP FIND MISSING F1 CUBESAT

An article published on the AMSAT-UK website reports that the F Space team at the F-P-T University in Viet Nam are requesting Amateur Radio operators continue to listen for their F-1 CubeSat. The mini satellite went missing shortly after it was deployed from the International Space Station on October 4 but never heard on Earth.

F 1 was expected to begin transmitting beacon alternatively on its main and backup channels 30 minutes after deployment. Its operating frequencies are on 437.485 MHz while in daylight and 145.980 in satellite darkness.

More information and guide to download F-1 telemetry decoder can be found at tinyurl.com/f1-info. Decoded data can be submitted on using a File Transfer Protocol client to thuvt (at) fpt (dot) edu Dot)vn. Audio recordings are highly appreciated. (F1 Cubesat Team)

**

HAM RADIO IN SPACE: ISRAELI GPS CUBESAT BEING BUILT

Israel is planning to launch a student built ham radio microsat. The Space Duchifat-1 is an experimental and educational CubeSat being developed and built by students at the Space Laboratory of the Herzliya Science Centre.

The CubeSat will carry an APRS digipeater operating on 145.825 MHz and a UHF/VHF 1200 bps B-P-S-K transceiver that

can provide a CW beacon and an FM to DSB transponder.

The main mission of the satellite is to transmit real-time information via packet radio from a Low Earth Orbit using the Automatic Position Reporting System protocol. The satellite will allow remote traveler's to access the bird for worldwide position, status reporting and messaging. This using simple handheld or mobile radios with omni-directional whip antennas.

The project is directed by Dr. Ana Heller with support from the Herzliya city municipality and the Israeli Amateur Radio Club. At this moment no launch date or orbit details are available. (ANS)

**

ON THE AIR: SAQ TO TRANSMIT ON UNITED NATIONS DAY

On the air, word that the Alexander Association will activate the giant SAQ radio-wave alternator on Wednesday, October 24th. This, in recognition of United Nations Day.

Transmissions will begin at about 10:10 UTC, and a special commemorative message will be sent at 10:30 UTC using CW on 17.2 kHz. Unfortunately, reports from the transmission cannot be confirmed by QSL card.

The Alexander Association is a group of European radio enthusiasts who preserve and demonstrate the old ultra long wave Alexanderson electro-mechanical transmitter located at Grimeton, Sweden. The site houses the only working Alexanderson rotating alternator radio transmitter in the world and is classified as a World Heritage Site.

More on the transmitter is at the society Website at www.alexander.n.se
(Association Alexander)

**

ON THE AIR: CELEBRATING 150 YEARS OF THE PACIFIC RAILWAY ACT

And the Union Pacific Amateur Radio Club will sponsor Special Event UP150 on December 1st. The operation commemorates the 150 years since President Abraham Lincoln signed the Pacific Railway Act of 1862 and directed the Union Pacific and the Central Pacific to construct a transcontinental railroad. The event will use the call sign WOUPR. It will begin at 6am Central and end at 8 pm Pacific. Many present and past Union Pacific employees are expected to operate during that time frame in hope of talking with you. A special QSL will be available. More

information is on-line at www.pocatelloarc.org/uprr. (Union Pacific ARC)

**

DX

In DX, F1NGP will be active stroke FG from Saint Francois Island in Guadeloupe through October 26th. He will be operational on 40 through 10 meters on CW , SSB , RTTY QSL via his home call.

G3RWF who was expected to be active this month from Uganda 5X1NH has announced that his trip is now postponed. No reason was given.

WJ2O will be operational as 8P9DF from St. Philip, Barbados between November 21st and the 28th. Activity will be on all HF bands using mainly CW and as an entry in the CQ World Wide DX CW Contest on November 24th and 25th. Outside of the contest, he will be on 30, 17 and 12 meters. QSL via WJ2O.

HB9OAU will be on the air from the Maldives as 8Q7AU between November 26th and December 11th. Activity will be holiday style on 80 through 10 meters SSB only. QSL via his home callsign, direct or by the Bureau.

N3IQ will be operational as C6AQQ from Nassau's Providence Island between October 25th to the 31st. Activity will be mostly on the lower bands. QSL via N3IQ, direct, via the bureau or electronically using Logbook of the WQorld or eQSL.

Lastly, ZL1LC planning to be operational from the Chatham Islands hrom March 21st to the 27th of 2013 as Zed-L-7-L-C. He planning to be active PSK only. No times, frequencies or QSL route have yet been announced.

Above from various DX news sources)

**

THAT FINAL ITEM: WHAT EVER HAPPENED TO THE PRINCIPALITY OF SEALAND

And finally this week, do you remember Sealand? That's the self-proclaimed principality that also once claimed to be a DXCC entity. Well its still there but changes are in the wind. Amateur Radio Newsline's Cheryl Lasik, K9BIK, takes a look back into recent history:

--

Sealand is a former United Kingdom anti-aircraft tower legally known as Roughs Tower. Its located in the North Sea some 7 nautical miles off the shore of Suffolk, England. In 1967 the tower was occupied by a retired army major named Paddy Roy Bates along with his family in 1967. On September 2nd of that year Major Bates declared the fort an independent sovereign state from the UK and renamed it Sealand. He went on to establish Sealand as a nation in 1975.

Sealand had its own constitution, flag, national anthem, stamps, passports and currency. There were even a few DXpeditions to Sealand. This included a operation by a group of German DX'ersin 1982 using Sealand's self proclaimed and unofficial callsign prefix of S-1-A. Later, in 2000 there was the Dutch-lead 1SLA1 operation, but neither of these was awarded DXCC status.

Now comes word that Major Bates passed away on October 9th, in a senior care home Essex England at the age of 91. This, after a long battle with Alzheimer's.

But the Sealand saga is far from over. His wife Joan is now expected to take over the rule of the self proclaimed nation. Also, with Sealand is managed by the Bates family as if it were a recognised sovereign entity, and they are its hereditary royal rulers. Bates son is known as "His Royal Highness Prince Michael." He has also been referred to as the "Prince Regent" by the Bates family since 1999. In this role, he apparently serves as Sealand's acting "Head of State" and also its "Head of Government". Also, at a micro nations conference hosted by the University of Sunderland in 2004, Sealand was represented by Michael Bates' son James, who was referred to as "Prince Royal James".

Butr whomever takes on the leadership of Sealand, one thing is fairly certain. Mounting a DXpedition to Sealand in the hope of establisghing it as a new DXCC entity, woyuld likely be a very expensive waste of time.

For the Amateur Radio Newsline, I'm Cheryl Lasik, K9BIK, in Zion, Illinois.

--

According a Wikipedia, the Sealand News says that a movie about Sealand is currently in development and scheduled to be released in 2013. More about this interesting location is on-line at www.sealandgov.org and also at wikipedia.com. (OPDX, Wikipedia)

RESTRUCTURING: CLOSURE OF TV CHANNEL 1 AND ZL ACCESS TO 6 METERS UPDATE

Changes will be coming to the 6 meter band down-under, but not as quickly as some hams in New Zealand had hoped for. Amateur Radio Newsline's Jim Meachen, ZL2BHF, reports:

--

Amateurs across New Zealand may have to wait a bit longer to get full access to the 6 meter band. As previously reported, 50 to 51 MHz down-under is to be returned to amateur radio once all Channel 1 television has ceased using the spectrum and the current management right for this band expires.

What may not be known by some hams is that the last New Zealand channel 1 television transmitter is not due to close down until November 2013. After that, the management right under which it operates does not expire until August 2015.

Because of this, the New Zealand national amateur radio society, NZART, is working with the nations Radio Spectrum Management on arrangements for the period between when all the Channel 1 transmitters are turned off and their management right expires. In the meantime any New Zealand amateur in an area where TV channel 1 is no longer operating can apply for a permit to operate on the band.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, down-under in Nelson, New Zealand

--

As we go to air, not exact date when all New Zealand hams will have 6 meter access is known. (NZART)

**

RADIO LAW: DARC TO OPPOSE NEWLY PROPOSED EUROPEAN PLT STANDARD

Germany's national amateur radio society, the Deutscher Amateur Radio Club, or DARC will be asking the Deutsche Commission for Electrical, Electronic & Information Technologies to oppose a new pan-European draft Power Line Transmission standard. PLT is what Europe call Broadband over Powerline or BPL.

During its October 22nd meeting, the DARC Board discussed the pros and cons of the proposed draft standard. While it said that it recognizes the new draft provided for some non-binding commitments for notching out of certain frequencies in the amateur bands, it also noted that it fears the future ambitions of the manufacturers of other PLC products in the direction of higher limits for the emission of harmful electromagnetic or EMC interference. This could lead to a weakening of the previous limits in other European EMC standards.

To be clear, this new standard concerns the devices that people install in their homes to run data over their house wiring. It has nothing to do with PLC or BPL that is carried over the over company power networks. (Southgate, DJ0QN)

**

RADIO LAW: SARL TAKES UP ZONING REGULATIONS WITH THE CITY OF CAPE TOWN

Its not just hams in the United States that are having problems erecting towers and keeping them up. And a case in South Africa points graphically this out. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

Recently South African Radio League President, Rassie Erasmus, ZS1YT and Legal advisor. Johan Marais, ZS1JM, met with a delegation of the Cape Town Metro Council. This, to intervene in a notice received by a society member stating that he requires approval in terms of the Environmental Act & City of Cape Town Zoning regulations for his antenna which

is less than 15 meters in height.

It was quickly learned that the council had received a complaint from a neighbor, which was most probably RF related. Rather than investigate the matter the Council simply elected to notify the ham that his antenna has not been approved and that it intend taking steps to either have him remove the tower or to apply for the necessary permits.

But the South African Radio League delegation was right on top of this one. It pointed out that amateur radio antennas fewer than 15 meters of are exempt under the provisions of the National Environmental Management Act of 1998.

Based on this it was agreed that the process will be suspended pending the Council consulting with its legal advisors. The South African Radio League will then be afforded further opportunities to discuss the issues once feedback has been received from the Council's legal department.

For the Amateur Radio Newsline. I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The South African Radio League will be keeping the qorld of amateur radio up0dated on this one. (SARL)

**

RESCUE RADIO: HURRICANE WATCH NET ACTIVATED FOR HURRICANE SANDY

The United States-based Hurricane Watch Net has been activated for Hurricane Sandy. Net operations began at 11:00 UTC on Wednesday, October 24th on 14.325 MHz to observe and report conditions surrounding the storm to the National Hurricane Center.

Sandy is expected to develop into what forecasters are calling a volatile hurricane as tropical storm Sandy merges with a powerful cold front charging towards the East Coast late the weekend of October 27th and 28th. As Sandy progresses the Hurricane Watch Net will be looking for condition reports from stations located in the affected areas. Hams in the places affected by this storm should be prepared to operate from a place of safety.

Net organizers say that they appreciate the consideration of all amateur operators in keeping the frequency of 14.325 MHz clear, and listening for possible relays. Operation on lower frequencies such as 40 or 80 meters will be considered depending on propagation during evening and night hours.

For information on the storm and the Hurricane Watch Net, go to www.hwn.org on the World Wide Web. (HWN)

**

RESCUE RADIO: UK ESSEX COUNTY RAYNET CALLED OUT IN FLOOD WATCH

Ham radio is called out in the UK as rising waters along riverbanks put several towns on emergency alert.

The Radio Society of Great Britain reports that at 18:00 UTC on Sunday, October 14th, the Emergency Planning Officer from the Maldon District Council requested Essex RAYNET to be placed on standby. This in response to flood alerts issued by the Environment Agency.

At 20.00 members were mobilized and deployed to the riverbanks at Heybridge Basin, Fulbridge and the Hythe in Maldon. This was in preparation for the high tide and possible tidal surge due at quarter to one in the morning.

Thankfully, the high tide hit without any significant incident. RAYNET volunteers were able to stand down shortly afterward. More information is on the Web at www.essexraynet.co.uk. (GB2RS)

**

HAM RADIO NEAR SPACE: PICO HAM BALLOON MAKES TREK FROM UK TO SWEDEN

PicoAtlas VII, a single foil balloon launched by James Coxon, M6JCX, on Saturday, October 20th from Suffolk in the UK has landed some 1050 kilometers or 650 miles to the East in Sweden.

PicoAtlas VII carried a GPS receiver and a miniature transmitter running only 10 milliwatts output sending RTTY on 434.301 MHz USB. The telemetry data from the balloon transmitter could be decoded using the free software at dl-fldigi. This program can decode many different amateur radio digital modes and can be downloaded for Windows, Mac and Ubuntu Linux at tinyurl.com/8zlo437.

An increasing number of radio amateurs are experimenting with ultra light balloon payloads, typically weighing less than 100 grams. Balloons such as these do not go to high altitudes. Instead they float between 3,500 and 6,000 meters which roughly equates to 9000 to 20,000 feet for an extended period of time. During the 19 hour flight this balloon successfully crossed the North Sea before landing in central Sweden. We will have more ham radio space related news later on in this weeks report. (Southgate)

**

HAM RADIO NEAR SPACE: MAY LAUNCH AND OCTOBER RECOVERY OF HIGH ALTITUDE BALLOON PAYLOAD

An amateur radio balloon project launched last May finally ended this month with the recovery of the payload.

Members of AMSAT-LU, had launched a high altitude balloon on 19th May from La Pampa, Argentina. The payload included a 70cm to 2m 4 watt FM repeater, live SSTV, an HF beacon and two video cameras. During the 4 hour flight, over 200 stations made contacts through the repeater.

Unfortunately, while the flight was deemed to be a complete success the balloon came down in an isolated and flooded area. It was finally recovered from the mud on October 6th by a 4 by 4 off-road adventure group.

The good news is that all flight data was retrieved. This included over 6 hours of video from the two cameras. Details can be found at www.uk.amsat.org. (GB2RS

**

RADIO BUSINESS: GRE QUITS THE SCANNER BUSINESS BUR ALINCO NOT AFFECTED

GRE, the radio manufacturer which also represents Alinco here in the United States, has ceased all manufacture of scanner radios. The good news is that Alinco product sales and service will continue. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the details:

--

The news was a bit of a shock to the GRE group in Belmont, California - word from Japan earlier this month that the GRE personnel in Asia and the United States were being dismissed and scanner operations were being discontinued.

It was October 16th when the official word was released by GRE-employed U.S. managers of the shutdown in Japan.

But there was a pledge to keep the California office open because of its distribution affiliation with Alinco.

Michael Herbert, WB6JKV, a service technician and engineer for GRE's Belmont office, officially confirmed for Amateur Radio Newsline that things are still go for Alinco.

"GRE America will continue to market, service and support Alinco's radio products without any interruption," Herbert says. "So, for us amateurs, it will be business as usual."

And, Herbert continues: "No worries for warranty repairs. We have a great parts supply. We have a direct line with the factory and they are really eager to go forward with us and proceed."

Herbert says he's not authorized to say much more.

However, he says GRE is waiting on Alinco's new SDR, 100 watt HF radio due for delivery by Christmas. And, is expecting to distribute the new 900 megahertz /220 megahertz mobile radio about Dayton time next May.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The bottom line. If you own or are planning to purchase an Alinco brand piece of radio gear you have nothing to worry about. However at airtime the future of GRE manufactured scanner radios is unknown. (ARNewslineT)

**

RESCUE RADIO: ISABELLA COUNTY MICHIGAN WANTS RADIO AMATEURS

An Emergency Management Director in Michigan, is seeking the assistance of the local ham radio community. This to be ready to provide solid emergency communications assistance in time of crisis.

Isabella County's Marc Griffis is actively recruiting licensed ham radio operators to help out in a variety of situations including training exercises. According to Griffis, there are more than fifty ham radio operators in Isabella County and he wants those who are interested to attend a Community Emergency Response Team training meeting.

Griffis says there is a potential in Isabella County for emergency management to call upon those with expertise in ham radio operation, and he wants them to be prepared for any situation. Examples of the types of assistance Griffis is referring to include assisting in the coordination of search and rescue perimeters. Also, communications between

shelters and in other situations where other forms of communication have failed.

Isabella County is a located in central Michigan. As of the 2000 census, the population was 63,351. Its county seat is Mt. Pleasant. (Michigan Morning Sun)

**

ENFORCEMENT: UNLICENSED IOWA BROADCASTER ISSUED $10000 NAL

It's rare that you hear of an unlicensed broadcaster in Iowa, but it apparently has happened. This with word that the FCC has issued a $10,000 Notice of Apparent Liability for Forfeiture to Thomas Costa for allegedly operating an unlicensed radio transmitter on the frequency 87.9 MHz in Iowa City. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

This past September 17th agents from the Enforcement Bureau's Kansas City Office used direction finding to locate the source of radio frequency transmissions on the frequency 87.9 MHz to a transmitting antenna mounted on a chimney of a residence in Iowa City. The agents determined that the signal exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license. The Commission's records showed that no authorization was issued to anyone for operation of an FM broadcast station at or near this address.

On September 18th agents from the Kansas City Office again used direction finding and confirmed that the station was still in operation. The agents, this time accompanied by the property owner, inspected the unlicensed station's antenna and transmitter. The latter was located in a locked basement room. It turned out that the station was automated with a computer providing audio to a non-certified FM transmitter. The property owner stated that one Thomas Costa rented the basement room housing the station.

Later that day, the agents interviewed Costa. At that time he admitted that he rented the basement room and installed the radio station equipment but denied operating it. Rather he claimed that several unnamed individuals owned the equipment and gave him rent money each month which he, in turn, gave to the property owner. Costa also asserted that the alleged operators of the station did not provide him with their names or contact information in order to protect him and them from the FCC. He also stated that he was told by the unnamed operators that he could expect the Commission to inspect the station at some point and order him to cease

operation.

Now in issuing the $10,000 N-A-L the FCC says that the record evidence in this case is sufficient to establish that Costa violated Section 301 of the Communications Act. Also that Costa can be said to have "operated" the unlicensed radio station because the evidence shows that he exercised control over the general conduct or management of it despite his claim that other individuals, who he refused to identify, were actually the operators. In this regard, Costa admitted that he rented and paid the monthly rental for the locked room housing the unlicensed station, and that he installed the station equipment.

Further, during the interview with the FCC agents, Costa mentioned that he was warned about the unlawfulness of the operation by unnamed individuals, who told him that he could expect the Commission to inspect the station and order him to cease operations at some point. Assuming the statement to be true, it appears that, in spite of the warning, Costa nonetheless allowed the station to continue to operate in the basement room. The FCC says that these facts indicate that Costa consciously operated and/or otherwise was involved in the general conduct or management of the unauthorized station.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Costa was given the customary 30 days to pay the proposed fine or to file an appeal. (FCC)

**

RADIO LAW: BBG ACCUSES SYRIA OF JAMMING SATELLITE SIGNALS (Print version only)

The United States Broadcasting Board of Governors and several other international broadcasters believe jamming of their satellite signals last week came from Syria.

According to an announcement from the board, the interference has disrupted satellite transmissions in Europe and the Middle East. Specifically, the jamming hit satellites operated by Eutelsat, a European satellite operator, and affecting TV and radio programs reaching millions of households.

The board noted that the jamming started when Eutelsat announced it would terminate transmission of 19 channels belonging to Islamic Republic of Iran Broadcasting. Several

international broadcasters also criticized the jamming, citing disruption of broadcasts from Russia through Europe, Central Asia and the Middle East. Here in the United States, the Broadcasting Board of Governors said signals of Voice of America, Radio Free Europe and the Middle East Broadcasting Networks were affected.

According to the Broadcasting Board of Governors, an earlier round of jamming this month was traced directly to Iran. (RW)

**

RADIO ON THE WEB: SOUTHGATE NEWS OPENS AMATEUR RADIO TODAY DISCUSSION BOARD

Great Britain's Southgate Amateur Radio News has launched a new amateur radio forum discussion board. Called the Ham Radio Today the forum contains lots of amateur radio news stories, plus sections for special interest groups. While geared mainly toward Europe and IARU Region 1, the board offers subjects of interest to hams world-wide including specialty areas to discuss 5 MHz operation, ham radio satellites EME operations and reports from several of the worlds best known propagation experts. Registration is free and only takes a minute. You'll find the new forum board at www.hamradiotoday.com (Southgate)

**

RADIO EDUCATION: ARRL GRANT RETURNS HAM RADIO TO MISSOURI SCHOOL

Thanks to a dedicated teacher and a grant from the American Radio Relay League, ham radio is back at a suburban Saint Louis, Missouri school.

STL Today reports that a new amateur radio club has been created at St. Charles High School, in St. Charles County. The club was started by science teacher Ellen Zerr, KD0PES, after the ARRL recently awarded nearly $2,000 to the school. Zerr used the grant to buy radio gear and antennas for the station.

The last time the school had an active amateur radio club was way back in the 1960's. You can read the full story at tinyurl.com/new-missouri-club (STL Today)

**

HAM HAPPENINGS: ANOKA COUNTY ARC CELEBRATES THE HALLOWEEN CAPITOL OF THE WORLD (Print Version Only)

Turning to the social scene, since 1920 the City of Anoka, Minnesota, has hosted some major Halloween festivities, earning the reputation of "The Halloween Capitol of the World". To commemorate this years festivities the Anoka County Radio Club will operate a special event station W0YFZ from Anoka High School parking lot on Saturday, October 27th from 10 a.m. to 6 p.m. local time. Visitors are welcome to come observe the special event Haloween station. More about this operation is on the web at tinyurl.com/anoka-halloween-event (KB1UOG)

**

NAMES IN THE NEWS: 14 YEAR OLD MAKES DIGITAL DXCC

The ARRL report that 14 year old radio amateur Tom Jose, VU3TMO, has just achieved his Digital DXCC award.

First licensed when he was 13 years old in December of 2011, VU3TMO is a 3rd generation ham operator in his family along with his parents. VU3TMO is a member of India's National Institute of Amateur Radio and the Dayton Amateur Radio Association. He is reported to be one of the youngest hams in his nation. (ARRL, Southgate)

**

NAMES IN THE NEWS: ARRL MEDIA AND PUBLIC RELATIONS MANAGER ALLEN PITTS, W1AGP, RETIRES

After more than eight years as the ARRL Media and Public Relations Manager, Allen Pitts, W1AGP, has retired.

During his tenure, Pitts was responsible for developing public relations campaigns that featured the many facets of the Amateur Radio Service. The first of these was the simple but very effective Hello Radio campaign in 2006 that highlighted the fun and friendships of ham radio. That was followed by Emergency Radio, which built on the ARRL and the Amateur Radio Service's response during Hurricane Katrina. Next was his We Do That - Radio in 2008 showcased the technologies used in Amateur Radio. Pitts rounded out his career by spearheading the 2011 with the Do It Yourself or DIY campaign aimed at recruiting members of the burgeoning maker and hacker community to expand their horizons through becoming amateur radio operators.

While W1AGP has retired from day to day work at ARRL headquarters, he has not severed his ties with the national society. The ARRL is currently seeking a new Media and Public Relations Manager. In the interim, Pitts has agreed to continue on a very limited part-time basis during the selection process to find a successor. He also hopes to be able to work as a consultant on the League's Centennial

projects, celebrating the 100th anniversary of the ARRL. (ARRL)

WORLDBEAT: OPERATOR NEEDED FOR 2013 AMERICAN SAMOA DXPEDITION

Are you interested in going to American Samoa on a DXpedition? If yes, listen up.

Bill Worthman, N6MW, and Jim Colletto, N6TQ. will be active stroke KH8 from a hotel in Tutuila between March 19th and the 28th of next year. Their location on the island will be well south of the Pago Pago harbor area to avoid as much mountain low angle cut off as possible.

According to their website, they have an opening for one more operator to go along on this operation. For more details and updates, visit n6mw.jimdo.com on the World Wide Web. (OPDX)

**

WORLDBEAT: DARC SEEKS NOMINATIONS FOR ANNUAL HORKHEIMER PRIZE

Nominations are being invited by the German national amateur radio society, the DARC, for the prestigious Horkheimer Prize. The prize consists of an etched glass trophy and a monetary prize for non-personal use. The money is to be spent for the promotion of amateur radio however the recipient chooses. The prize can be awarded to one or more persons or institutions.

Any member of an amateur radio society in the International Amateur Radio Union is eligible, and self proposals are permitted. Nominations must be submitted to DARC by March 28, 2013, and the prize itself will be awarded at the opening of next year's Ham Radio convention in Friedrichshafen. More information in the German language is on-line at www.darc.de (DARC, GB2RS)

HAM RADIO IN SPACE: FUNCUBE-2 A STEP CLOSER TO LAUNCH

The highly publicized Funcube satellite has taken another step toward becoming a reality. This with work that AMSAT-UK has delivered a set of completed Funcube 2 subsystem boards to Clyde Space Ltd in Glasgow. The handover took place on October 19th. The boards represent the Funcube-2 subsystem that will become a part of the UKube-1 spacecraft.

Three circuit boards make up the spacecraft. One is for command, control and telemetry. An RF Board that houses the command receiver, telemetry transmitter and linear transponder and a third board contains the 400 milliwatt VHF amplifier and sensors.

Funcube-2 will provide a 435 to 145 MHz linear transponder for amateur radio SSB and CW communications and telemetry for school students around the world. Its host, the UKube-1 spacecraft is expected to be launched on a Soyuz-2 launcher from the Baikonur Cosmodrome launch facility in Kazakhstan in March 2013. (AMSAT-UK)

RADIO FROM SPACE: NEW EXOPLANET DISCOVERED ONLY 24 TRILLION MILES AWAY

Scientists using visual and radio telescope data have discovered the closest planet outside our Solar System. One that is orbiting a sun-like star about 24 trillion miles away from Earth.

According to astronomers at the European Southern Observatory the so-called exoplanet has about the same mass as Earth but it circles its star much closer than Earth does the sun, The exoplanet which is described as a planet outside our Solar System is outside the "habitable zone" for possible life because of hot and rocky conditions Temperatures on its surface could reach some 2,200 degrees and the surface is likely to be lava.

Scientists discovered the planet while monitoring stars in Alpha Centauri, a neighboring star system, only about four light years away. That system is peppered with stars orbiting one another, making the hunt for planets difficult, astronomers explained.

This is now the closest of more than 840 confirmed exoplanets. This according to research published in the British science journal Nature. (Nature)

DX

In DX, DF7NX is currently operational from Bolivia as CP8MW. He is active on HF Bands mostly operating CW. QSL as directed on the air.

LU3XEM, LU3XEI, LU1XBF, LU5VAT and LU7DSY will be active from Penguin Island November 2nd to the 4th as LTZ0. They will be operational on 80 through 10 ethers using CW, SSB and PSK 31. QSL this operation via LU7DSY

DF7NX is currently operational from Bolivia as CP8MW. He is active on the High Frequency bands mostly using CW. QSL via his home call, either direct or via the bureau.

JR1MLT has been heard on the air from Singapore as 9V1KK. He is reportedly active on all of the High Frequency bands using various modes. QSL direct only via JH1ILX.

N5ZO will be active from Ascension Island through October 30th as ZD8O. He plans to operate the CQ WW DX SSB Contest in Single Operator All Band category. If you make contact, QSL via OH0XX

ND9M will be active from Diego Garcia Island through November 4th under the callsign VQ92JC. He also plans to operate the CQ World Wide DX SSB Contest while at that location. If you work him please QSL via home call.

Lastly, ZS3Oh is currently on the air from Botswana as A22LL. He is reported to be active on HF Bands mostly using CW. QSL via home call.

(Above from various DX news sources)

THAT FINAL ITEM: BRITISH SOPRANO SARAH BRIGHTMAN TO BE THE NEXT VISITOR TO THE ISS

The British songstress who created the role of Christine Daae (pron "Die Aye") in Sir Andrew Lloyd Webbers musical stage classic The Phantom of the Opera will be the next space tourist to visit the International Space Station. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--

On Wednesday, October 10th it was announced in Moscow that world famous soprano Sarah Brightman had passed the required mental and physical examinations to permit her fly to the ISS. And in a video of the press conference made public by the Russian Space Agency Roscosmos, and the singer herself, Brightman described how as a child she was inspired by the

Apollo 11 landing on the moon.

--

Brightman: "When I look back, my minds eye brings me to a rush of images from all of the incredible things that I have been privileged to experience in my life. But if I keep tracking back, my thoughts eventually come to rest on a flickering TV screen in 1969. There as a small and incredulous child I watched a man bound gently from the steps of a rocket ship and land on the surface of the moon.

"This really was an adventure. It was something miraculous.

"For me it was an epiphany. From that moment I began looking into the future. I began to dream about what life might hold in store for me and of what I could accomplish."

--

During her comments, Brightman said the trip would serve as a way to promote environmental awareness and to encourage women's education by helping to close the gender gap in the sciences. For this she has called on the United Nations Educational, Scientific and Cultural Organization, better known as UNESCO, to join with her to make it happen:

--

Brightman: "There are two key areas that we have identified which unify my personal passions, UNESCO's objectives and my spaceflight. Both are inexplicably linked and both relate to issues of sustainability."

--

After completing an upcoming world tour to promote her new album appropriately called Dream Chaser, Brightman will undertake six months of training at Star City in Moscow in preparation for her mission to the International Space Station. Once on-orbit she is expected to take part in several educational ventures as just mentioned but it is not yet known if she will obtain an amateur radio license or has any plans to make any ham radio contacts from the ISS.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

This is not Sarah Brightman's first venture into the area of science education. Earlier this year in conjunction with Virgin Galactic she launched the Brightman STEM Scholarship program. STEM is an acronym for the words science,

technology, engineering, and mathematics. Her program is designed to help young women in the United States to pursue STEM education across their four year college careers.

(Roscosmos, Southgate, others)

Hope all my radio friends up there in the northeast are doing alright.
Caught some DX from Connecticut this evening and it seems like
everyone along the eastern seaboard got hammered. Some deep snow in
parts of my favorite hunting grounds so I'm kinda wishing I was up
there right now as the critters move around with the first snowfall.
Tagged another driver heading into northern Virginia and he said some
roads are closed. Fare well up that way, keep the wheels turning and
be safe.

Twisted, Twisted and more Twisted, STILL down here in the swamp!
Break, break, bump, bump!

RESCUE RADIO: HAM RADIO MEETS KILLER HURRICANE SANDY

As Hurricane Sandy made her way across the Caribbean and the up along the U.S. East Coast ham radio operators had been tracking the storms every move. When she made landfall on the New Jersey shore they were ready to respond. Mark Abramowicz, NT3V is here with whats known so far:

--

To be sure, the hams who responded to Hurricane Sandy will never, ever forget the destructive power of a superstorm that - to this point - has been unmatched in modern history.

It was New Jersey Gov. Chris Christie, who the day following the storm striking along the state's barrier islands, summed up the grit and determination for the people of his state...

"We have a long road ahead of us but I have complete confidence we're going to come out of this better and stronger than before," Christie said. "This state is too tough to give in to this type of devastation."

And, in the immediate aftermath of the storm, radio operators in southern New Jersey were put to the test, especially in Atlantic and Ocean counties.

The first is home to Atlantic City, which ended up under water as the storm passed, and the second, home to Long Beach Island and other well-known seaside communities where

homes were ripped apart and boats thrown into piles like toys in a child's messy play chest.

Southern New Jersey hams will remain on the job with relief coming into Atlantic County for shelters still being manned by Red Cross personnel.

John Zaruba, K2ZA, is ARRL Section Emergency Coordinator for Southern New Jersey,

Zaruba says hams went active Saturday morning - days before the storm arrived - and began moving equipment into position.

He says by Sunday night as the rain bands from Sandy starting closing in on New Jersey and tge wind began kicking up, operators were already out..

"There was a lot of good ground intelligence," Zaruba says. "You know where people were trying to get places and there was a lot of reporting of, 'Okay this road's flooded, you can't go here. You have to re-route and go this way.' So there was a lot of real-time information coming back that way."

Zaruba says the Red Cross was operational with shelters in-land, away from the coastal areas, before the storm hit...

"In some of the counties, seven or eight shelters actually operating," Zaruba says. "But as the storm passed through. They started consolidating things, getting people out that could go back to their homes and other people that needed more long-term sheltering. They started moving them into more consolidated shelter facilities."

At one point, Zaruba says there was a need for more equipment and section officials contacted ARRL headquarters and a response came quickly...

"We were able to get six 'Go Kits' sent down from the League to Ocean County and that went a long way toward easing their operational burden," Zaruba says.

As for the modes of communication, Zaruba says it was all voice...

"Primarily, we were using 2-meter FM," Zaruba says. "And, I've been a big proponent of using digital communications. But, here, again, we've got a bit of a way to go to get people focused in on that's an available tool in our tool kit and let's utilize it.

"Right now, most of the mindset revolves around voice communication."

Zaruba says hams in south Jersey are standing down, for the most part, and he's proud of their dedication and response...

"They did an outstanding job, to a person," Zaruba says. "All went above and beyond the call of duty. The folks in Ocean and Atlantic counties were pulling some brutal shifts."

And, Zaruba says, some of the volunteer radio operators also suffered some devastating losses themselves...

"Some hams that were talking about shore houses that have 20-25 inches of water in the bottom," Zaruba says. "And, granted those folks didn't sound real happy but as long as there were no lives lost, the house and the contents are all replaceable."

Now, on to New York, where Sandy socked the city hard.

Mike Lisenco, N2YBB, is ARRL section manager for New York/Long Island.

He says during the storm itself, operations were hunkering down like everyone else, but quick sprung into action once it passed.

"Despite the tremendous devastation that the city has faced, the role amateur radio played in the five boroughs was relatively small, "Lisenco says. "We manned the emergency operations center at the American Red Cross in mid-town Manhattan."

But Lisenco says the devastation is far worse outside the city and its environs...

"In Nassau Couny, the response has been rather large because a good portion of the southern part the county has seen complete devastation, primarily because they are very close to the water," Lisenco says. "The Red Cross has run a rather large sheltering operation in Nassau County. We've been providing communications for the shelters

"They've been running a resource net as well as a net for passing traffic back and forth between the shelters and to, of course, Red Cross headquarters in Nassau County."

Lisenco says the many hams responding to help faced some challenges even getting into position...

"The biggest problem I think we faced was the fact that there's these widespread power outages," Lisenco says. "We're talking about millions of people without power in the area. And, also what damage that was done with downed trees, power lines, a tremendous amount of sand washed up on shore,

houses displaced, a large problem would then be in terms of transporting oneself to a location that they're supposed to be manning, such as a shelter.

"Even just driving around Brooklyn we have a lot of areas where they have no power. Lights are out. Driving, even during the day is somewhat tenuous. So imagine having to do that at night."

Lisenco says the effort in Nassau County remains very fluid and active and he expects emergency operations will continue for the coming days as we go to air on Friday, Nov. 2.

Lisenco and Zaruba from the southern New Jersey section agree on one thing.

It's important for all amateurs to realize the role they can play in their communities in times of disaster.

Lisenco sums it up...

"It's very easy for people to grow complacent over time when they feel their services aren't needed," Lisenco says. "But they need to keep in mind that emergencies happen at any point in tie, anywhere.

"And, they need to be involved at some level in the emergency communications aspect of amateur radio. Amateur radio is both a service and a hobby. And we can't lose sight of that. And, in order to participate in the hobby aspect, you have to give something back."

So, while New Jersey and New York have a long way to go in coping with the aftermath of Sandy, Lisenco and Zaruba say communities can rest assured amateur radio will be there when needed.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Obviously, reports are still coming in and it will be some time before we know the full extent of the work of radio amateurs in response to this event that's been called the perfect storm. More in future Amateur Radio Newsline reports.

RESCUE RADIO: HAWAII EMCOMM RADIO AMATEURS RESPOND TO TSUNAMI WARNING

Amateur radio operators in Hawaii responded to a tsunami warning on Saturday evening, October 27th. This by providing valuable information to emergency management officials after a magnitude 7.7 earthquake struck off the coast of British Columbia, Canada at 5:04 pm Hawaii Standard Tine.

At 7:14 pm, the Pacific Tsunami Warning Center upgraded an earlier bulletin to a warning with an estimated wave arrival time of 10:28 pm. At this point key members of Hawaii's emergency communications ham radio network were alerted by an automated text message system. One of them was Ron Hashiro AH6RH, is the Hawaii State Civil Defense RACES Coordinator.

--

AH6RH: "With the estimated wave arrival time of 10:28 pm, we really had to hustle because now we were within the three hour time limit that we would normally sound sirens and of coarse all of that notification was subsequently delayed. The telephone alert process took 22 minutes and from there we had to mobilize and it took 40 minutes to get on site at the state EOC.

--

Also alerted were ARES Emergency Coordinators on each island that make up the State of Hawaii. This lead to a call-up of various ARES and RACES nets. Hams were also dispatched to keep an eye on ocean levels and report back:

--

AH6RH: " We had Kalani Ku, WH6KX, on the north side of Maui at Kahului Harbor and Dave Garrison, AL4A, on the South side reporting ocean level changes. At 10:53 pm Kalani reported that the water was receding from Kahului Harbor and shortly thereafter Dave reported the same.

"For the next two hours WH6KX and AL4A passed timely reports of ocean level changes ranging from plus 2 feet to minus 3 feet below normal. The ocean level reports were received by hams at all the EOC's and passed on to their respective EOC operations."

--

Once the Tsunami arrival time was well past, a determination was made to downgrade the warning to an advisory effective at 12:54 am. Nets stood down at about 10 minutes later.

AH6RH says that the only major incident that took place came in a notice from the Hilo EOC. Hams there reported that the receding water in Hilo Bay caused the bottom of boats to hit

the floor of the bay. (ARNewsline[TM], AH6RH)

RESTRUCTURING: SARL PRESENTS AMATEUR RADIO'S NEEDS IN THE MICROWAVE BANDS AT HEARING

The South African Radio League was to discuss amateur radio's needs for allocation in the 2.3; 3.5 and 5 GHz bands at a hearing with that nations telecommunications regulator held on November 1st and 2nd. The hearing dealt with the draft frequency migration regulation and frequency migration plans for this spectrum. Prior to the meeting the South African Radio League had put forward its requirements for allocations in these bands in line with the IARU Region 1 spectrum requirements for amateur radio use of these bands. Like many parts of the world, this region is also looking into ways to make more spectrum available to broadband and other emerging technologies. (SARL)

RESCUE RADIO: MOBILE WEATHER TRAINING AT GAREC 2012

A free session on the Mobile Emergency Weather Station is available to those who will be attending the Global Amateur Radio Emergency Conference being held in Malaysia from November 11th to the 14th. Presented by its inventor Gregory Lee, HS0ZHM, of the Rural Training Centre in Thailand, the session will first cover the Weather Observation Log form and then take the trainees through the device set-up and its operation.

The Mobile Emergency Weather Station device enables hams to quickly gather weather data in a reliable manner for them to be reported by radio. Its ultimate goal is to provide meaningful weather reports from a disaster zone. This, to help in making the multitude of decisions by relief authorities and also to improve helicopter flight operations and safety.

The Mobile Emergency Weather Station session will be on November 11th at the Melaka House, in Port Dickson. For

more information contact 9W2PCK by e-mail to choysegt (at) gmail (dot) com (VK3PC)

RESCUE RADIO: SANTA CLARITA CALIFORNIA RESCUES STRANDED HIKER

A stranded hiker has been saved in California. On Sunday, October 28th, at approximately 1:15pm the Santa Clarita Valley Sheriffs Station Search and Rescue Team along with Los Angeles County Fire Department responded and rescued a 54-year-old female hiker from the narrows portion of Towsley Canyon.

When located, the hiker was suffering from heat exhaustion and dehydration. She was airlifted by a Los Angeles County Fire Department helicopter and brought to a safe landing zone where she was medically checked out by Search and Rescue team members, and fire department paramedics. The hiker was then released to her family.

At the time the incident occurred the team was helping out with the haunted jailhouse fundraiser. This by teaching children about rescues along with demonstrating some of the most common gear used during a rescue. When they received an emergency call regarding a stranded hiker they quickly decided how many members would deploy to Towsley Canyon and how many members would remain at the haunted jailhouse event.

The Santa Clarita Search and Rescue team is made up of highly trained individuals from all walks of life, several of whom are ham radio operators. Their backgrounds range from school teachers to contractors, to film directors and even rocket scientists. For further information please visit www.scvrescue.com (nixle.com)

RADIO LAW: FCC PROHIBITS ROBOCALLING TO PUBLIC SAFETY ANSWERING POINTS

The government has put in place some rules to prevent automated telemarketing devices from calling emergency service providers. Jeff Clark, K8JAC, has the details:

--

Emergency Service providers are getting government protection from unwanted robocalls that can tie up their phone lines. This through the establishment a specialized Do-Not-Call registry for Public Safety Answering Points and prohibiting the use of robocalling equipment to contact

registered Public Safety Answering Point phone numbers other than for an emergency purpose.

Public Safety Answering Points are typically 911 call centers that receive emergency calls and route them to emergency service personnel. By some estimates, hundreds or even thousands of unwanted robocalls are made to these centers each day, tying up public safety phone lines and diverting critical first responder resources away from the provision of emergency services.

Specifically, the new rules released on October 17th allow Public Safety Answering Points to upload any number associated with the provision of emergency services or communications with other public safety agencies onto a specialized Do-Not-Call registry. They also prohibit operators of rob calling equipment from using such equipment to contact any number on the registry except for an emergency purpose and adopt specific monetary penalties for contacting or disclosing numbers contained in the registry. In the case of violations prohibiting disclosure or dissemination of registered numbers, the new law provides for monetary penalties of up to $1,000,000 per incident.

The rules also address concerns voiced by the public safety community in comments to the FCC about the potential problems unwanted texts to Public Safety Answering Points may pose in the future. For violations of the prohibition on robocall texting numbers on the registry, the law provides for monetary penalties that are not less than $10,000 per call or text or more than $100,000 per call or text.

For the Amateur adio Newsline, I'm Jeff Clark, K8JAC

--

For those that have never heard the term robocalling, those are the irritating automated telemarketing calls that seem to be growing in number each day. And in more and more instances the operators of these machines seem to be programming them to call back incessantly if you hang up and keep on doing so until you give some type of response. (FCC)

RADIO LAW: FBI AND STINGRAY VS PUBLIC RIGHT TO KNOW

Tracking cell phones by tricking them into operating on a bogus network is a law enforcement tactic shrouded in secrecy. Now the FBI is under pressure to release information about it-but the bureau doesn't want to let go

of 25,000 pages of documents on sophisticated cell surveillance technology.

In an Arizona court case last year it was made public that the FBI had used a cell-site simulator in order to track down a suspect. The portable equipment, sometimes described as either an I-M-S-I catcher or a Stingray, covertly sends out a signal that fools all phones within a specific area into connecting to a fake network. The spy tool can force targeted phones to release unique identity codes that can then be used to track a person's movements in real time.

But not everyone likes the idea of this type of law enforcement tool being used. Among them is the Electronic Privacy Information Center which is attempting to obtain internal FBI documents relating to the technology. In fact the Center is taking legal action to force the prompt disclosure of records concerning Stingray devices or other cell site simulator technologies. It alleges that the FBI has failed to comply with statutory deadlines by not handing them over quickly enough following a freedom of information request made last February.

For its part, the FBI says that it has found 25,000 pages of documents that relate to the request, about 6,000 of which are classified. Because of this the agency says that it may need up to three years to process the files before they can be released.

In light of the FCC's recent enforcement activities against cellular telephone jamming devices, it will be interesting to see if the regulatory agency can or will become involved in this controversial issue. (slate.com)

**

ENFORCEMENT: SATELLITE JAMMING TRACED TO SYRIA AND IRAN

According to European satellite operator Eutelsat, disruptions in satellite signals in the Middle East and Europe have been traced back to Syria and Iran. There has been speculation that the jamming is a reaction to changes in the regulations put forth by the International Telecommunications Union to comply with the European Union's increasingly tough sanctions on Iran.

The ITU altered its regulations at the World Radiocommunication Conference in Geneva after receiving complaints of repeated and deliberate interference in the reception of TV in Persian and Arabic. Because of these changes, Eutelsat no longer carries 19 radio and television channels broadcast by the Islamic Republic of Iran Broadcasting.

The European Broadcasters Union has now responded to the information by condemning it. In a press statement it's Director Ingrid Deltenre said that access to information is a universal human right and an essential component for democracy. As such the E-B-U deplores this attack on media freedom.

For its part, the International Telecommunications Union says that these recent incidents are not the first time that there have been allegations of Iran blocking communications from the outside world. The latest wave of interference has affected numerous radio and TV broadcasters including the BBC, France 24, Deutsche Welle and the Voice of America.

NAMES IN THE NEWS: M6GLD UNVEILS ISS APRS VIIDEO

Some names in the news. First up is Robert Broughton, M6GLD who has made available a new video demonstrating reception of amateur radio APRS signals from the International Space Station. The data shown in the clip is decoded using free online software and a soundcard connected from a receivers audio out to the computers audio in. For this demonstration the closest slant range to the I-S-S at zenith was around 1,350 miles line of sight with the space station transmitting on 145.825 Mhz. You can watch the video at tinyurl.com/iss-aprs-video
(M6GLD)

**

NAMES IN THE NEWS: K6LCS RECEIVES SPECIAL PUBLIC SERVICE AWARD

Clint Bradford K6LCS of Jurupa Valley, California and his wife Karen have earned a special award from the Public Relations Society of America. This for their work in planning a space related educational event held back on April 19th.

Called "LIVE! . from outer space!" the operation gave students a chance to speak to an astronaut in the orbiting International Space Station." Some 120 students of Flabob Airport Preparatory Academy, more than 80 parents, community leaders and media representatives got to witness a live contact with the International Space Station. Flight Engineer Don Pettit was on the I-S-S to answer questions posed by some of the students via ham radio.

K6LCS initiated the event because of his volunteer position through Amateur Radio on the International Space Station or ARISS program which is allied to NASA's with Teaching from

Space curriculum. The latter is available to any school that applies, but the typical wait-time from application to an actual contact with a member of the space station crew is three years.

According to K6LCS for the Flabob school contact it was 13 months of planning for 10 minutes of conversation. But adds Bradford, but, "oh, what a conversation!" (Southgate)

**

NAMES IN THE NEWS: LEAGUE SEEKING NEW MEDIA AND PUBLIC RELATIONS MANAGER

The ARRL is currently looking to fill the position of Media and Public Relations Manager at ARRL Headquarters in Newington. This following the recent retirement of Allen Pitts, W1AGP, from that position.

The ARRL Media and Public Relations Manager is responsible for explaining the value of the amateur radio service to the media and the general public, directly and through a corps of volunteers. Outstanding communications skills and the ability to train and motivate volunteers is also required.

For more information on this position and how to apply please viait the news paes at www.arrl.org. (ARRL)

HAM RADIO IN SPACE: LARGEST CONTACT EVER WITH THE ISS

The largest contact in the history of the Amateur Radio on the International Space Station program has taken place in Florida. This as Florida Science Museum station WS4FSM hosted the largest school contact ever with the ISS. Take a listen:

--

Actual contact audio

--

The contact took place on Tuesday, October 30th, at 15:58 UTC when most of Palm Beach County's 187,000 students were watching live as 10 students and 2 teachers made the historic contact. The actual call was from the Motorola Theater at the museum. Both a tower mounted tracking antenna and a mast mounted Eggbeater were loaned to the club by area hams for making this contact. Eleven students and two teachers already asked their questions of Japan Aerospace Exploration Agency Astronaut Akihiko Hoshide, KE5DNI. Hoshide who has been on the International Space Station since mid-July, was quick to provide answers.

--

Actual contact audio

--

The event was to be televised live by closed circuit system to classrooms in all the county schools and streamed on the web as well as on the school system's educational channel and Comcast Cable in South Florida. The final audience was expected to be over 250,000 live viewers.

The West Palm Beach Amateur Radio Group sponsors the station at the South Florida Science Museum as part of a permanent amateur radio exhibit. Club members and other volunteer hams in the area staff the station and exhibit on weekends, for school tours during the week, and during summer science camps. More about the club is on-line at www.wpbarc.com. (Southgate, Palm Beach Post, AJ4XM)

**

WORLDBEAT: DENMARK SETS DIGITAL RADIO SWITCHOVER DATE

The Danish government's new media policy has defined 2019 as the year for the country's digital radio switchover. This providing that at least half of all radio listening in the country is digital by 2018.

Uffe Elbak, the Danish Culture minister stated that this move is a normal progression. He said that the world is digital and therefore it is a natural continuation of previous efforts and policy decisions in the area that we now will speed up the digitization of radio, just as we did with the TV a few years ago. Elbak said that this will be accomplished by continuing to expand the nations digital radio network, and establishing, albeit with conditions, a date for the switch-off of analog FM. By setting a date Elbak says that his nation is sending a clear signal to both the industry and the Danish radio listeners about where digitalization of broadcasting is headed.

According to other reports, the national single-frequency Digital Audio Broadcasting or DAB block used by the public service broadcaster D R Multiplex will be exchanged for two DAB regional frequency blocks now occupied by a single commercial multiplex. This will take place in 2013. All Danish DAB transmissions will also transition from the original DAB standard to the DAB+ standard. (RW)

**

WORLDBEAT: MULTIPLE COPIES OF RAC REPORT E-MAILED

Radio Amateurs of Canada says that there have been issues with multiple copies of its R-A-C Report unintentionally going out via e-mail. Chief Information and Technology Officer Paul Burggraaf, VO1PRB, says that the society is working to fix this problem before the next issue is sent out. (Radio Amateurs of Canada)

DX

IN DX, the March, 2013 DXpedition to Clipperton Island has received the callsign TX5K to be used during the operation. So far the team has 23 members and one space remains available for another operator, scientist, or other supporter who wishes to join the DXpedition. More information is on-line at www.cordell.org/CI,

DL1LLL is currently operational portable Zed-S-7 from Antarctica on the High Frequency Bands. His location is the Neumeyer Emergency base. QSL via DL5EBE.

VK6LC will be active from Vietnam in November as XV1LC. He will be operational on the High Frequency Bands using CW and SSB only. QSL direct via VK6LC.

JA1PBV will be on the air from Mauritania as 5T5BV until November
10th. His activity has so far been on 30, 12 and 10 meters using CW and RTTY. QSL via JA1PBV.

JH5GHM is currently on the air stroke V26 from Antigua Island on the High Frequency bands only. No mention of modes or times on the air. QSL via his home call or electronically using Logbook of the World.

JA1PBV is currently active from Mauritania as 5T5BV. Listen out for him on the High Frequency bands operating mainly CW. QSL via home call

DL8NU will be active from Mahe Island in the Seychelles November 9th to the 24th as S79NU He will be operational on the High Frequency bands mostly on CW. QSL

via home call

Lastly, UA4WHX is currently active stroke EX
from Kyrgyzstan. Hes been reported being heard on many o
the High Frequency bands. His QSL route is direct to his
home callsign.

(Above from various DX news sources

THAT FINAL ITEM: HAM RADIO CELEBRATES HOLLYWOOD

And finally this week, Ham Radio Celebrates Hollywood was
the title of an all-band multi mode operation from Stage 9
at CBS Studio Center in Los Angeles, California on Sunday,
October 28th. Stage 9 is currently the home of the hit
sitcom Last Man Standing which features ham radio as one of
the shows themes. Amateur Radio Newsline's Bill Pasternak,
WA6ITF, stopped by the operation and has this report:

--

The callsign of the operation was K6H which stood for King-6-
Hollywood. And maybe you were one of the lucky ones to make
contact with members of the southern California-based PAPA
repeater system who sponsored and staffed this fun event:

--

Actual 40 meter QSO

--

That was just one of several stations that were up and
running at K6H. And while the majority of operators came
from the PAPA System, the idea for the event was that of
John Amodeo, NN6JA, who happens to be the producer of Last
Man Standing:

--

NN6JA: "I think it came about because a while ago I was
asked to do a forum at Dayton by the ARRL to talk about ham
radio and the way it's treated in the media. That set me
off to thinking how ham radio is often portrayed either
inaccurately or negatively.

"I wrote a forum and performed it in Dayton and it went out
very well. But I could see that there was a bigger audience
to reach with the whole concept of ham radio and Hollywood.
And I thought that a special event radio station might be
fun.

"We have the stage and we have a lot of ham radio equipment on the stage to do that. And I'm a member of several radio clubs; in particular the PAPA group here in Southern California, the Great South Bay Radio Club on Long Island, and a member of B.E.A.R.S. which is the Broadcast Engineers Radio Club who are connected to D.E.A.R.S. who are the Disney amateur radio guys and DARI which is an interconnect repeater system ob the East coast.

"So I thought to myself that if we could get the PAPA people on the West coast, the B.E.A.R.S. guys on the East coast and maybe throw in IRLP and Echolink, I could cover much of the country."

--

The K6H event had a lot of pre-publicity in the ham radio media. Even so, there are always bound to be last minute changes. So to cover this, Amodeo and the PAPA group turned to another kind of communications; the social media:

--

WA6ITF: ".You have an official tweeter?"

NN6JA: "We have an official tweeter on the show. Billy is our Assistant Production Coordinator and also a ham radio operator. As some of your fans might know we have twelve ham radio operators on staff and Billy's one of them. And he is over there tweeting and Facebook'ing about the event so that people can follow the frequencies we are broadcasting on."

--

Ham Radio Celebrates Hollywood was only on the air for a few hours. Even so the operators racked up a good number of contacts using traditional modes like SSB voice as well as emerging technology that included Echolink and IRLP. But perhaps the most important aspect of K6H is that it let the world of amateur radio know that the hams of Hollywood are also, thinking about the hobby and thinking about them as well.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles. Don.

--

While a final QSO count is not available at airtime, there is no doubt that Ham Radio Celebrates Hollywood was a rousing success.

And less we forget, an interview with Last Man Standing Producer John Amodeo, NN6JA, is on this week's Rain Report.

You can hear it or download it at www.therainreport.com.

a few big alternators and a couple of batteries and use 1/0 welding
cable. Be sure to run as large a ground wire back under the hood as
the positive you run out from there. It's OK to use the chassis as
ADDITIONAL grounding but don't make it your primary ground. Figure
on needing at least 160 amps of current and plan accordingly.

I run a 34Ah SLA at my 4x2879 box just to buffer the pulses
that SSB makes on the power source. I was going to make a set
of splitters and combiners to put two of them together but
decided my car wouldn't have enough alternator to run it.

Hell, 4 pills on 10 meters with a 102" whip busts pile ups!

You know that is ILLEGAL....

FCC Part 95 rules says - you cannot operate on 11 meters more then 155
miles.

27.540 MHz is a part of the buisness band, not the CB radio band.....

HAM RADIO IN SPACE: GERMAN SPACE AGENCY REJECTS AMSAT DL MARS MISSION

Germany's space exploration plans will not support a proposed ham radio mission to the red planet. We have more in this report:

--

After five years of discussions and negotiations with the German space agency, AMSAT-DL reports that nation's space exploration group has withdrawn its support for the amateur satellite organization's plan to send a ham radio satellite to Mars. This is the so-called P 5 or Phase 5 satellite mission.

According to the AMSAT News Service, the agency advised the group that P5's mission was not financially feasible. Also that compared with the current Mars missions the scientific attraction was simply not there. You can read that as being of insufficient interest to the formal scientific research community.

The decision by the German Space Agency also affects plans for a geostationary Earth-orbiting ham radio satellite. This being the so called Phase 3 E which was to be part of the overall P 5 program. None of this is good news for amateur radio's future exploration of the final frontier.

For the Amateur Radio Newsline, I'm Burt Hicks, in Los Angeles.

--

AMSAT-DL officials sat that they are not giving up hope for these missions. They note that their organization recently had some interesting meetings in China adding that if it cannot do rocket science in Germany, that it will have to look for other countries. (ANS)

**

RADIO POLITICS: IARU REGION 3 CONFERENCE IN HO CHI MINH CITY

Delegates are likely preparing to return home from the International Amateur Radio Union Region 3 conference that was held in Ho Chi Minh City from November 5th to the 9th. This 15th triennial conference was hosted by the Vietnam Amateur Radio Club and was themed emergency communications as reflected in the frequent disasters that involve amateur radio communications.

In seeking to standardize privileges and licensing, the organizations directors have asked that consideration be given to one of their papers. This is one that explores issues facing amateur radio societies in working with their administration in the 21st century.

There were also reports from the IARU Region 1 and 2, from Region 3 member societies, Amateur Radio Direction Finding interests, the IARU Monitoring Service, along with beacon and satellite representatives. The delegates also talked about regional finances and the organizations constitution. (VK3PC)

**

RADIO LAW: IRTS ANNOUNCES OPPOSITION TO PROPOSED EUROPEAN PLT STANDARD

Ireland's Irish Radio Transmitters Society is the latest national ham radio organization to line up in opposition to a newly proposed pan-European draft digital Power Line or PLT transmission standard. Jeremy Boot, G4NJH, has more:

--

Following the news last week that the German National Society, DARC, now opposes a new pan-European draft Power Line Transmission standard, we have heard that the Irish Radio Transmitters Society, like the RSGB, also opposes the standard.

In their magazine they say that "the draft Standard accepts that the PLT devices do not, in effect, meet the essential requirements of the EMC Directive as it prescribes measures to mitigate interference by permanently or dynamically excluding frequencies in the amateur, aeronautical mobile and broadcast bands."

The IRTS Committee took the unanimous view that it would not be appropriate to support a draft Standard that sought only to protect selective sensitive frequencies in the HF spectrum without regard to the levels of interference that could be caused by the equipment concerned on the remainder of the HF spectrum.

For the Amateur radio Newsline, I'm Jeremy Boot, G4NJH, in Nottingham in the United Kingdom.

--

As previously noted here on Amateur Radio Newsline, this new standard concerns the devices that people install in their homes to run data over their house wiring. It has nothing to do with PLC or BPL data that is carried over the over company powerline networks. (GB2RS)

**

RESCUE RADIO: CANADIAN RADIO CLUB WANTS WEATHER TRANSMITTER IN MINDEN

A Canadian amateur radio club is lobbying for a new severe weather alert transmitting station in the county it serves. The Minden Times reports that on October 26th the Minden Amateur Radio Club members of the club which is one of the oldest in Haliburton County, gathered for their weekly meeting. At that time club President Dorian Young, VE3YBG, put forth the idea of getting a transmitter in Minden for the purpose of emergency weather alert situations.

One of the special guests at the gathering was Gord Maybee of Weatheradio Canada who connected the group via a conference call to Denis Paquette of Environment Canada. Paquette told the group the average amount of time it takes to get a transmitter is two years, after specifics such as scouting a location and installation are factored in.

At the meeting VE3YBG noted that there have been two weather emergencies in the past few years, one being a massive snowstorm and a the other wind storm. He noted that with Minden hosting the Pan Am Games in 2015 it would be a wonderful addition to have a weather transmitter in the area. Young added that the radio club is eager to make this happen.

Currently, the closest transmitter is in Orillia, however, members of the club argued Haliburton County does not receive adequate or timely information from that location. While there used to be a transmitter in nearby Algonquin Park that unit is no longer operational.

More is on-line at tinyurl.com/minden-weather-radio (Minden Times, Minden Amateur Radio Club)

**
RESCUE RADIO: CLARK COUNTY NEVADA DROPS HARRIS DESERT SKY RADIO SYSTEM

After two years of battling dropped calls and dead zones in the department's new radio system, Nevada's Clark County Sheriff Doug Gillespie has opted to drop the Harris Desert Sky police radio system.

On October 11th, Gillespie informed the Chief Executive Officer of Harris Corporation that his company's Desert Sky radio system cannot meet his department's needs.

Unveiled in the summer of 2010, the $42 million Desert Sky digital system is based on Harris' OpenSky digital communications technology. While Desert Sky's data capabilities have seen mixed results, the voice communication between officers is the bigger problem. Gillespie says that while things have improved in the past two years, the system still is not up to the standard for an agency whose officers talk on the radio 50,000 times every day.

The most common complaints are common among patrol officers who say the faulty system endangers their lives. In his statement Sheriff Gillespie noted that he believed that his department had given Harris every opportunity to make the system work, but it's just not reliable. The full story is on-line at tinyurl.com/DesertSkyDumped. Clark County, Nevada encompasses the city of Las Vegas and surrounding areas.
(CGC, Las Vegas Review Journal)

**

INTERNATIONAL LAW: INTERNATIONAL REPLY COUPONS MAY SOON BE PASSED OUT IN THE USA

International Reply Coupons may soon be a thing of the past. At least here in the United States with word that the U.S. Postal Service has proposed doing away with them due to what it says is a very low demand.

The Postal Service says that even if it stops selling International Reply Coupons that it will continue to accept

those purchased in foreign countries and presented at its U.S. facilities.

International Reply Coupons have long been a staple in the DX community used to help offset the cost of DX'ers to provide QSL cards especially from some of the words rarer DX locations. They have also been used to assist hams in nations where sending in foreign currency is not allowed. (USPS, QRZ)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Cal-Net Link serving all of California.

(5 sec pause here)

**

RESCUE RADIO: HAMS SHOULD NOT SELF DEPLOY FOR HURRICANE SANDY RELIEF

The ARRL is warning hams who want to assist those regions affected by Hurricane Sandy to not self-deploy to those areas. According to the League there are many ARRL Sections involved and each has different requirements as to how they locate, credential and deploy volunteers. If a need for manpower is identified that cannot be met locally or in a given ARRL Section, its leadership may contact other ARRL Sections for assistance. If the need is still not met, Section leadership may then contact ARRL Headquarters for the needed assistance. But the bottom line is that you not go to any devastated area unless you are specifically asked to do so. (ARRL)

**

RESCUE RADIO: UNSUNG HEROES OF THE VoIP HURRICANE NET

Some of the most important messaging during Hurricane Sandy or any other hurricane was handled by the unsung heroes of the VoIP Hurricane Net. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is here with their story:

--

They truly are the unsung heroes of ham radio that few in the hobby know about. But they do the kind of volunteer work that is needed to assist the National Weather Service and other served agencies when disaster is near. And during Hurricane Sandy their contributions were immense. Take a

listen:

--

Net audio: "WB1BOX from N1OU. Seeing a dramatic increase in the amount of wires down, trees taking out transformers and powerlines here in the city of Meriden Connecticut."

--

That's the sound of the sound of the VoIP SKYWARN and Hurricane Nets. Their primary objective is to help save lives and property thru the identification and field evaluation of threatening or dangerous weather conditions. At the same time facilitate the timely gathering and dissemination of this information.

--

Net audio: "We are very concerned about Rhode Island for coastal storm surge flooding basically from the Dartmouth - New Bedford area West is our big concern coming up here. So we are going to try to do the best we can to try to get some data. A lot of those areas are going to be closed off so we are going to see what we can come up with to gather data there that I know is extremely critical."

--

The VoIP SKYWARN and Hurricane Nets operate by combining both Echolink and IRLP linked repeater networks over the Internet. This they say provides for more efficient and effective utilization of available resources while handling critical wide area communications during major severe weather events.

To learn more about the efforts of the VoIP Hurricane Net, you are invited to join the VOIP-WXNET Yahoo Group or visit voipwx.net on the World Wide Web.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

More on Hurricane Sandy and ham radio relief efforts in future Amateur Radio Newsline reports. (ARNewsline)

RADIO LAW: FCC TURNS DOWN PETITION TO CHANGE RESPONSIBILITY OF CONTENT IN MESSAGE FORWARDING SYSTEMS

The FCC has denied a petition to change Part 97.219 of the Amateur Service rules filed by Rolan O. Clark, W3FDK, of

Adamstown, Maryland. This regarding the responsibility of control operators in message forwarding systems for retransmitted messages that violate the Commission's rules. Amateur Radio Newsline's Heather Embee, KB3TZD, has the details:

--

In his rule making request, Rolan O. Clark, W3FDK, had asked that the phrase - quote -- "except as noted in paragraph (d) of this section, for stations participating in a message forwarding system" be removed from Section 97.219(c) and that Section 97.219(d) be removed completely.

In his filing, Clark stated that he believed that the control operator of the first forwarding station in a message forwarding system - quote -- "should have the same standing as the control operator of a repeater that inadvertently retransmits communications that violate the rules. This, because the intent to accomplish communications consisting of text and/or voice communications is the same.

Clark also claimed that Section 97.219 (d) is ambiguous as it gives no direction to the method and degree of processes and or procedures needed to define the degree of authentication. He said that it implies that there would have to be a visually obtainable copy of the suspected violation otherwise it becomes hearsay.

Clark proposed to address these differences between a message forwarding system and a repeater by conforming Section 97.219 to Section 97.205(g). Specifically, he suggested requiring that the originator of a message that is entered into a message forwarding system be the only licensee responsible for its content.

But in its November 5th ruling turning down Clark's rule change petition the FCC noted that it had considered and rejected requirements such as he proposed when it adopted the message forwarding system rules back in 1994. It went on to say that Clark's present petition did not demonstrate or even suggest that any relevant circumstances have changed such as to merit reconsideration of this decision. As such the Commission says that Clark's current proposal does not demonstrate that revising this rule would provide the ongoing oversight of message forwarding systems that must be present. To the contrary, the regulatory agency suggests that Clark's proposal asks for an accommodation for message forwarding systems that commenter's said should not apply to these systems.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, in Berwyck, Pennsylvania.

--

At airtime its unknown if Clark plans to appeal the Commissions dismissal of his rule making request. (FCC)

RADIO PRODUCTS: NEW HT WITH GSM PHONE NOT LEGAL IN USA

A mainland China company called Puxing has announced what might be the ultimate in hand held two-way gear, but the chances are that you will never see one in the United States. At least not legally and the reason for this is simple.

The PX-D03 combines a GSM cellular telephone with a dual-band two-way radio and as a bonus can also be used as an MP3 player for your favorite tunes. And under the current FCC rules, combining a two-way radio with a cellphone makes the unit illegal to import, buy, sell or use in the U-S-A or its possessions.

According to the specifications posted on-line by one China-based mail order retailer, the PX-D03 covers 136 to174 and 400 to 470 MHz as a full dual band two-way transceiver with a total of 128 memory channels. It can be computer programmed and features what Puxing calls a human-based operational interface.

On the cellphone side, the GSM-based unit carries dual S-I-M cards, has text messaging, and a built-in front-facing camera. And if that were not all, the unit also contains an FM radio that receives the 87.5 to 108 MHz broadcast band, the afore mentioned MP3 player plus other entertainment including several games.

As being advertised, the PX-D03 comes with a 3.7v Lithium-Ion battery, a charging stand and power supply for the country the purchaser lives in; two antennas, a soft case and a remote plug in earpiece. According to one of the websites advertising the unit, the total cost is $151 shipped world-wide. (Southgate)

**

RADIO FUNDING: DX MAGAZINE ASKS HOW TO GET INCREAEED FUNDING FOR RXPEDITIONS

The current issue of DX Magazine features an article titled Dealing With the Skyrocketing Costs of DXpeditions and is is asking its readers for their ideas on how to increase the level of funding for future major DX operations

Carl Smith, N4AA, is the Editor and Publisher of the DX Magazine. He says that major DXpeditions to entities in the top ten most wanted list can cost $500,000 or more to activate. This poses a major fund raising challenge to organizers, especially with costs rising rapidly for such big ticket items as transportation, licensing, and permits.

Specific costs are documented in the article appearing in the November-December issue. Smith said that DXer's and others are invited to send their ideas to the DX Magazine, which will be reporting the results in a future issue. All suggestions are welcome, and may be either anonymous or identified by the contributor's name and call.

If you want to lend your thoughts to solving this problem please send your ideas and comments to the DXpedition Costs Survey, % Dee Logan, W1HEO, 9901 Cypress Circle, Mentor, Onio, 44060. E-mail submissions to deverelogan (at) gmail (dot) com are also welcome. (DX Magazine, Southgate)

**

NAMES IN THE NEWS: NEWSLINE'S WA6ITF TO APPEAR ON ECHOLINK NET NOV. 17

Amateur Radio Newsline producer Bill Pasternak, WA6ITF, will be the featured guest on the Saturday night, November 17th edition of the Echolink Newsline Net. The net meets every Saturday at 9 p.m. Eastern on the Dodropin conference server which is Echolink Node number 355800. According to Steve Sercrest, W8WFO, this is not the original name for the gathering. Rather, because it's been running our weekly report for such a long time that those signing in began calling it the Amateur Radio Newsline or Newsline network.

Again, you are welcome to join in the net conference at Echolink node 355800 on Saturday night, November 17th at 9 p.m. Eastern to hear Newsline's Bill Pasternak, WA6ITF, talk about numerous things in ham radio and do is best to answer your questions. Bill says he hopes to meet many of you there. (W8WFO)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

EMERGING TECHNOLOGY: MORE TESTING AT WWVB

WWVB, the 60 kHz station most often used as our nation's time and frequency standard, is continuing to test its phase modulated mode and may switch between their legacy AM mode and their new phase modulated mode in the days and weeks ahead. Stay tuned and keep listening on 60 kHz for their ongoing experiments. (CGC, WWVB)

**

EMERGING TECHNOLOGY: OZ7IGY NEXT GENERATION 6 AND 2 METER BEACONS ON THE AIR FROM DENMARK

The first two Next Generation Beacons have come to the airwaves. On October 30th the latest two OZ7IGY came to 6 and 2 meters from Slettebjerg, Denmark.

OZ7IGY is the world's oldest beacon system in the world having begun operation in the International Geophysical Year in 1957. From its start on 144 MHz it has ever since been on air continuously. Now the newest beacons can be heard on 50.46973 MHz and 144.46973 MHz respectively.

And by way of background, the Next Generation Beacon platform is open to other users and the software can easily be adapted to other modulation types and sequences. And as the new platform is frequency and time locked to GPS signals the frequency accuracy is better than 5 milli-Hertz.

More information is on the web at www.oz7igy.dk. (GB2RS)

**

RADIO IN SPACE: SPOT THE ISS SERVICE FROM NASA

A new service from NASA called Spot the Station will send you a text message when the International Space Station is within visual range of your house.

The service will only notify users if the station is easily visible above trees, buildings, and other objects. Spot the Station will calculate the station's proximity to more than 4,600 positions on Earth, updating its information several times each week.

The International Space Station is usually at peak visibility at dawn and dusk. When skies are clear, it typically appears as fast-moving point of light.

You can sign up for the service on line by visiting spotthestation.nasa.gov. (NASA, N6ZXJ)

**

HAM RADIO IN SPACE: STILL NO SIGNAL FROM F1 CUBESAT

There have still been no confirmed reception reports since the F-1 amateur radio CubeSat was deployed from the International Space Station on 4th October. Its command team is now focusing on reception of the backup UHF transmitter on 437.485 MHz, plus or minus 10 kHz Doppler shift.

This FM beacon should transmit Morse code for 20 seconds every minute during the satellites daylight. The team would appreciate any reports of the beacon be sent by email to thuvt (at) fpt (dot) edu dot) vn. Further information on F1 can be found at www.amsat-uk.org. (Southgate)

**

HAM RADIO IN SPACE: FIRST TIME EVER INDIA TO ISS STUDENT CONTACT

A group of students in Gujarat, India will reach out to the stars. For the first time in that nation's history about 500 students will have a live chat with Sunita Williams, KD5PLB, the Indian-origin astronaut aboard the International Space Station, using an amateur radio station at the Science City facility in Ahmedabad.

Ravi Saxena is an Assistant Chief Secretary of the Department of Science and Technology. He says that because Williams has roots in India, it is all the more special to them.

The contact is currently slated for November 14, celebrated as Children's Day in India. To arrange this Q-S-O, India's scientific community from the state of Ahmedabad contacted NASA soon after Williams set off for her record-breaking journey in July of this year.
(WIA)

**

ON THE AIR: THE 850 BIRTHDAY OF CHINGGIS

On the air keep an ear open for special event callsigns with a J-U-850 prefix that will be on the air November 14th to the 21st from Mongolia. This to celebrate 850th birthday emperor Chinggis Khan.

A Chinggis Khan Award will be issued free to those who make three contacts with three different event callsigns. These include JU850AA, JU850DA, JU850DN and can be made using any mode on any band. If you make contact with any of the commemorative JU850 stations please QSL via the information found for each call on QRZ.com.

By way of background, Chinggis Kahn, called in some parts of the world as Genghis Khan, came to power by uniting many of

the nomadic tribes of Northeast Asia. In the year 1207 he was the founder and great leader of the Mongol Empire, which became the largest contiguous empire in history after his demise in 1227. (JT1CS)

**

DX

In DX, word that JH1AJT will be on the air from Bhutan through the 15th of November as A5A He will be active on 40 through 10 meters using various modes. QSL via home call

ARRL Awards Branch Manager Bill Moore, NC1L, has announced that the August 2012 VU7M Lakshadweep Islands and the ZD9UW operation from Tristan Da Cunha and Gough have been approved for DXCC credit. If you worked them feel free to submit your cards for DXCC checking for these two.

R4WAA will be active from Dominican Republic November 21st to the 30th signing stroke HI7. He will be working on 40 through 10 meters and will definitely be on for the CQ World Wide DX CW Contest November 24th and 25th. QSL via home call call direct or via the bureau.

G7COD will be on the air 8Q7AK from Embudu Island in the Maldives for three weeks in February of 2013. He's expected to be operating holiday style on 30, 17 and 12 meters using CW and SSB. QSL him also via his home callsign, direct or via the bureau.

DF2WO is currently operational from Cape Verde as D-44-T-W-O. He is reported to be active on the High Frequency Bands. QSL via his home call

Lastly, SP5EAQ will be active from Tongatapu Island in the Kingdom of Tonga 26 from March 26th to April 16th as A3EAQ He will be operational on 80 through 10 meters using SSB. QSL via SP5EAQ.

(Above from various DX news sources)

**

THAT FINAL ITEM: A TRUE ACT OF TRUE HUMANITY

And finally this week, it isn't often that you hear a story like this, but when you do it makes one proud to be a member of the human race. Amateur Radio Newsline's Bruce Tennant, K6PZW reports:

--

Gene "Bean" Baxter is a personality of CBS Radio's KROQ-FM in Los Angeles. He has entertained L.A. audiences since 1990 alongside on-the-air partner Kevin Ryder, as part of the "Kevin and Bean" morning show team.

In addition to making a multitude of over the air friends, Bean, as he is known, has also created longstanding relationships with those inside the KROQ offices. In that vein he recently announced that he will become a kidney donor to help a longtime staffer. The recipient of Bean's generosity will be Scott Mason, N1CBS, who is the Director of Engineering for CBS radio on the West Coast, and who has been with the company in a variety of capacities since 1979.

On November 13th, the two will go to Cedars Sinai Medical Center which is one of only four hospitals in the country that have the ability to match Mason's blood type to that of Bean and give him the much needed organ. Bean then plans to take a few weeks off from work, and expects his remaining kidney to function at about 80%.

Out of this whole process, Bean hopes that people will see how easy it is to become an organ donor. He also believes that if he recovers quickly and is back to work in a short time, it may deliver an even stronger message, changing the minds of some and raising awareness of organ donation.

This will be the second transplant for Mason, who has had kidney problems for most of his adult life. He underwent a previous transplant from a cadaver in 1999 that lasted about 10 years. He currently undergoes daily dialysis and calls Bean's decision to donate a kidney to him as a game changer. Bean Baxter calls it a no-brainer.

Wishing them both Mason and Bean a quick recovery from this upcoming and life changing surgery, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Scott Mason has been on a waiting list for a kidney, which sometimes is a six to 10 year wait, when Bean offered his kidney. For Bean Baxter, it was an educational process and a decision based on math, not emotions. He said that Mason has zero kidneys and that he has two. You can hear the full discussion with Bean Baxter and Scott Mason on Kevin and Bean audio archive at tinyurl.com/radio-kidney-donation

(RBR, KROQ Audio Archive, ARNewsline)

RESTRUCTURING: CHINA TO REVISE ITS AMATEUR RADIO SERVICE

Big amateur radio changes ahead for ham radio in China. Amateur Radio Newsline's Jim Meachen, ZL2BHF, reports from down-under:

--

According to word from Jim Linton, VK3PC, mandatory membership of the Chinese Radio Sports Association will likely soon be a thing of the past. This as China moves forward under soon to be announced new amateur service regulations.

For the past 30 years, only a sports organization could transmit on the amateur Radio bands. That began on the 29th of March, 1982 with the station BY1PK, at first on CW and with limited spectrum made available for ham radio operations. But this is 2012 and the old system of someone first being a member of a sport-related body before entering amateur radio no longer works and will end. Now clubs and individuals will have their own callsigns throughout the world's most populated country.

Also being considered for emergency communications is a new error-correcting low power data mode for HF radio using Chinese characters, a Software Defined Radio receiver network for noisy locations, an alarm system, VHF and UHF

repeaters and overall training.

Along with the revised regulations will be a new entity called the Chinese Radio Amateur Club, that will be solely focused on amateur radio. The new group will deal with the regulations including visitor licenses, conduct exams and licensing, create band plans, allow nation-wide mobile operation, develop emergency communications infrastructure, amateur satellites, and work with the International Amateur Radio Union.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand

--

When enacted, these revised regulations promise to bring China more in line with the rest of amateur radio service regulations world wide. As such don't be too surprised to hear many more mainland China stations on the hambands once the new rules do take effect. (VK3PC)

**

INTRUDER WATCH: HAM RADIO OPPOSED EUROPEAN PLT STANDARD APPROVED

Europe has a new Power Line Communication or PLT standard and hams on the other side of the Atlantic are not very happy. Amateur Radio Newsline's Bruce Tennant, K6PZW reports:

--

Despite opposition from the Radio Society of Great Britain and several other European national ham radio societies, the European Committee for Electrotechnical Standardization or CENELEC Working Group 11 has voted in favor of a draft standard for what ham radio operators are calling polluting Power Line Communication or PLT apparatus. According to the Radio Society of Great Britain this means the chance of radio interference from P-L-T devices could be 10,000 times higher than the previous standard and holding the potential of ruining people's enjoyment of radio.

A statement on the RSGB website says that one of the reasons why the combined voice of the amateur radio fraternity was not heeded was the absence of complaints reported to and by the national enforcement agencies. As a consequence it is imperative that interference cases are diagnosed and reported to, and pursued with, U-K telecommunications regulator Ofcom if and when they occur.

The statement goes on to note that the RSGB EMC Committee is working with other parties to enable radio amateurs to do this and to build up statistics on the status of complaints. If a significant number of people are affected the organization can then lobby for further revision to the standard. If the devices do not cause publicized problems then the protection provided by this new standard will be deemed adequate.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.

--

You can read the full RSGB statement at tinyurl.com/european-PLT-approved. (Southgate)

**

INTRUDER WATCH: FRENCH RADAR ON THE HF HAM BANDS

The IARU Region 1 Monitoring Service reports that French radar is again active near and in the High Frequency ham bands. Recent reports have heard it near 7, 14, 14,259, and 21 MHz transmitting a 20 kHz wide burst system.

But that's not all. Region 1 monitors also report that taxi operators in the Russia Federation, Belarus, Ukraine and Kazakhstan are now using FM in the 28 MHz, 10 meter amateur radio band more than ever. You can read more about both these intruders on-line tinyurl.com/10-meter-intruders (IARU-R1)

**

RESTRUCTURING: NORWAY AFFIRMS NEW SPECTRUM FOR AMATEUR RADIO OPERATIONS

Its now official. Norway has affirmed news bands for ham radio in that nation. Jeremy Boot, G4NJH, of the RSGB News reports:

--

The Norwegian Post and Telecommunications Authority has made changes to the Norwegian amateur license regulations.

The major change is that permission has been given to use 472 to 479 kHz with a maximum 1 Watt EIRP, with the former permission to use 493 to 510 kHz removed.

Permission has been given to use 70.1875 to 70.2625MHz, except in the three Norwegian southwest counties of Hordaland, Rogaland and West-Agder, where there still is commercial traffic within this frequency segment.

Other segments allowing 100W transmitter power and maximum 16kHz bandwidth include 70.0625 to 70.0875MHz, 70.3625 to 70.3875MHz and 70.4125 to 70.4625MHz.

For the Amateur Radio Newsline, Im Jeremy Boot, G4NJH, in Nottingham in the U.K.

--

The new rules in Norway are reportedly effective now. (GB2RS)

**

RESCUE RADIO: SOUTH AFRICA HAMNET AIDS IN SEARCH FOR MISSING AIRCRADT

South Africa's HAMNET, the Amateur Radio Emergency Communications Organization has concluded it's involvement in a cross-border search and rescue operation for a missing aircraft. This after a light aircraft, on an October 28th flight from Malawi to an airport in South Africa failed to make regular radio contact over Mozambique.

Soon after the plane was reported as missing, the South African Air Rescue Control Centre was advised and requested to assist. HAMNET was called out on Monday, October 29th by the Air Rescue Control Centre to form a team to travel to the region and provide a High Frequency communications link between the two countries. Operations took place on the internationally agreed Emergency Centre of Activity frequencies using the 30 and 20 meter bands.

Unfortunately the search for the missing plane and its occupants was unsuccessful and was scaled back on Saturday November 3rd. At that point the HAMNET team stood down and has now returned home. (IARU Region 1)

**

HAM RADIO IN SPACE: FITSAT-1 SCHEDULES CHRISTMAS EVE OPTICAL TRANSMISSION

And there will be a Christmas present of sorts from ham radio in space. On December 24th which is Christmas Eve the students in Japan who built the FITSAT-1 satellite are planning to active the birds LED optical array and flash a message in Morse Code to those of us here on mother Earth.

According to JA6AVG, the students plan to start testing the optical system at the end of November. As such its Morse message beacon may well be visible from Earth with the unaided eye well before the scheduled transmission date.

FITSAT-1 is a CubeSat that was developed by students at the Fukuoka Institute of Technology in Japan. In addition to the optical transmission system the bird carries a CW beacon on 437.250 MHz and a data link on 437.445 MHz. There is also a 5.8 GHz data downlink.

Further information about the FITSAT-1 cubesat is on-line at tinyurl.com/fitsat-christmas-signal. And we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (FITSAT-1 Team)

**

RESCUE RADIO: NIAGRA COUNTY NY RACES GETS $7000 GRANT

Some good news for a dedicated rescue radio group. Buffalo dot com reports that the Niagara County New York Radio Amateur Civil Emergency Service has received a $7,000 donation from Waste Management, parent company of the CWM Chemical Services.

Jim Callahan of Waste Management made the presentation of the check that will provide the group with equipment for expanding and enhancing its services to Niagara County in the event of a disaster. In doing so Callahan called the RACES hams as being the unsung heroes who are prepared to help communicate through any emergency situation, when other means of communication may be down. (Buffalo.com)

**

ENFORCEMENT: PAGER COMPANY FINE REDUCED TO $7000

The Federal Communications Commission has affirmed a $7000 monetary forfeiture order to Leetek America, Inc. a subsidiary of Lee Technology Korea. This for marketing of an unauthorized pager transmitter system. Jim Davis, W2JKD, has the details:

--

On August 25, 2008, the Enforcement Bureau's Spectrum Enforcement Division issued a Notice of Apparent Liability for Forfeiture or NAL to Leetek in the amount of $14,000. This for its apparent willful and repeated violations of

Section 302(b) of the Act and Section 2.803(a) of the Rules in connection with its marketing of two models of unauthorized pager transmitter systems.

The Division's investigation into this matter was initiated by a complaint that Leetek was marketing a pager transmitter system that did not comply with the Rules and was causing interference to primary licensed operators.

Leetek responded to the NAL on September 2, 2008. In its reply, the company repeated the argument that it imported only three units of the LTK-1700CT solely for the purpose of design review and performance testing. Leetek's response also clarified information Leetek submitted to the Division in its response with respect to the LTK-1400S pager transmitter system. It asserted that it never marketed a pager transmitter system with the model number LTK-1400S. Rather that its third party website provider mistyped LTK-1400S as the model number for Leetek's authorized LTK-1400A pager transmitter system. Leetek also said that it never marketed or sold a pager transmitter system with a LTK-1400S model number. According to Leetek, the company was marketing an authorized pager transmitter system called he LTK-1400A, but its third-party website provider misprinted the model number as LTK-1400.

In rendering its final decision, the FCC says that based on the company's statements, which were made under penalty of perjury, it appears that the device mistakenly marketed on Leetek's website under model number LTK-1400S was properly authorized. Therefore the agency finds that a reduction of the proposed forfeiture is warranted as to that model. However having considered Leetek's response to the proposed fine in light of the applicable statutory factors the FCC concludes that Leetek did willfully and repeatedly violate Section 2.803(a) of the Rules in connection with its marketing of the uncertified LTK-1700CT pager transmitter system, and is therefore liable for a forfeiture in the amount of $7,000.

Im Jim Davis, W2JKD.

--

Because this was an affirmed fine, Leetek Payment was given only fifteen calendar days after the release date of this Forfeiture Order to pay the amount in full. That period is now past. If the forfeiture was not paid within the period specified, the FCC said that the case may be referred to the U.S. Department of Justice for enforcement.
(FCC)

**

RADIO LAW: EXTENSION OF HEART MONITORING DEVICE GRANTED

The FCC has granted a request by Boston Scientific Corporation to extend the existing waiver of Section 15.205 of its rules to continue tests of the company's Cognis cardiac device.

The FCC says that granting Boston Scientifics' request will permit this device to continue to use the 90 to 110 kHz frequency band while Boston Scientific completes its ongoing MultiSENSE clinical trial, begun in 2010, in which it is using the Cognis device to collect physiologic data related to patients' worsening heart failure.

The present waiver is scheduled to expire on November 17, 2012, and the extension will permit the continued manufacture and marketing of the subject devices until December 31, 2013, when the referenced clinical trial is expected to complete its enrollment. (FCC)

NAMES IN THE NEWS: MICHAEL J. OWEN AWARD CREATED BY IARU

Some names in the news. A new Michael J. Owen, VK3KI, Award has been created and announced at the recently concluded IARU Region 3 Conference held in Ho Chi Minh City, Vietnam. The purpose of the award is to recognize an individual or individuals that best exemplify the dedication and hard work of International Amateur Radio Union volunteers.

At the same conference the Wireless Institute of Australia proposed that an annual award or trophy be introduced in Michael Owen's name for the highest Region 3 individual operator score in the IARU High Frequency Contest. It reported that the proposal was well received and the details are to be announced at a later date. (RSGB)

**

NAMES IN THE NEWS: G4SWX NAMED NEW RSGB VHF MANAGER

The RSGB has announced the appointment of John Regnault, G4SWX as the societies new VHF Manager. Regnault is described as an active amateur on the VHF and UHF bands, a long standing designer and home builder of VHF equipment and a contributor to the RSGB publication RadCom. He replaces David Butler, G4ASR, who took on the job temporarily following the death of Terry Stevens, G8DKS, earlier in the year. (RSGB)

**

NAMES IN THE NEWS: GREG WALDEN, W7EQI, RE-ELECTED TO CONGRESS

Congressman Greg Walden, W7EQI, who is the chairman of the House Energy and Commerce Committee's Communications Subcommittee has been re-elected by a wide margin in Oregon's second district. Walden pulled almost 70% of the vote, according to unofficial results from the Oregon Secretary of State. (Published News Reports)

**

NAMES IN THE NEWS: NEWSLINE'S WA6ITF TO APPEAR ON ECHOLINK NET NOV. 17

Amateur Radio Newsline producer Bill Pasternak, WA6ITF, will be the featured guest on the Saturday night, November 17th edition of the Echolink Newsline Net. The net meets every Saturday at 9 p.m. Eastern on the Dodropin conference server which is Echolink Node number 355800. According to Steve Sercrest, W8WFO, this is not the original name for the gathering. Rather, because it's been running our weekly report for such a long time that those signing in began calling it the Amateur Radio Newsline or Newsline network. Again, you are welcome to join in the net conference at Echolink node 355800 on Saturday night, November 17th at 9 p.m. Eastern to hear Newsline's Bill Pasternak, WA6ITF, talk about numerous things in ham radio and do is best to answer your questions. Bill says he hopes to meet many of you there. (W8WFO)

EMERGING TECHNOLOGY: BOEING UNVEILS EMP DRONE

From our technology page, it appears as if science fiction has become a military fact. This after a successful missile test has ushered in a new era of warfare in which the military can take out electronic targets without destroying a single building or harming human beings. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is here with the story:

--

According to news reports, back on October 16th an experimental missile called CHAMP fired bursts of high power microwave energy at an unoccupied site to damage computers and other electronic systems during a test at the Utah Test and Training Range. The Counter Electronics High Power Microwave Advanced Missile Project flew over the Utah test site and brought down the compound's entire spectrum of electronic systems, apparently without producing any other damage at all. Even cameras recording the test was shut down.

Keith Coleman is the CHAMP program manager for Boeing Phantom Works. He says that in the near future this technology may be used to render an enemy's electronic and data systems useless even before the first troops or aircraft arrive.

The idea of using microwaves or electromagnetic pulses to knock out electronic systems without having to reduce cities or military bases to rubble first arose during Cold War nuclear tests. There scientists found that explosions created electromagnetic pulses that damaged some civilian power grids and other facilities.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

It will be interesting to see where the development of this new electronic warfare device goes in years to come. (Science OnLine, Business Insider, Discovery News, others)

**

HAM RADIO IN SPACE: WORK PROCEEDING ON RECOVERY OF AO-27

Amsat Oscar 27 is down but not out. This according to controllers who are working to return of the satellites FM repeater back to service after it stopped responding on October 5th. Heres the back story.

In early October AO-27 was restored to running on its primary bootloader program. Control operators were able to turn on the Transmitter for a short time on several occasions. Also required were multiple recoveries the stuck AFSK modem.

During recovery efforts AO-27 crashed once again on October 16. The command team again recovered the satellite to the bootloader state. It was also recovered from another occurrence of the AFSK modem problem and they again performed another software upload.

On October 18 the transmitter was left on in an attempt to discharge the batteries with the hope that faults could be cleared. Once the battery was recharged the high-level software aboard AO-27 ran for a few seconds before locking up. The team was able to reset it back to the bootloader once again. Telemetry indicate AO-27 is locking up while fetching telemetry from the hardware. As such, controllers say that it does not look like there will be a quick resolution to this crash.

In the meantime the AO-27 controllers are asking the ham radio public not to attempt to use the AO-27 if you hear it in Amalog mode. This to prevent interfering with the command team's recovery efforts. (AMSAT)

RADIO IN SPACE: JAPAN SCHEDULES FIRST LAUNCH OF NEW EPSILON ROCKET

Japan is scheduled to launch its first Epsilon solid-fueled rocket next August or September. The flight will deploy a planetary telescope while on-orbit while demonstrating new low-cost rocket assembly and control techniques, the Japanese space agency announced last week.

The Epsilon program is designed to cut in half the cost of Japanese small satellite launches. Japan's M5 rocket, which launched seven times before retiring in 2006, cost $94 million per flight. Engineers designed the Epsilon rocket with a simplified control system, and the vehicle's own computers will autonomously monitor the status of its systems during countdown.

Only a handful of engineers with laptop computers are required on the launch control team. The Epsilon is also designed to launch after only seven days of assembly on the launch pad, reducing labor and overhead costs. (ANS)

SWL NEWS: L.A. INTERNATIONAL AIRPORT'S TIS STATION GOES DARK

If you are an A-M broadcast band DX'er and have not been able to hear the Travelers Information Station on 530 kHz at Los Angeles International Airport theres a good reason. It has reportedly been off the air for a month or so. No word as to why, but it does open up that frequency in the Southwest United States for DX'ing a 50 Kilowatt religious station in Turks and Caicos islands that operates on the same frequency. (CGC)

**

SWL NEWS: UK REGULATOR OFCOM CANCELS 648 KHZ BBC NOV

British telecommunications regulator Ofcom has issued a notice of variation the Wireless Telegraphy Act to Babcock Communications Ltd. This to remove Babcock's authorization to the frequency of 648 kHz previously used to broadcast the BBC World Service.

Subject to international co-ordination, this frequency will now be available for use by community radio licensing in various parts of the UK, in addition to FM and other AM frequencies that are already potentially available for this purpose.

However, some note that the characteristics of 648 kHz is at the lower end of the AM broadcast spectrum and therefore requiring relatively large towers and transmitter sites. This they say may make it less suitable for community radio than other AM frequencies higher up in the Medium Wave band.

A Notice of Variation in the UK is very much like a Special Temporary Authorization or STA issued here in the United States by our FCC.

You can read the Ofcom announcement on line at tinyurl.com/uk-nov-cancel (GB2RS)

**

DX

In DX, word that F8FQX will be active
from Cameroon as TJ3SN next 3 to 4 years. He will be
operational on High Frequency bands plus 6 meters using
various modes. QSL via IZ1BZV direct or electronically
using Logbook of the World.

Members of F6KOP team and others will be on the air
from Uganda next February 6th to the 18th as 5X8C. They
will be active on 160 through 10 meters using CW, SSB, RTTY
and PSK. QSL via the bureau or electronically using Logbook
of the World.

AA9A will be active from Antigua Island February 10th to the
20th as V24A. His operation will include the 2013 ARRL DX
CW Contest. No bands or modes mentioned. QSL via home
call

HB9TUZ will be active as 8Q7MS from Gangehi Island Resort on
the North Ari Atoll Male in the Republic of the Maldives
from December 26th to January 3rd. His operation will be on
80 through 10 meters using SSB only. QSL electronically
only using eQSL.

Lastly the 2012 operation 5X1EME operation from Uganda has
been approved for DXCC credit. If you have a card for this
operation you can submit it to checkers to be added to your
DXCC total.

(Above courtesy of various DX news sources)

**

THAT FINAL ITEM: DAYTON 2013 IS A DX HAMVENTION

The Dayton Hamvention has announced its theme for 2013.
Amateur Radio Newsline's Cheryl, Lasek, K9BIK, has the
details:

--

When the 2013 Dayton Hamvention opens its doors next May
17th the theme will be that of it being the DX Hamvention.
This according to General Chairman Charles Kaiser who says
that this name will reflect the distant contact which is an
important part of ham radio.

Kaiser says that the Dayton Hamvention is often an important
DX destination for amateurs from around the globe to visit.
Also, working DX is often a mix of band conditions, the
diligent application of radio theory and of coarse a little
bit of magic.

Kaiser noted that many attendees return to Dayton each year to meet other hams that they have talked to on the radio. He says that the quest for that distant contact advances amateur radio on many levels so the Hamvention team is honoring DX in all of its forms this year.

In the same press release, Kaiser announced that Jim Tiderman, N8IDS, will serve as his assistant General Chairman for 2013. Kaiser says that Tiderman has been active in Hamvention for many years and brings a natural leadership style to the Hamvention Team.

For the Amateur Radio Newsline, Im Cheryl Lasek, K9BIK, not far from Dayton in Zion Illinois.

--

Hamvention 2013 will take place next May 17th to the 19th at its traditional home at the Hara Arena in suburban Trotwood, Ohio For more information please visit www.hamvention.org on the World-Wide-Web or e-mail media@hamvention.org. And as always, we will se you there.
(Dayton Hamvention)

Amateur Radio Newsline[TM} Report 1841 - November 23 2012
(audio at http://www.arnewsline.org/storage/audio/nsln1841.mp3)

Amateur Radio Newsline report number 1841 with a release
date of November 23, 2012 to follow in 5-4-3-2-1.

The following is a QST. Hams in China develop a new digital
protocol based on their own written language while mystery
signals are being heard on the High Frequency bands coming
from that nation. Find out the details are on these stories
and more on Amateur Radio Newsline[TM} report number 1841
coming your way right now.

EMERGING TECHNOLOGY: NEW CHINESE DATA MODE CP-16 ANNOUNCED

China makes news again this week with word that hams in that
nation have developed their own new data mode. One based on
characters in the Chinese alphabet. Amateur Radio
Newsline's Bruce Tennant, K6PZW, has the details:

--

Up until now, most amateur radio data modes have been based
around the English alphabet. The problem is that does not
work well for languages that are built around graphic
characters rather than letters. Because of this the Chinese
Radio Amateurs Club has been working since 2011 on a project
to develop a new data mode called CP-16, which stands for
Chinese character Pattern of 16 x 16 dot-matrixes.

To achieve the goal of allowing easy communication at very
low signal to noise ratio, CP-16 is designed to directly
transmit the graphic image of Chinese a character one line
at a time at about 10 milliseconds per line but adjustable
according to propagation and other conditions. This makes
the total transmission speed of 2 to 5 characters per
second, which is suitable for real-time reading.

To make the system work, CP-16 uses 16 on-off keyed audio
carriers spaced at 17 Hz intervals, with the total bandwidth
under 400 Hz. A CP-16 message can be received by any
Software Defined Receiver or the combination of an ordinary
SSB receiver and a computer equipped with any type of S-D-R

audio analyzing software that produces the traditional waterfall display. The text will be directly shown on the waterfall graph. Designers say that the human brain can then easily filter out all sorts of noise and correctly pick out the character.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

A paper on the work was presented by the Chinese Radio Amateurs Club to the International Amateur Radio Union Region 3 conference held recently in Vietnam. It can be seen at tinyurl.com/CP16-data. (IARU Region 3)

**

INTRUDER WATCH: MYSTERY CHINESE SIGNALS BEING HEARD ON HF BANDS

Wolfgang Hadel, DK2OM, who is the IARU Region 1 Monitoring System coordinator reports that there are some strange signals coming from China and making their homes on various parts of the Amateur Service spectrum. DK2OM says that since October 25th hams have been hearing from mysterious signals on 7, 14, 21 and 21.010 MHz. He notes that they are also audible in the shortwave spectrum at 15, 18, 19 and 20 MHz as well.

DK2OM says that initially the A3E signals sounded like grunt or cow mooing. Now reports are that thy have become very strong multi-tone signals with a carrier and both sidebands and heard every morning. He speculates that this night become kind of special kind of encrypted broadcast or a new generation of Over the Horizon radar but at the moment its actual purpose is unknown.

For further details visit www.iarums-r1.org/ and look under "Latest Intruder News". There you can also find a link to a recording of this new intruder to the High Frequency bands. (IARU-R1)

**

INTRUDER WATCH: RUSSIAN TAXIS ON 15 METERS

And here's a rather strange one. A taxi dispatch system seems to have set up shop on 15 Meters in Russia. This as DK2OM confirms a report of a taxi company in the Russian Federation is transmitting FM around the clock on 21.404.2 MHz. He says you can often hear a female voice organizing the business. (IARU-R1)

**

HAM RADIO IN SPACE: NASA PHONESAT COMING SOON TO HAM RADIO

Scientists at NASA's Ames Research Center have built the most affordable ham band satellite to date. Amateur Radio Newsline's Heather Embee, KB3TZD, has the details:

--

The $3,500 orbital device is a cubesat the size of a coffee cup that uses an off-the-shelf Nexus One smartphone as a central processor and an inexpensive off the shelf radio for communications with the ground.

Called PhoneSat 1, the tiny bird is scheduled to launch by the end of this year. Once on-orbit it will transmit back photos of Earth on an amateur radio band for 10 days, or until the battery dies.

Subsequent iterations will be capable of much more. For example, PhoneSat 2.0 will have a two-way S-band radio transponder which most satellites use to communicate with the ground and solar panels for extended life.

More on PhoneSat 1 is on-line at tinyurl.com/phonesat-one. An overview of the entire NASA PhoneSat mission can be found at tinyurl.com/phone-sat-project. At airtime, exact operating frequencies for these tiny birds has not been announced.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, near Berwick, Pennsylvania.

--

We will have more space related ham radio news later on in this weeks newscast. (CGC, W7RNA, AI9Q)

**

ENFORCEMENT: US AND MEXICO JOIN FORCES TO COUNTER CROSS BORDER TRAFFICKING OF STOLEN MOBILE DEVICES

Its going to get a lot harder to activate a stolen smart prone or other broadband device in both the United States or Mexico. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

FCC Chairman Julius Genachowski has announced the signing of a new bilateral agreement with Mexican Communications Under-Secretary Hector Olavarria Tapia. This to combat the theft and cross-border trafficking of mobile devices between the United States and Mexico.

The agreement builds further on the FCC's `PROTECTS Initiative', and the recent participation of U.S. and Mexican mobile providers in an international stolen device database. This database will prevent mobile devices stolen in U.S. cities from being re-activated in Mexico, and stolen Mexican devices being re-activated in the U.S. market. U.S. carriers were able to join the database from October 31st.

But it does not end there. The agreement also commits the FCC and Mexico's Secretariat of Communications and Transport to extend their inter-agency cooperation to crack down on the international trafficking of stolen mobile devices through a series of new action steps using technology and transparency. Among other measures, Chairman Genachowski and Under-Secretary Olavarr&#65533;a agreed that the respective agencies will closely track, analyze, and report progress in preventing mobile device theft.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Both the United States and Mexican telecommunications agencies will also develop and share best practices with respect to theft prevention and consumer education. (FCC)

RESCUE RADIO: DEMOCRATIC LAWMAKERS WANT HEARING ON HURRICANE SANDY COMMS FAILURES

A group of top Democrats on the House Energy and Commerce Committee is calling for a hearing to be held on the effect Hurricane Sandy had on the reliability of Internet, mobile, telephone and other communications networks. This after the massive storm whipped across the East Coast.

In a letter sent to committee chairman Representative Fred Upton and Communications and Technology sub-panel chairman Representative Greg Walden, W7EQI, the Democrats emphasized that network outages put lives at risk and noted that the storm knocked out 25 percent of cell towers in the affected areas. They argue that a hearing would let lawmakers examine vulnerabilities found in wireless and mobile networks during

the storm and help with preparation for the next one. The lawmakers said they also want to examine the performance of wireless networks during and after the storm. (The Hill)

**

RADIO LAW: ZONECASTING TO BE TRIED ON THE FM BAND IF FCC SAYS OK

Something new may soon be coming to the FM broadcast band in the United States. This if a proposed system called ZoneCasting proves out its proposed technology.

ZoneCasting is the result of research and development by a company known as Geo-Broadcast Solutions. It proposes to use a series of booster transmitters to give FM radio stations the ability to divide their coverage areas into geographic zones and "geo-target" their advertising and programming. Geo-Broadcast Solutions says its ZoneCasting system uses GPS and mobile broadband technologies to slice up the FM signal but avoid interference via a single-frequency network made up of FM boosters.

To allow the system to work, the company has asked the FCC to modify its current rule that prohibits booster stations from originating programming. A booster operates on the same frequency as an FM station's main channel and is used to improve signal within the station's coverage contour.

The company and Harris are partnering on the first commercial test, which is expected to launch early next year at WRMF-FM in Palm Beach, Florida. Broadcast engineers say that limiting interference between a main channel signal and booster can be a challenge. Geo-Broadcast Solutions said the purpose of the test at WRMF is to prove ZoneCasting will not cause that type of a problem. (RW)

**

ENFORCEMENT: FOUR UNLICENSED FLORIDA STATION OPERATORS HAVE FINES AFFIRMED

Four operators of unlicensed broadcast stations in Florida have had proposed fines ranging from $10,000 to $20,000 each affirmed by the FCC. This is because none of them responded to Notices of Apparent Liability that were issued to them last summer.

The four unlicensed operators are identified by the regulatory agency as Damian Anthony Ojouku Allen, Michael William Downer, McArthur Bussey and Burt Byng. As a result of their failure to communicate back to the FCC the agency has upheld a total of $65,000 in fines and issued Forfeiture

Orders.

Downer and Allen were fined $20,000 each for operating unauthorized stations on 101.1MHz in Pompano Beach and 102.1 MHz in Lauderhill. Bussey was told he has to pay$15,000 for operating on 89.1 MHz in Fort Lauderdale while Byng received a $10,000 penalty for operating an unauthorized facility on 107.1 in Miami.

As is usual in these cases, each was given 30 days to pay the fine or to file an appeal. If they fail to do either the cases may be turned over to the Justice Department for collection. (FCC, RW)

**

ENFORCEMENT: ALLEGED COPPER THIEVES CHARGED IN OHIO

Federal officials in Cleveland, Ohio, have charged 28 year old Thomas M. Carbone and 23 year old Katie M. Stanton with the malicious destruction of federally-licensed communications lines. U.S. Attorney Steve Dettelbach said that the defendants are accused of allegedly breaking into and seriously damaging radio towers.

The indictment charges that on or about August 17 to 18, 2012, Carbone and Stanton unlawfully entered the property of Radio One in North Royalton, Ohio, and willfully and maliciously destroyed and removed copper material from four radio station towers on the property. According to the indictment, this unlawful removal of copper depleted the signal strength of the radio station, thereby impeding its ability to broadcast emergency messages. As such emergency repairs cost nearly $11,000 while permanent repairs will cost an estimated $125,000.

The indictment also charges that Carbone and Stanton conspired together to commit these unlawful acts. (CGC, Published News Reports)

**

HAM HAPPENINGS: HAPPY 20th BIRTHDAY TO REC.RADIO.INFO

A very happy birthday to the popular Usenet newsgroup rec.radio.info which is about to turn 20. This with the first articles having appeared back in January of 1993.

Usenet is an electronic discussion and bulletin system that predates much of the Internet. It later began using the Internet to carry its discussion categories, known as newsgroups. Amateur radio was one of the very first topics to have these newsgroups.

The rec.radio.info newsgroup carries a wide range of bulletins, announcements, and other informational articles about all kinds of radio. These include amateur, shortwave, and domestic broadcasting all of which are submitted by its readers and selected by its moderation team. Articles from rec.radio.info suitable for amateur radio transmission are also relayed to the amateur packet radio bulletin board service network.

The rec.radio.info newsgroup can be accessed using a newsreader and subscription to a News Service Provider. A web-based interface to Usenet newsgroups, including rec.radio.info, is available from Google Groups at groups.google.com. (K3FU, K9YA)

**

SOCIAL SCENE: HAMFEST INDIA 2012 TO HOLD US LICENSE EXAMS

Hamfest India 2012 is in the process of organizing a USA amateur radio license exams session on for this December 16th in city of Radakrishnan. Planners say that they are trying to find a location near to the hamfest venue with the exact location to be updated as soon as its known.

All the three classes of United States licenses will be tested. As anywhere else, applicants must present a photo identification of whom they and pay the exam fee of $15 or 850 Rupee in Indian currency. Walk-ins allowed and results will be made known to each applicant on the same day.

Oversight for this exam session will be by the ARRL VEC. More information is on-line at tinyurl.com/us-exams-in-india. (AB9US)

**

NAMES IN THE NEWS: THREE ASTRO-HAMS RETURN TO EARTH

Some names in the news. First up are ISS Expedition 33 Commander Suni Williams, KD5PLB, and Flight Engineers Yuri Malenchenko, RK3DUP, and Aki Hoshide, KE5DNI. All three returned to Earth on Monday, November 19th after 127 days in space.

The descent and landing took over 3.5 hours and occurred at 5:56 am U-T-C. This with a successful touchdown to the north-east of the town of Arkalyk in the Ukraine.

Expedition 34 arrived at in October is now in charge of ISS operations. It consists of Russian cosmonauts Oleg Novitsky and Evgeny Tarelkin, as well as NASA astronaut Kevin Ford, KF5GPP. They will spend five months on the orbiting laboratory. (NASA, Southgate, published news reports)

**

NAMES IN THE NEWS: ARRL DIVISION ELECTION RESULTS ANNOUNCED

Mike Lisenco, N2YBB, who has been elected the new Director of the ARRL's Hudson Division. Lisenco of Brooklyn New York handily defeated incumbent Joyce Birmingham, KA2ANF, for the top slot in that Division.

Meantime in the Northwestern Division, incumbent Jim Fenstermaker, K9JF, defeated challenger William Balzarini, KL7BB, to retain his Directors seat. James Pace, K7CEX, was elected as Vice Director in a three-way race.

Ballots were counted on November 16th. Those standing for election in other divisions were unchallenged. Terms for all Directors and Vice Directors elected or re-elected begin at noon on January 1, 2013 and run for three years. (ARRL)

**

NAMES IN THE NEWS: WALDEN TO CHAIR NATIONAL REPUBLICAN CONGRESSIONAL COMMITTEE

Newly re-elected Oregon Representative Greg Walden, W7EQI, says he will remain chairman of the House Subcommittee that oversees communications and technology policy. This as the former radio station group owner is being promoted within the Republican party leadership in Congress.

In addition to his other duties, W7EQI will chair the National Republican Congressional Committee. Elected to the post by House GOP members, the National Republican Congressional Committee chairman works with House leadership to set the agenda of that body. The committee also coordinates national efforts to elect Republicans to the House. (Published news reports)

**

NAMES IN THE NEWS: 2012 ARRL UHF CONTEST RESULTS POSTED

Sean Kutzko, KX9X, who is the League's Contest Branch Manager says that the results for the 2012 ARRL August UHF Contest are now on-line. You can view them at www.arrl.org/contest-results-articles. (ARRL)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: INCREASING EFFICIENCY OF WIRELESS NETWORKS

Professors at the University of California, Riverside Bourns College of Engineering have apparently developed a way of doubling the efficiency of wireless networks. According to researchers Yingbo Hua and Ping Liang it appears the doubling of efficiency could be achieved by using full-duplex with "time-domain transmit beam forming." They say that the latter digitally creates a time-domain cancellation signal, couples it to the radio frequency front-end to allow the radio to hear much weaker incoming signals while transmitting strong outgoing signals at the same frequency and same time.

Wireless Design says scientists Hua and Liang see applications in cognitive radio. They say that this is a type of wireless communication in which a transceiver can detect which communication channels are in use and which are not, and move into vacant channels while avoiding occupied ones. You can read the Wireless Design Online article at tinyurl.com/highly-efficient-radio. (Southgate, Wireless Design)

**

TECHNOLOGY CHANGING: SPACE WEATHER TO INTRODUCE TWO NEW PRODUCTS

This note from National Oceanic and Atmospheric Administration. Tentatively on December 11th the Space Weather Prediction Center will introduce two new forecast products titled the 3-Day Forecast and the Forecast Discussion. These new products will be available twice a day at 00:30 and 12:30 UTC to provide space weather information in abbreviated and detailed formats.

Both will use NOAA Space Weather Scale information. Examples of these new products are available at tinyurl.com/caqy4ox and for the concise, 1-page summary and tinyurl.com/bm9flp6 for the in-depth space weather analysis. These two products will supplement the existing product suite and no current forecasts will be discontinued. (OPDX, W8KVK)

**

RADIO IN SPACE: DARPA RECRUITING AMATEUR ASTRONOMERS FOR SPACE JUNK SURVEILLANCE

The U.S. military is launching a far-out neighborhood watch. But instead of warding off burglars, it's recruiting amateur astronomers to assist in tracking orbital debris and thereby help in avoiding possible satellite collisions in Earth orbit.

The sky-monitoring project, called SpaceView, is a Defense Advanced Research Projects Agency or DARPA program that enrolls the talents of amateur astronomers to help protect American space assets from orbital trash. These dangerous objects include spent rocket stages, defunct satellites and fragments from other spacecraft that are the result of erosion, explosion and collision. DARPA says that a collision between one of these small pieces of debris and a satellite could release more than 20,000 times the energy of a head-on automobile collision at 65 miles an hour.

The concept of the SpaceView program is to provide more diverse data to the Space Surveillance Network. This is a U.S. Air Force program charged with cataloguing and observing space junk and debris to identify potential near-term collisions. NASA estimates more than 500,000 pieces of hazardous space debris orbit the Earth, threatening satellites that among other things support peacekeeping and combat missions.

For more information on DARPA's SpaceView project take your web browser to www.spaceviewnetwork.com. (Space.com)

**

ON THE AIR: SPECIAL EVENT STATION GB0IDD TO CELEBRATE UN INTERNATIONAL DAY OF PERSONS WITH DISABILITIES

The United Kingdom's Wakefield District Radio Society will be operating the special event station GB0IDD over the weekend of December 1st to the 3rd. This in celebration of the United Nations International Day of Persons with Disabilities.

This United Nations sponsored Day of Action takes place each year. Its overall aim is to raise awareness and understanding of disability issues and to promote the independence, inclusion and choice of disabled people and their rights, abilities and well-being worldwide.

This year's theme is Removing Barriers to Create an Inclusive and Accessible Society for All. Operation will be mainly on 20 through 10 meters and you should confirm this contact electronically via e-QSL only.

By the way: Some 30 percent of the Wakefield District Radio Society members are disabled in some way, (GB0IDD)

**

ON THE AIR: 5G12ITD CELEBRATES INTERNATIONAL TOLERANCE DAY

And special events station 5G12ITD is on the air Morocco in celebration International Tolerance Day. The United Nations sponsors International Day for Tolerance annually observed to educate people about the need for tolerance in society and to help them understand the negative effects of intolerance. 5G12ITD will be active all bands and all modes through December 16th. QSL via RW6HS. (Southgate)

**

DX

In DX, word that Members of the F6KOP team expected to be active from Ugands as 5X8C between February 6th to the 18th, 2013, from a location some 20 Km from Entebbe airport. They have announced they will comply to the last IARU bandplan on 40 meters for the region with the frequencies of the PSK and RTTY moved to 7040 and 7042 kHz. For more details see www.5x2013.com

H44RK has announced that he will be active from Samoa for a while in early December. More details will be forthcoming shortly.

DL5RMH will be active from Guatemala until middle of January signing stroke TG9 stroke KF5LSG though he is hoping to obtain the call TG9IDX. If you make contact, please QSL via his home callsign.

VK6DXI will be active stroke FK from New Caledonia until mid December. He has been heard early on Sunday mornings on 28.485 MHz around 07:20 UTC. QSL only via his home callsign.

LA9JKA continues to be operational as JX9JKA from Jan Mayen Island and will be there until approximately April 11th, 2013. He operates SSB and the digital modes on 160 through 4 meters including 60 and 6 meters. QSL direct only to his home callsign as listed in QRZ.com.

Lastly, special event station 8J6HAM will be operational from the Island of Kyushu Japan, between December 10th and March 3rd. Activity is in celebration of the 12th West Japan Ham Fair with operations on all bands and using many modes. QSL via the JARL Bureau.

**

NEWSLINE FOLLOW-UP: L.A. AIRPORT'S TRAVELERS INFORMATION STATION IS HISTORY

And finally this week, thanks to the efforts of a sharp-eyed CGC Communicator reader, we now know why the 530 kHz Travelers Information Station at Los Angeles International Airport reported on last week is silent. Amateur Radio Newsline's Bill Pasternak tells us who found out and why its goods and bad news for broadcast band DX'ers:

--

According to the CGC Communicator, it was a reader identified as Mark Nodine who provided the answer to the question of why the station went dark. According to Nodine, who holds the call KJ6MS says Los Angeles World Airports canceled their recently renewed license for WNHV296 effective October 1, 2012.

Los Angeles World Airports is the City of Los Angeles department that owns and operates three airports. These are Los Angeles International, Ontario International and Van Nuys. The latter of the three being mainly used for private and corporate aviation.

The CGC Communicator goes on to give some interesting technical date about the now defunct Los Angeles International Airport Travelers Information Station. For instance, the station consisted of two separate transmitters. A 10 watt unit was used to provide service to street traffic in a tunnel under the runways while a 100 watt transmitter broadcast to the general public. An FCC waiver was necessary in order to run 100 watts with the above-ground transmitter. That power level was granted back in 2004 after being deemed necessary to communicate with the general public in case of a terrorist attack.

The bottom line: As we said in our last report, the disappearance of this Travelers Information Service station does open up that frequency in the Southwest United States for DX'ing a 50 Kilowatt religious station in Turks and Caicos islands that operates on the same frequency. But it also means another low power AM broadcast band station that was a challenge for DXing listeners has gone away.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, scanning the medium waves from the newsroom in Los Angeles.

--

As an aside, the Los Angeles World Airports still holds but is not using the license for station WQEA967 on 770 kHz. It is supposed to be a 10 watt station at Southern California's Ontario International Airport. (CGC Communicator)

Amateur Radio Newsline{[TM] Report 1842 - November 30 2012

Attention bulletin stations. Please note that this is an extended Amateur Radio Newsline report and contains three breaks. Thank you.

Amateur Radio Newsline report number 1842 with a release date of November 30, 2012 to follow in 5-4-3-2-1.

The following is a QST. The FCC issues a rule making proposal aimed at implementing the 2007 World Radiocommunications Accords; the NTSB says it wants to end all kinds of distracted driving; South Africa's ham radio community is told it will have to re-apply for their licenses and the 8th Global Amateur Radio Emergency Communications Conference is called a major success. Find out the details are on Amateur Radio Newsline[TM] report number 1842 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: FCC PROPOSES IMPLEMENTING 2007 WRC ACCORDS

The FCC has issued ET Docket 12-338 that if passed as written is pretty good news for ham radio. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

ET Docket 12-338 released on Tuesday, November 20th proposes modify the rules governing a number of communications services for amateur radio which falls under Part 97 of its rules, the proposed changes are quite positive.

Starting at the low end of the electromagnetic spectrum and working our way up, Docket 12-338 proposes the creation of a permanent albeit shared allocation from 135.7-137.8 kHz with a power output of 1 watt effective radiated power to an isotropic radiator. To those who have never heard the term isotropic radiator, this is a theoretical point source of electromagnetic waves that emits the same intensity of radiation in all directions. Translated into everyday language it really means hams will only be able to transmit a few hundred milliwatts of power if that.

Now going up a few hundred kilohertz to the 160 mter band. That where Docket 12-338 proposes to change the Amateur Radio Service allocation to make 1800 through 2000 kHz a primary amateur service allocation.

By way of background, historically, the 1715 to 2000 kHz band was allocated exclusively to the Amateur Service. In 1953, the FCC removed the 1715 to 1800 kHz segment from the Amateur Radio Service and allocated the 1800 to 2000 kHz band to the Amateur Service on a shared basis with the Radionavigation Service. Then in 1983, the FCC allocated the 1800 to 1900 kHz band to the Amateur Service on an exclusive basis and the 1900 to 2000 kHz band to the Radiolocation Service on a primary basis and to the Amateur Service on a secondary basis.

Lastly, in the WRC-07 Table Clean-Up Order, the FCC combined the 10 to 10.45 GHz and 10.45 to 10.5 GHz bands in the Federal Table of Allocations. In doing so, the frequency band was inadvertently not changed to 10 to 10.5 GHz. To fix this the FCC will revise the text of three footnotes that pertain to this spectrum by adding the existing Amateur-Satellite Service allocation to the list of permitted non-federal services. It will also order that non-federal stations in the Radiolocation Service not cause harmful interference to the Amateur Service in the 10 to 10.5 GHz band.

As we said, its pretty good news for ham radio here in the USA.

From the studio in Los Angeles, Im Bill Pasternak, WA6ITF.

--

If approved as written, these changes will implement allocation decisions from the 2007 World Radiocommunication Conference that concern those portions of the radio frequency spectrum between 108 MHz and 20.2 GHz by making specific updates to the rules in this frequency range. You can download the full text of ET Docket 12-338 at as a Word document at tinyurl.com/proposed-wrc-changes (FCC)

**

RADIO LAW: NTSB VS CEA ON DISTRACTED DRIVING AND DISTRACTED TRANSIT

The National Transportation Safety Board wants to eliminate all driver distraction and is broadening its focus on the use of portable electronic devices in all types of vehicles. The issue is part of the NTSB's recently released "2013 Most Wanted List." Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

While acknowledging that distracted driving didn't begin when people began making calls or texting in the car, the National Transportation Safety Board still says that portable electronic devices that do not directly support the task at hand have no place in any vehicles. This includes automobiles planes, trains, and just about any other vessel you might be able to think of. As such it argues that states and regulators can set the proper tone by banning the nonessential use of such devices in all areas of transportation.

The NTSB says that young drivers are more likely to use portable electronic devices while behind the wheel and therefore are especially at risk. It urges that laws, education, and enforcement efforts should place special emphasis on curbing the use of portable electronic devices by these younger drivers.

The NTSB goes on to say that companies should develop and vigorously enforce policies to eliminate distractions. It also says that manufacturers can assist by developing technology that disables these devices when in reach of operators.

But the NTSB has some strong opposition from the Consumer Electronics Association or CEA. That organization says that while it applauds the effort, it also notes that the NTSB misses the mark on the use of portable electronics in vehicles. It says that calling for an abstinence only approach, the NTSB ignores established realities of human behavior. It also claims that in-vehicle technology when used correctly can make for vastly safer roadways.

The CEA says that rather than calling for broad regulations or outright bans, policymakers should encourage the use of the many innovative driver safety technologies coming on to the marketplace. The CEA notes that it has already forwarded the NTSB a list of third-party applications that promote safe use of portable technologies in the automobile.

How any of this might affect mobile or even hand held pedestrian portable operations in the future by ham radio operators and other users of two-way radio is at this time unknown. But the NTSB stand seems to be that any and all forms of distraction must be removed from the public's hands while in transit. And that's not likely to sit well with the public at large.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP. In Scottsdale, Arizona.

--

It should be noted that the National Transportation Safety Board is an independent body that has no authority to enact transportation policy, nor to force the federal government to make transportation policy changes. However it makes recommendations to governments, industry and the public and uses its "Most Wanted" list as a way to highlight changes that it is advocating. (RW)

**

WORLDBEAT: ALL RADIO SOUTH AFRICAN AMATEURS WILL HAVE TO REAPPLY FOR THEIR LICENSES

All South African radio amateurs are going to have to reapply for their licenses. This is according to the South African Radio League which says its liaison committee met with that nation's telecommunications regulatory body Independent Communications Authority of South Africa.

At that meeting the national society learned that following an audit by the Auditor General, that the communications regulator has been instructed to implement regulation 15 of the nations Radio Frequency Spectrum Regulations. This is a law that stipulates that an amateur radio license can only be renewed for up to five years after which a new application has to be submitted. Because of this, all South Africa licensed radio amateurs will be required to re-apply for a license for the period of April 1st 2013 through March 31st 2018.

The South Africa Radio League says that the details as to how this will be accomplished are expected to be made public in the next few weeks. Until that time, South African hams should do nothing. As soon as information is made available the South Africa Radio League announce it via its news bulletin service system and make forms available on its website at www.sarl.org.za. (SARL, ICASA)

RESCUE RADIO: GAREC 2012 DEEMED A MAJOR SUCCESS

The 8th Global Amateur Radio Emergency Communications Conference also known as GAREC 2012 was held recently in Port Dickson, Malaysia. We have an updated report on what

transpired at that gathering from WIA Newsman Graham Kemp, VK4BB:

--

Attending the conference on November 12 to 14 were delegates from nine countries under this year's theme of 'One world, One commitment'.

Among the presentations was one on the Mobile Emergency Weather System which assists authorities using simple equipment and training.

There were status reports from various countries and these highlighted the differences and similarities in approach to emergency planning. While solutions may not be easy to find, sharing the problems and allowing individual countries to recognize that they were not alone, provides valuable support to the Global community.

GAREC-2012 included two practical activities. These enhanced inter-personal relationships enabling delegates to work together more efficiently in future.

Future conferences may seek to involve partners in emergency response, such as the International Federation of the Red Cross and the ITU, in accord with the existing Memoranda of Understanding.

The delegates thanked the Malaysian Amateur Radio Transmitters Society in hosting this successful conference.

For the Amateur Radio Newsline. I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

The next GAREC is in Zurich, Switzerland on June 25 to 27, 2013. All groups and organizations involved in Amateur Radio Emergency Communications are invited to attend to share their knowledge and learn from others. (WIA News)

**

RESCUE RADIO: DISASTER READINESS FAIR IN CALIFORNIA HIGHLIGHTS CERT AND HAM RADIO

In the wake of Hurricane Sandy, a disaster-readiness fair that highlighted solar oven cooking, water storage, 72-hour emergency kits and amateur radio communication demonstrations has been held in Temecula, California. The event, hosted by the Temecula Stake of the Church of Jesus Christ of Latter-day Saints, took place on Saturday, November 10th.

At the event dozens of tables with information and demonstrations on topics pertinent to emergency preparedness were set up in and around the church facility. There were also two presentations on food storage and earthquake preparedness was given by specialists in those areas.

Gordon Neuls, N6ELS, manned a booth promoting amateur radio certification. Members of the Temecula Citizen Corps were on hand to raise awareness of the need to be ready for natural disasters and to promote the Community Emergency Response Team operations. It was noted that in the case of a disaster where normal lines of communication are interrupted, amateur radio can be used to relay information, as well as to send for help and other assistance.

According to the Temecula Press Enterprise, the Church of Jesus Christ of Latter-day Saints has long been an advocate of emergency preparedness. It noted that the church leadership encourages each of its members to have a year's supply of food and emergency items, be self-reliant and free of debt. (Temecula Press Enterprise)

RESCUE RADIO: HAM RADIO RESPONDERS THANKED FOR THEIR HELP IN GUATEMALA QUAKE

Amateur radio operators who were among the first responders following an Earthquake that hit Guatemala have been thanked for their efforts. WIA Newsman Robert Broomhead, VK3DN has the details:

--

The rescue and relief work in San Marcos, Guatemala, a mountainous region bordering Mexico that was hit by a 7.4 scale earthquake claiming the lives of at least 52 people earlier this month, was aided by emergency communications provided by radio amateurs.

International Amateur Radio Union Region 2 Emergency Communication Coordinator, Cesar Pio Santos HR2P said he was very proud of the work done during and after the earthquake on November 8, despite the difficult times.

Cesar HR2P thanked the members of the Club de Radioficionados de Guatemala for their outstanding efforts. He was responding to a report from Marco Aurelio TG 8 AMP, who was in charge of the emergency network. About 10,000 houses have been affected by the earthquake with authorities setting up 11 rescue centers for the homeless.

This has been VK3DN, reporting from Melborne.

--

According to news reports, this was the worst quake to hit Guatemala since 1976. Thats when a 7.5 magnitude temblor caused the deaths of about 23,000 people in one of the worst natural disasters of the time. (VK3PC, HR2P, WIA News)

**

RADIO LAW: HAM RADIO TOWER AMENDMENT TO ZONING IN RIDGECREST CA

The Planning Commission in Ridgecrest California was to hold a public hearing November 27th to recommend the City Council amend a city zoning ordinance that would help hams in that city erect antennas. The amendment request, should it be approved by the city council at a later date, could permit amateur ham radio antennas in excess of 35 feet to be erected subject to a ham obtaining a Conditional Use permit.

The agenda relates directly to a previous request by Ridgecrest resident Steven Rainey, N6MVX, to put up a 55-foot tower on his property back in September. Rainey could not receive a conditional use permit for the proposed tower following a public hearing. This is because the Planning Commission does not have the authority to grant such permits under the current municipal code.

According to a city staff report, the amendment request, should it be approved by the city council at a later date, could permit amateur radio antennas and windmill towers in excess of 35 feet to be erected subject to a Conditional Use permit. City Planner Matthew Alexander is quoted as saying ham radio operators represented a strong asset to the city in case of emergencies.

More is on-line at tinyurl.com/ridgecrest-antenna. (Ridgecrestca.com)

**

HAM HAPPENINGS: COMMEMORATE NOAA - SKYWARN RECOGNITION DAY

NOAA - SKYWARN Recognition Day is December 1st from 0000 to 2400 hours UTC and everyone is invited to take part.

NOAA - SKYWARN Recognition Day was developed in 1999 by the National Weather Service and the American Radio Relay League. Its purpose is to celebrate the contributions that volunteer SKYWARN radio operators make to the National Weather Service

As we go to air some 70 NWS ham radio operations are registered for the 24 hour operating event. These stations are expected to be operational on the High Frequency bands plus 6, 2 and 70 centimeters along with Echolink as well as IRLP.

For more informational please visit the official NOAA - SKYWARN Recognition Day website at tinyurl.com/skywarn-nws-day. (PAPA, NWS)

**

HAM HAPPENINGS: HANDIHAM 2013 RADIO CAMP ANNOUNCED

The Handihams have make known that their 2013 Radio Camp is tentatively scheduled for the Woodland campus of Camp Courage in late July and early August. The tentative dates are July 28th through August 2nd making travel days for the campout Sunday and Friday. No pricing has been announced. (Handihams)

**

HAM HAPPENINGS: COURAGE CENTER CAMPS PARTNER WITH FRIENDSHIP VENTURES

The Handihams have also announced that Courage Center Camps and Friendship Ventures have entered a joint partnership. This to create a new camp organization to serve people with disabilities.

The new organization founded on November 19th will be called Camps of Courage and Friendship. At least that will be its title until a formal name study is completed in 2013.

Campers, volunteers and staff will see traditional programs continue in 2013. However, behind the scenes, new methods and approaches will be developed to incorporate the strengths of both organizations. More about this new joint venture is on-line at www.campscouragefriendship.org. (Handihams)

**

HAM HAPPENINGS: TOWER WORK WEBINAR DECEMBER 12

The World Wide Radio Operators Foundation will be presenting a webinar on towers and how to work safely on and around one on.

Titled "Tower Work --Tips, Techniques, and Tools," this presentation taught by John Crovelli, W2GD, and Don Daso, K4ZA. During the session the two will outline things that they have learned from almost 100 years of combined experience, focusing on safety, cost savings, and of coarse problem solving.

The hour long webinar will begin at 9 PM Eastern Standard Time on Wednesday, December 12th which equates to Thursday, December 13th at 02:00 UTC. Registration is free to hams world-wide at tinyurl.com/tower-webinar-registration.

(K4ZW, QRZ.com)

**

NAMES IN THE NEWS: ELLEN OCHOA, KB5TZZ, NAMED DIRECTOR OF JSC

Some names in the news. A ham radio operator will soon be heading up the Lyndon B. Johnson Spaceflight Center in Houston, Texas. This as NASA Administrator Charles Bolden announces that Astronaut Ellen Ochoa, KB5TZZ, as the next Director of the historic space development facility.

Ochoa was the first Hispanic woman to go into space. Since September 2007 she has served as Johnson Spaceflight Center Deputy Director. Prior to that position she worked as Deputy Director of Flight Crew Operations at JSC and in September of 2006 became Director of Flight Crew Operations.

Ellen Ochowa will be facility's 11th Director. She will also be its first Hispanic, first radio amateur and the second female to serve in that position. KB5TZZ will take over the reins at JSC from Michael Coats when he retires at the end of the year. (NASA, Southgate)

**

NAMES IN THE NEWS: KOLD OWNER TURNS 90

The founder of the world's most remote radio station, Radio KOLD in Antarctica has turned 90. Steve Grimsley, VK2ZP, set up Radio KOLD at Wilkes Base in 1961, and the station is still broadcasting. Family, friends and former colleagues gathered in the Australian town of Binalong to celebrate VK2ZP's birthday. (WIA News)

**

NAMES IN THE NEWS: VE3XT ELECTED ONTARIO NORTH/EAST RAC DIRECTOR

Congratulations are extended to Bill Unger, VE3XT who was recently selected as the Radio Amateurs of Canada Director for Ontario North East. Unger ran unopposed, eliminating the need for a balloted election. VE3XT has been an amateur operator since 1970 and has been involved in many aspects of the hobby. His term as Director will be for two years starting January 1, 2013 and ending on December 31, 2014. (RAC)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: MEXICO ZETA DRUG GANG BLAMED FOR KIDNAPPING ENGINEERS

If you are an Information Technology or two-way radio technician and planning a trip to Mexico, you might not carry an H-T on a belt clip where it can be seen. This is because at least one drug gang seems to be kidnapping and enslaving those who know two-way radio to build and keep their private system going. Amateur Radio Newsline's Cheryl Lasek, K9BIK, takes a look at the situation south of the border:

--

According to a report from Mexican news site Animal Politico, at least three dozen engineers and technicians have been kidnapped in the past four years. And Felipe Gonzalez who is the head of Mexico's Senate Security Committee told Animal Politico that none of the engineers who disappeared have ever been found.

Mexican authorities blame the notorious drug running gang the Zeta's for the kidnappings. The Mexican military is trying to dismantle an extensive radio network built and operated by the drug cartel but to date authorities have not had much luck shutting it down. Not only is much of the equipment super-easy to replace, but the drug runners have apparently found some unwilling assistance by kidnapping and enslaving technicians to help build it. Among them is at least one IBM employee and several communications technicians from a firm owned by Mexico's largest construction company.

Last year the Mexican military found and dismantled one such drug runners radio network spread across northeastern Mexico that included 167 radio antennas sites. As recently as this past September, Mexican marines found a 295-foot-high transmission tower in Veracruz State.

The bottom line: It seems the drug gangs have discovered that two-way radio is a tool that they will not be without but the Mexican government is doing all it can to take these clandestine operations off the air.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, near Zion, Illinois.

--

One of the best stories in the English language that explains in depth the safety issue to engineers and technicians in Mexico is on the World Disaster Report website. Its on-line at tinyurl.com/enslaved-technicians. (Animal Politico, Whatspoppin.net, World Disaster Report, other news sources)

**

WORLDBEAT DIGITAL RADIO FAILS IN HONG KONG

As of this past October 10th, Hong Kong's new Digital Broadcasting Corporation is off the air. This after only one month of operation. The stated reason is that they simply have run out of money to continue operations.

According to the South China Morning Post, the station's co-founder Albert Cheng King Hon wanted the government to intervene between the shareholders, but Secretary for Commerce and Economic Development turned down the request for mediation.

Digital Broadcasting Corporation's financial woes have meant that the staff was not paid for the month of October, or offered severance. Nonetheless, at least one talk show host indicated that he would like to continue broadcasting without pay, but some doubted the practicality of this goodwill gesture.

Disagreements over what to do with the company's assets extend to questions over whether or not these should be liquidated to pay employees or allow the board members to buy back shares at a discounted rate. Digital Broadcasting Corporation license required it to formally launch its service by September 21st, 2012, and also to provide seven 24-hour programming channels. (RW)

**

WORLDBEAT: BCDX NET CELEBRATES ITS 24th ANNIVERSARY

The weekly 40 meter BCDX Net from South India celebrated its 24th anniversary on Sunday, November 25th. This Net began operation on Sunday, November 27, 1988 by a small group of radio amateurs that included 4S7VK, VU2FOT, VU2JOS along with some very interested shortwave listeners.

The BCDX Net is now held on Sunday morning's at 03:00 UTC on 7 dot 085 MHz Lower Sideband for the advantage of those who are keenly interested in Broadcast Band DXing. According to

its operators, the unique thing about this net is that is helped hams to become SWL DX'ers and SWL's to get their amateur licenses. The current net control station is VU3SIO and assisted from time to time by VU3BGK and VU2JOS. (Southgate)

**

WORLDBEAT: MARITIME AMATEUR WEBSITE SERVING HAMS UP NORTH

The Maritime Amateur website was launched back in March 2008 with the purpose of sharing information among radio amateurs in Nova Scotia, New Brunswick and Prince Edward Island of Canada. Now in its fifth year, there has been over 43 thousand hits and has a membership of over 110 ham radio operators.

From the homepage, there are links to local, national and international news, CANWARN, maritime nets and numerous others sits of interest to hams that spend time on the water or who just want to be of service to their communities. You can check it out at www (dot) maritimeamateur (dot) ca. For more information please contact Jim Langille by e-mail to ve1jbl@eastlink.ca (VE1JBL)

**

HAM RADIO IN SPACE: FOX-1 CUBESAT UPDATED DESIGN PUBLISHED

The design of the Fox-1A has been updated. During the 2012 Symposium AMSAT Vice-President Engineering, Tony Monteiro, AA2TX and the Fox Engineering team presented the latest status on the design, development, and construction of the Fox-1A satellite project. Fox-1A is is a one unit size cubesat which will carry an FM repeater transponder to replace the ageing AO-51. (ANS)

**

HAM RADIO IN SPACE: 2012 AMSAT SYMPOSIUM PROCEEDINGS AVAILABLE IN THE AMSAT STORE

The Proceedings of the AMSAT-NA 30th Symposium and AMSAT-NA Annual Meeting, held October 26th to the 28th in Orlando, Florida have been put up for sale at the on-line AMSAT Store. The proceedings contain over 30 articles on subjects ranging from current satellite operations to updates on the Fox Project. For information on pricing and shipping or to oplace an order please visit store.amsat.org/catalog on the World Wide Web. (ANS)

**

BREAK 3

The news never stops and neither do we. From the United States of America we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed to you by the following bulletin station:

(5 sec pause)

**

ON THE AIR: SPECIAL EVENT STATION TM1TARA

On the air, keep an ear open for special event station TM1TARA to be on air between December 8th to the 10th. This to commemorate the scientific voyages of French polar vessel the Tara.

Tara Expeditions has been organizing missions aboard this research schooner for the past 9 years. The goal is to learn more about the impact of climate change on the planets ecosystems. So far Tara has accomplished eight successful expeditions including voyages to Greenland, Antarctica, Patagonia, southern Georgia, and the Arctic. Its latest voyage was described as world-wide known as Tara Oceans.

For this special celebration operations will be conducted by F8DVD and F8IJV from Paris, France during the Tara exhibit. Look for them on 20 through 10 meters on SSB. A special color QSL card will be printed and will be sent via the Bureau or direct. QSL with a self addressed envelope and 2 IRC's - if you can still get them -- to F8DVD. (Southgate)

**

DX

In DX, CT1FTR is currently on the air from the Sudan as ST2FT. He is active on High Frequency bands using SSB and PSK31. If you make contact QSL via CT2GBU or electronically using eQSL.
OH0XX is currently active from Contadora Island in the Archipelago Perlas as HP1XX. Bands and modes are not known but if you work him please QSL via home call.

K4UUK plans to operate from Belize May 4th to the 18th 2013 as V31RD. He will be active on 80 through 6 meters on SSB. QSL via K4UUK.

GM3YTS , GM4FDM , GM0GAV , GM3POI will be active from Tuvalu Island from March 12th to the 23rd 2013 as T2GM. They will be operational on all of the High Frequency bands with an emphasis on contacts with Europe. QSL via GM4FDM

AA4NC will be operational from Montserrat February 12th to the 20th of 2013 as VP2ME. He he also plans to be active in ARRL DX CW Contest. QSL this station electronically using Logbook of the World.

Four British hams plan to be active from Easter Island February 13th to the 21st as XR0YG. They will be operational on High Frequency bands only. An actual guide to their operating hours and QSL routes is expected to be announced shortly.

Lastly, a team of operators from Germany will be on the air from Samoa next April 4th to the 18th as 5W0M. They will be operational using various modes on 80 through 6 meter plus and 2m E-M-E. QSL the main operation to DL4SVA direct, via the bureau or OQRS. For EME QSO's send cards via DL9MS. (Above from various DX news sources)

**

THAT FINAL ITEM: HURRICANE SANDY - EVERYTHING OLD WAS NEW AGAIN

And finally this week you might want to say that everything old is new again. This after Professor Darren Hayes of Pace University's Seidenberg School of Computer Science and Information Systems reports on the aftermath of Hurricane Sandy. According to Professor Hays, it appears that older technology played a vital role to assist the public after this disaster. Amateur Radio Newsline's Bruce Tennant, K6PZW has the details:

--

In an article in the news blog The Hill, Professor Darren Hays notes that the Verizon network suffered widespread outages and with no electricity, telecommunications were problematic. The old corded telephones were plugged in by those who still had them and there were lines for payphones. For those of you to young to remember these are coin operated telephones that in many places are nothing more than a distant memory.

Professor Hays also had some nice words for the amateur radio community. He says that others resorted to using ham radio to communicate, which was found to be very effective. Hays pointed to ham radio networks like ARES and RACES which are dedicated to communications outages. Hays who holds the call KI6UEI noted that a battery-powered radio was at one point his only connection to the outside world during the storm.

Hays article notes that as the recovery in the aftermath of Hurricane Sandy continues, questions are being raised about

our nation's preparedness for emergencies. On Friday, November 9th it was reported that two Congressmen, U.S. Representatives Peter King and Steve Israel, were requesting that the military assume control of Long Island Power Authority. This in an effort to restore electricity to more than 150,000 homes and businesses which at that point still without mains power.

Back in 2006 the newspaper Newsday reported that the Long Island Power Authority was warned that its critical infrastructure could not handle a major storm. One of the issues noted was that the utility was utilizing a 25-year old mainframe computer system that could not track power outages or other critical functions like monitoring for rotting utility poles.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

You can read the entire article by Professor Hays on-line at tinyurl.com/old-worked-best (The Hill)

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's W-I-A News, that's all from the Amateur Radio Newsline[TM]. Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org.

A reminder to those of you who still receive these newscasts over our 661-296-2407 dial in telephone line rater than downloading the MP3 file from our website or from the RSS feed. We are still giving consideration to discontinuing telephone feed service as a cost cutting measure. But before we do, we want to know how many people are actually using it.

If you are one of those who call in each week on the phone and have not already done so, please send us a note telling us who you are and the reason you are using telephone access rather than simply downloading the newscast from the Internet.

Our address is the Amateur Radio Newsline, 28197 Robin Avenue, Saugus California, 91350. Or, as we said, you can

e-mail us at newsline (at) arnewsline (dot) org. We look forward to hearing from you.

For now, with Bill Pasternak, WA6ITF, at the editors' desk, I'm Don Wilbanks, AE5DW, in Southern Mississippi saying 73 and we thank you for listening.

Amateur Radio Newsline[TM] Report 1843 - December 7 2012
(audio at http://www.arnewsline.org/storage/audio/nsln1843.mp3)

Amateur Radio Newsline report number 1843 with a release
date of December 7, 2012 to follow in 5-4-3-2-1.

The following is a QST. Hams provide emergency
communications as a massive typhoon hits the Philippines;
The IARU Region 3 Monitoring System notes an increase in the
number of intrusions into the amateur radio bands; hams in
Taiwan say that they are in need of additional operating
spectrum and the FCC plans to hold several hearings on the
communications breakdowns caused by Hurricane Sandy. Find
out the details are on Amateur Radio Newsline[TM] report number
1843 coming your way right now.

**

RESCUE RADIO: HAMS PROVIDE EMERGENCY COMMUNICATIONS IN WAKE
OF TYPHOON BOPHA

When Typhoon Bopha hit the Philippines, it uprooted trees,
downed power lines, sparked landslides and made 40,000
people head for shelters. And ham radio was out in the
middle of it doing what it does best. Providing emergency
communications as we hear from Amateur Radio Newsline's Bill
Pasternak, WA6ITF:

--

When it made landfall on December 4th local time in the
Philippines, Typhoon Bopha was the strongest of about 20
typhoons to affect that country in recent times. The storm
brought with it heavy rain and winds gusting 110 to 130
miles per hour as it came ashore near the city of Mindanao.

The Philippine Amateur Radio Association had its emergency
radio operations in activated by the time the typhoon
struck. Ham radio operators immediately began assisting in
the communication needs of several cities using all
available means of communication. This included a high
frequency net on 7.095 MHz, VHF FM on 144.740 MHz, the
internet and even social media to monitor the situation and
give updates to those in need.

RADNET 5, a local amateur radio club in Tacloban was active in helping provide the city with a vital communications link. It's members were in constant coordination with the City Disaster Risk Reduction Management Council. As this report is prepared, so far it has assisted in the evacuation of 5,700 families.

RADNET 5 also was assisting the Red Cross in Tacloban and Saint Bernard. The government of Tacloban City has been using its Convention Center as one of its evacuation centers.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

According to news reports, casualties have been minimal, due to preparations, the cooperation of evacuees and the mammoth response and recovery efforts. More on this story as developments warrant. (DU1EV, PARA)

**

INTRUDER WATCH: IARU REGION 3 MONITORING SYSTEM DETECTS NEW INTERERENCE

The IARU Region 3 Monitoring System notes an increase in the number of intrusions in the higher frequency bands, particular from Over the Horizon Radar on 15 meters. In the newsletter Peter Young VK3MV reports that some of these radar emissions into northern Australia are very strong and a report has been filed with the Australian Regulator which is seeking information and their removal.

With high frequency propagation improving there are more sightings of intrusions on 10 meters from low power commercial like services. These include reports of High Frequency Man Pack operations that are being logged. Unfortunately, due to the random nature of these signals locating their source is difficult.

Also, reported is a Burmese broadcast station operating on 7 dot 110 MHz in the 40 meter band. It has been reported to the Australian telecommunications regulator in the hope of using international diplomatic channels to get it to move out of the 40 meter ham radio allocation. (IARU R-3)

**

RESTRUCTURING: TAIWAN RADIO HAMS SEEK ADDITIONAL ALLOCATIONS

Hams in Taiwan say that they are in need of additional operating spectrum and have prepared a report that explains

what, where and why. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has the details:

--

Taiwan's national society the CTARL, presented a paper regarding amateur radio in that country at the recent IARU Region 3 conference. In it the Taiwanese ham radio community says that it is seeking to expand several amateur allocations.

On 80 meters where they currently only have 3.5 to 3.5125 and 3.55 to 3.5625 MHz, they are seeking an allocation from 3.5 to 3.9 MHz. On 6 meters they have just 50 to 50.0125 and 50.11 to 50.1225 MHz. As such they are seeking the entire 50.0 to 54.0 MHz band and to add 146 to 148 MHz to their existing 144 to 146 MHz allocation.

Taiwan has very limited amateur allocations in the UHF and Microwave bands, only 430 to 432, 1260 to 1265 and 2440 to 2450 MHz. There they seek to expand these allocations to from 430 to 440 and 1240 to 1300 MHz.

Of interest, the CTARL reports that its membership is now just 362. In 2000 the IARU reported it had a membership of 1264 out of an amateur population of 24,324. This indicates that they have lost 72% of their members this century and one can speculate that perhaps the number of radio amateurs in that nation has had a similar sharp decline.

For the Amateur Radio Newsline, Im Jim Meachen, ZL2BHF, in Nelson. New Zealand.

--

By way of comparison, Taiwan's population is 23 million or about 1/14th that of the United States. The US now boasts over 700,000 FCC licensed amateur radio service licenses. (IARU-R3)

**

ENFORCEMENT: AUSTRALIA'S ACMA TO CRACK DOWN ON NON COMPLIANT RF INTERFERENCE CAUSING DEVICES

The Australian Communications and Media Authority is looking for devices that pose a high a high risk to the orderly use of the radio spectrum and to public safety.

ACMA Field Staff, particularly in Western Australia, are looking for such items as mobile phone and GPS jammers, both of which are prohibited in VK land. Also on the ACMA's list of illegal communications devices are mobile phone repeaters, and non-compliant devices such as high power

cordless phones and headsets.

A comment by a radio amateur to the ACMA claimed there was concern about non-compliant imported goods that are stamped as being compliant.
The unidentified ham wants the ACMA to clamp down on switch mode power supplies used in plasma TV sets that don't meet the standards and cause much of the interference.

As of now, the ACMA rules enforcement campaign will include education and traditional legal measures. It will also focus on improving the supply chain compliance of on-line, or over the internet purchased devices. In other words if you are a seller of such goods on any of the on-line auctions that are banned in Australia, the ACMA will be taking a long and hard look at you, no matter what nation you operate out of. (VK3PC)

**

RESCUE RADIO: MID SEVERN RAYNET ACTIVATED AFTER FLOOD WARNING

The United Kingdom's Mid Severn Valley RAYNET called out on Sunday, November 25th. This, in support of flood preparations as waters rose on a near by river.

With very short notice available members of Mid Severn group were requested by the Worcestershire County Council County Volunteers Emergency Committee to be ready for assignment due to the rising waters of the River Severn. Emergency Planning Officers were concerned at the potential for flooding of adjacent residential properties in parts of Worcester city centre.

Multi agency teams from the County Volunteers Emergency Committee were tasked with notifying homeowners of the threat as well as issuing warnings advice and leaflets. They were also to report back to Social Services on those residents who may not be able to evacuate and could require rest centre assistance.

G8WOX, G6DQM and M0VNG deployed with the team. Having on the ground liaison through RAYNET channels reportedly made of the task a lot easier, especially with some of the properties being so new and road names were not yet in place.

The RAYNET teams completed the task in the early evening and stood down. News reports say that residents were most appreciative of the efforts made to alert them. (UK RAYNET, Southhgate)

RADIO LAW: KALISPELL MONTANA CITY COUNCIL MEMBERS DIVIDED OVER CITY CELLPHONE BAN AND HAM RADIO EXEMPTION

A draft cell phone ban for drivers in Kalispell, Montana from using cellphones while in motion has drawn mixed responses from City Council members. This is because one council member seems to object to exemptions made for users of other portable and fixed vehicle electronics including ham radio gear.

The current proposal mirrors bans enacted in most other Montana cities. The draft ordinance would prohibit people from using handheld electronic communication devices such as cell phones while they are driving or riding a bike. Breaking the law would be considered as a primary offense and civil infraction punishable by fines up to $100 for a first offense and $300 for later offenses.

However some council members don't feel that the proposed ban goes far enough. Council person Kari Gabriel questioned why the ordinance does not include portable music devices such as iPods. She also expressed concern about an exemption in the ordinance for people who hold amateur radio operator licenses.

In a statement quoted by the press, Gabriel said that she does not think the overall idea is bad, but the ordinance is not written as it should be. In other words hinting that it should be far more inclusive.

Other council members raised concerns about how the ban would be enforced and how effective it would be with so many other activities contributing to distracted driving. Some of them expressed hope for a countywide or even statewide ban on all such activities. (Daily Interlake)

**

RADIO LAW: FCC PLANS HEARINGS ON EFFECTS OF HURRICANE SANDY

The FCC plans to hold several field hearings on the challenges faced by communications networks in the wake of

Hurricane Sandy.

Though the agency focused on wired and wireless phones in the announcement, the commission also included broadcasting, noting its experts will want to know how the power held up in studios and at transmitter sites.

Specifically, the agency is asking things like: When commercial power is unavailable, how long should back-up power sources be expected to last?

Beginning in the New Year, the hearings will focus on the challenges faced by communications service providers, state and local officials, emergency personnel and consumers before, during and after Sandy as well as other natural disasters. Business representatives, public safety officials, engineering and academic experts, consumers and other stakeholders will take part.

New York Senator Chuck Schumer had called for the commission to develop a roadmap to better protect critical communications functions during major disasters. (RW)

**

ON THE SCREEN: HAMS PROVIDE REALISTIC WAR DEPARTMENT SET FOR FILM LINCOLN

Members of the Morse Telegraph Club are reported to have played an important role in the production of the Steven Speilberg motion picture "Lincoln."

Jim Wades, WB8SIW, is the International President of the Morse Telegraph Club. He says that several members provided period telegraph instruments for use in the construction of the War Department Set.

Jim Wades was employed as a Technical Advisor for the production, worked with set designers over a period of months to develop the War Department telegraph scenes. Wades coordinated the process of procuring the necessary instruments and served as a historical consultant as the telegraph scenes were developed. Most notably W1TP, WB0TUA, N7JKD and Roger Reinke provided telegraph instruments to equip the sixteen operating positions portrayed at the War Department set.

Nine of the sixteen telegraph positions depicted in the War Department were fully operational. These instruments could be operated in any combination through the use of a specialized computer program and terminal units custom built by WB8SIW for the process. When necessary, a hand key could be inserted in the individual telegraph loops so messages

could be improvised

Jim Wilson, K4BAV, and his son, Matt Wilson had minor roles as Extras. K4BAV also worked with production staff and the actors to explain telegraph technology and the role of the telegrapher.

The Morse Telegraph Club is an association of retired railroad and commercial telegraphers, historians, radio amateurs and others with an interest in the history and traditions of telegraphy and the telegraph industry. (ARRL, RAC, WIA)

**

HAM RADIO ON STAGE: TITANIC RADIO SIGNAL MAN INSPIRES NEW STAGE SHOW

The Western Mail newspaper reports that the man who picked up the distress signal from the Titanic over his amateur radio from his shed in Pontllanfraith has inspired a new stage drama.

Called Whispers On The Waves, the play was motivated by the real life story of Welsh wireless operator Artie Moore. Moore is reported to have heard a distress signal from Titanic before news of the disaster arrived in the UK.

The cast of the show features children from Meadowbank School in Cardiff. More is on-line at tinyurl.com/titanic-stage-show. (Western Mail)

**

THE SOCIAL SCENE: 2013 SOUTHEASTERN VHF SOCIETY CONFERENCE

The 2013 Southeastern VHF Society Conference, sponsored by the Florida Weak Signal Society, will be held next April 19th and 20th. This at the Hilton Cocoa Beach Oceanfront in Cocoa Beach, Florida.

Planned so far are a full slate of events including, a surplus tour, antenna range and noise figure testing, a Friday luncheon and Friday night flea market. The Saturday night banquet will have awards for the best paper and the best presentation.

For more information plase check on-line at www.svhfs.org or contact Chuck Hoover, K0VXM, by e-mail to k0vxmfl (at) gmail (dot) com. (K0VXM)

**

THE SOCIAL SCENE: PROTECTED BEETLE SPECIES CAUSES CANCELLATION OF 2013 PALM SPRINGS HAMFEST

The Palm Springs Hamfest slated for Saturday, January 26th 2013 has been cancelled due to an endangered species of bug that lives in and around the shows venue. This after the city of Riverside County, California, acts to protect the Dinocoma Brunnescens beetle habitat.

Nope we are not kidding. According the Desert RATS Amateur Radio Club that sponsors the event part of the area in which previous Palm Springs Hamfest had been held has been deemed a protective habitat for this creature of nature. As such, it is therefore no longer available as an event site. And to make matters worse, the radio club was not notified of the situation in time to locate another venue for the 2013 event.

Current plans are to hold the next Palm Springs Hamfest the third weekend in March of 2014 at a venue that is ham radio friendly rather than beetle protected. In the meantime the Desert Rats says that it regrets any inconvenience to those who already made travel and accommodation plans.

For further information you may contact Desert RATS Past President, Peter Reinzuch, VE7REZ by e-mail to ve7rez (at) gmail (dot) com.
(Desert RATS ARC)

**

SUPERSTITION HAMFEST DELAYED. TO BE RESCHEDULED FOR EARLY 2013.

The Superstition Arizona Hamfest, that was originally slated for Saturday, December 1st has been pushed back at least 60 days. This due to what's being termed as a last minute paperwork timing issue.

According to Larry Kuck, WB7C, the problem arose on the Monday before the hamfest and sponsors were not able to resolve it in time to keep the scheduled date. Kuck advises that those who have purchased Main Prize drawing tickets are advised to hold on to them as they will be good toward the same drawing when the hamfest is held sometime in early 2013.

For further updates on the delay and to what for the new date please take your web browser to tinyurl.com/superstition-delayed. (WB7C, QRZ.com)

**

NAMES IN THE NEWS: RADIO WORLD EXCELLENCE IN ENGINEERING AWARD WINNER ANNOUNCED

Turning to names in the news, word that Paul Brenner will receive the 2012 Radio World Excellence in Engineering Award

from the editors of Radio World. Brenner is senior vice president and chief technology officer for Emmis Communications. He also is originator of the HD Radio data distribution consortium business model and serves as president of the Broadcaster Traffic Consortium, LLC (BTC).

Radio World is a newspaper for broadcast radio managers and engineers. Recipients of the Radio World Excellence in Engineering Award are said to represent the highest ideals of the U.S. radio broadcast engineering profession and reflect those ideals through contributions to the industry. The announcement of Brenner's selection was made by U.S. Editor in Chief Paul J. McLane (RW)

**

NAMES IN THE NEWS: ARRL CEO INTERVIEWED BY URGENT COMMUNICATIONS MAGAZINE

ARRL Chief Executive Officer Dave Sumner, K1ZZ, has attributed the increased popularity in ham radio in part to the do-it-yourself movement that is sweeping the country and the world.

Author Glenn Bischoff of Urgent Communications magazine took the opportunity to interview K1ZZ while he was visiting New York. Sumner is quoted as saying that the perception is that we're stuck in the Sixties. But the number of licenses continues to grow. In fact, this is the sixth straight year of growth.

K1ZZ attributed at least part of the increased popularity in part to the do-it-yourself movement. He noted that so-called D-I-Y clubs are popping up from coast to coast.

You can read the entire article on-line at urgentcomm.com/blog/singing-praises-unsung-heroes (Southgate)

HAM HAPPENINGS: 2013 INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND

While its still months away, plans are already going forward for the 3013 International Lighthouse and Lightship weekend as we hear from Jim Linton, VK3PC:

--

The 100th registration for this event is in. It comes from the Deutscher Amateur Radio Club, Emden clubstation DL0EM at the Campen Lighthouse, on the North Coast of Germany.

Active since 1891 with Germany's most powerful lighthouse lamp, in the mouth of the Ems River, and with its lattice tower construction it stands 65 metres or 213 feet tall.

Listen for clubstation DL0EM with a team of operators on the HF bands.

The International Lighthouse and Lightship Weekend is an annual fun and friendly event sponsored by the Ayr Radio Group on the third full weekend of August.

The basic objective is to promote public awareness of the historic structures and their need for preservation, promotion of amateur radio and to foster international goodwill.

For the Amateur Radio Newsline this is Jim Linton VK3PC.

--

If you would like to know more or register online for the next event on August the 17th and 18th visit the website illw dot net

(VK3PC)

**

HAM HAPPENINGS: YOUNGSTERS ON THE AIR THE SUMMER 2013

IARU Region 1 Youth Coordinator Lisa Leenders, PA2LS sends us word on plans for next years European Youth Radio Camp or YOTA. Amateur Radio Newsline's Heather Embee, KB3TZD, has more:

--

During the summer of 2013, a youth radio camp called Youngsters on the Air will be held in Estonia. The event is being organized by the Estonian Radio Amateurs Union. During this week teams of young radio amateurs from 10 different European countries will be participating in different ham radio related activities. These include presentations,

competitions, visiting radio stations and much more.

A team consists of a team leader, who could be an older person, and 4 team members ranging in the age from 14 to 25. There will be 10 teams in total representing different European member associations of IARU Region 1.

This outstanding ham radio youth event will take place near the city of Tartu. If you are in Europe and if your organization is interested in taking part, please respond not later than December 20th by means of the downloadable form that you will find on-line at tinyurl.com/European-youth-radio.

For the Amateur Radio Newsline, I'm Heatrer Embee, KB3TZD, reporting from Berwick, Pennsylvania.

--

The date for this European ham radio youth outing are August 5th to the 12th of 2013. And as previous events in Romania and a combined outing in the Netherlands and Belgium have shown, this will be an amazing experience for the young hams which they will not soon forget. (IARU Region 1)

**

RADIO PHENOMA: IRELAND IS CAMPBELL ISLAND'S ANTIPODE

The much-anticipated DXpedition to Campbell Island, a sub-Antarctic island south of New Zealand, is now underway. And now comes word that Campbell Island's antipode which is described as the point on the Earth's surface diametrically opposite to its location is not far off the south-west coast of Ireland.

Nigel Cawthore, is G3TXF, in Surry, England. He has pointed out that this should provide considerable propagation enhancement across the spectrum for Ireland stations near the antipode. This due to the phenomenon of antipodean focusing which at least in theory can boost signal levels between stations located near their respective sides of the path.

Or to put it another way, those with hams living in Cork and Kerry may be very popular over the next few weeks. (IRTS)

**

DX

In DX, H44RK will be active as 5W0RK from Samoa between December 8th and March 3rd from Samoa. Operations will be on 20 through 10 meters using SSB and the Digital modes.

QSL via NR6M.

W8YCM will be on the air stroke 6Y5 from Jamaica until the new year. Hes been heard on 17 through 10 meters using SSB. QSL via his home callsign.

ZS6RI will be active from Lesotho for 20 weeks beginning December 17th using the call 7P8RI from Lesotho. Operations will be on all HF bands using CW, SSB and the Digital modes. QSL via details are at QRZ.com.

TA3J will be active stroke Oh N from various locations in Belgium between December 7th and the 11th. Operations will be on 160 through 2 meters using SSB and FM. QSL to his home callsigneau

And word that JH1NBN will be active from both Pohnpei Island and Yap Island in the not to distant future. He will use the call V63AQ and will be operational on the High Frequency bands using SSB. Moire details to follow. QSL via home call.

N2GG will be on the air as C6AGG from Grand Bahama Island through December 13th. Activity is holiday style on 80 through 10 meters using mostly SSB with some CW. QSL via N2GG.

The Italian Dxpedition Team has announced that its next operation will be from Burkina Faso between February and March 2013. This will be a 15 day affair on all bands and using all modes. The pilot station for HF operation is IK7JWY, and the pilot for 6 meter band is IK0FTA with real time logging on line by IH9GPI. More o this upcoming operation is on-line at i2ysb.com/idt

Lastly, K7ZO will be active from Nicaragua as YN5ZO through December 10th. Operations will be on 40 through 10 meters, including 30, 17 and 12 meters using SSB and RTTY. QSL via K7ZO direct or using Logbook of the World.

(Above from various DX news sources)

**

THAT FINAL ITEM: CELEBRATING THE MAYAN END OF THE WORLD

Finally this week, according to one of the three Mayan Calendars, the end of the world will occur on December 21, 2012. And to celebrate this possibly once in a lifetime event, special event station N-Zero-D which stands for Now Zero Days will be activated on 80 through 10 meters and on several satellite passes for three days during and after the planets destruction. Amateur Radio Newsline's Norm Seeley, KI7UP, takes a look at the operation and what the Mayans say

is to come:

--

According to the event planners down in Texas, December 20th will be the celebration of the end of the world. December 21, the day of destruction, they will be on the air as long as possible. As to December 22nd, well that is a little iffy right now.

And less we forget to mention it, you too can become an Official Doomsday Station by registering at www.nowzerodays.com . Those who do will receive a registration number and the authority to identify yourself as "Official Doomsday Station" followed by your Official Doomsday Number.

Official Doomsday stations will receive the Doomsday Station Certificate. Stations contacting at least 10 Official Doomsday Stations during the event will be recognized on the group's website. If there still is one.

QSL's with Self Addressed Stamped Envelope to KK5W at the address on QRZ.com. If Doomsday actually does happen, the event sponsors regret that a QSL will not be possible so hold on to your QSL card and SASE at least until December 22nd.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, waiting it out here in Scottsdale, Arizona.

--

And if we might add a suggestion of our own: If that particular Mayan calendar is correct and December 21st is to be the end of the world, we are told that the best way to enjoy it is to watch it all implode from your picture window table at Milliways. That's the famed restaurant at the end of the universe. You can find complete directions on how to get there in your copy of the Hitchhikers Guide to the Galaxy authored by the late Douglas Adams. And most important of all, don't forget to bring along your Babblefish and at least one clean towel. (N0D)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's W-I-A News, that's all from the Amateur Radio Newsline[TM]. Amplifiers are only used when all other attempts at using a more efficient antenna set up has failed.
It does not increase range - as per receive, only transmit, and even then - only when the other persons antenna is efficient enough to be able to hear you.

Range is dependant upon location and upon time of day and upon the atmospheric and solar conditions...

On 11 meters - when the band is open and you have a efficient antenna system - 3 watts could talk half way around the world and when the band is closed 1000 watts might barely talk across the street.

Just the fact of the sheer number of units still in operation today attests to the fact that you can hear someone babbling most any time day or night on the CB radio.

The intelligence level is so low - it's almost necessary to have an amplifier according to how those people acts and the urban mydth that you have to have more power.

The question is - who are you going to talk to?

I live 14 miles from I 80 and I monitored the CB radio for years and almost never heard anyone mobile driving along the interstate...
Too many mountains and valleys for it to work.

At the same time, I have talked to people with legal 3 watt AM base stations 40 miles away - due to the fact that they had a efficient antenna system.

The same is true for 10 meters.
I am a amateur radio licensed operator and I have a 100 watt transceiver - Kenwood TS 590S and a Solorcon A99 and I only ever talked to someone locally one time in two years.
That person was located near Youngstown OH and his array of towers is clearly visable from I 80 - multiple beam antenna's.

It isn't that he was using an amplifier, it was that his antenna system exhibited forward gain in one direction and rejection in another...

Doing all that work to put an amplifier in a big rig is ludrichrist since you can do the same thing with a cheap $40.00 a month cell phone.

Talk to other people...

Amateur radio is actually the place to be if you want to talk....
Even with that - there is hardly anyone to talk to on 10 meters except
when there is a contest.

Amateur Radio Newsline[TM] Report 1844 - December 14 2012
[audio at: http://www.arnewsline.org/storage/audio/nsln1844.mp3]

Amateur Radio Newsline report number 1844 with a release date of December 14, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. A high altitude balloon carrying an amateur radio APRS transponder flies from California to Morocco; D-Star tests coming to the High Frequency bands; two nations on opposite sides of the world gain access to 472 to 479 Kilohertz and more on the Department of Homeland Security sponsored emergency communications traing at the 2013 Dayton Hamvention. Find out the details are on Amateur Radio Newsline[TM] report number 1844 coming your way right now.

(Billboard Cart Here)

**

EMERGING TECHNOLOGY APRS BALLOON LAUNCHED IN CALIFORNIA LANDS IN MOROCCO

A group of high altitude balloon experimenters have achieved a milestone. This with confirmation that their K6RPT-12 APRS equipped high altitude balloon has successfully crossed the Atlantic and landed in Morocco. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

Amateur radio stations from the United Kingdom to the Azores had been listening for the transatlantic balloon signing K6RPT-12 on 144.390 MHz FM. This after it was lofted skyward from California at about 0126 UTC on Monday, December 3rd.

The balloon was launched by the California Near Space Project team with the intent of it crossing the Atlantic heading for the British Isles. When it left the USA it was traveling at over 185 an hour but was believed to have slowed down in its over-water trek to as little as 55 miles an hour. Knowing this, the payload was designed for over 60 hours of flight. It also included a heating system for its 144.390 MHz FM transmitter developed by Johnathan Corgan, AE6HO, to prevent it freezing during overnight flight. This was because the bitterly cold night temperatures at that

altitude have caused the transmitters on several amateur radio balloons to fail.

After its journey across the Atlantic its APRS signals were first picked up by stations in Spain. It was last heard at 09:22:31 UTC on December 5th descending rapidly, indicating that the balloon had finally burst. Its last recorded position was 34°25.75' North and 3°58.96' West placing it in the Taza Provence of Morocco North-North East of Tazekka National Park.

It is believed there are less than 150 radio amateurs in Morocco and no known APRS stations. As such the balloon and its payload may never be recovered.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

It should be noted that the amateur radio APRS frequency is not standardized world-wide. The United States uses 144.390 MHz while the British Isles and Europe use 144.800 MHz. To see the See the K6RPT-12 APRS reported flight track please take your web browser to tinyurl.com/k6rpt-12 on the World-Wide-Web. (California Near Space Project, Southgate, others)

**

EMERGING TECHNOLOGY: HF D-STAR TESTS TO BE HELD SATURDAY AND SUNDAY UTC

D-Star is coming to a high frequency band near you. According to a post on the Illinois D-Star Reflector, by Kent Hufford, KQ4KK, D-Star High Frequency tests will be held Saturday at midnight UTC and Sunday at 1500 hours UTC. D-Star operation will last only 5 minutes on each band beginning on 6 meters and working down to 10, 12, 15, 17, 20, 40 and finally 75 meters. The test will be compatible with Icom 9100 series transceivers and other D-Star equipped High Frequency transceivers. The posting did not mention specific frequencies to be used but asked those interested to monitor D-Star reflector 030C to coordinate. (KQ4KK, D-Star Reflector)

**

RESTRUCTURING: NEW ZEALAND HAMS GET 472 to 479 KHZ LOW FREQUENCY BAND

Hams in New Zealand are getting access to the 472 kHz to 479 kHz band. Amateur Radio Newsline's Jim Neachen, ZL2BHF, has

more:

--

At the World Radiocommunication Conference held earlier this year the band from 472 kHz to 479 kHz was allocated to the Amateur service for use world wide on a secondary basis. Some nations almost immediately opened it to use by their ham radio communities and now it becomes our turn here, down under.

Its now has been agreed that New Zealand amateurs will be given access to this band following agreements made with the Radio Spectrum Policy and Planning Group of the Ministry of Business, Innovation & Employment. And the rules they came up with are quite simple.

Like the rest of the world, the frequency range will be 472 kHz to 479 kHz on a secondary, non interfering basis with other spectrum users. Power output will be 25 watts effective radiated with no bandwidth restrictions.

As a result of this new allocation, New Zealand hams will loose access to the previous temporary low frequency allocation from 505 to 515 kHz. However the Ministry has agreed that the temporary use of the band by the nation's ham radio community will be permitted for another 12 months until the end of 2013. This is to provide amateurs with the opportunity to retune or rebuild their equipment to use the new band.

All in all not a bad way to end 2012 and begin the new year.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

The rules creating the 472 kHz to 479 kHz low frequency band in New Zealand come are effective on December 20th. (NZART)

**

RESTRUCTURING: NEW SPECTRUM FOR UK HAMS AT 474 KHZ AND 5 MHZ

Meantime over in the United Kingdom, holders of a UK Full class license will soon be able to apply for a Notice of Variation to their ham tickets This to use 472 to 479 KHz as well as three additional 5 MHz channels that will permit up to 6 kHz bandwidth emissions.

The new 472 to 479 KHz band is being created as a result of the World Radiocommunications conference held earlier this

year. The added spectrum in the 5 Experimental Band is the outcome of negotiations between the spectrums primary user and telecommunications regulator Ofcom. The primary user was unable to agree to contiguous spectrum, however it has been agreed that three additional non-contiguous frequencies will be available.

Notices of Variation will be accepted after January 1st of 2013. Details on the application process will be published shortly. (GB2RS)

**

RADIO POLITICS: IARU ACCEPTS TWO NEW MEMBERS

The Federation of Radio Sport of Azerbaijan and the St Vincent and the Grenadines Amateur Radio Club are the two newest members of the International Amateur Radio Union.

The Radio Sport of Azerbaijan has some 50 members while the Grenadines Amateur Radio Club hosts 21. Both nations have relatively small ham radio populations with the former representing all 50 of its ham radio population and the latter representing 21 of that nation's 134.

As of February, 2009, the International Amateur Radio Union was composed of 162 national member societies. The addition of The Radio Sport of Azerbaijan and the Grenadines Amateur Radio Club now brings that total to 164. (IARU, Southgate, others)

**

RADIO LAW: CONFRONTATIONAL WORLD CONFERENCE ON INTERNATIONAL TELECOMMUNICATIONS BEING HELD DUBAI

A confrontational United Nations internet regulation treaty being discussed at a gathering in Dubai may impact on amateur radio operators. This, according to the telecommunications information website dot-nxt. Amateur Radio Newslines Bill Pasternak, WA6ITF, explains:

--

At the heart of the issue is the term operating agencies. Currently the international telecommunication regulations or I-T-R's apply only to recognized operating agencies. This really means the large telecommunications operators in each country such as ATT and Verizon here in the United States.

Some countries want that term changed to just the term agencies. This would mean the I-T-R's would become applicable to a vastly larger number of groups. So rather than just ATT, British Telecom or Italia Telecom and the

like, the international treaty would then apply to entities such as Google, Facebook, Microsoft and eBay just to name a few. In reality, just about every Internet company, as well private network operators, leased-line operators, government agencies and even amateur radio operators would be included in this new definition.

But this idea is not sitting well with many developed nations. Opposed so far are the United States, Canada, Japan, Korea, Mexico, Poland and the pan-European C-E-P-T and the Inter American Telecommunications Commission which is better known by the acronym Citel. On the other side in favor of the change are the Arab States, African States, Brazil, India, Philippines and several others.

In the meantime hthe entire conference risks grinding to a halt until this issue can be decided.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

You can find out more about the situation on-line at tinyurl.com/wcit-meeting-2012 (Dot-Nxt, NewsGateInternational)

ENFORCEMENT: KANSAS HAM ISSUED $10000 NAL FOR ALLEGED OPERATION OF FM BROSDCAST STATION

A ham in Kansas has been issued a $10,000 Notice of Apparent Liability to Monetary Forfeiture for allegedly operating an unlicensed FM broadcast station. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The proposed $10,000 fine was issued on December 5th to Glen Rubash, licensee of Amateur Radio Station KC0GPV. This for what the FCC terms as his apparently willful and repeated violating of Section 301 of the Communications Act. This by operating an unlicensed radio transmitter on the frequency 88.3 MHz in Manhattan, Kansas.

By way of background, this past September 26th agents from the Enforcement Bureau's Kansas City Office T-hunted the source of an 88.3 MHz signal to a transmitting antenna mounted on a pole next to a residence in Manhattan, Kansas. The agents determined that the signals from the antenna exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license. The Commission's records showed that no authorization was issued to anyone for operation of an FM broadcast station at or near this address.

On September 27th the agents from the Kansas City Office again used direction-finding techniques to confirm if the station was still operating on 88.3 MHz from the same location, and found that it was. The agents, accompanied by the property owner, inspected the unlicensed station's antenna and transmitter. The latter was located in a locked detached garage. The property owner stated that he allowed Rubash to use the garage to operate the station and that he thought the operation was legal because Rubash told him that he was a licensed radio operator.

Later that same day a person it identified as Glen Rubash spoke to an agent from the Kansas City Office via telephone. At that time the regulatory agency claims that Rubash confirmed that he was an Extra class amateur licensee assigned call sign KC0GPV. He also admitted that he purchased the radio transmitter and that the station had been on the air for two months. The person on the phone reportedly added that he would not voluntarily relinquish the transmitter if asked to do so.

Now the FCC has acted in the case by proposing the $10,000 fine. It concludes, based on the evidence before it, that Mr. Rubash apparently willfully and repeatedly violated Section 301 of the Act by operating radio transmission equipment without the required Commission authorization and as such is liable for the proposed $10,000 fine.

For the Amateur Radio Newsline, Im, Norm Seeley, KI7UP, in Scottsdale, Arizona

--

As is customary, Rubash was given the customary 30 days to pay the proposed fine or to file an appeal. (FCC)

**

RESCUE RADIO: UPDATED INFORMATION ON DHS EMERGENCY RESPONSE CLASS AH HAMVENTION 2013

The Department of Homeland Security's Office of Emergency Communications has announced that on January 14, 2013, it

will begin accepting registration requests for the training class that it will be sponsoring next May at the 2013 Dayton Hamvention.

Students requesting to attend must meet all pre-requisites and provide electronic scanned images of certain documents at the time of registration. These include proof of completion of FEMA emergency incident instructional sessions IS-100.b, IS-200.b, IS-700.a and IS-800.b. They must also provide a copy of their General Class or above FCC amateur radio license. The DHS says that it is important that all listed documents be submitted at one time along with the registration request in order to be considered.

The session is limited to 50 students and the registration process will be closed when that number of qualified students is reached. But even if you are not among the 50 selected to attend the session there will be other training available. Word is that the instructors conducting the course will also be giving a forum at Hamventionr 2013 regarding the use of trained amateur radio operators as backup communicators in an emergency operations environment.

More information including the actual class and the e-mail address for pre-registration will soon be posted on-line at www.Hamvention.org. (Press release)

RESCUE RADIO: AUSTRALIA ACMA FINDS STOLEN EMERGENCY BEACON

Australian Search and Rescue was recently alerted that an activated emergency position-indicating radio beacon, or EPIRB had been stolen from the city of South Melbourne. After narrowing down its initial search, Search and Rescue called in the expertise of a field inspector from the Australian Communications Authority or ACMA. Using a Yagi directional antenna, he eventually found the errant device hanging from overhead power lines. It was safely retrieved for evidence by members of the Victoria Police. For those not aware, EPIRB's are automatic or manually activated search and rescue beacons linked to satellites when turned on. (VK3PC)

**

HAM HOLIDAY HAPPENINGS: GETTING INTO THE CHRISTMAS SPIRIT BY HAM RADIO

The Moose Jaw Canada Times Herald reports that kids in that city had a chance to tell their holiday gift requests to Santa up at the North Pole using amateur radio. Brenda MacKenzie, VE5TRG, and other members of the Moose Jaw

Amateur Radio Club operated the ham radio links. You can read the complete story on-line at tinyurl.com/moose-jaw-holiday.
(Via e-mail)

**

HAM HAPPENINGS: NAMES IN THE NEWS OKLAHOMA STUDENTS HOLD RADIO TRIBUTE ON PEARL HARBOR DAY

Okalahoma's Lawton Constitution newspaper reports that students at the Eisenhower Middle School's amateur radio club recently commemorated the 71st anniversary of Pearl Harbor Day. The club held the tribute to honor all veterans, but especially the 2,402 Americans killed in the December 7, 1941 Japanese sneak attack on the United States base in Hawaii.

Clifton Harper, KE5YZB, is the teacher who sponsors the amateur radio club. He told the newspaper that students started contacting other amateur radio operators around the world at 8:30 a.m. and continued until 3:30 p.m. both local time. Three separate stations were in use including one in a trailer from the Lawton Amateur Radio Club operating as W5KS.

According to the newspaper, about 140 students took part in the event throughout the school day. More is on-line at tinyurl.com/lawton-pearl-harbor. (Lawton Constitution)

**

HAM HAPPENINGS: WYONG MINI CONTEST UNIVERSITY OPEN FOR REGISTRATIONS

Registration to attend the free Mini Contest University at Australia's Wyong field day in February 2013 is now open. For details please visit tinyurl.com/contest-u-down-under on the World Wide Web. (VK2JI)

**

NAMES IN THE NEWS: HANDIHAM MANAGER'S TECHNOLOGY AWARD TO KK4JZX.

Some names in the news. Jose Tamayo, KK4JZX, has been named to receive the 2012 Handiham Manager's Technology Award. This for his dedication to the Handiham Remote Base software update project.

According to the Handihams, Tamayo has done exemplary work to debug and update the existing W4MQ remote base client software. He has lead the beta testing team and is working to build accessibility into the newest version of this

important remote control client. (WA0TDA)

**

NAMES IN THE NEWS: BRITISH SINGER SARAH BRIGHTMAN TO BLAST OFF TO SPACE IN 2015

The Space Adventures Agency has confirmed that famed British soprano Sarah Brightman has signed an agreement with the Russian Space Agency and secured herself a space trip to the International Space Station for sometime in in 2015.

As previously reported here on Amateur Radio Newsline, about two months ago the singer was cleared to fly by the medical commission and set her schedule to begin gan her training at Russia's Cosmonaut Training Centre outside Moscow. More recently Brightman told a Russian newspaper she will also have to learn speak some Russian before her space trip to be able to communicate with the crew.

Brightman's eventual arrival on-orbit will denote a long period between visitors to the orbiting outpost. The last visitor was Cirque du Soleil founder Guy Laliberte who traveled into space in 2009. (G0SFJ, others)

CHANGING OF THE GUARD: CQ NEW PRODUCTS EDITOR JOHN WOOD, SR., WV5J - SK

The changing of the guard in amateur radio continues with the sad news that John Wood, Sr., WV5J, who served as CQ's New Products Editor since 2009, passed away on December 3 after a brief battle with cancer.

A lifelong journalist, Wood spent most of his career as a reporter and editor for newspapers in and around Memphis, Tennessee. He lived in the Memphis suburb of Germantown.

A contributor to CQ for several years on a variety of topics, John became editor of the "What's New" column as of the magazine's December, 2009, issue. He continued writing occasional feature articles as well. His most recent,

"There's a 'Secret Service' in Memphis on the 222 Ham Band," appeared in the Fall 2012 issue of CQ VHF.

Wood is survived by his wife of 41 years, Marie, WA4WFX; his son, John, Jr., KI4VCK; his daughter, Christi, and two grandchildren. The family requests that contributions in John's memory be made to the St. Jude Children's Research Hospital. At the time of his passing John Wood, Sr., WV5J, was only age 61. (CQ)

**

CHANGING OF THE GUARD: HELICOPTER NEWS PIONEER JOHN SILVA - SK

The man who invented helicopter coverage for television, has died. John D. Silva was the chief engineer for Los Angeles television station KTLA when he convinced station executives to give him $40,000 to outfit a rented Bell helicopter with a TV camera for news coverage.

Silva then worked in secrecy with Hollywood special effects shops and engineers from the General Electric Corporation to find or invent technology small and light enough to fit on a helicopter. He and his small team broadcast their first air to ground signal on July 28, 1958 to Los Angeles viewers who would eventually come to equate a helicopter news coverage with a high-speed police pursuits and the like.

In an interview with Smithsonian Air & Space Magazine, Silva said he came up with the idea while on the freeway. He explained that he was driving on the Hollywood Freeway one morning and when the idea came to him.

Silva told Air & Space that he never thought about being a pioneer. Rather all that he ever wanted to do was get KTLA News there and get the picture before the competition got it.

The Los Angeles Times reported Silva died in Camarillo, California, of Pneumonia complications. He was age 92. (RW)

**

WORLDBEAT: HISTORIC BLETCHLEY PARK GB2BP QRT

A historic amateur radio station is going QRT for good. Over the weekend of December 15th and 16th, station GB2BP will be making its final transmissions from the famed Bletchley Park estate in the United Kingdom.

Bletchley Park has been the home of GB2BP as well as serving as the location of its sponsor the Milton Keynes Amateur Radio Society for the past 18 years. But both are being

forced to vacate the estate due to a change in its status to a museum. This will mean that it will have scheduled opening and closing times after which there will be no public access.

For those who are not aware of Bletchley Park's significance, during World War 2 it was the site of the United Kingdom's main message intercept center where ciphers and codes of several Axis countries were decrypted. The most important of these were the ciphers generated by the German Enigma and Lorenz machines. The work done there is generally credited as one of the main reasons that the Allies won the war.
While GB2BP may no longer be in full time residence on the Bletchley Park Estate it will re-appear occasionally as a special event station supporting public events at the new museum. (Southgate)

**

HAM RADIO IN SPACE: RUSSIAN HAM TO SPEND A YEAR IN SPACE:

Russian Cosmonaut Mikhail Kornienko, RN3BF, along with NASA Astronaut Scott Kelly have been chosen for a one-year long term assignment aboard the International Space Station. According to NASA, the mission will which will begin in 2015 will include collecting scientific data that will be important to the future of human exploration of our solar system. Also it should help researchers to understand better how the human body reacts and adapts to the harsh environment of space as NASA plans for missions around the Moon, to an asteroid and ultimately to Mars. (ARRL)

**

RADIO IN SPACE: VOYAGER 1 REACHING INTERSTELLAR SPACE

Researchers say that NASA's long-lived Voyager 1 which is heading out of the solar system, has reached what they call the magnetic highway leading to interstellar space

Voyager 1 will be the first manmade object to leave the solar system. Scientists believe the probe is currently in an area of deep space where the magnetic field lines from the sun are intersecting with magnetic fields from interstellar space. They believe that this phenomenon is causing highly energetic particles from distant supernova explosions and other cosmic events to zoom inside the solar system, while less-energetic solar particles exit.

The Voyager 1 probe was launched 35 years ago to study the outer planets. It is currently some 11 billion miles from Earth. At that distance, it takes radio signals traveling

at the speed of light 17 hours to reach Earth.

Voyager 2 which is traveling on a different path out of the solar system has experienced similar, though more gradual changes in its environment than Voyager 1. Scientists do not believe Voyager 2, which is about 9 billion miles from Earth, has yet reached the magnetic highway to interstellar space. (Space Update)

**

ON THE AIR: N4D CELEBRATES ARRL PUERTO RICO STATE CONVENTION

On the air, the ARRL Puerto Rico State Convention operate special event station N4D from January 11th to the 25, 2013 to commemorate the first ever ARRL Convention to be held there. Frequency to listenout on are 14.250, 21.350 and 28.450 MHz on the High Frequency babds as wll as locally on 147.550 MHz FM on 2 meters. More information on the convention and specialo event station N4D is on-line at www.arrlpr.org or by e-mail to wavilesjr (at) yahoo (dot) com. (ARRL Puerto Rico State Convention)

**

DX

In DX, DD0VR and DE3BWR will be active from Vietnam through January 4th as XV0VR. During their stay they also plan to operate from Cat Ba Island December 18th to the 20th and Phu Quoc Island from December 30th through January 2nd. QSL these operations via DD0VR.

JA7LU will be active from Phu Quoc Island, Vietnam January 12th to the 16 as XV4LU. He will be operational on 40 through 10 meters on SSB and RTTY. QSL direct only via home call,

KE4TG will be active as J38RF from Grenada between February 6th and March 8th. His primary interest is the Digital modes but he may operate some CW and SSB. QSL via his home callsign direct as listed at QRZ.com. His logs will be uploaded to Logbook of the World.

Lastly, several sources are reporting that a team of 10 operators will be active from Robinson Crusoe Island during mid-2013. It was also mentioned that this is the same group who activated D64K earlier this year. Look for more details to be forthcoming.

Above from various DX news sources,

SPACE AND THINGS: A STRANGE USE FOR A CUBESAT
And finally this week, while hams and researchers look at the now venerable cubesats as communications and scientific research space platforms, a company in Scotland has come up with its own idea. How about space burials? No, we are not kidding as we hear from Amateur Radio Newsline's Cheryl Lasek, K9BIK.

--

A Glasgow based company called Alba Space is planning to use cubesats for just that. Burials of human remains in space.

According to the FAQ on the Alba Space website, the company will take a portion of ones cremated ash and integrate it into its spacecraft called the AlbaCube. It will then launch it skyward using a commercial service provider who takes it from Earth into space.

Why choose Space Burial over other forms of end off life celebration? Alba Space says that space is a place were only very few and very fortunate people have had the chance to venture. The company says that it wants to help make space become a place that is accessible to the public and enable those who have an interest in it to fulfill their life's ambition to do so. It notes that after passing on that 75% of people in the United Kingdom get cremated and you have to do something with the ashes, so why not a ride into space.

Will this be a burial option only for the rich and famous? Not according to Alba Space. It says that while it has not yet launched its pricing options it is aiming for it to be competitively priced with other funeral options. This so the average consumer can afford to take part.

And if you will excuse a pun or two, this could be another fascinating use for the final frontier or the most extreme of extreme DX.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Alba Space says that it's still not sure when its space burial service might begin. It says that it's currently at its market research phase and are trying to gauge the demand for different services such as sub-orbital, low earth orbit and beyond. More about Alba Space's plans is on line at www.albaorbital.com. (Southgate)

Amateur Radio Newsline[TM] Report 1845 - December 21 2012
(audio at: http://www.arnewsline.org/storage/audio/nsln1845.mp3)

Amateur Radio Newsline report number 1845 with a release
date of December 21, 2012 to follow in 5-4-3-2-1.

The following is a QST. New Zealand approves a Digital
amateur radio repeater to test compatibility with other
radio services; the United States says no to a new I-T-U
treaty to govern the Internet; the Dutch military wont give
up 915 MHz for unlicensed short range devices; and a new eye
on the sky down-under will warn of solar eruptions. Find
out the details are on Amateur Radio Newsline[TM] report number
1845 coming your way right now.

RADIO COMPATIBILITY: NEW ZEALAND ATV REPEATER TO TEST
COMPATABILITY WITH COMMERCIAL BROADCASTING

In what may be a first anywhere world-wide, a New Zealand
amateur radio service digital ATV repeater has been given a
chance to test its compatibility with commercial
broadcasters. Amateur Radio Newsline's Jim Meachen, ZL2BHF,
reports from down-under:

--

New Zealand Radio Spectrum Management or RSM has granted the
first Digital Amateur TV License to NZART Branch 74, the
Wellington VHF Group, for use at its main station located on
Mount Belmont, in Wellington.

The main features of License 236831 are: Digital TV Channel
25 (DTV25);
502 MHz to 510 MHz; DVB-T format; 7.7 MHz emission
bandwidth; 100 Watts mean effective isotropic radiated power
and horizontal polarization

The license is valid for an initial period of 6 months, from
1st January 2013 to 30th June 2013.

The license permits DATV transmissions for the purpose of
testing compatibility with services on the adjacent
frequencies and requires the production of a comprehensive
report to RSM.

The DTV25 channel is, in effect, the guard band between Communications services below 502 MHz and Digital TV Broadcasts above 510 MHz (DTV26 and above).

It is hoped that these tests will, once again, demonstrate the engineering capabilities of Radio Amateurs and lead the way to the granting of DATV licenses throughout New Zealand.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

If the test proves successful it holds the potential of opening up a new concept in channel sharing between amateur radio and other telecommunications services. (ZL2BHF)

RADIO LAW: FOLLOW-UP - US SAYS NO TO DUBAI INTERNET TREATY

A follow-up to last weeks story regarding that confrontational meeting in Dubai to discuss the future of the Internet. As the gathering drew to a close the United States joined 20 other counties in refusing to sign a treaty that they say will harm Internet freedom.

The final proposal was forged at an international communications conference that ended Friday, December 14th. A major problem of the treaty produced by the 193 nation International Telecommunications Union was its endorsement of greater control over the Internet by governments.

United States Ambassador Terry Kramer said that rejecting the treaty was an obvious direction for the U.S. delegation to take. He told the media that there were too many concerns that were problematic for the nation.

AS reported last week, one issue troubling the United States is language extending the treaty to Internet Service Providers and private network operators, as well as governments. The United States believes this would invite greater government control of the Internet. The same is true of provisions in the treaty to fight cybercrime. According to the U.S. delegation the broad powers designed to increase network security could too easily be abused by governments.

The chair of the World Conference on International Communications is Mohamed Nasser Al-Ghanim. He disagreed with the dissenting countries noting that their concerns are addressed in the text. Al-Ghanim said that special provisions were written into the treaty to say that content is excluded and that he Internet will continue to express freedom of thought as it has.

If the Dubai conference showed anything, it's that a major schism exists between the developed nations and much of the ITU over Internet issues. Some believe this could result in a second, more strictly regulated Internet emerging, although experts acknowledge that would be difficult to actually create.

The final version of the treaty goes into effect in 2015, but without the signatures of many of the Internet super powers, its effect is likely to be minimal at best. (Various Internet news sources)

**

RESTERUCTURING: DUTCH MILITARY STILL INSIST ON 915 MHZ

With almost 42 CEPT nations reporting that 915 to 921 MHz is empty, or emptying, it is hoped the band will soon be made available for Short Range Devices or SRD's.

An article by Bill Ray in UK newspaper The Register implies that the Dutch military appear to be just about the only obstacle to 915 to 921 MHz being available for Short Range Devices use on a world-wide basis.

To date there has been no globally available license exempt spectrum for Short Range Devices available between 42 MHz and 2.4 GHz. In some countries such as the United Kingdom, spectrum at 433 to 435 MHz has been used as a stopgap move. However this has caused considerable interference to other existing licensed services. (UK Register, Southgate)

**

RADIO FROM SPACE: NORTH KOREA SATELLITE ATTAINS ORBIT BUT NOBODY HAS HEARD IT TRANSMIT

North Korea appears to have successfully launched a satellite into space through the use of its Unha 3 satellite launcher, but may have lost control over the bird soon after it attained orbit.

As reported by several news outlets, according to U.S. officials, the satellite which was launched by North Korea on Wednesday, December 12th is now believed to tumbling out of control in an uncontrolled orbit and nobody is quite sure what the spacecraft's purpose or capabilities are.

North Korea lofted the spacecraft on the long-range rocket from its Sohae Satellite Launch Station on the nation's northwest coast. The launch was detected by United States missile warning systems. NORAD, the North American Aerospace Defense Command said the Unha-3 rocket's first stage fell into the Yellow Sea, while the second stage fell into the Philippine Sea. It went on to state that the

missile deployed an object that appeared to achieve orbit.

According to the ITU the North Koreans have so far not specified the type or format of the data or video transmissions it plans to make through the satellite although said it expects the transmissions to continue for up to 2 years. Currently the only claim from North Korea is that the bird is transmitting music on either 470 or 479 MHz but so far no monitoring stations have reported hearing this new bird or its sound. Similar claims were made in 1998 for another North Korean orbital launch attempt that is believed to have failed. (Space.com and various news sources)

**

HAM RADIO NEAR SPACE: END OF THE WORLD TRANSATLANTIC HIGH ALTITUDE BALLOON PREMATURELY BURSTS

The transatlantic crossing attempt by an amateur radio balloon carrying an 18 MHz PSK beacon ended over the coast of Mississippi when the balloon prematurely burst.

The ham radio balloon called BLT-32 carried a PSK 31 transmitter on 18.100 MHz. It was due to be launched late Saturday, December 15th from near Sugarland, Texas with its destination aimed at Europe. According to reports it only made it a few hundred miles.

The South Texas Balloon Launch Team had joined the N0D End of the World Special Event with the launch its high altitude 'floater' balloon with hope of it reaching Europe before the End of the World took place as described in one Mayan calendar. And in keeping with the theme of the event the beacons and APRS tracker on the balloon were to use the N0D call sign. N0D meaning Now Zero-Days. And it was a case of Now Zero-Days for this ham radio balloon flight.

As reported last week a similar ham radio floater balloon launched by a group in Northern California dis make it across both the United States and the Atlantic Ocean before descending in Morocco. (Southgate)

**

ENFORCEMENT: UK REGULATOR OFCOM SUPPORTS INVALIDATED EXAM

The United Kingdom's Radio Communications Foundation or RCF has announced that telecommunications regulator Ofcom has supported its decision to disallow an amateur radio examination in Northern Ireland.

According to a statement on the RCF, the Ofcom findings were that there is no hard evidence of wrong doing by the club or

candidates but nevertheless the examination results were considered unsafe. Also that the suspension of the club concerned from running examinations was appropriate in the circumstances but it is now free to resume this activity.

The Radio Communications Foundation has offered a free re test to both of the candidates whose exam was invalidated. (Southgate)

ENFORCEMENT: FCC AFFIRMS $16000 FINE FOR OUT OF BAND OPERATION

Back in the USA, the FCC has affirmed a $16,000 fine issued to a radio amateur for his alleged operating on a frequency reserved for government use only. We have the details in this report:

--

Recipient of the monetary forfeiture order is Joaquim Barbosa, N2KBJ, of Elizabeth, New Jersey, whom the FCC says operated a transmitter on the frequency 296.550 MHz without Commission authorization.

In his own defense Barbosa who holds an Extra class license, filed a response to the original Notice of Apparent Liability. In it he admitted to operating a radio transceiver on the frequency 296.550 MHz but contended that that cancellation or a substantial reduction of the then proposed $20,000 forfeiture is warranted nonetheless for several reasons. First that he reasonably believed that he had authority to operate on the frequency 296.550 MHz. Second, that his constitutional rights had been violated. Third that the unlicensed operation did not cause harm or interference. Forth that the forfeiture amount is not supported by case precedent and lastly that there are other factors such as his cooperation with the investigation, inability to pay, and prior history of overall compliance with the rules.

But the FCC bought only one of Barbosa's arguments. In issuing its final order it agreed that a reduction of the forfeiture amount was warranted based on its review of the record and finding that Barbosa, prior to this investigation, has a history of overall compliance with the Commission's rules. So after consideration of the entire record including Barbosa's response to the initial Notice of Apparent Liability that it was going to knock $4000 of the now affirmed fine and reduce it to the $16000 level.

For the amateur radio Newsline I'm Heather Embee, KB3TZD, near Berwick, Pennsylvania.

--

As this is now an affirmed fine, Barbosa was given only until close of business on December 31st to pay it or the case may be referred to the U.S. Department of Justice for enforcement of the forfeiture pursuant to Section 504(a) of the Communications Act. (FCC)

**

ENFORCEMENT: FCC REDUCES FINE ISSUED TO NY UNLICENSED BROADCASTER

The FCC has issued a Memorandum Opinion and Order that in part grants and in part denies a Petition for Reconsideration filed by Dexter Blake of Mt. Vernon, New York. This in regard to a $10,000 Forfeiture Order issued to him for willfully and repeatedly operating an unlicensed radio broadcast station.

On March 3, 2009, the Enforcement Bureau's New York Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Blake for operating an unlicensed broadcast station on the frequency 101.5 MHz in Mount Vernon, New York. Blake did not file a response to the proposed fine. As a result on July 22, 2010, the Enforcement Bureau issued a Forfeiture Order affirming the findings in the Notice of Apparent Liability and assessing the $10,000 forfeiture.

That apparently got Blake's attention after which he filed his petition for reconsideration. In it, Blake admits to having operated the unlicensed station, but claims that cancellation is warranted because the individual from whom he received the equipment did not advise him that he needed an FCC license. In addition, he requested a reduction or cancellation of the forfeiture based on his inability to pay.

Now, after what it calls a careful review the FCC issued its decision on December 13th. In it, the agency said that

although Blake concedes operating an unlicensed radio station that it is a violation of Section of the 301 of the Communications Act. Therefore it declines to cancel the forfeiture on this basis. However it does agree with Blake that the $10,000 amount would constitute a financial hardship and as such has lowered the fine to $1700.

Blake was given 30 days to pay the reduced fine or the case may be referred to the U.S. Department of Justice for further enforcement.
(FCC)

**

RADIO LAW: FCC SAYS HAWAIIAN CABLE OPS MUST CARRY KLEI TV

The FCC says that two cable television stations in Hawaii must carry a particular station even though neither wants to. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the rest of the story:

--

The FCC has denied a request by Oceanic Time Warner Cable and Hawaiian Telcom Services Company asking that they not carry KLEI TV on their respective systems. The station, under new ownership since 2011, asked for carriage, but the operators said no so KLEI then filed a must-carry complaint.

In part, the FCC agreed with the cable operators that the station could not argue historical carriage as neither had been carrying the station before it was bought in 2011. That's when the new owners sought carriage or that it was delivering an over-the-air signal to any of the communities it sought cable carriage in. Those are two of the four tests for cable TV carriage.

But in this case the FCC took a different view. It said the absence of those two points was not sufficient to deny the station's request. The agency said that the unique characteristics of the Hawaiian market and KLEI's strong lineup of local programming of relevance to the inhabitants of Hawaii County and to all Hawaiians. Also that it's foreign language programming targeted at special groups and residents, persuaded it to grant the carriage complaint.

Hawaiian Telcom Services Company had said that if it carried KLEI, it should not have to carry it on channel 6 in Honolulu. This is because it was already carrying station KBFD there. The FCC rejected that request as well. I t pointed out that it has clarified very recently that a digital station, generally speaking, is entitled to be

carried on its former analog channel number. In this case KLEI was channel 6 and KBFD was 32.

I'm Don Wilbanks, AE5DW.

--

At airtime its not known if either the Hawaiian Telcom Services Company or Oceanic Time Warner Cable plan to file an appeal. (FCC. B&C)

**

THE BPL-PLT WAR: DARC TO HOLD STRATEGY MEETING ON DANGERS OF PLC / PLT

This note to our listeners in Germany. On Saturday, January 12, 2013 the Deutscher Amateur Radio Club will be sponsoring a one-day workshop dealing with the possible hazards to amateur radio from electromagnetic Powerline Transmission more commonly known in Europe as in-home P-L-T. The workshop slated for the DARC headquarters in Baunatal will cover all aspects of powerline Internet transmission and its likely effects on amateur radio operations. All DARC members wishing to attend are welcome. Interested parties are asked to pre-register by contacting Renate Stackebrandt by e-mail to r.stackebrandt (at) darc (dot) de. More is on line at tinyurl.com/GermanyDARC. (DARC, Southgate)

**

HAM EDUCATION: W5KUB.COM TO CARRY D-STAT LIVE NETCAST

Tom Medlin, W5KUB, tells us that all systems a go for the next live W5KUB.COM worldwide Internet broadcast. On December 29th at1500 UTC Tom will be presenting the D-Star Live netcast that will feature many experts on the mode as a part of the show. Using Tom's interactive website you will be able to ask questions, and be a part of this program. Tom says that updates are available via his Facebook web page. Just join Facebook and then use the search task bar to locate the W5KUB Group page. Then just click to join. (W5KUB)

**

THE SOCIAL SCENE: SUPERSTITION HAMFEST RESCHEDULED TO FEBRUARY 19

Arizona's postponed Superstition Hamfest will now take place on Saturday, February 9th at Mesa Community College off of highway 60 in western Mesa, Arizona. The Superstition Amateur Radio Club, sponsor of the event that usually takes place in December says that it appreciates everyone's

patience and once again apologizes for the inconvenience the rescheduling has caused. For more information please take your web browser to tinyurl.com/superstion-hamfest. An updated information sheet may be downloaded from the site in PDF form. (WB7C)

**

RADIO HAPPENINGS: SAQ VLF TRANSMISSION CHRISTMAS EVE

There will be a transmission from Sweden's famed Alexanderson 200 kilowatt Very Low Frequency alternator on Christmas Eve. The transmitter will be tuned up from around 07:30 UTC with the message itself transmitted on 17.2 kHz at exactly 08:00 UTC on Monday, December 24th.

The Alexanderson alternator is located at the Grimeton Radio SAQ transmitter site. If you copy the message you are asked to send QSN reports via e-mail to info (at) alexander (dot) n (dot) se. You can also mail reports via the S M bureau. More information on the Alexanderson alternator is on-line at www.alexander.n.se. (Southgate)

**

RADIO HAPPENINGS: CRICKET CAM COMING DOWN-UNDER

FOX Sports reportedly will take broadcasting of cricket competition in Australia to a new level this summer. This with pictures to be broadcast from micro size cameras installed in helmets worn by batsmen and wicket keepers.

According to the WIA News, the equipment consists of a High Definition visor-mounted camera and transmitter with batteries on the rear strap. The additional weight on the helmet is only 250 grams, or about the weight of a bar of soap.

The can be fitted to any player's helmet during the game. Fox Sports believes it will be the first camera attached to a player during a Cricket match at this level. The technology is to be officially introduced in the Big Bash Twenty tournament.

For those unfamiliar with Cricket, it is a baseball like game played between two teams of 11 players. One team bats, trying to score as many runs as possible while the other team fields, trying to dismiss the batsmen and limit the runs scored by the batting team. The game is most popular in Australia, England, the Indian sub-continent, the West Indies and Southern Africa. (WIA News)

THE CHANGING OF THE GUARD: RADIO PIONEER RAY BRIEM, N6FFT - S.K.

We seem to be using the words of the changing of the guard more often these days, and once again they seem most apropos. This with the word of the passing of broadcasting legend Ray Briem, N6FFT as we hear from Amateur Radio Newsline's Bruce Tennant, K6PZW:

--

Anyone born or raised in the great American Southwest in the last half century likely knows the name Ray Briem. For some 30 of those years Briem who held the Amateur Service call letters N6FFT was called the host who owned overnight talk radio on Los Angeles station KABC A.M..

Born Leland R. Briem in Ogden, Utah, in 1930, Ray Briem first took to the radio airwaves at the age of fifteen. On August 14th, 1945 he was asked by a station manager to substitute for a staff announcer and with that his days in radio were off and running.

The highlight of Ray Briems career was when he came to KABC in 1967 where he held court over the nighttime hours until 1994. While he loved big band music and interviewed hundreds of celebrities his mainstay was talking with and to his listeners. And when he got involved in shortwave listening and then ham radio, several nights each year were devoted to talking about both of these topics. Frequent guests on those special shows included the late Lenore Jensen, W6NAZ, her husband Bob, W6VGQ and Lloyd Sigmon, W6LQ, who created the traffic alert system named in his honor known as the Sigalert.

After retiring from KABC, Ray Briem did a brief afternoon talk show on KIEV-AM. He received a star on the Hollywood Walk of Fame and in 2008 was honored for his contributions to broadcast radio by the Pacific Pioneer Broadcasters organization.

On a personal note, unlike some celebrities with call signs, Ray was more than a name in an amateur radio database. He

was often heard on the local ham radio airwaves and I myself had many contacts great with him through the Catalina Island repeater. As always, be it speaking to hundreds of thousands over KABC, or in a one on one contact via ham radio Ray Briem, N6FFT, was a true gentleman and a friendly voice in the night that will be missed.

For the Amateur Radio Newsline, Im Bruce Tennant. K6PZW, in Los Angeles.

--

For a truly beautiful retrospective about Ray Briem, N6FFT, and his career we suggest that you read the article by fellow broadcaster Doug McIntire that appeared in the Los Angeles Daily News. You can find it at tinyurl.com/la-daily-news-briem. (ARNewsline[TM]; K6PZW, published news reports)

**

RADIO FROM SPACE: NEW HUGE TELESCOPE TO WARN OF SOLAR STORMS

Astronomers say a new eye on the sky in Western Australia's remote outback could potentially save the world billions of dollars. This by warning of a pending cosmic catastrophe.

The International Center for Radio Astronomy Research in Perth reports that the new Murchison Widefield Array radio telescope will give a dramatically improved view of the sun. This in turn should provide an early warning of explosive solar storms that can damage to communication satellites, electric power grids and GPS navigation systems.

In addition to its solar observations, the Murchison Widefield Array will offer scientists an unprecedented view of the entire history of the universe, including how the very first stars and galaxies formed.
(WIA)

**

WORLDBEAT: ZIMBABWE THREATENS TO JAM SHORTWAVE BROADCASTS

The South African nation of Zimbabwe thinks it should jam shortwave broadcasts from outside that nation's borders. Newzimbabwe.com reports that at a recent Zanu PF party conference it was proposed to jam the signals of foreign-based radio stations such as Voiceof America's Studio 7, Radio Voice of the People and South West Radio Africa that ruling party officials accuse of pushing a Western-backed regime change agenda in Zimbabwe.

But critics say such a move would deny the majority of people access to important alternative sources of information to make informed decisions. They argue that President Robert Mugabe's party wants to continue its domination of the airwaves in order to maintain the status quo. But Zanu PF officials maintain these radio stations are breaking the Zimbabwe law and should be jammed. More is on-line at tinyurl.com/zimbabwe-jamming-threats. (Newzimbabwe)

**

ON THE AIR: NEW SUPER LOW POWER 80 METER BEACON FROM ITALY

On the air, keep an ear open on 80 meters for a new QRP level propagation signal. The Irish Radio Transmitting Society reports that a new European low power beacon is transmitting on 3574.5 Kilohertz using only 300 milliwatts. The callsign is IZ3NYT with diagrams and pictures at iz3nyt.altervista.org/gallery. Text is in the Italian language. QSN reports go to IZ3NYT using eQSL or direct. (IRTS)

**

ON THE AIR: TC9SAM IN MEMORIAM OF THE ALLAHEKBER MARTYRS

If you contacted special event station TC9SAM between December 20th and the 24th you are being asked to QSL direct only. TC9SAM was to operate at the Turkish Scouting and Guiding Federation's National Conciousness Camp-In held in memoriam to the Allahuekber martyrs. The memorial is a traditional winter march to Allahuekber peak in eastern Turkey held in memory of the 60,000 patriots who were frozen to death while trying to reach the occupied Kars city in December of 1914. In accordance with the camp program operations of TC9SAM were mainly on 80 and 40 meter SSB. (TA1HZ)

**

DX

In DX, members of the Lufthansa Amateur Radio Club Frankfurt will be on the air from Vietnam from February 15th to the 26th. They will operate as XV2DLH and will be active on all of the High Frequency bands. QSL's go via DK8ZZ.

JR1IZM who also holds the call V31IZ will be operational as 7P8ZM from Lesotho through January of 2013. He will be active on all of the High Frequency bands. QSL via JO1CRA

F6ITD will be on the air stroke FG from Guadeloupe and two islands between next February 1st and March 25th. He will be using SSB and the Digital modes during his stay. Logs will

be uploaded to both ClubLog and Logbook of the World. QSL via his home call either direct or via the bureau.

GM3YTS, GM4FDM, GM0GAV and GM3POI will be operational as T2GM from Tuvalu between March 12th and the 23rd with their activity will be focused on Europe. The group now has a Web page available at t2gm.org. QSL
via GM4FDM.

K1GI will be active stroke VP9 from Bermuda between December 29th and January 2nd. Operations will be on 160 through 10 meters using CW, SSB and the digital modes. QSL via JG2BRI, direct or electronically using Logbook of the World. No bureau cards will be accepted.

Lastly, AA9A will again be active from Antigua between February 11th and the 20th using a new callsign V24A. Operations should be on 160 through 10 meters using CW, SSB and possibly RTTY. QSL via his home callsign either direct or using the bureau.

**

THAT FINAL ITEM: CUBESAT DESIGNER INTERVIEWED ON SWEDISH RADIO

And finally this week, a Swedish radio show recently featured an interview with Hojun Song, DS1SBO, about his O-S-S-I CubeSat. The broadcast took place on Monday, November 26th and dealt with the Maker and Hacker movement that continues to take the world of home construction by storm. This included the item on DS1SBO, and the CubeSat that is to launch in April of 2013. Here Song discusses his philosophy in developing the OSSI bird:

--

DS1SBO: ".The point of my project is to freeing all of the technologies that is used in the satellite."
--

The entire program can be downloaded as an MP3 file at inyurl.com/ossi-cubesat-interview. While Song speaks in English the rest of the show is entirely in Swedish. The interview with DB1SBO begins at about 1 minute and 20 seconds into the show. (Southgate, audio clip from sverigesradio.se)

Amateur Radio Newsline[TM] Report 1846 - December 28 2012

Amateur Radio Newsline report number 1846 with a release date of December 28, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in the Philippines activate as yet another tropical storm hits that nation; new spectrum for hams in Switzerland and the U-K; a ham radio operator in New York City beats the bureaucracy and gets to keep his tower; Canada changes the way it administers its communications enforcement and AMSAT gets a Matching Fund for donations made to the Fox satellite project. These stories and more on the Amateur Radio Newsline report number 1846 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: PHILIPPINES ACTIVATES EMERGENCY NET 7.095 MHZ

Hams in the Philippines are again activated as yet another tropical storm hits the nation. Stephen Kinford, N8WB, has more in this report:

--

Spare a thought for those who spent a nervous, very wet and windy Christmas as Tropical Storm Quinta went through the south of the Philippines. This in areas trying to recover from Tyhoon Bopha earlier in the month.

Landslides occurred in the Visayas, Southern Leyte and Eastern Samar areas. There were more than 5,800 ferry passengers stranded with fishermen told not to venture out.

Activated during the storm was the Philippines Amateur Radio Association Emergency net on 7.095 MHz and VHF, to handle emergency and welfare traffic.

Among those involved were members of the Philippines Amateur Radio Association affiliated club called the District 5 Radio Amateur Network. They were kept busy coordinating pre-emptive evacuations in Tacloban City and elsewhere alongside members of the Disaster Risk Reduction and Management Council. Other radio amateurs were also involved in the overall emergency.

The Philippine archipelago has numerous severe weather events each year. Typhoon Bopha which made landfall over Mindanao on December the 2nd ripped through the southern provinces killing 1,067 people, leaving hundreds missing and many
more homeless.

For the Amateur Radio Newsline, I'm Stephen Kinford, N8WB.

--

All ham radio operators world wide awere being asked to keep clear of the Philippine emergency net frequency of 7.095 MHz until operations stand down. (VK3PC, DU1UG)

**

RESTRUCTURING: SWITZERLAND GRANTS HAMS ACCESS TO 472 TO 479 KHZ

A new year's present from telecommunications regulator BAKOM to the ham radio community of Switzerland. As of January 1st, Swiss hams will have access to the low frequency spectrum from 472 to 479 kHz.

As in most other nations that have granted access to this band, the Effective Radiated Power level is 5 watts making it more suitable for low noise digital narrowband modes than either analog voice or CW.
(Southgate)

**

RESTRUCTURING: 5 MHZ SLOTS AVAILABLE IN THE UK

And a New Years gift from United Kingdom telecommunications regulator Ofcom to that nations hams. This with the announcement that the previously adopted additional block of frequencies at 5 MHz are now available on a Notice of Variation Basis.

As of January 1st UK hams holding Full Advanced class U-K licenses can apply for the Notices of Variation to gain access to the new frequency slots. Information for U-K hams on how to apply for these as well as a Notice of Variation for operation in the Low Frequency 472 to 479 kHz bands are on line at tinyurl.com/new-UK-nov (Southgate, 5 MHZ Newsletter, G4MWO)

**

RADIO LAW: NYC HAMS WINS FIGHT TO KEEP TOWER

A New York City ham will be able to keep his tower and antenna on the roof of his home in the borough of Manhattan. This after the city's Board of Standards and Appeals

overrules the Department of Buildings that had tried to revoke his permit for the antenna that had previously been legally issued. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

In September of 2010, Paul Isaacs, W2JGQ, was granted a building permit for his amateur radio antenna. The antenna system was made up of a 40 foot tower and top mounted Yagi antenna. Isaacs installed his antenna system on the roof of his four story home about 60 or so feet above ground level.

Then some four months after the system had been put in place the City of New York's Department of Buildings declared its intention to revoke Isaacs' properly attained building permit. Why? Well after all that tuime it decided that Issac's amateur radio antenna system was not, in the Department's opinion, an accessory use.

Isaacs appealed the decision through the Department's bureaucracy. When it didn't reverse the decision, W2JGQ had a series of hearings before the New York City Board of Standards and Appeals.

Now comes word that in November the Board of Standards and Appeals ruled that while perhaps uncommon, that an amateur radio antenna system is indeed an accessory use under New York City's zoning ordinance and the building permit was properly granted.

Burt heres the best part. The Board of Standards and Appeals also stated in the case of amateur radio towers, that, unlike cellular towers and certain other structures, there is no expressed standards to guide Department of Buildings in determining at what height a particular radio tower becomes a non-accessory.

While its possible that the city could enact some form of ordinance to create a standard in at some future date, at the moment the interpretation stands as defined. It also has the blessing of the New York City Board of Standards and Appeals.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The bottom line: Not a bad win for ham radio and other private radio users in the city known as The Big Apple. (eHam, others)

**

RADIO LAW: CANADIAN ENFORCEMENT RULES CHANGES

An announcement in the Canada Gazette says that there have been modifications made in the Contravention Regulations concerning the enforcement of the nations Radiocommunication Regulations. These changes will allow peace officers including Municipal, Provincial and Royal Canadian Mounted Police officers to issue tickets for certain offences under the nations Radiocommunication Regulations.

This change is the result of amendments made back in 2000 and 2011 to the Canadian Radiocommunication Regulations to exempt amateur radio apparatus and its operation from the licensing requirement by Industry Canada. Also to respond to concerns expressed by the Standing Joint Committee for the Scrutiny of Regulations. The latter had concluded that provisions of the Radiocommunication Regulations were redundant to, or inconsistent with, the Radiocommunication Act, or inconsistent with the terms of the Charter of Rights and Freedoms.

You can see the changes and how they might affect radio amateurs in that nation at tinyurl.com/new-Canadian-regs (RAC, VE4WO)

**

COMMUNICATIONS LAW: SUPREME COURT REFUSES TO HEAR CHALLENGE TO 2008 WIRETAP IMMUNITY LAW

The United States Supreme Court has rejected a challenge to a 2008 federal law granting immunity to phone companies. This for assisting the government eavesdrop on private phone conversations. Amateur Radio Newsline's Skeeter Nash takes a look at what transpired:

--

The case involved 33 lawsuits brought against the telecommunications providers in 2006 after news reports that the government had conducted warrant-less surveillance. Phone customers alleged that AT&T, Sprint Nextel, Verizon Communications and others violated federal and state law.

In reaction to the suits, in 2008 Congress passed Section 802 of the Foreign Intelligence Surveillance Act. This gave the Attorney General the power to grant legal immunity to anyone providing assistance to the intelligence community. The then Attorney General used that law to block the 33 suits all of which were eventually dismissed.

The Electronic Frontier Foundation, the American Civil Liberties Union and others appealed. Their lawyers argued that Section 802 violated the separation of powers doctrine

of the U.S. Constitution. But in December of 2011, the 9th U.S. Circuit Court of Appeals in San Francisco rejected those arguments, finding the telephone companies immune.

Asking the Supreme Court to review that decision, the civil liberties groups said the law allowed the executive branch to conduct warrantless, suspicionless domestic surveillance without fear of review by courts. Also that it gave the Attorney General sole discretion to decide when eavesdropping was necessary.

But the high court, without comment, has declined to review the challenge to the law.

--

This decision is the latest in which the High Court has refused to review government surveillance practices adopted since the al-Quida lead terrorist attacks of September 11, 2001. (Published news reports)

**

HAM RADIO IN SPACE: FOX MATCHING FUND ESTABLISHED

AMSAT President Barry Baines, WD4ASW, says that the organization has received a matching funds challenge to help with the Fox 1 program. Baines says that an anonymous donor will match up to $25,000 in funds to be donated to the Fox satellite project.

Fox-1B mission will incorporate the spare flight hardware of Fox-1. It is a joint project with the Institute for Space and Defense Electronics at Vanderbilt University and is AMSAT's first satellite with science as its primary mission. As such it holds the potential of opening up new opportunities for free launches. The satellite will also carry a ham radio FM transponder and AMSAT expects to be able to operate the transponder and science payload simultaneously.

AMSAT says that it has requested a launch in the second half of 2014 to a 650 kilometer sun-synchronous orbit. This is same as had been requested for Fox-1.

Donatations to the matching fund can be made via PayPal sent to Martha (at) amsat (dot) org. Or you can simply click on the PayPal logo at www.amsat.org. And we will have more ham radio space related news later on in this weeks newscast. (AMSAT)

**

BREAK 1

Wishing you a very Happy New Year. From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the K7CSK repeater serving Everett, Washington.

(5 sec pause here)

**

RADIO MIRACLES: HAM RADIO OPERATOR WALKS AWAY FROM CHOPPER CRASH

Call it a Christmas miracle. This with word that a Minnesota ham who crash landed his helicopter on his sons back yard helipad has walked away with only minor injuries. Bill Pasternak, WA6ITF, has the details:

--

The pilot was Trygve Svard, KD0PNQ, of Plymouth, Minnesota. According to news reports Svard was in the process of landing his personal helicopter in the yard of his son's home in the rural city of Corcoran at around 10:30 a.m. on Sunday morning, December 23rd. This as he had done many times in the past. But something went wrong as the chopper began to spin with its tail rotor hitting a near-by trailer.

News reports go on to say that Svard's son Stefan was watching his father land the Robinson Model 22 chopper when the accident occurred. The younger Svard ran out with a fire extinguisher. Stefan got his father safely out of the helicopter before a major fire erupted. KD0PNQ reportedly suffered only a scorched arm and singed facial hair but thankfully was otherwise unscathed.

Brad Christianson, KC0HCP, tells Amateur Radio Newsline that Trygve Svard is a member of the Minneapolis area Twin City FM Club. The news report about the crash describes Svard as being a very skilled pilot.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The FAA and National Transportation Safety Board are investigating the incident. More on this story is on the web at tinyurl.com/hams-helicopter-down. (KC0HCP, Lakeminnetonka Patch, other published news reports)

**

ENFORCEMENT: UNLICENDED BROADCASTER WITH THREE TRANSMITTER LOCATIONS HANDED $25000 PROPOSED FINE

An unlicensed broadcaster that tried to fool the FCC by originating his programming frm different locations has been found and issued a $25,000 propsed fine.

Recipient of this likely unwanted gift from Uncle Sam is Fabrice Polynice, of North Miami, Florida, whom the regulatory agency claims to have apparently, willfully and repeatedly violated Section 301 of the Communications Act. This by allegedly operating unlicensed radio transmitters on the frequency 90.1 MHz from three locations in North Miami, Florida.

According to the FCC, while conducting routine monitoring of the airwaves, agents from the Enforcement Bureau's Miami Office determined that an unlicensed radio station was operating on 90.1 MHz from multiple locations, presumably to evade detection. On six different days over several months the agents the used direction finding to locate the source of radio frequency transmissions and traced them to three separate locations in North Miami. The agents made signal strength measurements and determined that the signals exceeded the limits for operation under Part 15 of the FCC rules and therefore required a license.

The agents inspected two of the station locations when Mr. Polynice was not present. One inspection was conducted following seizure of the transmitting equipment by federal marshals. The other was conducted with the residents of the property, and they were issued an on-scene Notice of Unlicensed Operation. But the unlicensed station continued to operate at one of the locations even after the federal marshals had seized the radio transmitting equipment located at another location.

Now in issuing the $25,000 proposed fine, the FCC says that the evidence in this case is sufficient to establish that Mr. Polynice violated Section 301 of the Communications Act on at least six different days during March to July of 2012. It also stated that its agents heard the station identify itself on the air as "Touche Douce" and announce Polynice's personal telephone number as the station's telephone number. It also noted that Polynice has a history of operating a radio station without a license, which demonstrates a complete disregard for Federal and State authorities and their laws. Despite being arrested and convicted in 2006 for violating the State of Florida's prohibition against operating an unlicensed radio station within the State that Polynice continued to operate an unlicensed radio station at three separate locations in North Miami.

Based on the evidence before it, including what the FCC termed as consideration of the egregiousness of the violations, the history of prior offenses, and the degree of

culpability, that it finds that the violations warrant a total upward adjustment of $15,000 from the $10,000 base fine. Polynice was also warned that future violations may subject him to more severe enforcement action, including larger monetary forfeitures, criminal prosecution, and the seizure of his equipment. (FCC)

**

EXPANDING RADIO: MORE RADIO HAMS IN FAIRBANKS

The amateur radio population in Fairbanks, Alaska is increasing thanks to the work of the Arctic Amateur Radio Club. The club reports that in 2012 that it welcomed 18 new Technician licenses and had 11 General class upgrades and 7 Extra class upgrades.

If you are not familiar with Alaska, Fairbanks is located in the interior of the state. It is about a 6 hour drive from the next largest city of Anchorage. (KL3NO)

**

CORRECTION: SUPERSTITION HAMFEST FEBRUARY 9 AND YUMA HAMFEST FEBRUARY 15 - 16

A quick correction to a typo that only appeared only in the text version of last weeks' newscast. In the printed headline, the text gave a date of Superstition Arizona hamfest February 19th while the story itself said the date was the 9th. To clarify, the text of the story was correct and the headline was wrong. The correct date is February 9th.

And while we are at it we should mention that the following weekend is the Hamfest and State Convention in Yuma Arizona. That's February 15th and 16th. The bottom line is that it looks like a busy ham radio month in Arizona and the planners of both these events hope to see you there.

Our thanks to Alan Price. N6ALP for the correction and the Arizona events update. (N6ALP)

**

HAM HAPPENINGS: ORLANDO HAMCATION ON FEBRUARY 8 - 10 IN FLORIDA

The 67th annual Orlando Amateur Radio Club Orlando HamCation Amateur Radio and Computer Show is slated for the weekend of February 8, 9 and 10 at the Central Florida Fairgrounds in Orlando, Florida.

The theme for the 2013 Orlando HamCation is Ham Radio Exploring New Horizons. The event will feature over 150 commercial vendor booths, 400 swap tables, the largest Tailgate Area in the southeast as well as a plethora of forums. Special event station K4H will be on the air from the Hamcation site.

Updated information is available at www.hamcation.com, on Facebook under the fan page of Hamcation. You can also follow developments on Twitter by subscribing to @hamcation. (Orlando Hamcation)

**

HAM HAPPENINGS: STRAIGHT KEY NIGHT ON OSCAR

AMSAT is again inviting radio amateur's world wide to participate in Straight Key Night on OSCAR.

As always, operation is simple and informal. Just use CW through one or more satellites on January 1st 2013 from 0000 to 2400 UTC using only a straight hand key. There is no need to send in a log, but all participants are encouraged to nominate someone they worked for Best Fist. Your nominee need not have the best fist of anyone you heard, only of those you worked. Send your nomination to w2rs at amsat dot org. A list of those nominated will appear on the Amsat News and in the AMSAT Journal.

And less we forget, this year's event is dedicated to the memory of John Thompson, who held the calls W1BIH and PJ9JT who passed away in 2012 ate age 96. Although known primarily as a High Frequency DXer and contester, Thompson was also active on the OSCAR satellites, mostly on CW. (ANS)

**

HAM HAPPENINGS: WYONG CONTEST UNIVERSITY URL UPDATE

From the social calendar file we have been advised to ask that you use the direct U-R-L for information regarding the Mini Contest University at Wyong Australia. According to the event planners the Tiny URL link will not work because there is a space in the URL which causes problems with tinyurl and other U-R-L compression schemes.

Wyong Mini Contest University takes place on Saturday, February 23rd. If you want more information on this event please take your web browser to www.fieldday.org.au/contest_university/.

If you missed that, don't worry. You will find it in the printed edition of this week's Amateur Radio Newsline report. (VK2JI)

**

HAM HAPPENINGS: HAM RADIO UNIVERSITY 2013 JANUARY 6 IN NY

The 14th annual Ham Radio University will be held on Sunday, January 6th from 7:30 a.m. to 3:30 p.m. at Briarcliffe College in Bethpage, New York. The event will include more than 25 informational forums moderated by local experts in a broad range of Amateur Radio activities. The keynote speaker will be Bill Cross W3TN, Staff member in the Federal Communications Commission's Mobility Division.

Ham Radio University is a cooperative effort supported by radio clubs and related organizations in the New York City and Long Island area. This year the event is being sponsored by the Long Island Mobile Amateur Radio Club. Further information and the forum schedule is on line at www.hamradiouniversity.org. (KS2G)

**

NAMES IN THE NEWS: 2012 YASME EXCELLENCE AWARD WINNERS ANNOUNCED

The Yasme Excellence Awards for 2012 have been announced. Among those receiving honors this year are George Fremin, K5TR; Tree Tyree, N6TR; Trey Garlough, N5KO, and Scott Neader, KA9FOX. This, for their contributions to many infrastructure projects that benefit the ham community at large.

Also recognized is ARRL Education and Technology Program Director Mark Spencer, WA8SME. Spencer received the honor for his contribution to the ARRL Teachers Institute on Wireless Technology and other training efforts. Also for his development of P-I-C microcontroller projects, books for amateurs, as well as working with leaders in student and scientific teams in applying amateur radio to scientific projects and experiments.

The Yasme Excellence Awards are given to individuals who through their own service, creativity, effort and dedication, have made a significant contribution to amateur radio. The award itself takes the form of a cash grant and an engraved crystal globe. For a complete list of these years winners please take your web browser to www.yasme.org/awards.
(Yasme. ARRL)

**

NAMES IN THE NEWS: VE3DSS NEW RAC MARITIMES SECTION MANAGER

And congratulations to Craig Seaboyer, VE1DSS, who was recently elected Radio Amateurs of Canada Section Manager

for the Maritimes for the balance of a two year term. He ran unopposed eliminating the need for a balloted election. (RAC)

**

NAMES IN THE NEWS: AE5DW TO GUEST ON THE DODROPIN ECHOLINK NER OM JANUARY 5

And on Jan 5th at 2100 hours Eastern Standard Time, Amateur Radio Newsline's Don Wilbanks, AE5DW, will be the guest on the Amateur Radio Newsline Net held on the DoDropIn Echolink conference server. You are invited to - well -- drop in and catch Don talking about his career in broadcasting as well as amateur radio after which the latest Amateur Radio Newsline newscast will be aired. Again that's the Amateur Radio Newsline Net on Saturday January 5th 2100 ours Eastern Standard Time to meet Don Wilbanks, AE5DW, on the DoDropIn Echolink conference server node number 355800. Hope to see you there. (W8WFO)

**

BREAK 2

With you 52 weeks a year every year. From the United States of America, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: RESPECTED FCC ENGINEER ANGELO DITTY K4GKB - SK

A name familiar to both broadcasters and ham radio operators has passed from the scene. This with word that former FCC Inspector Angelo Ditty, K4GKB, became a Silent Key on December 2nd at the age of 87.

Ditty served in the Atlanta FCC office as the Engineer in Charge from 1974 until 1990 following a stint with the FCC out of Tampa, Florida. Earlier in his career while based at the FCC's San Francisco office he worked with Ney Landry, W6UDU, who recently passed away at age 95.

After leaving the FCC Ditty took a position with the Georgia Association of Broadcasters where he served until 2011. There he examined engineering and public files for members, allowing them three-year exemptions from FCC inspections.

Memorial services for Angelo Ditty, K4GKB, were held on Friday, December 7th in Canton. Georgia. (RW)

**

CHANGING OF THE GUARD: BARCODE INVENTOR JOSEPH WOODLAND -S.K.

Norman Joseph Woodland who co-created the barcode using Morse code, has died at his New Jersey home at the age of 91.

Barcodes Inc. says that Woodland worked with university classmate Bernard Silver to create the now ubiquitous thick-and-thin-line system in the 1940s. Woodland reportedly used the Morse code as a basis to create the barcode when he just extended the dots and dashes downward and made narrow lines and wide lines out of them.

The BBC reports that the system was patented in the US in 1952 and was later sold for only $15,000. (BBC)

**

HAM RADIO IN SPACE: THREE NEW HAMS JOIN ISS CREW

Three new astro-hams are now on-board the Internationl Space Station. They are American Tom Marshburn, KE5HOC; Russian Roman Romanenko, UT5ERP and Canada's Chris Hadfield, KC5RNJ. All were launched from the Bikenour Cosmodrome in Kazakhestan on board a Soyuz booster on Wednesday, December 19th . The trio traveled for two days in the capsule, before docking with the space station where three other astronauts are already on board. (ANS)

**

HAM RADIO IN SPACE: AMSAT-UK introduces Electronic Membership

AMSAT-UK has announced that it will now offer Electronic E-membership at a reduced rate.

The new E-membership will provide OSCAR News as a downloadable PDF file and members will have the freedom to read it on their tablets or smart phones at their leisure. E-membership should also be especially beneficial to overseas members who have long suffered from high postal charges and long delivery times.

The AMSAT-UK membership year runs from January 1st to December 31st. Members can renew at tinyurl.com/amsat-uk-renew. New members sign up at tinyurl.com/amsat-uk-join (AMSAT-UK)

**

RADIO IN SPACE: CUBESAT DEPLOYERS BEING MANUFACTURED AT CALIFORNIA PRISON

According to a news reports, inmates at San Quentin prison in California are building CubeSat orbital deployers.

Working under the strict guidance of NASA, a handful of skilled inmate machinists are making P-PODs which is an acronym for Poly Picosatellite Orbital Deployers. These are essentially, aluminum boxes designed to hold CubeSats which ride "piggyback" into space as secondary payloads.

The devices are part of a new generation of low-cost, miniature launch vehicles developed for research used by more than 150 universities worldwide. You can read the complete story on-line at tinyurl.com/prison-satellite-deployers (Southgate)

**

WORLDBEAT: ACMA SAYS NO MORE VK MICKEY-D SPAM E-MAIL

The Australian Communications and Media Authority has given McDonald's Australia Limited a formal warning under the nations Spam Act about a `send to friends' facility on the McDonald's Happy Meal website. According to the WIA News, an ACMA investigation found that e-mails using the `send to friends' facility which promoted games and activities were sent to friends of users without first getting the friends' consent. The messages also did not have an unsubscribe facility, as required by that nations Spam Act. (WIA, ACMA)

**

WORLDBEAT: HUNGARY CLOSES REGIONAL PUBLIC SERVICE STATIONS

Hungary's Media Services and Support Trust Fund has closed all five of its regional radio studios which make up the Regio Radio network. According to the Trust memo on December 21st, the studios will be leased out, and staff will either be made redundant or employed as correspondents for the national public talk and news service.

According to the Chief Operating Officer of the Media Services and Support Trust Fund, the Regio Radio network experienced a waning audience due to increasing competition from other local private stations. The soon-to-be-available FM and AM frequencies will be used for broadcasting a new nationwide public service of Hungarian song or urban folk music and at least one operetta music station, (RW)

**

WORLDBEAT: NEW CANADIAN HELLSCHREIBER AWARD

A new award has been created for those ham radio enthusiasts in Canada who enjoy operating Hellschreiber. The basic Worked All Canada award requires contacts in Hellschreiber with the ten Canadian Provinces. The complete award requires additional QSO's be held with the three northern Territories of the Yukon, the Northwest Territories, and Nunavut.

Hellschreiber was originally a mechanical mode that now is operated by most in the digital domain and enables the transmission of text using facsimile technology. The start date of the award was December 19th which happened to be the birthday of Dr. Rudolf Hell, who patented Hellschreiber in 1929.

You must be a member of the Feld Hell Club to be eligable, but contacts with non-members are bvalid for award credit. A sample of the certificate, the rules and information on how to apply for the award is on line at tinyurl.com/Hellschreiber-Canada-Award. (Feld Hell Club)

**

ON THE AIR: 6 METER PROPAGATION TO BE ACTIVATED IN ANTARCTICA

On the air, listen out in February for Craig Hayhow VK6JJJ, who will be signing VK0JJJ from the coast of MacRobertson Land and Australia's base
at Mawson in Antarctica. He arrives on February the 10th and while there he is also planning to install a 6 meter beacon to test the propagation on that band. The beacon will operate using the call VK0RTM running 400 watts out into a 5 element yagi. For contacts on the high frequency bands he will be running a Flex 5000A and an amplifier to a triangle antenna. QSL via VK3ZAZ. (VK3PC)

**

DX

In DX, OH1LEG will be active from Rodrigues Island through January 7th signing stroke 3B9. He will be operational on 160 through 10 meters using SSB , RTTY and PSK31. QSL direct via OH1LEG.

DF3FS and DL1QW will be active stroke 5Z4 from Kenya from January 6th to the 20th . They will be operating 80 through 10 meters using CW , SSB and RTTY. QSL via each operators home call.

PP1CZ will be on the air from Fernando de Noronha Island January 15th to the 21st signing PY0F. He will focus on 160 and 80 meter CW. QSL via his home call.

JR1IZM will be active from Lesotho through January 2013
as 7P8ZM
He will be operational on all of the High Frequency
bands but no specific modes or operating times have been
mentioned. QSL via JO1CRA

DK9FN is operational from Temotu Province using the call H-
40-F-N through January 7th. If you make contact QSL H-40-F-N
via HA8DD.

JR1IZM is in Losotho has been issued with the callsign
7P8ZM. He will be active until mid-January though no
specific bands or operating times are known. QSL's go via
his home call.

Prefix hunters will be interested in the callsign 8N119T.
This is being
used to celebrate the 65th anniversary of the Tokyo Fire
Department and
will be in operation until March 25th. QSL as directed on
the air.

Lastly, an international team organized by the Belgian
Rockall Team will be on the air from Burundi between
February 14th and the 23rd with four stations using the call
9U4U. Activity will be on 160 through 10 meters using CW,
SSB and RTTY. Their QSL Manager will be M0URX and their
website can be found at www.9u4u.be

(Above from various DX news sources)

**

THAT FINAL ITEM: ANNIVERSARY OF LAST MORSE CODE TELEGRAM

And finally this week, we celebrate the last telegram ever
sent in New South Wales, Australia. Amateur Radio
Newsline's Norm Seeley, KI7UP, has the details:

--

The date was December the 13th, 1962 when the last telegram
and its reply were sent by Morse code in New South Wales.
And in a 50th anniversary re-enactment, former Telegraph
Operator Phil McGrath traveled to Bombala, Australia, to
send and receive souvenir telegrams to mark the occasion.

At the appointed time McGrath sat at the sounding box and
typewriter and received what was originally meant to be that
all important final commemorative message. It read:

"This telegram from Sydney to Bombala is the last message
which will be sent by Morse in New South Wales, concluding
104 years of operations. Henceforth telegrams to and from
Bombala like all other offices in this state will be

transmitted through the teleprinter perforator switching system TRESS."

Not to be outdone, Bombala's then postmaster Stan Blyton, sent his own reply that read:

"My privilege personally to transmit the last message from last Morse station New South Wales. Key being forwarded to you is a relic that was in use in 1919 where I joined service and remained there in use untill station closed in 1960. On behalf old telegraphists and Morse operators we bow to progress."

And with that transmission the celebration of Morse messaging system in New South Wales, Australia, had come to an end.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

TRESS eventually also ceased its messaging, first giving way to individually owned Telex machines and in more modern times to internet based e-mail. (VK3PC)
